CONSOLIDATED COMMUNICATIONS HOLDINGS, INC. AND SUBSIDIARIES

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Business and Basis of Accounting

Consolidated Communications Holdings, Inc. (the “Company,” “we,” “our” or “us”) is a holding company with operating subsidiaries (collectively “Consolidated”) that provide communication solutions to consumer, commercial and carrier customers across a 23-state service area.

Leveraging our advanced fiber network spanning more than 37,000 fiber route miles, we offer residential high-speed Internet, video, phone and home security services as well as multi-service residential and small business bundles. Our business product suite includes data and Internet solutions, voice, data center services, security services, managed and IT services, and an expanded suite of cloud services. As of March 31, 2019, we had approximately 887,000 voice connections, 781,000 data connections and 91,000 video connections.

In the opinion of management, the accompanying unaudited condensed consolidated balance sheets and related condensed consolidated statements of operations, comprehensive income (loss), shareholders’ equity and cash flows include all adjustments, consisting only of normal recurring items, necessary for their fair presentation in conformity with accounting principles generally accepted in the United States (“US GAAP” or “GAAP”) for interim financial information and pursuant to the rules and regulations of the Securities and Exchange Commission (the “SEC”). Certain information and footnote disclosures normally included in annual financial statements prepared in accordance with US GAAP have been condensed or omitted pursuant to such SEC rules and regulations and accounting principles applicable for interim periods. Events subsequent to the balance sheet date have been evaluated for inclusion in the accompanying condensed consolidated financial statements through the date of issuance. Management believes that the disclosures made are adequate to make the information presented not misleading. Interim results are not necessarily indicative of results for a full year. The information presented in this Form 10-Q should be read in conjunction with Management’s Discussion and Analysis of Financial Condition and Results of Operations and the consolidated financial statements and the accompanying notes to the financial statements (“Notes”) thereto included in our 2018 Annual Report on Form 10-K filed with the SEC.

Divestitures

On July 31, 2018, we completed the sale of all of the issued and outstanding stock of our subsidiaries Peoples Mutual Telephone Company and Peoples Mutual Long Distance Company (collectively, “Peoples”) for total cash proceeds of approximately \$21.0 million, net of certain contractual and customary working capital adjustments. Peoples operates as a local exchange carrier in Virginia and provides telecommunications services to residential and business customers. The sale of Peoples has not been reported as discontinued operations in the condensed consolidated statements of operations as the annual revenue of these operations is less than 1% of the consolidated operating revenues.

Recent Accounting Pronouncements

Effective January 1, 2019, we adopted Accounting Standards Update (“ASU”) No. 2016-02 (“ASU 2016-02”), Leases using the optional transitional method. ASU 2016-02 establishes a new lease accounting model for leases, which requires lessees to recognize right-of-use assets and lease liabilities on the balance sheet but lease expense will be recognized on the income statement in a manner similar to previous requirements. Under the optional transitional method, the new standard is applied using the modified retrospective approach on the date of adoption. Prior years presented have not been adjusted for ASU 2016-02 and continue to be reported in accordance with our historical accounting policy.

As part of the adoption, we elected the package of practical expedients permitted under the new lease standard, which among other things, allows us to carry forward the historical lease classification. As a result, there was no impact to opening retained earnings. We elected the practical expedient to combine lease and non-lease components, as well as

Table of Contents

the practical expedient related to land easements, which allows us to carry forward our accounting treatment for land easements in existing agreements. We also made an accounting policy election to not recognize right-of-use assets and lease liabilities on the balance sheet for leases with a term of 12 months or less and will recognize lease payments as an expense on a straight-line basis over the lease term.

The adoption of the new lease standard resulted in the recognition of right-of-use assets and lease liabilities of approximately \$30.9 million for historical operating leases, while our accounting for historical finance leases remained substantially unchanged. The adoption of the new lease standard did not have a material impact on our consolidated statements of operations, consolidated statements of cash flows or our debt-covenant compliance under our current agreements. For additional information on leases and the impact of the new lease standard, refer to Note 8.

Effective January 1, 2019, we adopted ASU No. 2018-07 (“ASU 2018-07”), Improvements to Nonemployee Share-Based Payment Accounting. ASU 2018-07 expands the scope of Topic 718, Compensation – Stock Compensation, to include share-based payment transactions for acquiring goods and services from nonemployees to align the accounting guidance for both employee and nonemployee share-based transactions. The adoption of this guidance did not have a material impact on our condensed consolidated financial statements and related disclosures.

Effective January 1, 2019, we adopted ASU No. 2018-02 (“ASU 2018-02”), Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income. ASU 2018-02 provides an option to allow reclassification from accumulated other comprehensive income to retained earnings for stranded tax effects resulting from the Tax Cuts and Jobs Act of 2017. Tax effects in accumulated other comprehensive loss are established at the currently enacted tax rate and reclassified to earnings in the same period that the related pre-tax items included in accumulated other comprehensive loss are recognized. The adoption of this guidance did not have any impact on our condensed consolidated financial statements and related disclosures as we did not make the optional election for reclassification of stranded tax effects from accumulated other comprehensive income (loss) to retained earnings.

Effective January 1, 2019, we adopted ASU No. 2017-12 (“ASU 2017-12”), Targeted Improvements to Accounting for Hedging Activities. ASU 2017-12 amends current guidance on accounting for hedges mainly to align more closely an entity’s risk management activities and financial reporting relationships through changes to both the designation and measurement guidance for qualifying hedging relationships and the presentation of hedge results. In addition, amendments in ASU 2017-12 simplify the application of hedge accounting by allowing more time to prepare hedge documentation and allowing effectiveness assessments to be performed on a qualitative basis after hedge inception. ASU 2017-12 was adopted using the modified retrospective transition approach, except for the amended presentation and disclosure requirements, which are applied prospectively. Upon adoption of ASU 2017-12, we recognized a cumulative adjustment of \$0.6 million, net of tax, from accumulated other comprehensive loss to opening retained earnings. The adoption of this guidance did not have a material impact on our condensed consolidated financial statements and related disclosures.

In August 2018, the Financial Accounting Standards Board (“FASB”) issued ASU No. 2018-15 (“ASU 2018-15”), Customer’s Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That is a Service Contract. ASU 2018-15 provides guidance on accounting for costs of implementation activities in a cloud computing arrangement that is a service contract. The new guidance should be applied either retrospectively or prospectively and is effective for annual and interim periods beginning after December 15, 2019 with early adoption permitted. We are currently evaluating the impact this update will have on our condensed consolidated financial statements and related disclosures.

In August 2018, the FASB issued ASU No. 2018-14 (“ASU 2018-14”), Disclosure Framework – Changes to the Disclosure Requirements for Defined Benefit Plans. ASU 2018-14 modifies disclosure requirements for defined benefit pension and other postretirement plans by removing disclosures that no longer are considered cost beneficial, clarifying the specific requirement of disclosures and adding disclosure requirements identified as relevant. The new guidance is effective retrospectively for annual periods beginning after December 15, 2020 with early adoption permitted. We are currently evaluating the impact this update will have on our condensed consolidated financial statements and related disclosures.

Table of Contents

In June 2016, the FASB issued ASU No. 2016-13 (“ASU 2016-13”), Measurement of Credit Losses on Financial Instruments. ASU 2016-13 establishes the new “current expected credit loss” model for measuring and recognizing credit losses on financial assets based on relevant information about past events, including historical experience, current conditions and reasonable and supportable forecasts. The new guidance is effective on a modified retrospective basis for annual and interim periods beginning after December 15, 2019, with early adoption permitted for annual and interim periods beginning after December 15, 2018. We have not yet made a decision on the timing of adoption and are currently evaluating the impact this update will have on our condensed consolidated financial statements and related disclosures.

Reclassifications

Certain amounts in our 2018 condensed consolidated financial statements have been reclassified to conform to the current year presentation.

2. REVENUE

Nature of Contracts with Customers

Our revenue contracts with customers may include a promise or promises to deliver goods such as equipment and/or services such as broadband, video or voice services. Promised goods and services are considered distinct as the customer can benefit from the goods or services either on their own or together with other resources that are readily available to the customer and the Company’s promise to transfer a good or service to the customer is separately identifiable from other promises in the contract. The Company accounts for goods and services as separate performance obligations. Each service is considered a single performance obligation as it is providing a series of distinct services that are substantially the same and have the same pattern of transfer.

The transaction price is determined at contract inception and reflects the amount of consideration to which we expect to be entitled in exchange for transferring a good or service to the customer. This amount is generally equal to the market price of the goods and/or services promised in the contract and may include promotional discounts. The transaction price excludes amounts collected on behalf of third parties such as sales taxes and regulatory fees. Conversely, nonrefundable upfront fees, such as service activation and set-up fees, are included in the transaction price. In determining the transaction price, we consider our enforceable rights and obligations within the contract. We do not consider the possibility of a contract being cancelled, renewed or modified.

The transaction price is allocated to each performance obligation based on the standalone selling price of the good or service, net of the related discount, as applicable.

Revenue is recognized when or as performance obligations are satisfied by transferring control of the good or service to the customer as described below.

Table of Contents

Disaggregation of Revenue

The following table summarizes revenue from contracts with customers for the quarters ended March 31, 2019 and 2018:

(In thousands)	Quarter Ended	
	March 31, 2019	2018
Operating Revenues		
Commercial and carrier:		
Data and transport services (includes VoIP)	\$ 88,126	\$ 86,025
Voice services	48,070	52,161
Other	15,176	11,863
	151,372	150,049
Consumer:		
Broadband (VoIP and Data)	63,085	63,111
Video services	20,736	22,834
Voice services	45,879	52,062
	129,700	138,007
Subsidies	18,159	25,255
Network access	36,591	39,715
Other products and services	2,827	3,013
Total operating revenues	\$ 338,649	\$ 356,039

Services

Services revenues, with the exception of usage-based revenues, are generally billed in advance and recognized in subsequent periods when or as services are transferred to the customer.

We offer bundled service packages that consists of high-speed Internet, video and voice services including local and long distance calling, voicemail and calling features. Each service is considered distinct and therefore accounted for as a separate performance obligation. Service revenue is recognized over time, consistent with the transfer of service, as the customer simultaneously receives and consumes the benefits provided by the Company's performance as the Company performs.

Usage-based services, such as per-minute long-distance service and access charges billed to other telephone carriers for originating and terminating long-distance calls in our network, are billed in arrears. We recognize revenue from

these services when or as services are transferred to the customer.

Revenue related to nonrefundable upfront fees, such as service activation and set-up fees are deferred and amortized over the expected customer life as discussed below.

Equipment

Equipment revenue is generated from the sale of voice and data communications equipment as well as design, configuration, installation and professional support services related to such equipment. Equipment revenue generated from telecommunications systems and structured cabling projects is recognized when or as the project is completed. Maintenance services are provided on both a contract and time and material basis and are recognized when or as services are transferred.

Subsidies and Surcharges

Subsidies consist of both federal and state subsidies, which are designed to promote widely available, quality telephone service at affordable prices in rural areas. These revenues are calculated by the administering government agency based

Table of Contents

on information we provide. There is a reasonable possibility that out-of-period subsidy adjustments may be recorded in the future, but they are expected to be immaterial to our results of operations, financial position and cash flows.

We recognize Federal Universal Service contributions on a gross basis. We account for all other taxes collected from customers and remitted to the respective government agencies on a net basis.

Contract Assets and Liabilities

The following table provides information about receivables, contract assets and contract liabilities from our revenue contracts with customers:

(In thousands)	Quarter Ended	
	March 31,	
	2019	2018
Accounts receivable, net	\$ 132,326	\$ 134,496
Contract assets	13,897	4,527
Contract liabilities	55,212	47,269

Contract assets include costs that are incremental to the acquisition of a contract. Incremental costs are those that result directly from obtaining a contract or costs that would not have been incurred if the contract had not been obtained, which primarily relate to sales commissions. These costs are deferred and amortized over the expected customer life. We determined that the expected customer life is the expected period of benefit as the commission on the renewal contract is not commensurate with the commission on the initial contract. During the quarters ended March 31, 2019 and 2018, the Company recognized expense of \$1.2 million and \$0.4 million, respectively, related to deferred contract acquisition costs.

Contract liabilities include deferred revenues related to advanced payments for services and nonrefundable, upfront service activation and set-up fees, which under the new standard are generally deferred and amortized over the expected customer life as the option to renew without paying an upfront fee provides the customer with a material right. During the quarters ended March 31, 2019 and 2018, the Company deferred and recognized revenues of \$94.0 million and \$87.3 million, respectively.

A receivable is recognized in the period the Company provides goods or services when the Company's right to consideration is unconditional. Payment terms on invoiced amounts are generally 30 to 60 days.

Performance Obligations

ASU No. 2014-09 (also known as ASC 606), Revenue from Contracts with Customers, requires that the Company disclose the aggregate amount of the transaction price that is allocated to remaining performance obligations that are unsatisfied as of March 31, 2019. The guidance provides certain practical expedients that limit this requirement. The service revenue contracts of the Company meet the following practical expedients provided by ASC 606:

1. The performance obligation is part of a contract that has an original expected duration of one year or less.
2. Revenue is recognized from the satisfaction of the performance obligations in the amount billable to the customer in accordance with ASC 606-10-55-18.

The Company has elected these practical expedients. As mentioned above, performance obligations related to our service revenue contracts are generally recognized over time. For services transferred over time, revenue is recognized based on amounts invoiced to the customer as the Company has concluded that the invoice amount directly corresponds with the value of services provided to the customer. Management considers this a faithful depiction of the transfer of control as services are substantially the same and have the same pattern of transfer over the life of the contract. As such, revenue related to unsatisfied performance obligations that will be billed in future periods has not been disclosed.

Table of Contents

3. EARNINGS (LOSS) PER SHARE

Basic and diluted earnings (loss) per common share (“EPS”) are computed using the two-class method, which is an earnings allocation method that determines EPS for each class of common stock and participating securities considering dividends declared and participation rights in undistributed earnings. The Company’s restricted stock awards are considered participating securities because holders are entitled to receive non-forfeitable dividends during the vesting term.

