President's Letter (unaudited)

Dear Fellow Shareholders:

We are pleased to present you with this semi-annual report for Value Line Premier Growth Fund, Inc., The Value Line Mid Cap Focused Fund, Inc., Value Line Income and Growth Fund, Inc. and Value Line Larger Companies Fund, Inc. (individually, a "Fund" and collectively, the "Funds") for the six months ended June 30, 2015.

The six months ended June 30, 2015 were rewarding ones for the equity and hybrid Value Line Funds. Equities generated positive absolute returns, and each Fund outpaced its respective benchmark index on a relative basis during the semi-annual period. The semi-annual period was also highlighted by several of the Funds being recognized for their long-term performance and attractive risk profiles.

- Value Line Premier Growth Fund, Inc. outpaced its peers for the ten-year period ended June 30, 2015, as noted by leading independent mutual fund advisory service Lipper Inc.¹ (multi-cap growth category). Lipper also awarded its top Lipper Leader rating of 5 to the Fund for Preservationⁱ versus its peers overall as of June 30, 2015. Additionally, Morningstar² gave the Fund an overall Risk rating of Below Averageⁱⁱ as of June 30, 2015.

- The Value Line Mid Cap Focused Fund, Inc., formerly The Value Line Fund, Inc., outpaced its peers for the five-year period ended June 30, 2015, as noted by leading independent mutual fund advisory service Lipper Inc.¹ (mid-cap growth category). Additionally, the Fund was given an overall Risk rating of Below Average^{iv} by Morningstar² as of June 30, 2015.

- Value Line Income and Growth Fund, Inc. outpaced its peers for the one-, three-, five- and ten-year periods ended June 30, 2015, as noted by Lipper Inc.¹ (mixed-asset target allocation moderate category). Lipper also awarded its top Lipper Leader rating of 5 to the Fund for Total Returnⁱⁱⁱ and Consistent Returnⁱⁱⁱ versus its peers overall as of June 30, 2015. Additionally, the Fund earned an overall four-star rating from Morningstar² in the moderate allocation category among 815 funds as of June 30, 2015 based on risk-adjusted returns. Morningstar gave the Fund an overall Risk rating of Below Average.^{vi} As of June 2015, Value Line Income and Growth Fund, Inc. remained on the Fund Picks from FidelitySM list.

- Value Line Larger Companies Focused Fund, Inc., formerly Value Line Larger Companies Fund, Inc., outpaced its peers for the one- and three-year periods ended June 30, 2015, as noted by leading independent mutual fund advisory service Lipper Inc.¹ (larger-cap growth category). Lipper also awarded its top Lipper Leader rating of 5 to the Fund for Preservation^v versus its peers overall as of June 30, 2015. Additionally, the Fund was given an overall Risk rating of Below Average^{vii} by Morningstar² as of June 30, 2015.

On the following pages, the Funds' portfolio managers discuss the management of their respective Funds during the semi-annual period. The discussions highlight key factors influencing recent performance of the Funds. You will also find a schedule of investments and financial statements for each of the Funds.

Before reviewing the performance of your individual mutual fund investment(s), we encourage you to take a brief look at the major factors affecting the financial markets during the six months ended June 30, 2015, especially given the newsworthy events of the semi-annual period. With the positive absolute performance results of the Funds during the first half of 2015, we also invite you to take this time to consider a broader diversification strategy by including additional Value Line Funds in your investment portfolio. You can find out more about the entire family of Value Line Funds at our website, www.vlfunds.com.

Economic Review

U.S. real Gross Domestic Product (GDP) got off to a slow start in 2015, contracting at a 0.2% annualized rate from January through March. This was a significant deceleration from the 2.2% pace of U.S. economic growth seen in the

fourth quarter of 2014. The contraction in first quarter GDP was largely a reflection of weak consumer spending in part due to harsh winter weather and in part due to mixed employment data. A sharp drop in exports due to the strong U.S. dollar and a labor strike in west coast ports also contributed to weak first quarter economic growth. While the final GDP numbers for the second quarter of 2015 have not yet been reported as of this writing, most expect modest positive growth, as many of the driving forces of first quarter weakness were widely viewed as temporary.