The potentially dilutive impact of the Company’s restricted stock awards is determined using the treasury stock method. Under the treasury stock method, if the average market price during the period exceeds the exercise price, these instruments are treated as if they had been exercised with the proceeds of exercise used to repurchase common stock at the average market price during the period. Any incremental difference between the assumed number of shares issued and repurchased is included in the diluted share computation.

Diluted EPS includes securities that could potentially dilute basic EPS during a reporting period. Dilutive securities are not included in the computation of loss per share when a company reports a net loss from continuing operations as the impact would be anti-dilutive.

The computation of basic and diluted EPS attributable to common shareholders computed using the two class method is as follows:

	Quarter Ended March 31,	
(In thousands, except per share amounts)	2019	2018
Net loss	\$ (7,186)	\$ (11,198)
Less: net income attributable to noncontrolling interest	79	100
Loss attributable to common shareholders before allocation of earnings to participating securities	(7,265)	(11,298)
Less: earnings allocated to participating securities	457	221
Net loss attributable to common shareholders, after earnings allocated to participating securities	\$ (7,722)	\$ (11,519)
Weighted-average number of common shares outstanding	70,813	70,598
Net loss per common share attributable to common shareholders - basic and diluted	\$ (0.11)	\$ (0.16)

Diluted EPS attributable to common shareholders for the quarters ended March 31, 2019 and 2018 excludes 0.7 million and 0.3 million potential common shares, respectively, that could be issued under our share-based compensation plan, because the inclusion of the potential common shares would have an antidilutive effect.

Table of Contents

4. INVESTMENTS

Our investments are as follows:

(In thousands)	March 31, 2019	December 31, 2018
Cash surrender value of life insurance policies	\$ 2,579	\$ 2,371
Investments at cost:		
GTE Mobilnet of South Texas Limited Partnership (2.34% interest)	21,450	21,450
Pittsburgh SMSA Limited Partnership (3.60% interest)	22,950	22,950
CoBank, ACB Stock	8,910	9,051
Other	298	298
Equity method investments:		
GTE Mobilnet of Texas RSA #17 Limited Partnership (20.51% interest)	18,532	17,800
Pennsylvania RSA 6(I) Limited Partnership (16.67% interest)	7,841	7,786
Pennsylvania RSA 6(II) Limited Partnership (23.67% interest)	29,478	29,147
Totals	\$ 112,038	\$ 110,853

Investments at Cost

We own 2.34% of GTE Mobilnet of South Texas Limited Partnership (the “Mobilnet South Partnership”). The principal activity of the Mobilnet South Partnership is providing cellular service in the Houston, Galveston and Beaumont, Texas metropolitan areas. We also own 3.60% of Pittsburgh SMSA Limited Partnership, which provides cellular service in and around the Pittsburgh metropolitan area. Because of our limited influence over these partnerships, we account for these investments at our initial cost less any impairment because fair value is not readily available for these investments. No factors of impairment existed for any of the investments during the quarters ended March 31, 2019 or 2018. For these investments, we adjust the carrying value for any purchases or sales of our ownership interests. We record distributions received from these investments as investment income in non-operating income (expense). For the quarters ended March 31, 2019 and 2018, we received cash distributions from these partnerships totaling \$3.3 million and \$3.0 million, respectively.

CoBank, ACB (“CoBank”) is a cooperative bank owned by its customers. On an annual basis, CoBank distributes patronage in the form of cash and stock in the cooperative based on the Company’s outstanding loan balance with CoBank, which has traditionally been a significant lender in the Company’s credit facility. The investment in CoBank represents the accumulation of the equity patronage paid by CoBank to the Company.

Equity Method

We own 20.51% of GTE Mobilnet of Texas RSA #17 Limited Partnership (“RSA #17”), 16.67% of Pennsylvania RSA 6(I) Limited Partnership (“RSA 6(I)”) and 23.67% of Pennsylvania RSA 6(II) Limited Partnership (“RSA 6(II)”). RSA #17 provides cellular service to a limited rural area in Texas. RSA 6(I) and RSA 6(II) provide cellular service in and around our Pennsylvania service territory. Because we have significant influence over the operating and financial policies of these three entities, we account for the investments using the equity method. In connection with the adoption of ASC 606 by our equity method partnerships, the value of our combined partnership interests increased \$1.8 million, which is reflected in the cumulative effect adjustment to retained earnings during the three months ended March 31, 2018. For the quarters ended March 31, 2019 and 2018, we received cash distributions from these partnerships totaling \$4.0 million and \$6.5 million, respectively.

5. FAIR VALUE MEASUREMENTS

Our derivative instruments related to interest rate swap agreements are required to be measured at fair value on a recurring basis. The fair values of the interest rate swaps are determined using valuation models and are categorized

Table of Contents

within Level 2 of the fair value hierarchy as the valuation inputs are based on quoted prices and observable market data of similar instruments. See Note 7 for further discussion regarding our interest rate swap agreements.

Our interest rate swap agreements measured at fair value on a recurring basis as of March 31, 2019 and December 31, 2018 were as follows:

		As of March 31, 2019		
		Quoted	Significant	
		Prices	Other	Significant
		In	Markets	Unobservable
		Active	for	Identical
		Markets	Observable	Inputs
		Assets	Inputs	Inputs
		(Level		
		1)	(Level 2)	(Level 3)
(In thousands)	Total			
Current interest rate swap assets	\$ 1,352	\$ —	\$ 1,352	\$ —
Long-term interest rate swap assets	4	—	4	—
Long-term interest rate swap liabilities	(13,714)	—	(13,714)	—
Total	\$ (12,358)	\$ —	\$ (12,358)	\$ —

		As of December 31, 2018		
		Quoted	Significant	
		Prices	Other	Significant
		In	Markets	Unobservable
		Active	for	Identical
		Markets	Observable	Inputs
		Assets	Inputs	Inputs
		(Level		
		1)	(Level 2)	(Level 3)
(In thousands)	Total			
Current interest rate swap assets	\$ 2,465	\$ —	\$ 2,465	\$ —
Long-term interest rate swap assets	1,524	—	1,524	—
Long-term interest rate swap liabilities	(6,647)	—	(6,647)	—
Total	\$ (2,658)	\$ —	\$ (2,658)	\$ —

We have not elected the fair value option for any of our financial assets or liabilities. The carrying value of other financial instruments, including cash, accounts receivable, accounts payable and accrued liabilities approximate fair value due to their short maturities. The following table presents the other financial instruments that are not carried at

fair value but which require fair value disclosure as of March 31, 2019 and December 31, 2018.

(In thousands)	As of March 31, 2019		As of December 31, 2018	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Investments, equity basis	\$ 55,851	n/a	\$ 54,733	n/a
Investments, at cost	\$ 53,608	n/a	\$ 53,749	n/a
Long-term debt, excluding finance leases	\$ 2,321,010	\$ 2,182,193	\$ 2,315,077	\$ 2,155,127

Cost & Equity Method Investments

Our investments as of March 31, 2019 and December 31, 2018 accounted for at cost and under the equity method consisted primarily of minority positions in various cellular telephone limited partnerships and our investment in CoBank. It is impracticable to determine the fair value of these investments.

Long-term Debt

The fair value of our senior notes was based on quoted market prices, and the fair value of borrowings under our credit facility was determined using current market rates for similar types of borrowing arrangements. We have categorized the long-term debt as Level 2 within the fair value hierarchy.

Table of Contents

6. LONG-TERM DEBT

Long-term debt, presented net of unamortized discounts, consisted of the following:

(In thousands)	March 31, 2019	December 31, 2018
Senior secured credit facility:		
Term loans, net of discounts of \$6,650 and \$6,994 at March 31, 2019 and December 31, 2018, respectively	\$ 1,791,825	\$ 1,796,068
Revolving loan	32,000	22,000
6.50% Senior notes due 2022, net of discount of \$2,815 and \$2,991 at March 31, 2019 and December 31, 2018, respectively	497,185	497,009
	2,321,010	2,315,077
Less: current portion of long-term debt	(18,350)	(18,350)
Less: deferred debt issuance costs	(10,694)	(11,386)
Total long-term debt	\$ 2,291,966	\$ 2,285,341

Credit Agreement

In October 2016, the Company, through certain of its wholly owned subsidiaries, entered into a Third Amended and Restated Credit Agreement with various financial institutions (as amended, the “Credit Agreement”). The Credit Agreement consists of a \$110.0 million revolving credit facility, an initial term loan in the aggregate amount of \$900.0 million (the “Initial Term Loan”) and an incremental term loan in the aggregate amount of \$935.0 million (the “Incremental Term Loan”), collectively (the “Term Loans”). The Credit Agreement also includes an incremental loan facility which provides the ability to borrow, subject to certain terms and conditions, incremental loans in an aggregate amount of up to the greater of (a) \$300.0 million and (b) an amount which would cause its senior secured leverage ratio not to exceed 3.00:1.00 (the “Incremental Facility”). Borrowings under the Credit Agreement are secured by substantially all of the assets of the Company and its subsidiaries, with the exception of Consolidated Communications of Illinois Company and our majority-owned subsidiary, East Texas Fiber Line Incorporated.

The Initial Term Loan was issued in an original aggregate principal amount of \$900.0 million with a maturity date of October 5, 2023, but is subject to earlier maturity on March 31, 2022 if the Company’s unsecured Senior Notes due in October 2022 are not repaid in full or redeemed in full on or prior to March 31, 2022. The Initial Term Loan contains an original issuance discount of 0.25% or \$2.3 million, which is being amortized over the term of the loan. The Initial Term Loan requires quarterly principal payments of \$2.25 million and has an interest rate of 3.00% plus the London Interbank Offered Rate (“LIBOR”) subject to a 1.00% LIBOR floor.

The Incremental Term Loan was issued in an original aggregate principal amount of \$935.0 million and included an original issue discount of 0.50%, which is being amortized over the term of the loan. The Incremental Term Loan has the same maturity date and interest rate as the Initial Term Loan and requires quarterly principal payments of \$2.34 million.

Our revolving credit facility has a maturity date of October 5, 2021 and an applicable margin (at our election) of between 2.50% and 3.25% for LIBOR-based borrowings or between 1.50% and 2.25% for alternate base rate borrowings, in each case depending on our total net leverage ratio. Based on our leverage ratio as of March 31, 2019, the borrowing margin for the three month period ending June 30, 2019 will be at a weighted-average margin of 3.00% for a LIBOR-based loan or 2.00% for an alternate base rate loan. The applicable borrowing margin for the revolving credit facility is adjusted quarterly to reflect the leverage ratio from the prior quarter-end. As of March 31, 2019, borrowings of \$32.0 million were outstanding under the revolving credit facility, which consisted of LIBOR-based borrowings of \$20.0 million and alternate base rate borrowings of \$12.0 million. At December 31, 2018, there were borrowings of \$22.0 million outstanding under the revolving credit facility, which consisted of LIBOR-based borrowings of \$10.0 million and alternate base rate borrowings of \$12.0 million. Stand-by letters of credit of \$16.2 million were outstanding under our revolving credit facility as of March 31, 2019. The stand-by letters of credit are renewable annually and reduce the borrowing availability under the revolving credit facility. As of March 31, 2019, \$61.8 million was available for borrowing under the revolving credit facility.

Table of Contents

The weighted-average interest rate on outstanding borrowings under our credit facility was 5.53% and 5.54% as of March 31, 2019 and December 31, 2018, respectively. Interest is payable at least quarterly.

Credit Agreement Covenant Compliance

The Credit Agreement contains various provisions and covenants, including, among other items, restrictions on the ability to pay dividends, incur additional indebtedness and issue certain capital stock. We have agreed to maintain certain financial ratios, including interest coverage and total net leverage ratios, all as defined in the Credit Agreement. As of March 31, 2019, we were in compliance with the Credit Agreement covenants.

In general, our Credit Agreement restricts our ability to pay dividends to the amount of our available cash as defined in our Credit Agreement. As of March 31, 2019, and including the \$27.9 million dividend payable on May 1, 2019, we had \$310.1 million in dividend availability under the credit facility covenant.

Under our Credit Agreement, if our total net leverage ratio, as defined in the Credit Agreement, as of the end of any fiscal quarter is greater than 5.10:1.00, we will be required to suspend dividends, should we be making dividend payments as of such time, on our common stock unless otherwise permitted by an exception for dividends that may be paid from the portion of proceeds of any sale of equity not used to fund acquisitions or make other investments. During any such dividend suspension period, we will be required to repay debt in an amount equal to 50.0% of any increase in available cash, among other things. In addition, we will not be permitted to pay dividends if an event of default under the Credit Agreement has occurred and is continuing. Among other things, it will be an event of default if our total net leverage ratio or interest coverage ratio as of the end of any fiscal quarter is greater than 5.25:1.00 or less than 2.25:1.00, respectively. As of March 31, 2019, our total net leverage ratio under the Credit Agreement was 4.43:1.00, and our interest coverage ratio was 3.85:1.00.

Senior Notes

6.50% Senior Notes due 2022

In September 2014, we completed an offering of \$200.0 million aggregate principal amount of 6.50% Senior Notes due in October 2022 (the “Existing Notes”). The Existing Notes were priced at par, which resulted in total gross proceeds of \$200.0 million. On June 8, 2015, we completed an additional offering of \$300.0 million in aggregate principal amount of 6.50% Senior Notes due 2022 (the “New Notes” and together with the Existing Notes, the “Senior

Notes”). The New Notes were issued as additional notes under the same indenture pursuant to which the Existing Notes were previously issued on in September 2014. The New Notes were priced at 98.26% of par with a yield to maturity of 6.80% and resulted in total gross proceeds of approximately \$294.8 million, excluding accrued interest. The discount is being amortized using the effective interest method over the term of the notes.

The Senior Notes mature on October 1, 2022 and interest is payable semi-annually on April 1 and October 1 of each year. Consolidated Communications, Inc. (“CCI”) is the primary obligor under the Senior Notes, and we and the majority of our wholly owned subsidiaries have fully and unconditionally guaranteed the Senior Notes. The Senior Notes are senior unsecured obligations of the Company.