On the positive side, U.S. unemployment declined from 5.6% at year-end 2014 to 5.3% in June 2015. Despite the declining unemployment rate, the labor picture was not uniformly positive. Job creation slowed toward the end of the semi-annual period, and the labor force participation rate edged down slightly. These mixed labor results contributed to lackluster retail sales, as consumers spent conservatively.

As would be expected in this period of relatively slow economic growth, inflationary pressures remained modest. Consumer prices remained in check, with the headline Consumer Price Index (CPI) rising just 0.1% year over year before seasonal adjustment as of June 2015. This was the first 12-month increase in CPI since December 2014. Core inflation, which excludes food and energy and which is the price measure tied to consumer spending watched most closely by the Federal Reserve (the Fed), was up 1.8% in June 2015 from a year earlier. Notably, while the food segment of the CPI increased 1.8% during the 12 months ended June 2015, the energy segment of the CPI, despite rising in the months of May and June 2015, declined 15.0% over the same 12-month span.

The Fed continued to monitor inflation, as well as unemployment and other key market data, still looking for signs of inflation heading toward its desired 2% target. Inflationary pressures could be re-kindled should wage pressures build from declining

TABLE OF CONTENTS

President's Letter (unaudited) (continued)

unemployment. However, through June 2015, the Fed left the targeted federal funds rate unchanged near zero. At its June 2015 meeting, the Fed hinted that U.S. rates were still on track to increase later this year, though a shift lower in Fed officials' economic growth and inflation forecasts signaled a potential delay, extending forecasts for an initial rate hike to late 2015. Fed Chair Janet Yellen maintained a cautious tone at the Fed's press conference, noting the Fed would raise short-term interest rates only gradually, with the precise timing of "lift off," or its first rate hike, heavily dependent on data and developments.

Equity Market Review

U.S. equities, as measured by the S&P 500® Index³, gained 1.23% during the six months ended June 30, 2015. While representing the S&P 500® Index's weakest first-half performance since 2010, the modest gain still marked ten consecutive calendar quarters of positive returns for the broad U.S. equity market. The S&P 500® Index was volatile but showed its resiliency despite a backdrop of modest global economic growth, a contraction in the U.S. economy during the first calendar quarter, a potential Greek exit from the euro, and both an economic slowdown and equity market retreat in China. The U.S. equity market found support from the low interest rate environment and generally improving economic data, including a drop in the national unemployment rate and a better housing market, among other factors. Throughout, the U.S. equity market focused on the timing of the first interest rate increase by the Fed. Given these oppositional and somewhat cloudy market forces, sector performance within the S&P 500® Index was widely divergent during the semi-annual period, with five sectors posting positive returns and five posting negative returns. Growth-oriented stocks were favored.

Utilities was the worst performing sector in the S&P 500® Index during the semi-annual period. The utilities sector tends to be highly interest rate sensitive, and thus the sector sold off in anticipation of a Fed interest rate hike at some point in 2015. The energy sector also declined — based primarily on crude oil price weakness early in 2015.

Conversely, market participants perceived the combination of lower energy prices, better employment prospects and an improving housing market as beneficial for consumers. In anticipation of increasing consumption, the consumer discretionary sector performed especially well during the semi-annual period. Health care was the best performing sector in the S&P 500® Index during the semi-annual period, benefiting from healthy business fundamentals and an increase in mergers and acquisitions.