In October 2015, we completed an exchange offer to register all of the Senior Notes under the Securities Act of 1933 (“Securities Act”). The terms of the registered Senior Notes are substantially identical to those of the Senior Notes prior to the exchange, except that the Senior Notes are now registered under the Securities Act and the transfer restrictions and registration rights previously applicable to the Senior Notes no longer apply to the registered Senior Notes. The exchange offer did not impact the aggregate principal amount or the remaining terms of the Senior Notes outstanding.

Senior Notes Covenant Compliance

Subject to certain exceptions and qualifications, the indenture governing the Senior Notes contains customary covenants that, among other things, limits CCI’s and its restricted subsidiaries’ ability to: incur additional debt or issue certain

Table of Contents

preferred stock; pay dividends or make other distributions on capital stock or prepay subordinated indebtedness; purchase or redeem any equity interests; make investments; create liens; sell assets; enter into agreements that restrict dividends or other payments by restricted subsidiaries; consolidate, merge or transfer all or substantially all of its assets; engage in transactions with its affiliates; or enter into any sale and leaseback transactions. The indenture also contains customary events of default.

Among other matters, the Senior Notes indenture provides that CCI may not pay dividends or make other restricted payments, as defined in the indenture, if its total net leverage ratio is 4.75:1.00 or greater. This ratio is calculated differently than the comparable ratio under the Credit Agreement; among other differences, it takes into account, on a pro forma basis, synergies expected to be achieved as a result of certain acquisitions not yet reflected in historical results. As of March 31, 2019, this ratio was 4.49:1.00. If this ratio is met, dividends and other restricted payments may be made from cumulative consolidated cash flow since April 1, 2012, less 1.75 times fixed charges, less dividends and other restricted payments made since May 30, 2012. Dividends may be paid and other restricted payments may also be made from a “basket” of \$50.0 million, none of which has been used to date, and pursuant to other exceptions identified in the indenture. Since dividends of \$571.8 million have been paid since May 30, 2012, including the quarterly dividend declared in February 2019 and payable on May 1, 2019, there was \$1,145.1 million of the \$1,716.9 million of cumulative consolidated cash flow since May 30, 2012 available to pay dividends as of March 31, 2019. As of March 31, 2019, the Company was in compliance with all terms, conditions and covenants under the indenture governing the Senior Notes.

7. DERIVATIVE FINANCIAL INSTRUMENTS

We use derivative financial instruments to manage our exposure to the risks associated with fluctuations in interest rates. Our interest rate swap agreements effectively convert a portion of our floating-rate debt to a fixed rate basis, thereby reducing the impact of interest rate changes on future cash interest payments. Derivative financial instruments are recorded at fair value in our condensed consolidated balance sheets. We may designate certain of our interest rate swaps as cash flow hedges of our expected future interest payments. For derivative instruments designated as a cash flow hedge, the change in the fair value is recognized as a component of accumulated other comprehensive income (loss) (“AOCI”) and is recognized as an adjustment to earnings over the period in which the hedged item impacts earnings. When an interest rate swap agreement terminates, any resulting gain or loss is recognized over the shorter of the remaining original term of the hedging instrument or the remaining life of the underlying debt obligation. If a derivative instrument is de-designated, the remaining gain or loss in AOCI on the date of de-designation is amortized to earnings over the remaining term of the hedging instrument. For derivative financial instruments that are not designated as a hedge, including those that have been de-designated, changes in fair value are recognized on a current basis in earnings. Cash flows from hedging activities are classified under the same category as the cash flows from the hedged items in our condensed consolidated statements of cash flows.

The following interest rate swaps were outstanding as of March 31, 2019:

(In thousands)	Notional Amount	2019 Balance Sheet Location	Fair Value
Cash Flow Hedges:			
Fixed to 1-month floating LIBOR (with floor)	\$ 650,000	Prepaid expenses and other current assets	\$ 1,352
Forward starting fixed to 1-month floating LIBOR (with floor)	\$ 705,000	Other assets	4
Fixed to 1-month floating LIBOR (with floor)	\$ 500,000	Other long-term liabilities	(10,719)
Forward starting fixed to 1-month floating LIBOR (with floor)	\$ 705,000	Other long-term liabilities	(2,995)
Total Fair Values			\$ (12,358)

Our interest rate swap agreements mature on various dates between September 2019 and July 2023. The forward-starting interest rate swap agreements, each with a term of one year, become effective in July 2019 and July 2020.

Table of Contents

The following interest rate swaps were outstanding as of December 31, 2018:

(In thousands)	Notional Amount	2018 Balance Sheet Location	Fair Value
Cash Flow Hedges:			
Fixed to 1-month floating LIBOR (with floor)	\$ 650,000	Prepaid expenses and other current assets	\$ 2,465
Forward starting fixed to 1-month floating LIBOR (with floor)	\$ 705,000	Other assets	1,524
Fixed to 1-month floating LIBOR (with floor)	\$ 500,000	Other long-term liabilities	(5,698)
Forward starting fixed to 1-month floating LIBOR (with floor)	\$ 705,000	Other long-term liabilities	(949)
Total Fair Values			\$ (2,658)

The counterparties to our various swaps are highly rated financial institutions. None of the swap agreements provide for either us or the counterparties to post collateral nor do the agreements include any covenants related to the financial condition of Consolidated or the counterparties. The swaps of any counterparty that is a lender, as defined in our credit facility, are secured along with the other creditors under the credit facility. Each of the swap agreements provides that in the event of a bankruptcy filing by either Consolidated or the counterparty, any amounts owed between the two parties would be offset in order to determine the net amount due between parties.

During the quarter ended March 31, 2018, we entered into an interest rate swap agreement with a notional value of \$500.0 million and a term of five years. The interest rate swap agreement was designated as a cash flow hedge. On March 12, 2018, we completed a syndication of a portion of the \$500.0 million interest rate swap agreement with five new counterparties. On the date of the syndication, the interest rate swap agreements were de-designated due to changes in critical terms as a result of the syndication. Prior to de-designation, the change in fair value of the interest rate swap was recognized in AOCI. The balance of the unrealized loss included in AOCI as of the date the swaps were de-designated is being amortized to earnings over the remaining term of the interest rate swap agreements. Changes in fair value of the de-designated swaps were immediately recognized in earnings as interest expense prior to the re-designation date. During the quarter ended June 30, 2018, the interest rate swap agreements were re-designated as a cash flow hedge. During the three months ended March 31, 2018, a loss of \$2.9 million was recognized in interest expense for the change in fair value of the de-designated swaps.

As of March 31, 2019 and December 31, 2018, the total pre-tax unrealized (losses) and gains related to our interest rate swap agreements included in AOCI was \$(7.0) million and \$3.2 million, respectively. From the balance in AOCI as of March 31, 2019, we expect to recognize a gain of approximately \$0.1 million in earnings in the next twelve months.

Information regarding our cash flow hedge transactions is as follows:

	Quarter Ended March 31, 2019
(In thousands)	
Unrealized loss recognized in AOCI, pretax	\$ (9,053)
Deferred gains reclassified from AOCI to interest expense	\$ 280

8. LEASES

We have entered into various leases for certain facilities, land, underground conduit, colocations, and equipment used in our operations. For leases with a term greater than 12 months, we recognize a right-to-use asset and a lease liability based on the present value of lease payments over the lease term. The leases have remaining lease terms of one year to 90 years and may include one or more options to renew, which can extend the lease term from one to five years or more. Lease expense is recognized on a straight-line basis over the lease term.

As most of our leases do not provide a readily determinable implicit rate, we use our incremental borrowing rate based on the information available at lease commencement date in determining the present value of lease payments. We use the implicit rate when a rate is readily determinable. Our leases may also include scheduled rent increases and options to

Table of Contents

extend or terminate the lease which is included in the determination of lease payments when it is reasonably certain that we will exercise that option. For all asset classes, we do not separate lease and nonlease components, as such we account for the components as a single lease component.

Leases with an initial term of 12 months or less are not recognized on the balance sheet and the expense for these short-term leases is recognized on a straight-line basis over the lease term. Short-term lease expense, which is recognized in cost of services and products, was not material to the condensed consolidated statements of operations for the three months ended March 31, 2019. Variable lease payments are expensed as incurred.

The following table summarizes the components of our lease right-of use assets and liabilities at March 31, 2019:

(In thousands)	Balance Sheet Classification	March 31, 2019
Operating leases		
Operating lease right-of-use assets	Other assets	\$ 29,201
Current lease liabilities	Accrued expense	\$ (6,236)
Noncurrent lease liabilities	Other long-term liabilities	\$ (23,016)
Finance leases		
Finance lease right-of-use assets, net of accumulated depreciation of \$38,553	Property, plant and equipment, net	\$ 24,751
Current lease liabilities	Current portion of long-term debt and finance lease obligations	\$ (10,993)
Noncurrent lease liabilities	Long-term debt and finance lease obligations	\$ (16,133)
Weighted-average remaining lease term		
Operating leases		5.5 years
Finance leases		4.2 years
Weighted-average discount rate		
Operating leases		7.20 %
Finance leases		7.03 %

The components of lease expense for the quarter ended March 31, 2019 consisted of the following:

	Quarter Ended
(In thousands)	

	March 31, 2019
Finance lease cost:	
Amortization of right-of-use assets	\$ 3,533
Interest on lease liabilities	528
Operating lease cost	2,230
Variable lease cost	781
Total lease cost	\$ 7,072

Table of Contents

The following table presents supplemental cash flow information related to leases for the quarter ended March 31, 2019:

	Quarter Ended March 31, 2019
(In thousands)	
Cash paid for amounts included in the measurement of lease liabilities:	
Operating cash flows for operating leases	\$ 2,179
Operating cash flows for finance leases	528
Financing cash flows for finance leases	3,507
Right-of-use assets obtained in exchange for new finance lease liabilities	271

At March 31, 2019, the aggregate maturities of our lease liabilities were as follows:

(In thousands)	Operating Leases	Finance Leases
2019	\$ 6,275	\$ 9,873
2020	7,519	8,414
2021	4,987	3,582
2022	4,284	2,591
2023	2,643	1,489
Thereafter	6,585	6,405
Total lease payments	32,293	32,354
Less: Interest	(3,041)	(5,228)
	\$ 29,252	\$ 27,126

Our finance leases include lease agreements for the occupancy of three buildings with LATEL LLC, a related party entity as of March 31, 2019. The lease agreements mature on May 31, 2021 and require total remaining rental payments of \$1.8 million as of March 31, 2019.

Lessor

We have various arrangements for use of our network assets including tower space, certain colocation and dark fiber arrangements for which we are the lessor. These leases meet the criteria for operating lease classification. Lease income associated with these leases is not material. Occasionally, we enter into dark fiber arrangements where the term may be for a major part of the asset's remaining economic life, which meet the criteria for sales-type lease classification. During the quarter ended March 31, 2019, we did not enter into any sales-type lease arrangements.

As part of the adoption, we elected the practical expedient to combine lease and non-lease components in our lessor arrangements. We have arrangements where the non-lease component associated with the lease component is the predominant component in the contract, such as in revenue contracts that involve the customer leasing equipment from us. In such cases, we account for the combined component in accordance with ASC 606 as the service component is the predominant component in the contract.

9. EQUITY

Dividends

Our Board of Directors declared quarterly dividends of approximately \$0.38738 per share during 2018. On February 18, 2019, the Board of Directors declared a dividend of approximately \$0.38738 per share, payable on May 1, 2019 to stockholders of record on April 15, 2019.

On April 25, 2019, we announced the elimination of the payment of quarterly dividends on our stock beginning in the second quarter of 2019. Future dividend payments, if any, are at the discretion of our Board of Directors. Changes in

Table of Contents

our dividend program will depend on our earnings, capital requirements, financial condition, debt covenant compliance, expected cash needs and other factors considered relevant by our Board of Directors.

Share-Based Compensation

Our Board of Directors may grant share-based awards from our shareholder approved Amended and Restated Consolidated Communications Holdings, Inc. 2005 Long-Term Incentive Plan (the “Plan”). The Plan permits the issuance of awards in the form of stock options, stock appreciation rights, stock grants, stock unit grants and other equity-based awards to eligible directors and employees at the discretion of the Compensation Committee of the Board of Directors. On April 30, 2018, the shareholders approved an amendment to the Plan to increase by 2,000,000 the number of shares of our common stock authorized for issuance under the Plan and extend the term of the Plan through April 30, 2028. With the amendment, approximately 4,650,000 shares of our common stock are authorized for issuance under the Plan, provided that no more than 300,000 shares may be granted in the form of stock options or stock appreciation rights to any eligible employee or director in any calendar year. Unless terminated sooner, the Plan will continue in effect until April 30, 2028.

The following table summarizes total compensation costs recognized for share-based payments during the quarters ended March 31, 2019 and 2018:

	Quarter Ended March 31,	
(In thousands)	2019	2018
Restricted stock	\$ 927	\$ 435
Performance shares	571	243
Total	\$ 1,498	\$ 678

Share-based compensation expense is included in selling, general and administrative expenses in the accompanying condensed consolidated statements of operations.

As of March 31, 2019, total unrecognized compensation cost related to non-vested Restricted Stock Awards (“RSAs”) and Performance Share Awards (“PSAs”) was \$16.9 million and will be recognized over a weighted-average period of approximately 1.8 years.