Fixed Income Market Review

The broad U.S. fixed income market, as measured by the Barclays U.S. Aggregate Bond Index⁴, posted a return of -0.10% during the semi-annual period. The yield curve steepened, as longer-term yields (i.e. securities with maturities of seven years and longer) rose, while shorter-term maturities (i.e. securities with maturities of less than seven years) ended the semi-annual period with lower rates. A steepening yield curve is one in which the differential in yields of securities with various maturities widens. The yield on the two-year U.S. Treasury bill declined approximately three basis points, while the yield on the bellwether 10-year U.S. Treasury note rose approximately 18 basis points and the yield on the 30-year U.S. Treasury increased approximately 36 basis points during the semi-annual period. (A basis point is 1/100th of a percentage point.)

Much of the shift in interest rates derived from investor expectations that the Fed would delay its first rate hike. The concern was that should rates stay "lower for longer," the lack of Fed action would serve to increase inflation. In turn, expectations for potentially higher inflation led to an increase in rates at the longer-term end of the yield curve, or spectrum of maturities, despite the realization of only lackluster inflation measures. Amidst this backdrop, investors were attracted to securities offering higher yields. High yield corporate bonds performed best relative to U.S.

Treasuries, followed at some distance by securitized bonds, including mortgage-backed securities, asset-backed securities and commercial mortgage-backed securities. The securitized sector overall tends to be more defensive than U.S. Treasuries in an environment of modest rate increases and thus tends to outperform. Investment grade corporate bonds lagged U.S. Treasuries during the semi-annual period.

While it was difficult at times to get a clear picture of U.S. economic strength, investors strongly focused on the Fed's announcements and the likelihood of the first interest rate hike some time in 2015. The Greek crisis added another level of uncertainty to the markets. Still, as a whole, new issue supply was met with generally good demand.

1

Lipper Rankings represent the funds' ranking within its Lipper asset class peer group and are based on total return performance and do not reflect the effect of sales charges. Although a fund may outperform peers when compared to Lipper peer groups, the returns for that time period may still be negative. Rankings shown include management fees and are provided by Lipper Inc., a leading independent performance analysis service. This information is provided for educational purposes only and should not be considered investment advice. Lipper ratings are not intended to predict future results, and Lipper does not guarantee the accuracy of this information. Past performance is no guarantee of future results. Lipper Leader ratings are derived from highly sophisticated formulas that analyze funds against clearly defined criteria. Funds are compared to similar funds, and only those that trust stand out are awarded Lipper Leader status. Funds are ranked against their peers on each of four measures: Total Return, Consistent Return, Preservation and Expense. A fifth measure, Tax Efficiency, applies in the United States. Scores are subject to change every month and are calculated for the following periods: 3-year, 5-year, 10-year and overall. The overall calculation is based on an equal-weighted average of percentile ranks for each measure over 3-year, 5-year and 10-year periods (if applicable). For each measure, the highest 20% of funds in each peer group are named Lipper Leaders. The next 20% receive a rating of 4; the middle 20% are rated 3; the next 20% are rated 2; and the lowest 20% are rated 1.

i

For Value Line Premier Growth Fund, Inc.: Preservation 5 rating for 3-year (11,330 funds), 5-year (9,364 funds), 10-year (5,759 funds) and Overall (11,330 funds) periods ended June 30, 2015.

iii

For Value Line Income and Growth Fund, Inc.: Total Return 5 rating for 3-year (520 funds), 5-year (431 funds), 10-year (296 funds) and overall (520 funds) periods ended June 30, 2015. Consistent Return 5 rating for 3-year (518 funds), 5-year (429 funds), 10-year (294 funds) and Overall (518 funds) periods ended June 30, 2015.

v

For Value Line Larger Companies Focused Fund, Inc.: Preservation 5 rating for 3-year (11,330 funds), 5-year (9,364) funds, 10-year (5,759 funds) and Overall (11,330 funds) periods ended June 30, 2015.

2

The Morningstar Rating™ for funds methodology rates funds based on an enhanced Morningstar Risk-Adjusted Return measure, which also accounts for the effects of all sales charges, loads, or redemption fees. Funds are ranked by their Morningstar Risk-Adjusted Return scores and stars are assigned using the following scale: 5 stars for top 10%; 4 stars next 22.5%; 3 stars next 35%; 2 stars next 22.5%; 1 star for bottom 10%. Funds are rated for up to three periods: the trailing three-, five- and 10-years. For a fund that does not change categories during the evaluation period, the overall rating is calculated using the following weights: At least 3 years, but less than 5 years uses 100% three-year rating. At least 5 years but less than 10 years uses 60% five-year ratings/40% three-year rating. At least 10 years uses 50% ten-year rating/30% five-year rating/20% three-year rating.

3

The S&P 500® Index consists of 500 stocks that are traded on the New York Stock Exchange, American Stock Exchange and the NASDAQ national Market System and is representative of the broad stock market. This is an unmanaged index and does not reflect charges, expenses or taxes, and it is not possible to directly invest in this index.

4

The Barclays U.S. Aggregate Bond Index is a broad-based benchmark that measures the investment grade, U.S. dollar-denominated, fixed-rate taxable bond market, including U.S. Treasuries, government-related and corporate securities, MBS (agency fixed-rate and hybrid ARM pass-throughs), ABS and CMBS. This is an unmanaged index and does not reflect charges, expenses or taxes, which are deducted from the Fund's return. It is not possible to directly invest in this index.

5

TABLE OF CONTENTS

VALUE LINE PREMIER GROWTH FUND, INC.

INVESTMENT OBJECTIVE AND STRATEGY (condensed)

The Fund primarily seeks long-term growth of capital.

To achieve the Fund's goal, the Fund's investment adviser EULAV Asset Management (the "Adviser") invests at least 80% of the Fund's net assets in a diversified portfolio of U.S. equity securities with favorable growth prospects. In selecting securities for purchase or sale, the Adviser generally analyzes the issuer of a security using fundamental factors such as growth potential and earnings estimates and quantitative factors such as historical earnings, earnings momentum and price momentum. The Fund may invest in small, mid or large capitalization companies, including foreign companies. There are no set limitations of investments according to a company's size, or to a sector weighting.

Manager Discussion of Fund Performance

Below, Value Line Premier Growth Fund, Inc. portfolio manager Stephen E. Grant discusses the Fund's performance and positioning for the six months ended June 30, 2015.

How did the Fund perform during the semi-annual period?

The Fund generated a total return of 2.30% during the six months ended June 30, 2015. This compares to the 1.23% return of the Fund's benchmark, the S&P 500® Index, during the same semi-annual period.

What key factors were responsible for the Fund's performance during the six-month reporting period?

The Fund outpaced the S&P 500® Index during the six-month reporting period due primarily to effective stock selection. Sector allocation decisions overall also contributed positively, albeit more modestly.

Two currents in the U.S. equity market during the semi-annual period served as tailwinds to the Fund's favorable relative results. First, small- and mid-cap stocks outperformed large-cap stocks. Second, growth-oriented stocks outperformed value-oriented stocks. Less than half of the Fund's holdings are large-cap stocks and very few would be considered mega-cap stocks; rather mid-cap stock holdings predominate. Further, the Fund leans more toward growth than value, though we do not exclude value. In contrast, the S&P 500® Index is weighted toward the largest-cap stocks and is, by definition, composed half of growth stocks and half of value stocks.

Which equity market sectors most significantly affected Fund performance?

Stock selection in the information technology sector proved most effective. The Fund held overweighted positions in specialty consumer finance company Fiserv, application software provider Salesforce.com and aerospace and defense systems manufacturer Ansys, whose shares each saw double-digit gains during the semi-annual period. The Fund also benefited from avoiding the weak semiconductor industry, wherein Intel, Qualcomm and Micron Technology each suffered double-digit share price declines, and from not holding positions in software giant Microsoft and computer hardware leader Hewlett-Packard, whose shares also fell during the semi-annual period. Only partially offsetting these positive contributions was not owning Apple, whose shares rose significantly and thus the lack of a position in the sector behemoth detracted.