The following table summarizes the RSA and PSA activity for the three-month period ended March 31, 2019:

	RSAs		PSAs	
	Shares	Weighted Average Grant Date Fair Value	Shares	Weighted Average Grant Date Fair Value
Non-vested shares outstanding - December 31, 2018	338,771	\$ 14.31	35,626	\$ 21.97
Shares granted	551,214	\$ 9.87	371,672	\$ 9.86
Non-vested shares outstanding - March 31, 2019	889,985	\$ 11.56	407,298	\$ 10.92

Accumulated Other Comprehensive Loss

The following table summarizes the changes in accumulated other comprehensive loss, net of tax, by component for the three-month period ended March 31, 2019:

(In thousands)	Pension and Post-Retirement Obligations	Derivative Instruments	Total
Balance at December 31, 2018	\$ (55,514)	\$ 2,302	\$ (53,212)
Other comprehensive loss before reclassifications	—	(6,689)	(6,689)
Cumulative adjustment upon adoption of ASU 2017-12	—	(576)	(576)
Amounts reclassified from accumulated other comprehensive loss	1,026	(207)	819
Net current period other comprehensive income (loss)	1,026	(7,472)	(6,446)
Balance at March 31, 2019	\$ (54,488)	\$ (5,170)	\$ (59,658)

The following table summarizes reclassifications from accumulated other comprehensive loss for the quarters ended March 31, 2019 and 2018:

(In thousands)	Quarter Ended March 31,		Affected Line Item in the Statement of Income
	2019	2018	
Amortization of pension and post-retirement items:			
Prior service (cost) credit	\$ (798)	\$ 199	(a)
Actuarial loss	(595)	(1,451)	(a)
	(1,393)	(1,252)	Total before tax
	367	330	Tax benefit
	\$ (1,026)	\$ (922)	Net of tax
Gain (Loss) on cash flow hedges:			
Interest rate derivatives	\$ 280	\$ (356)	Interest expense
	(73)	91	Tax (expense) benefit
	\$ 207	\$ (265)	Net of tax

(a) These items are included in the components of net periodic benefit cost for our pension and other post-retirement benefit plans. See Note 10 for further discussion regarding our pension and other post-retirement benefit plans.

10. PENSION PLAN AND OTHER POST-RETIREMENT BENEFITS

Defined Benefit Plans

We sponsor three qualified defined benefit pension plans that are non-contributory covering substantially all of our hourly employees under collective bargaining agreements who fulfill minimum age and service requirements and certain salaried employees. The defined benefit pension plans are closed to all new entrants. In November 2018, a defined benefit pension plan was amended to freeze benefit accruals under the cash balance benefit plan for certain participants under collective bargaining agreements effective as of March 31, 2019. Consequently, as of April 1, 2019 all of our defined benefit pension plans are now frozen to all current employees, and no additional monthly pension benefits will accrue under those plans.

We also have two non-qualified supplemental retirement plans (the “Supplemental Plans” and, together with the defined benefit pension plans, the “Pension Plans”). The Supplemental Plans provide supplemental retirement benefits to certain former employees by providing for incremental pension payments to partially offset the reduction of the amount that would have been payable under the qualified defined benefit pension plans if it were not for limitations imposed by federal income tax regulations. The Supplemental Plans are frozen so that no person is eligible to become a new participant. These plans are unfunded and have no assets. The benefits paid under the Supplemental Plans are paid from the general operating funds of the Company.

Table of Contents

The following table summarizes the components of net periodic pension cost for our Pension Plans for the quarters ended March 31, 2019 and 2018:

(In thousands)	Quarter Ended March 31,	
	2019	2018
Service cost	\$ 11	\$ 1,535
Interest cost	7,661	7,139
Expected return on plan assets	(8,671)	(9,667)
Net amortization loss	703	1,472
Net prior service cost (credit) amortization	30	(61)
Net periodic pension (benefit) cost	\$ (266)	\$ 418

The components of net periodic pension cost other than the service cost component are included in other, net within other income (expense) in the condensed consolidated statements of operations.

Other Non-qualified Deferred Compensation Agreements

We are also liable for deferred compensation agreements with former members of the board of directors and certain other former employees of acquired companies. Depending on the plan, benefits are payable in monthly or annual installments for a period of time based on the terms of the agreement, which range from five years up to the life of the participant or to the beneficiary upon the death of the participant, and may begin as early as age 55. Participants accrue no new benefits as these plans had previously been frozen. Payments related to the deferred compensation agreements totaled approximately \$0.2 million for each of the quarters ended March 31, 2019 and 2018. The net present value of the remaining obligations was approximately \$1.5 million and \$1.6 million as of March 31, 2019 and December 31, 2018, respectively, and is included in pension and other post-retirement benefit obligations in the accompanying condensed consolidated balance sheets.

We also maintain 25 life insurance policies on certain of the participating former directors and employees. We did not recognize any life insurance proceeds during the quarters ended March 31, 2019 and 2018. The excess of the cash surrender value of the remaining life insurance policies over the notes payable balances related to these policies totaled \$2.6 and \$2.4 million as of March 31, 2019 and December 31, 2018, respectively. These amounts are included in investments in the accompanying condensed consolidated balance sheets. Cash principal payments for the policies and any proceeds from the policies are classified as operating activities in the condensed consolidated statements of cash flows.

Post-retirement Benefit Obligations

We sponsor various healthcare and life insurance plans (“Post-retirement Plans”) that provide post-retirement medical and life insurance benefits to certain groups of retired employees. Certain plans are frozen so that no person is eligible to become a new participant. Retirees share in the cost of healthcare benefits, making contributions that are adjusted periodically—either based upon collective bargaining agreements or because total costs of the program have changed. Covered expenses for retiree health benefits are paid as they are incurred. Post-retirement life insurance benefits are fully insured. A majority of the healthcare plans are unfunded and have no assets, and benefits are paid from the general operating funds of the Company. However, a plan acquired in the purchase of another company is funded by assets that are separately designated within the Pension Plans for the sole purpose of providing payments of retiree medical benefits for this specific plan.

Table of Contents

The following table summarizes the components of the net periodic cost for our Post-retirement Plans for the quarters ended March 31, 2019 and 2018:

(In thousands)	Quarter Ended March 31,	
	2019	2018
Service cost	\$ 117	\$ 127
Interest cost	1,144	1,029
Expected return on plan assets	(43)	(36)
Net amortization gain	(108)	(21)
Net prior service cost (credit) amortization	768	(138)
Net periodic post-retirement benefit cost	\$ 1,878	\$ 961

The components of net periodic post-retirement benefit cost other than the service cost component are included in other, net within other income (expense) in the condensed consolidated statements of operations.

Contributions

We expect to contribute approximately \$26.3 million to our Pension Plans and \$9.5 million to our Post-retirement Plans in 2019. As of March 31, 2019, we have contributed \$5.7 million and \$1.9 million of the annual contribution to the Pension Plans and Post-retirement Plans, respectively.

11. INCOME TAXES

Our unrecognized tax benefits as of each of March 31, 2019 and December 31, 2018 were \$4.9 million. The net amount of unrecognized tax benefits that, if recognized, would result in an impact to the effective tax rate is \$4.7 million as of March 31, 2019 and December 31, 2018. We do not expect any material change in our unrecognized tax benefits during the remainder of 2019.

Our practice is to recognize interest and penalties related to income tax matters in interest expense and selling, general and administrative expenses, respectively. As of March 31, 2019, we did not have a material liability for interest or penalties and had no material interest or penalty expense.

The periods subject to examination for our federal return are years 2015 through 2017. The periods subject to examination for our state returns are years 2014 through 2017. We do not expect any settlement or payment that may result from the examination to have a material effect on our results or cash flows.

Our effective tax rate was 30.4% and 27.5% for the quarters ended March 31, 2019 and 2018, respectively. The effective tax rate differed from the federal and state statutory rates primarily due to various permanent income tax differences and differences in allocable income for the Company's state tax filings.

12. COMMITMENTS AND CONTINGENCIES

Litigation, Regulatory Proceedings and Other Contingencies

Local Switching Support

In 2015, our subsidiary, FairPoint Communications, Inc., which we acquired in July 2017 ("FairPoint"), filed a petition (the "Petition") with the Federal Communications Commission ("FCC") asking the FCC to direct National Exchange Carrier Association ("NECA") to stop subtracting frozen Local Switching Support ("LSS") from FairPoint's intercarrier compensation ("ICC") Eligible Recovery for FairPoint's rate of return Incumbent Local Exchange Carriers ("ILECs") that participate in the NECA pooling process. This issue is unique to rate of return affiliates of price cap carriers because such companies are considered price cap carriers for the FCC's Connect America Fund ("CAF") funding, but remain rate of return for ICC purposes. Effective January 1, 2012, FairPoint rate of return ILECs were placed under the

Table of Contents

price cap CAF Phase I interim support mechanism, whereby the ILECs continued to receive frozen Universal Service Fund (“USF”) support for all forms of USF support received during 2011, including LSS. The rate of return rules for ICC included LSS support in that mechanism as well; therefore, NECA subtracted the frozen LSS support from the ICC Eligible Recovery amounts in accordance with FCC rules prohibiting duplicate recovery. When FairPoint accepted CAF Phase II support effective January 1, 2015, there was no longer any duplicate support and FairPoint requested NECA to stop subtracting LSS from FairPoint’s ICC Eligible Recovery. NECA declined to make that change, which led to FairPoint filing the Petition with the FCC asking the FCC to direct NECA to comply with FCC rules on ICC Eligible Recovery for rate of return ILECs. This issue also applies to Consolidated’s operations in Minnesota, which are also rate of return ILECs associated with a price cap company. The combined LSS support for the period from January 1, 2015 through December 31, 2017 was approximately \$12.3 million. Our ongoing ICC Eligible Recovery support for 2018 increased by approximately \$3.6 million, and thereafter, is expected to decline by 5% per year through 2021. On March 31, 2018, we obtained the required votes necessary for an approved order and on April 19, 2018, the FCC issued its order approving our Petition. As a result, during the first quarter of 2018, we recognized subsidies revenue of \$4.9 million and a contingent asset of \$8.4 million as a pre-acquisition gain contingency for the FairPoint LSS revenue prior to the acquisition date.

Access Charges

In 2014, Sprint Communications Company L.P. (“Sprint”) along with MCI Communications Services, Inc. and Verizon Select Services Inc. (collectively, “Verizon”) filed lawsuits against certain subsidiaries of the Company including FairPoint, and many other Local Exchange Carriers (collectively, “LECs”) throughout the country challenging the switched access charges LECs assessed Sprint and Verizon, as interexchange carriers (“IXCs”), for certain calls originating from or terminating to mobile devices that are routed to or from these LECs through these IXCs. The plaintiffs’ position is based on their interpretation of federal law, among other things, and they are seeking refunds of past access charges paid for such calls. The disputed amounts total \$4.8 million and cover periods dating back as far as 2006. CenturyLink, Inc. and its LEC subsidiaries (collectively “CenturyLink”), requested that the U.S. Judicial Panel on Multidistrict Litigation (the “Panel”), which has the authority to transfer the pretrial proceedings to a single court for multiple civil cases involving common questions of fact, transfer and consolidate these cases in one court. The Panel granted CenturyLink’s request and ordered that these cases be transferred to and centralized in the U.S. District Court for the Northern District of Texas (the “U.S. District Court”).

On November 17, 2015, the U.S. District Court dismissed these complaints based on its interpretation of federal law and held that LECs could assess switched access charges for the calls at issue (the “November 2015 Order”). The November 2015 Order also allowed the plaintiffs to amend their complaints to assert claims that arise under state laws independent of the dismissed claims asserted under federal law. While Verizon did not make such a filing, on May 16, 2016, Sprint filed amended complaints and on June 30, 2016, the LEC defendants named in such complaints filed, among other things, a Joint Motion to Dismiss them, which the U.S. District Court granted on May 3, 2017. Certain FairPoint entities filed counterclaims against Sprint and Verizon.

Relatedly, in 2016, numerous LECs across the country, including a number of our legacy Consolidated and FairPoint LEC entities, filed complaints in various U.S. district courts against Level 3 Communications, LLC and certain of its

affiliates (collectively, “Level 3”) for its failure to pay access charges for certain calls that the November 2015 Order held could be assessed by LECs. The Company’s LEC entities, including FairPoint, sought from Level 3 a total amount of at least \$2.3 million, excluding attorneys’ fees. These complaint cases were transferred to and included in the above-referenced consolidated proceeding before the U.S. District Court. Level 3 filed a Motion to Dismiss these complaints that, in part, repeated arguments, which the November 2015 Order rejected. On March 22, 2017, the U.S. District Court denied Level 3’s Motion to Dismiss.

On March 12, 2018, a motion for summary judgment was filed by various LECs with counterclaims against Verizon and Sprint. On March 26, 2018, a motion for summary judgment was filed by various LECs with claims against Level 3. On May 15, 2018, the U.S. District Court granted all pending motions for summary judgment against Sprint, Verizon, and Level 3, and directed the entry of formal judgments in these cases.

Table of Contents

On July 17, 2018, the U.S. District Court entered a judgment of \$0.7 million in favor of our legacy Consolidated LEC entities and against Level 3. Level 3 filed a notice of appeal of this judgment with the U.S. Court of Appeals for the Fifth Circuit (the “Fifth Circuit”) on July 24, 2018. On August 15, 2018, the U.S. District Court entered a judgment of over \$1.2 million in favor of our FairPoint LEC entities and against Level 3. Level 3 filed a notice of appeal of this judgment with the Fifth Circuit on August 20, 2018. On September 21, 2018, all of our LECs entered into a settlement agreement with Level 3 to resolve the dispute with respect to all past-due amounts at issue in the litigation. The settlement did not result in a material impact to our financial statements. As part of the settlement, the parties filed on October 18, 2018 joint stipulations to dismiss with prejudice the related complaints by our LECs against Level 3 with the U.S. District Court and a joint motion to voluntarily dismiss the Level 3 appeal against our LECs with the Fifth Circuit. The Fifth Circuit granted this motion on October 25, 2018 by dismissing the Level 3 appeal.

Formal judgments were entered in the Verizon and Sprint cases on June 7, 2018. Verizon and Sprint filed notices of appeal of these judgments with the Fifth Circuit on June 28 and June 29, 2018, respectively. Those appeals remain pending. Absent a decision by an appellate court that overturns these orders, it could be difficult for Sprint or Verizon to succeed on its claims against us. Therefore, we do not expect any potential settlement or judgment to have a material adverse impact on our financial results or cash flows.