Stock selection was also favorable to the Fund's results in the financials, consumer staples and industrials sectors, wherein each sector the S&P 500® Index lost ground while the Fund gained. In financials, the Fund benefited from double-digit share price advances from holdings Indian bank HDFC Bank and insurance company Arch Capital Group, while it avoided diversified conglomerate Berkshire Hathaway, whose shares declined. In consumer staples, the Fund avoided positions in household products manufacturer Procter & Gamble and discount retailer Wal-Mart Stores, whose shares each dropped, while it benefited from a notable gain in alcoholic beverage manufacturer Brown-Forman. In industrials, positions in lighting and control systems producer Acuity Brands and pest control services provider Rollins were particularly strong performers.

Partially offsetting these positive contributors was stock selection in the consumer discretionary and health care sectors, which detracted. In consumer discretionary, the Fund's results were hampered by not owning e-commerce retailer Amazon.com, entertainment content giant The Walt Disney Co. or Internet entertainment subscription service Netflix, each of whose shares rose substantially during the semi-annual period. In health care, not owning a position in biopharmaceutical company Gilead Sciences hurt, as its shares rose. Having an overweight position in life science equipment provider Idexx Laboratories, whose shares declined, also dampened performance.

What were some of the Fund's best-performing individual stocks?

Among the individual stocks that contributed most to the Fund's relative results were several already mentioned — Acuity Brands and Rollins each gained on strong quarterly earnings reports. HDFC Bank, which was a top performer in 2014, advanced further in the first half of 2015 as investors continued to regain confidence in the economy of India. The Fund also benefited from several stocks it did not own, including integrated oil company Exxon Mobil and consumer staples company Procter & Gamble, each of which saw its share price fall on weak quarterly operating results.

TABLE OF CONTENTS

Which stocks detracted significantly from the Fund's performance during the semi-annual period?

During the semi-annual period, not holding a position in information technology giant Apple was the largest relative detractor, as it was also in 2014. Also, not holding a position in Amazon.com detracted significantly. The Fund was also hurt by profit-taking in the railroad industry, where weaker than expected operating results sent the shares of Kansas City Southern, Canadian National Railway and Union Pacific, in each of which the Fund held a position, down.

How did the Fund use derivatives and similar instruments during the reporting period?

The Fund did not use derivatives during the reporting period.

Did the Fund make any significant purchases or sales during the semi-annual period?

During the semi-annual period, we established new Fund positions in integrated pharmacy health care provider CVS Health, life science equipment developer Illumina and application software developer Intuit, in each case based on strong quarterly earnings reports and the companies' consistent long-term record of superior earnings and stock price gains.

We sold the Fund's positions in supplement insurance company AFLAC, sporting goods retailer Dick's Sporting Goods and pollution control equipment manufacturer Donaldson. In each case, the elimination of the position from the Fund's portfolio was due to some erosion in its long-term track record of earnings and stock price growth rates.

Were there any notable changes in the Fund's weightings during the six-month period?

There were no material changes in the Fund's sector weightings during the six-month period ended June 30, 2015.

How was the Fund positioned relative to its benchmark index at the end of June 2015?

As of June 30, 2015, the Fund was overweighted relative to the S&P 500® Index in the industrials and materials sectors. The Fund was underweighted relative to the S&P 500® Index in the information technology, financials and energy sectors and was rather neutrally weighted relative to the Index in the consumer discretionary, consumer staples, health care, utilities and telecommunication services sectors on the same date.

What is your tactical view and strategy for the months ahead?

Regardless of market conditions, we intend to stay true to our time-tested investment discipline going forward, seeking to invest in companies that have demonstrated a solid history of consistent growth in both their earnings and stock price. In our view, these companies possess attractive portfolios of proprietary products and services that give them strong market positions and make them less vulnerable to swings in national and international economic conditions. At the same time, we believe the underlying stocks of these companies tend to be less volatile than the average stock in the S&P 500® Index. By maintaining our investment discipline, the Fund has historically provided a smoother ride to investors than its peer group averages. Putting aside short-term ebbs and flows in the equity market, we believe the Fund's investments are likely to provide superior returns to our shareholders over the long term.