Gross Receipts Tax

Two of our subsidiaries, Consolidated Communications of Pennsylvania Company LLC (“CCPA”) and Consolidated Communications Enterprise Services Inc. (“CCES”), have, at various times, received Assessment Notices and/or Audit Assessment Notices from the Commonwealth of Pennsylvania Department of Revenue (“DOR”) increasing the amounts owed for the Pennsylvania Gross Receipts Tax, and have had audits performed for the tax years 2008 through 2016. For our CCES and CCPA subsidiaries, the total additional tax liabilities calculated by the DOR auditors for the tax years 2008 through 2016, including interest, are approximately \$6.2 million and \$7.5 million, respectively. We filed Petitions for Reassessment with the DOR’s Board of Appeals for the tax years 2008 through 2016, contesting these audit assessments. These cases remain pending and are in various stages of appeal.

In May 2017, we entered into an agreement to guarantee any potential liabilities to the DOR up to \$5.0 million. We believe that certain of the DOR’s findings regarding CCPA’s and CCES’s additional tax liabilities for the tax years 2008 through 2016, for which we have filed appeals, continue to lack merit. However, in January 2018, CCES and CCPA submitted initial settlement offers to the Pennsylvania Office of Attorney General proposing to settle the intrastate and interstate cases at reduced tax liabilities for the tax years 2008 through 2013. The settlement offers are currently under review and subject to negotiation with the Commonwealth of Pennsylvania. The Commonwealth Court of Pennsylvania has imposed a deadline in June 2019 for the parties to reach an agreement and file stipulations for judgment. While we continue to believe a settlement of all disputed claims is possible, we cannot anticipate at this time what the ultimate resolution of these cases will be, nor can we evaluate the likelihood of a favorable or unfavorable outcome or the potential losses (or gains) should such an outcome occur.

Based on the initial settlement offers for the tax years 2008 through 2013 and the Company's best estimate of the potential additional tax liabilities for the tax years 2014 through 2018, we have reserved \$3.3 million and \$1.5 million, including interest, for our CCES and CCPA subsidiaries, respectively. We do not believe that the outcome of these claims will have a material adverse impact on our financial results or cash flows.

From time to time we may be involved in litigation that we believe is of the type common to companies in our industry, including regulatory issues. While the outcome of these claims cannot be predicted with certainty, we do not believe that the outcome of any of these legal matters will have a material adverse impact on our business, results of operations, financial condition or cash flows.

Table of Contents

13. SUBSEQUENT EVENTS

On April 25, 2019, we announced the elimination of the payment of quarterly dividends on our stock beginning in the second quarter of 2019. Future dividend payments, if any, are at the discretion of our Board of Directors. Changes in our dividend program will depend on our earnings, capital requirements, financial condition, debt covenant compliance, expected cash needs and other factors considered relevant by our Board of Directors.

14. CONDENSED CONSOLIDATING FINANCIAL INFORMATION

Consolidated Communications, Inc. is the primary obligor under the unsecured Senior Notes. We and substantially all of our subsidiaries, including our FairPoint subsidiaries, have jointly and severally guaranteed the Senior Notes. All of the subsidiary guarantors are 100% direct or indirect wholly owned subsidiaries of the parent, and all guarantees are full, unconditional and joint and several with respect to principal, interest and liquidated damages, if any. As such, we present condensed consolidating balance sheets as of March 31, 2019 and December 31, 2018, condensed consolidating statements of operations for the quarters ended March 31, 2019 and 2018 and condensed consolidating statements of cash flows for the three-month periods ended March 31, 2019 and 2018 for each of the Company (Parent), Consolidated Communications, Inc. (Subsidiary Issuer), guarantor subsidiaries and other non-guarantor subsidiaries with any consolidating adjustments. See Note 6 for more information regarding our Senior Notes.

ITEM 2. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

The Securities and Exchange Commission (“SEC”) encourages companies to disclose forward-looking information so that investors can better understand a company’s future prospects and make informed investment decisions. Certain statements in this Quarterly Report on Form 10-Q, including those which relate to the impact on future revenue sources, pending and future regulatory orders, continued expansion of the telecommunications network and expected changes in the sources of our revenue and cost structure resulting from our entrance into new communications markets, are forward-looking statements and are made pursuant to the safe harbor provisions of the Securities Litigation Reform Act of 1995. These forward-looking statements reflect, among other things, our current expectations, plans, strategies and anticipated financial results. There are a number of risks, uncertainties and conditions that may cause our actual results to differ materially from those expressed or implied by these forward-looking statements. Many of these circumstances are beyond our ability to control or predict. Moreover, forward-looking statements necessarily involve assumptions on our part. These forward-looking statements generally are identified by the words “believe,” “expect,” “anticipate,” “estimate,” “project,” “intend,” “plan,” “should,” “may,” “will,” “be,” “will continue” or similar expressions. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause actual results, performance or achievements of Consolidated Communications Holdings, Inc. and its subsidiaries (“Consolidated,” the “Company,” “we” or “our”) to be different from those expressed or implied in the forward-looking statements. All forward-looking statements attributable to us or persons acting on our behalf are expressly qualified in their entirety by the cautionary statements that appear throughout this report. A detailed discussion of these and other risks and uncertainties that could cause actual results and events to differ materially from such forward-looking statements is included in our 2018 Annual Report on Form 10-K filed with the SEC. Furthermore, undue reliance should not be placed on forward-looking statements, which speak only as of the date they are made. Except as required under federal securities laws or the rules and regulations of the SEC, we disclaim any intention or obligation to update or revise publicly any forward-looking statements. Management’s Discussion and Analysis (“MD&A”) should be read in conjunction with our unaudited condensed consolidated financial statements and accompanying notes to the financial statements (“Notes”) as of and for the quarter ended March 31, 2019 included in Item 1 of Part I of this Quarterly Report on Form 10-Q.

Throughout this MD&A, we refer to certain measures that are not measures of financial performance in accordance with accounting principles generally accepted in the United States (“US GAAP” or “GAAP”). We believe the use of these non-GAAP measures on a consolidated basis provides the reader with additional information that is useful in understanding our operating results and trends. These measures should be viewed in addition to, rather than as a substitute for, those measures prepared in accordance with GAAP. See the “Non-GAAP Measures” section below for a more detailed discussion on the use and calculation of these measures.

Overview

Consolidated is a broadband and business communications provider offering a wide range of communication solutions to consumer, commercial and carrier customers across a 23-state service area. We operate an advanced fiber network spanning approximately 37,000 fiber route miles across many rural areas and metro communities. Our business product suite includes: data and Internet solutions, voice, data center services, security services, managed and IT services, and an expanded suite of cloud services. We provide wholesale solutions to wireless and wireline carriers and other service providers including data, voice, network connections and custom fiber builds and last mile connections. We offer residential high-speed Internet, video, phone and home security services as well as multi-service residential and small business bundles.

We generate the majority of our consolidated operating revenues primarily from monthly subscriptions to our broadband, data and transport services (collectively “broadband services”) marketed to business and residential customers. Our acquisition of FairPoint Communications, Inc. (“FairPoint”) in 2017 provides us significantly greater scale and an expanded fiber network which allows for additional growth opportunities and expansion. Commercial and carrier services represent the largest source of our operating revenues and are expected to be key growth areas in the future. We are focused on expanding our broadband and commercial product suite and are continually enhancing our commercial

Table of Contents

product offerings to meet the needs of our business customers. We leverage our advanced fiber network and tailor our services by developing solutions to fit their specific needs and leveraging a value-based sales approach. In 2018, we launched new, innovative business services in our northern New England markets including BusinessOne, a high-speed data and voice solution designed for small and medium-sized businesses; software defined wide area network (“SD-WAN”); and multi-protocol label switching (“MPLS”). Additionally, we are continuously enhancing our suite of managed and cloud services, which increases efficiency and enables greater scalability and reliability for businesses. We anticipate future momentum in commercial and carrier services as these products gain traction as well as from the demand from customers for additional bandwidth and data-based services.

We market our residential services by leading with broadband or bundled services, which includes high-speed Internet, video and phone services. As consumer demands for bandwidth continue to increase, our focus is on enhancing our broadband services and progressively increasing broadband speeds. We offer data speeds of up to 1 Gbps in select markets, and up to 100 Mbps in markets where 1 Gbps is not yet available, depending on the geographical region. As of March 31, 2019, approximately 42% of the homes we serve on our legacy Consolidated network had availability to broadband speeds of up to 100 Mbps. The majority of the homes in our northern New England service areas have availability to broadband speeds of 20 mbps or less. As part of our integration initiatives in 2018, we upgraded broadband speeds to more than 500,000 homes and small businesses across our northern New England service area. The upgrades enable customers to receive broadband speeds up to three times faster than what was previously available.

Our competitive broadband speeds enable us to continue to meet the need for higher bandwidth from the growing consumer demand for streaming live programming or in-demand content on any device. The consumers’ demand for streaming services, either to augment their current video subscription plan or to entirely replace their video subscription may impact our future video subscriber base and, accordingly, reduce our video revenue as well as our video programing costs. Total video connections decreased 9% as of March 31, 2019 compared to the same period in 2018. We believe the trend in changing consumer viewing habits will continue to impact our business results and complement our strategy of providing consumers with higher broadband speeds to facilitate streaming content.

Operating revenues also continue to be impacted by the anticipated industry-wide trend of declines in voice services, access lines and related network access revenue. Many customers are choosing to subscribe to alternative communication services and competition for these subscribers continues to increase. Total voice connections decreased 7% as of March 31, 2019 compared to the same period in 2018. Competition from wireless providers, Competitive Local Exchange Carriers and cable television providers has increased in recent years in the markets we serve. We have been able to mitigate some of the access line losses through marketing initiatives and product offerings, such as our VoIP service.

As discussed in the “Regulatory Matters” section below, our operating revenues are impacted by legislative or regulatory changes at the federal and state levels, which could reduce or eliminate the current subsidies revenue we receive. A number of proceedings and recent orders relate to universal service reform, intercarrier compensation and network access charges. There are various ongoing legal challenges to the orders that have been issued. As a result, it is not yet possible to fully determine the impact of the regulatory changes on our operations.

Recent Developments

Divestitures

On July 31, 2018, we completed the sale of all of the issued and outstanding stock of our subsidiaries Peoples Mutual Telephone Company and Peoples Mutual Long Distance Company (collectively, “Peoples”) for total cash proceeds of approximately \$21.0 million, net of certain contractual and customary working capital adjustments. Peoples operates as a local exchange carrier in Virginia and provides telecommunications services to residential and business customers. The sale of Peoples has not been reported as discontinued operations in the condensed consolidated statements of operations as the annual revenue of these operations is less than 1% of the consolidated operating revenues.

Table of Contents

Results of Operations

The following tables reflect our financial results on a consolidated basis and key operating metrics as of and for the quarters ended March 31, 2019 and 2018.

Operating Revenues

Commercial and Carrier

Data and Transport Services

We provide a variety of business communication services to business customers of all sizes, including many services over our advanced fiber network. The services we offer include scalable high-speed broadband Internet access and VoIP phone services, which range from basic service plans to virtual hosted systems. In addition to Internet and VoIP services, we also offer a variety of commercial data connectivity services in select markets including Ethernet services; private line data services; SD-WAN and MPLS. Our networking services include point-to-point and multi-point deployments from 2.5 Mbps to 10 Gbps to accommodate the growth patterns of our business customers. We offer a suite of cloud-based services, which includes a hosted unified communications solution that replaces the customer's on-site phone systems and data networks, managed network security services and data protection services. Data center and disaster recovery solutions provide a reliable and local colocation option for commercial customers. We also offer wholesale services to regional and national interexchange and wireless carriers, including cellular backhaul and other fiber transport solutions.

Data and transport services revenues increased \$2.1 million during the quarter ended March 31, 2019 compared to the same period in 2018 primarily due to continued growth in Metro Ethernet and VoIP services.

Voice Services

Voice services include basic local phone and long-distance service packages for business customers. The plans include options for voicemail, conference calling, linking multiple office locations and other custom calling features such as caller ID, call forwarding, speed dialing and call waiting. Services can be charged at a fixed monthly rate, a measured rate or can be bundled with selected services at a discounted rate. We are also a full service 9-1-1 provider and have installed and now maintain two turn-key, state of the art statewide next-generation emergency 9-1-1 systems. These systems, located in Maine and Vermont, have processed over three million calls relying on the caller's location information for routing. Next-generation emergency 9-1-1 systems are an improvement over traditional 9-1-1 and are expected to provide the foundation to handle future communication modes such as texting and video.

Voice services revenues decreased \$4.0 million during the quarter ended March 31, 2019 compared to the same period in 2018 primarily due to a 6% decline in access lines as commercial customers are increasingly choosing alternative technologies, including our own VoIP product, and the broad range of features that Internet based voice services can offer.

Table of Contents

Other

Other services include business equipment sales and related hardware and maintenance support, video services and other miscellaneous revenues. Other services revenues increased \$3.3 million during the quarter ended March 31, 2019 compared to the same period in 2018 primarily due to an increase in business system sales.

Consumer

Broadband Services

Broadband services include revenues from residential customers for subscriptions to our VoIP and data products. We offer high-speed Internet access at speeds of up to 1 Gbps, depending on the nature of the network facilities that are available, the level of service selected and the location. Our VoIP digital phone service is also available in certain markets as an alternative to the traditional telephone line. Broadband services revenues were flat during the quarter ended March 31, 2019 compared to the same period in 2018 despite a decrease in data and VoIP connections of 5% and 10%, respectively, primarily as a result of price increases implemented during 2018.

Video Services

Depending on geographic market availability, our video services range from limited basic service to advanced digital television, which includes several plans, each with hundreds of local, national and music channels including premium and Pay-Per-View channels as well as video On-Demand service. Certain customers may also subscribe to our advanced video services, which consist of high-definition television, digital video recorders (“DVR”) and/or a whole home DVR. Our TV Everywhere service allows our video subscribers to watch their favorite shows, movies and livestreams on any device. In addition, we offer other in-demand streaming content including: DIRECTV®, DIRECTV NOWSM, fuboTV, Philo, HBO NOW®, FlixFling and VEMOX.

Video services revenues decreased \$2.1 million during the quarter ended March 31, 2019 compared to the same period in 2018 primarily due to a 10% decrease in connections as consumers are choosing to subscribe to alternative video services such as over-the-top streaming services.

Voice Services

We offer several different basic local phone service packages and long-distance calling plans, including unlimited flat-rate calling plans. The plans include options for voicemail and other custom calling features such as caller ID, call forwarding and call waiting. Voice services revenues decreased \$6.2 million during the quarter ended March 31, 2019 compared to the same period in 2018 primarily due to a 10% decline in access lines. The number of local access lines in service directly affects the recurring revenues we generate from end users and continues to be impacted by the industry-wide decline in access lines. We expect to continue to experience erosion in voice connections due to competition from alternative technologies, including our own competing VoIP product.

Subsidies

Subsidies consist of both federal and state subsidies, which are designed to promote widely available, quality broadband services at affordable prices with higher data speeds in rural areas. Subsidies revenues decreased \$7.2 million during the quarter ended March 31, 2019 compared to the same period in 2018 primarily due to a settlement for frozen local switching support (“LSS”) of \$4.9 million recognized during the first quarter of 2018 as well as the scheduled reductions in the annual Connect America Fund (“CAF”) Phase II funding rate in August 2018. See the “Regulatory Matters” section below for further discussion of the LSS matter as well as the subsidies we receive.

Network Access Services

Network access services include interstate and intrastate switched access revenues, network special access services and end user access. Switched access revenues include access services to other communications carriers to terminate or

Table of Contents

originate long-distance calls on our network. Special access circuits provide dedicated lines and trunks to business customers and interexchange carriers. Network access revenues decreased \$3.1 million during the quarter ended March 31, 2019 compared to the same period in 2018 primarily as a result of the continuing decline in minutes of use, voice connections and carrier circuits; however, a portion of the decrease can be attributed to carriers shifting to our fiber Metro Ethernet product, contributing to the growth in that area.

Other Products and Services

Other products and services include revenues from telephone directory publishing, video advertising, billing and support services and other miscellaneous revenue. Other products and services revenues decreased \$0.2 million during the quarter ended March 31, 2019 compared to the same period in 2018 primarily due to a decline in telephone directory advertising revenue.

Operating Expenses

Cost of Services and Products

Cost of services and products decreased \$4.6 million during the quarter ended March 31, 2019 compared to the same period in 2018 primarily due to a decline in employee salaries and benefits in 2019 as a result of a reduction in headcount through cost savings initiatives. Pension costs also decreased as a result of the freezing of certain benefit plans in connection with new collective bargaining agreements ratified in 2018. Access expense decreased due to a decline in usage and rates. Video programming costs also decreased as a result of 9% decline in video connections, which was offset in part by an increase in programming costs per channel as costs continue to rise as a result of annual rate increases. However, cost of goods sold related to equipment sales increased as a result of an increase in business system sales in the current year period.

Selling, General and Administrative Costs

Selling, general and administrative costs decreased \$11.6 million during the quarter ended March 31, 2019 compared to the same period in 2018 primarily due to a decline in employee salaries and benefits in 2019 as a result of a reduction in headcount as well as a decrease in incentive compensation. The decline in selling, general and administrative costs was also due to the operating synergies achieved in connection with the integration of FairPoint during 2018 which resulted in a reduction in operating costs and decline in integration and severance costs in 2019. In addition, real estate taxes also decreased due to property tax abatements received in 2019.

Depreciation and Amortization

Depreciation and amortization expense decreased \$8.7 million during the quarter ended March 31, 2019 compared to the same period in 2018 primarily due to outside plant and network cable assets and certain intangibles becoming fully depreciated or amortized in 2018, which was offset in part by ongoing capital expenditures related to network enhancements and success-based capital projects for consumer and commercial services as well as an increase in amortization expense for customer relationships.

Reclassifications

Certain amounts in our 2018 condensed consolidated financial statements have been reclassified to conform to the current year presentation.

Regulatory Matters

Our revenues are subject to broad federal and/or state regulation, which include such telecommunications services as local telephone service, network access service and toll service and are derived from various sources, including:

Business and residential subscribers of basic exchange services;

Table of Contents

 Surcharges mandated by state commissions and the Federal Communications Commission (“FCC”);

 Long distance carriers for network access service;

 Competitive access providers and commercial customers for network access service; and

 Support payments from federal or state programs.

The telecommunications industry is subject to extensive federal, state and local regulation. Under the Telecommunications Act of 1996, federal and state regulators share responsibility for implementing and enforcing statutes and regulations designed to encourage competition and to preserve and advance widely available, quality telephone service at affordable prices.

At the federal level, the FCC generally exercises jurisdiction over facilities and services of local exchange carriers, such as our rural telephone companies, to the extent they are used to provide, originate or terminate interstate or international communications. The FCC has the authority to condition, modify, cancel, terminate or revoke our operating authority for failure to comply with applicable federal laws or FCC rules, regulations and policies. Fines or penalties also may be imposed for any of these violations.

State regulatory commissions generally exercise jurisdiction over carriers’ facilities and services to the extent they are used to provide, originate or terminate intrastate communications. In particular, state regulatory agencies have substantial oversight over interconnection and network access by competitors of our incumbent local exchange companies. In addition, municipalities and other local government agencies regulate the public rights-of-way necessary to install and operate networks. State regulators can sanction our rural telephone companies or revoke our certifications if we violate relevant laws or regulations.

FCC Matters

In general, telecommunications service in rural areas is more costly to provide than service in urban areas. The lower customer density means that switching and other facilities serve fewer customers and loops are typically longer, requiring greater expenditures per customer to build and maintain. By supporting the high-cost of operations in rural

markets, Universal Service Fund (“USF”) subsidies promote widely available, quality telephone service at affordable prices in rural areas.

An order adopted by the FCC in 2011 (the “Order”) has significantly impacted the amount of support revenue we receive from the USF, CAF and intercarrier compensation (“ICC”). The Order reformed core parts of the USF, broadly recast the existing ICC scheme, established the CAF to replace support revenues provided by the current USF and redirected support from voice services to broadband services. In 2012, CAF Phase I was implemented, which froze USF support to price cap carriers until the FCC implemented a broadband cost model to shift support from voice services to broadband services. The Order also modified the methodology used for ICC traffic exchanged between carriers. The initial phase of ICC reform was effective on July 1, 2012, beginning the transition of our terminating switched access rates to bill-and-keep over a seven year period for our price cap study areas and a nine year period for our rate of return study areas, and, as a result, we anticipate that our network access revenue for 2019 will be reduced by approximately \$1.1 million.

In December 2014, the FCC released a report and order that addressed, among other things, the transition to CAF Phase II funding for price cap carriers and the acceptance criteria for CAF Phase II funding. For companies that accept the CAF Phase II funding, there is a three year transition period in instances where their current CAF Phase I funding exceeds the CAF Phase II funding. If CAF Phase II funding exceeds CAF Phase I funding, the transitional support is waived and CAF Phase II funding begins immediately. Companies are required to commit to a statewide build out requirement to 10 Mbps downstream and 1 Mbps upstream in funded locations.

We accepted the CAF Phase II funding in August 2015, which was effective as of January 1, 2015. The annual funding under CAF Phase I of \$36.6 million was replaced by annual funding under CAF Phase II of \$13.9 million through

Table of Contents

2020. With the sale of our Iowa ILEC in 2016, this amount was further reduced to \$11.5 million through 2020. Subsequently, with the acquisition of FairPoint, this amount increased to \$48.9 million through 2020. With the sale of our Virginia ILEC in 2018, this amount was reduced to \$48.1 million through 2020. The acceptance of CAF Phase II funding at a level lower than the frozen CAF Phase I support results in CAF Phase II transitional funding over a three year period based on the difference between the CAF Phase I funding and the CAF Phase II funding at the rates of 75% in the first year, 50% in the second year and 25% in the third year. We accepted CAF Phase II support in all of our operating states except Colorado and Kansas where the offered CAF Phase II support was declined. We continue to receive frozen CAF Phase I support in Colorado and Kansas until such time as the FCC CAF Phase II auction assigns support to another provider. The FCC auction process for CAF Phase II funding occurred during the third quarter of 2018. The winners have been announced and the impact to our future funding is expected to be determined in the second half of 2019.

The specific obligations associated with CAF Phase II funding include the obligation to serve approximately 124,500 locations by December 31, 2020 (with interim milestones of 40%, 60% and 80% completion by December 2017, 2018 and 2019, respectively); to provide broadband service to those locations with speeds of 10 Mbps per second down and 1 Mbps up; to achieve latency of less than 100 milliseconds; to provide data of at least 100 gigabytes per month; and to offer pricing reasonably comparable to pricing in urban areas. The Company met the milestones for 2017 and 2018 and currently is on target to achieve the 2019 milestone for all states where it operates.

The annual FCC price cap filing was made on June 18, 2018 and became effective on July 3, 2018. This filing reflects incorporating the legacy Consolidated and FairPoint holding companies, which changed the revenue threshold and amounts allocated to the price cap subsidiaries. The changes allowed some properties to raise their access recovery charge rates and were offset by a decrease in CAF ICC support. The net impact is an increase of \$1.8 million in support funding for the July 2018 through June 2019 tariff period.

Local Switching Support

In 2015, our subsidiary, FairPoint, which we acquired in July 2017, filed a petition (the "Petition") with the FCC asking the FCC to direct National Exchange Carrier Association ("NECA") to stop subtracting frozen LSS from FairPoint's ICC Eligible Recovery for FairPoint's rate of return ILECs that participate in the NECA pooling process. This issue is unique to rate of return affiliates of price cap carriers because such companies are considered price cap carriers for the FCC's CAF funding, but remain rate of return for ICC purposes. Effective January 1, 2012, FairPoint rate of return ILECs were placed under the price cap CAF Phase I interim support mechanism, whereby the ILECs continued to receive frozen USF support for all forms of USF support received during 2011, including LSS. The rate of return rules for ICC included LSS support in that mechanism as well; therefore, NECA subtracted the frozen LSS support from the ICC Eligible Recovery amounts in accordance with FCC rules prohibiting duplicate recovery. When FairPoint accepted CAF Phase II support effective January 1, 2015, there was no longer any duplicate support and FairPoint requested NECA to stop subtracting LSS from FairPoint's ICC Eligible Recovery. NECA declined to make that change, which led to FairPoint filing the Petition with the FCC asking the FCC to direct NECA to comply with FCC rules on ICC Eligible Recovery for rate of return ILECs. This issue also applies to Consolidated's operations in Minnesota, which are also rate of return ILECs associated with a price cap company. The combined LSS support for

the period from January 1, 2015 through December 31, 2017 was approximately \$12.3 million. Our ongoing ICC Eligible Recovery support for 2018 increased by approximately \$3.6 million, and thereafter, is expected to decline by 5% per year through 2021. On March 31, 2018, we obtained the required votes necessary for an approved order and on April 19, 2018, the FCC issued its order approving our Petition. As a result, during the first quarter of 2018, we recognized subsidies revenue of \$4.9 million and a contingent asset of \$8.4 million as a pre-acquisition gain contingency for the FairPoint LSS revenue prior to the acquisition date.

FCC Rules for Business Data Services

On April 20, 2017, the FCC adopted new rules for Business Data Services (“BDS”) which went into effect on August 1, 2017. BDS services are high speed data services provided on a point to point basis. The rules apply to interstate BDS services in areas served by price cap carriers. Under the new BDS rules, all packet-switched services and all transport services, channel terminations connecting wholesale customers to our networks and end user channel terminations in

Table of Contents

counties deemed competitive are competitive. End user channel terminations for DS0, DS1 and DS3 services are non-competitive in counties deemed by the FCC to be non-competitive, but are eligible for Phase I price flexibility. The FCC published a list of counties deemed competitive and non-competitive. Geographic areas previously under Phase II price flexibility will not be rate regulated for any BDS services.

In our price cap operations, we can continue to offer competitive BDS services under tariff or we can remove the services from tariff. All competitive services must be de-tariffed within three years of the effective date of the BDS rules. We have complete price flexibility for BDS services deemed competitive. As of October 23, 2018, the FCC issued an order giving rate of return carriers the option to elect a similar regulatory framework for their BDS services beginning in July 2019 and we have elected this option for all of our rate of return companies.

BDS services are subject to vigorous competition. We cannot determine the impact of the BDS rules on our revenues or operations.

State Matters

California

In an ongoing proceeding relating to the New Regulatory Framework, the California Public Utilities Commission (“CPUC”) adopted Decision 06-08-030 in 2006, which grants carriers broader pricing freedom in the provision of telecommunications services, bundling of services, promotions and customer contracts. This decision adopted a new regulatory framework, the Uniform Regulatory Framework (“URF”), which among other things (i) eliminates price regulation and allows full pricing flexibility for all new and retail services, (ii) allows new forms of bundles and promotional packages of telecommunication services, (iii) allocates all gains and losses from the sale of assets to shareholders and (iv) eliminates almost all elements of rate of return regulation, including the calculation of shareable earnings. In December 2010, the CPUC issued a ruling to initiate a new proceeding to assess whether, or to what extent, the level of competition in the telecommunications industry is sufficient to control prices for the four largest ILECs in the state. Subsequently, the CPUC issued a ruling temporarily deferring the proceeding. When the CPUC may open this proceeding is unclear and on hold at this time. The CPUC’s actions in this and future proceedings could lead to new rules and an increase in government regulation. The Company will continue to monitor this matter.

New York

With the acquisition of FairPoint, we assumed grants from the NY Broadband Program (the “NYBB”). In 2015, New York established the \$500 million NYBB to provide state grant funding to support projects that deliver high-speed

Internet access to unserved and underserved areas with a goal of achieving statewide broadband access in New York.

FairPoint received and accepted award letters in March 2017 for grant awards totaling \$36.7 million from the NYBB Phase 2 grants. These grants supported, in part, the extension and upgrading of high-speed broadband services to over 10,321 locations in our New York service territory in 2018. We accounted for the Phase 2 reimbursements as a contribution in aid of construction given the nature of the arrangement. During the second quarter of 2017, a bid for Phase 3 grants was submitted by FairPoint, the final phase of the NYBB grants. On January 31, 2018, the state notified us that we were awarded a portion of our Phase 3 bid. However, based on a reduction in the number of locations awarded under the bid, we did not accept the Phase 3 grant.