TABLE OF CONTENTS

VALUE LINE MID CAP FOCUSED FUND, INC.

INVESTMENT OBJECTIVE AND STRATEGY (condensed)

The Fund's primary investment objective is long-term growth of capital. Current income is a secondary investment objective.

To achieve the Fund's investment objectives EULAV Asset Management (the "Adviser") invests substantially all of the Fund's net assets in common stocks. Under normal circumstances, the Adviser expects that the Fund's portfolio will generally consist of positions in 30 to 50 companies. The Adviser invests at least 80% of the Fund's assets in common stocks and other equity securities of mid-sized companies. The Fund considers companies to be mid-sized if they have market capitalizations within the range of issuers represented in the S&P MidCap 400 Index. While the Fund is actively managed by the Adviser, the Adviser relies primarily on the rankings of companies by the Value Line Timeliness™ Ranking System (the "Ranking System") in selecting securities for purchase or sale. The Adviser will determine the percentage of the Fund's assets invested in each stock based on the stock's relative attractiveness. The Adviser may sell securities for a variety of reasons, such as to secure gains, limit losses or redeploy assets into more promising opportunities.

Manager Discussion of Fund Performance

Effective April 1, 2015, The Value Line Fund, Inc. was renamed The Value Line Mid Cap Focused Fund. Below, The Value Line Mid Cap Focused Fund, Inc. portfolio manager Stephen E. Grant discusses the Fund's performance and positioning for the six months ended June 30, 2015.

How did the Fund perform during the semi-annual period?

The Fund generated a total return of 2.88% during the six months ended June 30, 2015. This compares to the 1.23% return of the Fund's benchmark, the S&P 500® Index, during the same semi-annual period.

What key factors were responsible for the Fund's performance during the six-month reporting period?

The Fund outpaced the S&P 500® Index during the six-month reporting period due primarily to effective stock selection. Sector allocation decisions overall also contributed positively, albeit more modestly.

Two currents in the U.S. equity market during the semi-annual period served as tailwinds to the Fund's favorable relative results. First, small- and mid-cap stocks outperformed large-cap stocks. Second, growth-oriented stocks outperformed value-oriented stocks. Less than one-fifth of the Fund's holdings are large-cap stocks and none would be considered mega-cap stocks; rather mid-cap stock holdings predominate. Further, the Fund leans more toward growth than value, though we do not exclude value. In contrast, the S&P 500® Index is weighted toward the largest-cap stocks and is, by definition, composed half of growth stocks and half of value stocks.

Which equity market sectors most significantly affected Fund performance?

Stock selection in industrials, information technology and energy contributed most positively to the Fund's performance during the semi-annual period. Having an underweighted allocation to the energy sector, which posted a negative return during the semi-annual period, also helped. In industrials, positions in pest control services provider Rollins and tool and equipment manufacturer Snap-on were particularly strong performers. In information technology, the Fund held overweighted positions in specialty consumer finance company Fiserv, payment processing and information management services provider to the U.S. commercial and government vehicle fleet industry WEX and application software developer Ultimate Software Group, whose shares each saw double-digit gains during the semi-annual period. The Fund also benefited from avoiding the weak semiconductor industry. In energy, the Fund held only one position, natural gas-focused integrated energy company EQT, whose shares rose amidst a generally losing sector.

Partially offsetting these positive contributors was weak stock selection in and having underweighted allocations to the two strongest sectors in the S&P 500® Index during the semi-annual period — health care and consumer discretionary. In health care, having an overweight position in life science equipment provider Idexx Laboratories, whose shares declined, dampened performance. Also, not owning a position in biopharmaceutical company Gilead Sciences hurt, as its shares rose. In consumer discretionary, the Fund's results were hampered most by not owning e-commerce retailer Amazon.com and entertainment content giant The Walt Disney Co., each of whose shares rose substantially during the semi-annual period.