To be eligible for the grant, the network must be capable of delivering speeds of 100 Mbps or greater in unserved and underserved locations. As a condition of the grant, we are required to offer the NYBB's Required Pricing Tier as a service option to residential users for a period of five years from completion of construction of the network. This pricing requirement will provide for broadband Internet service at minimum speeds of 25/4 Mbps (download/upload).

Table of Contents

FairPoint Merger Requirements

As part of our acquisition of FairPoint, we have regulatory commitments that vary by state, some of which require capital investments in our network over several years through 2020. The requirements include improved data speeds and other service quality improvements in select locations primarily in our northern New England, New York and Illinois markets. In New Hampshire and Vermont, we are required to invest 13% and 14%, respectively, of total state revenues in capital improvements per year for 2018, 2019 and 2020. For our service territory in Maine, we are required to make capital expenditures of \$16.4 million per year from 2018 through 2020. In addition, we are required to invest an incremental \$1.0 million per year in each of these three states for service quality improvements. In New York, we are required to invest \$4.0 million over three years to expand the broadband network to over 300 locations. In Illinois, we were required to invest an additional \$1.0 million by the end of 2018 to increase broadband availability and speeds in areas served by the FairPoint Illinois ILECs. We met all of the regulatory commitments for 2017 and 2018, and we currently expect to achieve all of the regulatory commitments for 2019.

Other Regulatory Matters

We are also subject to a number of regulatory proceedings occurring at the federal and state levels that may have a material impact on our operations. The FCC and state commissions have authority to issue rules and regulations related to our business. A number of proceedings are pending or anticipated that are related to such telecommunications issues as competition, interconnection, access charges, intercarrier compensation, broadband deployment, consumer protection and universal service reform. Some proceedings may authorize new services to compete with our existing services. Proceedings that relate to our cable television operations include rulemakings on set top boxes, carriage of programming, industry consolidation and ways to promote additional competition. There are various on-going legal challenges to the scope or validity of FCC orders that have been issued. As a result, it is not yet possible to fully determine the impact of the related FCC rules and regulations on our operations.

Non-Operating Items

Other Income and Expense, Net

Interest expense, net of interest income, increased \$1.5 million during the quarter ended March 31, 2019 compared to the same period in 2018 primarily due to an increase in variable interest rates in the current year. The increase in interest expense was offset in part by a loss recognized on the change in the fair value of our re-designated interest rate swap agreements during the quarter ended March 31, 2018.

Other income decreased \$0.9 million during the quarter ended March 31, 2019 compared to the same period in 2018 primarily due to an increase in pension and post-retirement expense of \$1.8 million. However, investment income increased \$0.8 million in the current year from our wireless partnership interests.

Income Taxes

The income tax benefit decreased \$1.1 million during the quarter ended March 31, 2019 compared to the same period in 2018. Our effective tax rate was 30.4% and 27.5% for the quarters ended March 31, 2019 and 2018, respectively. The effective tax rate differed from the federal and state statutory rates primarily due to various permanent income tax differences and differences in allocable income for the Company's state tax filings.

Non-GAAP Measures

In addition to the results reported in accordance with US GAAP, we also use certain non-GAAP measures such as EBITDA and adjusted EBITDA to evaluate operating performance and to facilitate the comparison of our historical results and trends. These financial measures are not measures of financial performance under US GAAP and should not be considered in isolation or as a substitute for net income as a measure of performance and net cash provided by operating activities as a measure of liquidity. They are not, on their own, necessarily indicative of cash available to fund cash needs as determined in accordance with GAAP. The calculation of these non-GAAP measures may not be

Table of Contents

comparable to similarly titled measures used by other companies. Reconciliations of these non-GAAP measures to the most directly comparable financial measures presented in accordance with GAAP are provided below.

EBITDA is defined as net earnings before interest expense, income taxes and depreciation and amortization. Adjusted EBITDA is comprised of EBITDA, adjusted for certain items as permitted or required under our credit facility as described in the reconciliations below. These measures are a common measure of operating performance in the telecommunications industry and are useful, with other data, as a means to evaluate our ability to fund our estimated uses of cash.

The following table is a reconciliation of net loss to adjusted EBITDA for the quarters ended March 31, 2019 and 2018:

(In thousands, unaudited)	Quarter Ended March 31,	
	2019	2018
Net loss	\$ (7,186)	\$ (11,198)
Add (subtract):		
Interest expense, net of interest income	34,283	32,716
Income tax benefit	(3,145)	(4,248)
Depreciation and amortization	99,243	107,899
EBITDA	123,195	125,169
Adjustments to EBITDA:		
Other, net (1)	(1,672)	99
Investment distributions (2)	7,290	9,470
Non-cash, stock-based compensation (3)	1,498	678
Adjusted EBITDA	\$ 130,311	\$ 135,416

(1) Includes the equity earnings from our investments, dividend income, income attributable to noncontrolling interests in subsidiaries, acquisition and transaction related costs, including severance, non-cash pension and post-retirement benefits and certain other miscellaneous items.

(2) Includes all cash dividends and other cash distributions received from our investments.

(3) Represents compensation expenses in connection with the issuance of stock awards, which, because of the non-cash nature of these expenses, are excluded from adjusted EBITDA.

Liquidity and Capital Resources

Outlook and Overview

Our operating requirements have historically been funded from cash flows generated from our business and borrowings under our credit facilities. We expect that our future operating requirements will continue to be funded from cash flows from operating activities, existing cash and cash equivalents and, if needed, borrowings under our revolving credit facility and our ability to obtain future external financing. We anticipate that we will continue to use a substantial portion of our cash flow to fund capital expenditures, pay down long-term debt and invest in future business opportunities.

Table of Contents

The following table summarizes our cash flows:

(In thousands)	Three Months Ended	
	March 31, 2019	2018
Cash flows provided by (used in):		
Operating activities	\$ 74,997	\$ 90,842
Investing activities	(52,200)	(60,431)
Financing activities	(25,672)	(34,928)
Decrease in cash and cash equivalents	\$ (2,875)	\$ (4,517)

Cash Flows Provided by Operating Activities

Net cash provided by operating activities was \$75.0 million during the three-month period ended March 31, 2019, a decrease of \$15.8 million compared to the same period in 2018. Cash flows provided by operating activities decreased primarily as a result of a decline in earnings from a reduction in revenue. Cash distributions received from our wireless partnerships also decreased \$2.2 million during the quarter ended March 31, 2019 compared to the same period in 2018. In addition, interest payments increased approximately \$2.6 million from prior year due to an increase in variable interest rates.

Cash Flows Used In Investing Activities

Net cash used in investing activities was \$52.2 million during the three-month period ended March 31, 2019 and consisted primarily of cash used for capital expenditures.

Capital Expenditures

Capital expenditures continue to be our primary recurring investing activity and were \$53.4 million during the three-month period ended March 31, 2019. Capital expenditures for the remainder of 2019 are expected to be \$157.0 million to \$167.0 million, of which approximately 63% is planned for success-based capital projects for consumer and commercial initiatives. Capital expenditures for the remainder of 2019 and subsequent years will depend on various factors, including competition, changes in technology, regulatory changes and the timing in the deployment of new services. We expect to continue to invest in existing and new services and the expansion of our fiber network in order to retain and acquire more customers through a broader set of products and an expanded network footprint.

Cash Flows Used In Financing Activities

Net cash used in financing activities consists primarily of our proceeds from and principal payments on long-term borrowings and the payment of dividends, prior to the elimination of our quarterly dividend payments.

Long-term Debt

Credit Agreement

In October 2016, the Company, through certain of its wholly owned subsidiaries, entered into a Third Amended and Restated Credit Agreement with various financial institutions (as amended, the “Credit Agreement”). The Credit Agreement consists of a \$110.0 million revolving credit facility, an initial term loan in the aggregate amount of \$900.0 million (the “Initial Term Loan”) and an incremental term loan in the aggregate amount of \$935.0 million (the “Incremental Term Loan”), collectively (the “Term Loans”). The Credit Agreement also includes an incremental loan facility which provides the ability to borrow, subject to certain terms and conditions, incremental loans in an aggregate amount of up to the greater of (a) \$300.0 million and (b) an amount which would cause its senior secured leverage ratio not to exceed 3.00:1.00 (the “Incremental Facility”). Borrowings under the Credit Agreement are secured by substantially all of the assets of the Company and its subsidiaries, with the exception of Consolidated Communications of Illinois Company and our majority-owned subsidiary, East Texas Fiber Line Incorporated.

Table of Contents

The Initial Term Loan was issued in an original aggregate principal amount of \$900.0 million with a maturity date of October 5, 2023, but is subject to earlier maturity on March 31, 2022 if the Company's unsecured Senior Notes due in October 2022 are not repaid in full or redeemed in full on or prior to March 31, 2022. The Initial Term Loan contains an original issuance discount of 0.25% or \$2.3 million, which is being amortized over the term of the loan. The Initial Term Loan requires quarterly principal payments of \$2.25 million and has an interest rate of 3.00% plus the London Interbank Offered Rate ("LIBOR") subject to a 1.00% LIBOR floor.

The Incremental Term Loan was issued in an original aggregate principal amount of \$935.0 million and included an original issue discount of 0.50%, which is being amortized over the term of the loan. The Incremental Term Loan has the same maturity date and interest rate as the Initial Term Loan and requires quarterly principal payments of \$2.34 million.

Our revolving credit facility has a maturity date of October 5, 2021 and an applicable margin (at our election) of between 2.50% and 3.25% for LIBOR-based borrowings or between 1.50% and 2.25% for alternate base rate borrowings, in each case depending on our total net leverage ratio. Based on our leverage ratio as of March 31, 2019, the borrowing margin for the three month period ending June 30, 2019 will be at a weighted-average margin of 3.00% for a LIBOR-based loan or 2.00% for an alternate base rate loan. The applicable borrowing margin for the revolving credit facility is adjusted quarterly to reflect the leverage ratio from the prior quarter-end. As of March 31, 2019, borrowings of \$32.0 million were outstanding under the revolving credit facility, which consisted of LIBOR-based borrowings of \$20.0 million and alternate base rate borrowings of \$12.0 million. At December 31, 2018, there were borrowings of \$22.0 million outstanding under the revolving credit facility, which consisted of LIBOR-based borrowings of \$10.0 million and alternate base rate borrowings of \$12.0 million. Stand-by letters of credit of \$16.2 million were outstanding under our revolving credit facility as of March 31, 2019. The stand-by letters of credit are renewable annually and reduce the borrowing availability under the revolving credit facility. As of March 31, 2019, \$61.8 million was available for borrowing under the revolving credit facility.

The weighted-average interest rate on outstanding borrowings under our credit facility was 5.53% and 5.54% as of March 31, 2019 and December 31, 2018, respectively. Interest is payable at least quarterly.

Credit Agreement Covenant Compliance

The Credit Agreement contains various provisions and covenants, including, among other items, restrictions on the ability to pay dividends, incur additional indebtedness and issue certain capital stock. We have agreed to maintain certain financial ratios, including interest coverage and total net leverage ratios, all as defined in the Credit Agreement. As of March 31, 2019, we were in compliance with the Credit Agreement covenants.

In general, our Credit Agreement restricts our ability to pay dividends to the amount of our available cash as defined in our Credit Agreement. As of March 31, 2019, and including the \$27.9 million dividend payable on May 1, 2019, we had \$310.1 million in dividend availability under the credit facility covenant.

Under our Credit Agreement, if our total net leverage ratio, as defined in the Credit Agreement, as of the end of any fiscal quarter is greater than 5.10:1.00, we will be required to suspend dividends on our common stock, should we be making dividend payments as of such time, unless otherwise permitted by an exception for dividends that may be paid from the portion of proceeds of any sale of equity not used to fund acquisitions or make other investments. During any such dividend suspension period, we will be required to repay debt in an amount equal to 50.0% of any increase in available cash, among other things. In addition, we will not be permitted to pay dividends if an event of default under the Credit Agreement has occurred and is continuing. Among other things, it will be an event of default if our total net leverage ratio or interest coverage ratio as of the end of any fiscal quarter is greater than 5.25:1.00 or less than 2.25:1.00, respectively. As of March 31, 2019, our total net leverage ratio under the Credit Agreement was 4.43:1.00, and our interest coverage ratio was 3.85:1.00.

6.50% Senior Notes due 2022

In September 2014, we completed an offering of \$200.0 million aggregate principal amount of 6.50% Senior Notes due in October 2022 (the “Existing Notes”). The Existing Notes were priced at par, which resulted in total gross proceeds of

Table of Contents

\$200.0 million. On June 8, 2015, we completed an additional offering of \$300.0 million in aggregate principal amount of 6.50% Senior Notes due 2022 (the “New Notes” and together with the Existing Notes, the “Senior Notes”). The New Notes were issued as additional notes under the same indenture pursuant to which the Existing Notes were previously issued on in September 2014. The New Notes were priced at 98.26% of par with a yield to maturity of 6.80% and resulted in total gross proceeds of approximately \$294.8 million, excluding accrued interest. The discount is being amortized using the effective interest method over the term of the notes.

The Senior Notes mature on October 1, 2022 and interest is payable semi-annually on April 1 and October 1 of each year. Consolidated Communications, Inc. (“CCI”) is the primary obligor under the Senior Notes, and we and a majority of our wholly owned subsidiaries have fully and unconditionally guaranteed the Senior Notes. The Senior Notes are senior unsecured obligations of the Company.

Senior Notes Covenant Compliance

Subject to certain exceptions and qualifications, the indenture governing the Senior Notes contains customary covenants that, among other things, limits CCI’s and its restricted subsidiaries’ ability to: incur additional debt or issue certain preferred stock; pay dividends or make other distributions on capital stock or prepay subordinated indebtedness; purchase or redeem any equity interests; make investments; create liens; sell assets; enter into agreements that restrict dividends or other payments by restricted subsidiaries; consolidate, merge or transfer all or substantially all of its assets; engage in transactions with its affiliates; or enter into any sale and leaseback transactions. The indenture also contains customary events of default.

Among other matters, the Senior Notes indenture provides that CCI may not pay dividends or make other restricted payments, as defined in the indenture, if its total net leverage ratio is 4.75:1.00 or greater. This ratio is calculated differently than the comparable ratio under the Credit Agreement; among other differences, it takes into account, on a pro forma basis, synergies expected to be achieved as a result of certain acquisitions not yet reflected in historical results. As of March 31, 2019, this ratio was 4.49:1.00. If this ratio is met, dividends and other restricted payments may be made from cumulative consolidated cash flow since April 1, 2012, less 1.75 times fixed charges, less dividends and other restricted payments made since May 30, 2012. Dividends may be paid and other restricted payments may also be made from a “basket” of \$50.0 million, none of which has been used to date, and pursuant to other exceptions identified in the indenture. Since dividends of \$571.8 million have been paid since May 30, 2012, including the quarterly dividend declared in February 2019 and payable on May 1, 2019, there was \$1,145.1 million of the \$1,716.9 million of cumulative consolidated cash flow since May 30, 2012 available to pay dividends as of March 31, 2019. As of March 31, 2019, the Company was in compliance with all terms, conditions and covenants under the indenture governing the Senior Notes.

Finance Leases

We lease certain facilities and equipment under various finance leases which expire between 2019 and 2027. As of March 31, 2019, the present value of the minimum remaining lease commitments was approximately \$27.1 million, of which \$8.7 million was due and payable within the next twelve months. The leases require total remaining rental payments of \$32.4 million as of March 31, 2019, of which \$1.8 million will be paid to LATEL LLC, a related party entity as of March 31, 2019.

Dividends

We paid \$27.6 million and \$27.4 million in dividend payments to stockholders during the three-month periods ended March 31, 2019 and 2018, respectively. In February 2019, our Board of Directors declared a quarterly dividend of \$0.38738 per common share, which is payable on May 1, 2019 to stockholders of record at the close of business on April 15, 2019.

On April 25, 2019, we announced the elimination of the payment of quarterly dividends on our stock beginning in the second quarter of 2019 in order to focus on deleveraging, accelerate our fiber investment strategy as we achieve leverage targets and create long-term value for our stockholders. Future dividend payments, if any, are at the discretion of our Board of Directors. Changes in our dividend program will depend on our earnings, capital requirements, financial

Table of Contents

condition, debt covenant compliance, expected cash needs and other factors considered relevant by our Board of Directors.

Sufficiency of Cash Resources

The following table sets forth selected information regarding our financial condition.

	March 31,	December
(In thousands, except for ratio)	2019	31, 2018
Cash and cash equivalents	\$ 6,724	\$ 9,599
Working capital (deficit)	(89,150)	(85,471)
Current ratio	0.69	0.70

Our net working capital position declined \$3.7 million as of March 31, 2019 compared to December 31, 2018 primarily as a result of an increase in accrued interest related to the timing of the semi-annual interest payments for our Senior Notes. Working capital was also impacted by the adoption on January 1, 2019 of ASU No. 2016-02, Leases, which resulted in the recognition of current lease liabilities of \$6.2 million at March 31, 2019. These reductions in working capital were offset in part by a decline in accounts payable and accrued compensation at March 31, 2019 related to the timing of expenditures.

Our most significant uses of funds in the remainder of 2019 are expected to be for: (i) dividend payments of approximately \$27.9 million for the quarterly dividend that was declared on February 19, 2019 and that is payable on May 1, 2019; (ii) interest payments on our indebtedness of approximately \$107.0 million and principal payments on debt of \$13.8 million; and (iii) capital expenditures of between \$157.0 million and \$167.0 million. In the future our ability to use cash may be limited by our other expected uses of cash and our ability to incur additional debt will be limited by our existing and future debt agreements.

We believe that cash flows from operating activities, together with our existing cash and borrowings available under our revolving credit facility, will be sufficient for at least the next twelve months to fund our current anticipated uses of cash. After that, our ability to fund these expected uses of cash and to comply with the financial covenants under our debt agreements will depend on the results of future operations, performance and cash flow. Our ability to fund these expected uses from the results of future operations will be subject to prevailing economic conditions and to financial, business, regulatory, legislative and other factors, many of which are beyond our control.

We may be unable to access the cash flows of our subsidiaries since certain of our subsidiaries are parties to credit or other borrowing agreements, or are subject to statutory or regulatory restrictions, that restrict the payment of dividends or making intercompany loans and investments, and those subsidiaries are likely to continue to be subject to such restrictions and prohibitions for the foreseeable future. In addition, future agreements that our subsidiaries may enter into governing the terms of indebtedness may restrict our subsidiaries' ability to pay dividends or advance cash in any other manner to us.

To the extent that our business plans or projections change or prove to be inaccurate, we may require additional financing or require financing sooner than we currently anticipate. Sources of additional financing may include commercial bank borrowings, other strategic debt financing, sales of nonstrategic assets, vendor financing or the private or public sales of equity and debt securities. There can be no assurance that we will be able to generate sufficient cash flows from operations in the future, that anticipated revenue growth will be realized or that future borrowings or equity issuances will be available in amounts sufficient to provide adequate sources of cash to fund our expected uses of cash. Failure to obtain adequate financing, if necessary, could require us to significantly reduce our operations or level of capital expenditures which could have a material adverse effect on our financial condition and the results of operations.

Surety Bonds

In the ordinary course of business, we enter into surety, performance and similar bonds as required by certain jurisdictions in which we provide services. As of March 31, 2019, we had approximately \$5.7 million of these bonds outstanding.

Table of Contents

Defined Benefit Pension Plans

As required, we contribute to qualified defined pension plans and non-qualified supplemental retirement plans (collectively the “Pension Plans”) and other post-retirement benefit plans, which provide retirement benefits to certain eligible employees as described in the Note 10 to the Condensed Consolidated Financial Statements, included in this report in Part I – Item 1 “Financial Statements”. Contributions are intended to provide for benefits attributed to service to date. Our funding policy is to contribute annually an actuarially determined amount consistent with applicable federal income tax regulations.

The cost to maintain our Pension Plans and future funding requirements are affected by several factors including the expected return on investment of the assets held by the Pension Plans, changes in the discount rate used to calculate pension expense and the amortization of unrecognized gains and losses. Returns generated on the Pension Plans assets have historically funded a significant portion of the benefits paid under the Pension Plans. We estimate the long-term rate of return on assets will be approximately 7.00%. The Pension Plans invest in marketable equity securities which are exposed to changes in the financial markets. If the financial markets experience a downturn and returns fall below our estimate, we could be required to make a material contribution to the Pension Plans, which could adversely affect our cash flows from operations.

In 2019, we expect to make contributions totaling approximately \$26.3 million to our Pension Plans and \$9.5 million to our other post-retirement benefit plans. As of March 31, 2019, we have contributed \$5.7 million and \$1.9 million to our Pension Plans and our other post-retirement benefit plans, respectively. Our contribution amounts meet the minimum funding requirements as set forth in employee benefit and tax laws.

Income Taxes

The timing of cash payments for income taxes, which is governed by the Internal Revenue Service and other taxing jurisdictions, will differ from the timing of recording tax expense and deferred income taxes, which are reported in accordance with GAAP. For example, tax laws in effect regarding accelerated or “bonus” depreciation for tax reporting resulted in less cash payments than the GAAP tax expense. Acceleration of tax deductions could eventually result in situations where cash payments will exceed GAAP tax expense.

Regulatory Matters

As discussed in the “Regulatory Matters” section above, in December 2014, the FCC released a report and order that significantly impacts the amount of support revenue we receive from the USF, CAF and ICC by redirecting support from voice services to broadband services. The annual funding under CAF Phase I of \$36.6 million was replaced by annual funding under CAF Phase II of \$13.9 million through 2020. With the sale of our Iowa ILEC in 2016, this amount was further reduced to \$11.5 million through 2020. Subsequently, with the acquisition of FairPoint in July 2017, this amount increased to \$48.9 million through 2020. With the sale of our Virginia ILEC in 2018, our annual funding was reduced to \$48.1 million through 2020. The acceptance of CAF Phase II funding at a level lower than the frozen CAF Phase I support results in CAF Phase II Transitional funding over a three year period based on the difference between the CAF Phase I funding and the CAF Phase II funding at the rates of 75% in the first year, 50% in the second year and 25% in the third year.

The Order also modifies the methodology used for ICC traffic exchanged between carriers. As a result of implementing the provisions of the Order, our network access revenue decreased approximately \$0.3 million for the quarter ended March 31, 2019 compared to the same period in 2018. We anticipate that network access revenue will continue to decline as a result of the Order through 2019 by as much as \$1.1 million.

As discussed in the “Regulatory Matters” section above, the LSS matter settled in our favor during the first quarter of 2018. Our ongoing ICC Eligible Recovery support for 2019 is approximately \$3.4 million and is expected to decline by 5% per year through 2021. During the quarter ended March 31, 2019, we recognized subsidies revenue of \$0.9 million related to our ongoing ICC Eligible Recovery support.

Critical Accounting Estimates

Our condensed consolidated financial statements and accompanying notes are prepared in accordance with US GAAP. Preparing financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses. These estimates and assumptions are affected by management's application of accounting policies. Our judgments are based on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making estimates about the carrying values of assets and liabilities that are not readily apparent from other sources. For a full discussion of our accounting estimates and assumptions that we have identified as critical in the preparation of our condensed consolidated financial statements, refer to our 2018 Annual Report on Form 10-K filed with the SEC.

Recent Accounting Pronouncements

For information regarding the impact of certain recent accounting pronouncements, see Note 1 "Summary of Significant Accounting Policies" to the Condensed Consolidated Financial Statements, included in this report in Part I - Item 1 "Financial Statements".

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our exposure to market risk is primarily related to the impact of interest rate fluctuations on our debt obligations. Market risk is the potential loss arising from adverse changes in market interest rates on our variable rate obligations. In order to manage the volatility relating to changes in interest rates, we utilize derivative financial instruments such as interest rate swaps to maintain a mix of fixed and variable rate debt. We do not use derivatives for trading or speculative purposes. Our interest rate swap agreements effectively convert a portion of our floating-rate debt to a fixed-rate basis, thereby reducing the impact of interest rate changes on future cash interest payments. We calculate the potential change in interest expense caused by changes in market interest rates by determining the effect of the hypothetical rate increase on the portion of our variable rate debt that is not subject to a variable rate floor or hedged through the interest rate swap agreements.

As of March 31, 2019, the majority of our variable rate debt was subject to a 1.00% London Interbank Offered Rate floor thereby reducing the impact of fluctuations in interest rates. Based on our variable rate debt outstanding as of March 31, 2019, a 1.00% change in market interest rates would increase or decrease annual interest expense by approximately \$6.7 million.

As of March 31, 2019, the fair value of our interest rate swap agreements amounted to a net liability of \$12.4 million. Total pre-tax deferred losses related to our interest rate swap agreements included in accumulated other comprehensive loss was \$7.0 million as of March 31, 2019.

ITEM 4. CONTROLS AND PROCEDURES

We maintain disclosure controls and procedures as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (“Exchange Act”) that are designed to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is (i) recorded, processed, summarized and reported within the time periods specified in SEC rules and forms and (ii) accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives. In connection with the filing of this Form 10-Q, management evaluated, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, the effectiveness of the design to provide reasonable assurance of achieving their objectives and operation of our disclosure controls and procedures as of March 31, 2019. Based upon that evaluation and subject to the foregoing, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective as of March 31, 2019.

Table of Contents

Changes in Internal Control Over Financial Reporting

Based upon the evaluation performed by our management, which was conducted with the participation of our Chief Executive Officer and Chief Financial Officer, there have been no changes in our internal controls over financial reporting during the quarter ended March 31, 2019 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Limitations on the Effectiveness of Controls

We are responsible for establishing and maintaining adequate internal control over financial reporting. Our internal control systems are designed to provide reasonable assurance to the Company's management, Board of Directors and Audit Committee regarding the reliability of financial reporting and the preparation of published financial statements in accordance with generally accepted accounting principles.

Table of Contents

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

From time to time we may be involved in litigation that we believe is of the type common to companies in our industry, including regulatory issues. While the outcome of these claims cannot be predicted with certainty, we do not believe that the outcome of any of these legal matters will have a material adverse impact on our business, results of operations, financial condition or cash flows. See Note 12 to the Condensed Consolidated Financial Statements, included in this report in Part I - Item 1 “Financial Statements” for a discussion of recent developments related to these legal proceedings.

ITEM 1A. RISK FACTORS

We included in our Annual Report on Form 10-K as of December 31, 2018 a description of certain risks and uncertainties that could affect our business, financial condition, results of operations, cash flows and the trading price of our common stock (“Risk Factors”). The following risk factor was identified in addition to those risk factors presented on Form 10-K as of December 31, 2018.

Discontinuing paying dividends on our common stock could negatively affect holders of our common stock. On April 25, 2019, we announced the decision to eliminate the payment of quarterly dividends on our stock beginning in the second quarter of 2019, as a result of which shares of our common stock could become less liquid, the market price of our common stock could decline and our ability to raise equity capital could be adversely affected. The change in our dividend policy, among other various factors, may have a significant adverse effect on the market price of our common stock which could result in high levels of market volatility. A significant decline in our stock price could have a material adverse impact on our business, financial condition, results of operations and/or liquidity. In addition, we have significant goodwill and other intangibles recorded on our balance sheet. We test that goodwill and other intangibles for impairment on an annual basis or more often if events or changes in circumstances indicate that the carrying values may not be recoverable. The events or changes that could require us to test our goodwill and other intangibles for impairment include a significant and sustained reduction in our stock price and market capitalization and changes in our estimated future cash flows, as well as changes in rates of growth in our industry. If we determine that our goodwill or other intangibles are impaired, we may be required to record a significant charge to earnings that would adversely affect our financial results and could also materially adversely affect our business.