What were some of the Fund's best-performing individual stocks?

Among the individual stocks that contributed most to the Fund's relative results were several already mentioned — Rollins, Snap-on, Fiserv and WEX, which each saw gains driven by strong quarterly earnings reports. Other especially strong performers during the semi-annual period included cooking equipment manufacturer Middleby and construction materials manufacturer Carlisle Companies.

TABLE OF CONTENTS

VALUE LINE MID CAP FOCUSED FUND, INC.

(continued)

Which stocks detracted significantly from the Fund's performance during the semi-annual period?

During the semi-annual period, the Fund was hurt by its positions in railroad Kansas City Southern, application software company Open Text, and Idexx Laboratories, whose shares fell, each caused by weaker than expected quarterly earnings. Not holding a position in information technology giant Apple, whose shares saw double-digit gains during the semi-annual period, further detracted.

How did the Fund use derivatives and similar instruments during the reporting period?

The Fund did not use derivatives during the reporting period.

Did the Fund make any significant purchases or sales during the semi-annual period?

During the semi-annual period, no new positions were established, but we added to several names in the Fund's portfolio, most notably industrial, medical and specialty gas distributor Airgas, life science equipment manufacturer Danaher and aerospace products manufacturer HEICO. In each case, the positions were increased in recognition of the company's strong long-term track records of both earnings and stock price growth.

Early in 2015, we eliminated four positions from the Fund's portfolio — flow control equipment supplier Graco, aerospace and defense products supplier Esterline Technologies, trucking services provider JB Hunt Transport Services and corn refiner Ingredion. While there were no company-specific problems with any of these stocks, they simply did not make our list of "best ideas," as we completed the transition to a mid-cap focused fund with 45 names in the Fund's portfolio, down from 49 at the start of 2015 and down from 135 held at June 30, 2014.

Were there any notable changes in the Fund's weightings during the six-month period?

There were no material changes in the Fund's sector weightings during the six-month period ended June 30, 2015.

How was the Fund positioned relative to its benchmark index at the end of June 2015?

As of June 30, 2015, the Fund was overweighted relative to the S&P 500® Index in the industrials, materials and consumer staples sectors. The Fund was underweighted relative to the S&P 500® Index in the financials, energy and consumer discretionary sectors and was rather neutrally weighted relative to the Index in the information technology, health care, telecommunication services and utilities sectors on the same date.

What is your tactical view and strategy for the months ahead?

Regardless of market conditions, we intend to stay true to our time-tested investment discipline going forward, seeking to invest in companies that have demonstrated a solid history of consistent growth in both their earnings and stock price. In our view, these companies possess attractive portfolios of proprietary products and services that give them strong market positions and make them less vulnerable to swings in national and international economic conditions. At the same time, we believe the underlying stocks of these companies tend to be less volatile than the average stock in the S&P 500® Index. By maintaining our investment discipline, the Fund has historically provided a smoother ride to investors than its peer group averages. Putting aside short-term ebbs and flows in the equity market, we believe the Fund's investments are likely to provide superior returns to our shareholders over the long term.

VALUE LINE INCOME AND GROWTH FUND, INC.

INVESTMENT OBJECTIVE AND STRATEGY (condensed)

The Fund's investment objective is income, as high and dependable as is consistent with reasonable risk, and capital growth to increase total return.

To achieve the Fund's goals, EULAV Asset Management (the "Adviser") invests not less than 50% of the Fund's net assets in common or preferred stocks or securities convertible into common stock which may or may not pay dividends. The balance of the Fund's net assets are primarily invested in U.S. government securities, money market securities and investment grade debt securities rated at the time of purchase from the highest (AAA) to medium (BBB) quality. Although the Fund can invest in companies of any size, it generally invests in U.S. securities issued by larger, more established companies (those with a market capitalization of more than \$5 billion).

Manager Discussion of Fund Performance

Below, Value Line Income and Growth Fund, Inc. portfolio managers Cynthia Starke, Stephen E. Grant and Liane Rosenberg discuss the Fund's performance and positioning for the six months ended June 30, 2015.

How did the Fund perform during the semi-annual period?

The Fund generated a total return of 1.13% during the six months ended June 30, 2015. This compares to the 0.70% return of the Fund's blended benchmark, comprised 60% of the S&P 500® Index and 40% of the Barclays U.S.

Aggregate Bond Index (the Barclays Index), during the same semi-annual period.

What key factors were responsible for the Fund's performance during the six-month reporting period?

The Fund benefited from being overweighted equities and underweighted fixed income throughout the six-month reporting period. With U.S. equities, as measured by the S&P 500® Index, up 1.23% during the semi-annual period, and bonds, as measured by the Barclays Index, posting a return of -0.10%, this asset allocation clearly added value.

Security selection overall within all asset classes — equity, fixed income and convertibles — also proved beneficial. Within the equity portion of the Fund, having larger weightings in the better performing sectors helped as well. However, the Fund's allocation to cash equivalents during a period of an equity market gain, albeit a modest one, was a slight drag on the Fund's relative performance.

Which equity market sectors most significantly affected Fund performance?

Stock selection in the information technology and materials sectors contributed most positively to the Fund's results. Having overweighted allocation to health care and consumer discretionary, the two best performing sectors in the S&P 500® Index during the semi-annual period, and having underweighted allocations to utilities and energy, the two weakest performing sectors in the S&P 500® Index during the semi-annual period, also boosted relative results. Detracting most from relative results was stock selection in the consumer discretionary, industrials, energy, consumer staples and telecommunication services sectors. There were no significant detractors from a sector allocation perspective during the semi-annual period.

What were some of the Fund's best-performing individual stocks?

Contributing most to the Fund's relative results were Internet media company IAC/InterActive, specialty coffee retailer Starbucks and ski mountain resort operator Vail Resorts. IAC/InterActive, which is not a component of the S&P 500® Index, saw its shares gain significantly, and thus it was a strong relative contributor. Its shares rose on better than expected earnings reports and on the company's announced plans to pursue an Initial Public Offering of The Match Group, one of its assets, which specializes in online dating services, during the fourth quarter of 2015. Shares of Starbucks rose on better than expected earnings results. Vail Resorts saw its share price increase substantially on solid results, despite less than ideal weather conditions for skiing this season. We added to the Fund's positions in IAC/Interactive and Vail Resorts during the semi-annual period.

Which stocks detracted significantly from the Fund's performance during the semi-annual period?

During the semi-annual period, the stocks that detracted most from the Fund's performance were Michael Kors Holdings, Micron Technology and Delta Air Lines. Michael Kors Holdings, which is a global luxury lifestyle brand operating in retail, wholesale and licensing, saw its shares decline during the semi-annual period on lower than expected U.S. same-store sales. We added to the Fund's position in Michael Kors Holdings, as we felt that, despite the disappointment, its shares were undervalued given the company's growth prospects. Shares of semiconductor device manufacturer Micron Technology declined on disappointing results, and we opted to add to the Fund's position on its

share price weakness based on our view of the company's prospects ahead. Airline stocks broadly underperformed during the semi-annual period on worries about higher levels of competition in the U.S. market — despite the tailwind of lower fuel costs. Delta Air Lines was no exception. We added to the Fund's position in Delta Air Lines during the semi-annual period given our view that such worries would be temporary.

15

TABLE OF CONTENTS

VALUE LINE INCOME AND GROWTH FUND, INC. (continued)

Did the equity portion of the Fund make any significant purchases or sales?

During the semi-annual period, among the positions we initiated was Vertex Pharmaceuticals, whose shares we purchased opportunistically when the biotechnology industry experienced some broad-based weakness. Vertex Pharmaceuticals is a leading U.S.-based large-cap biotechnology firm with a dominant and expanding focus on therapies targeting cystic fibrosis (CF). The company recently received Food and Drug Administration (FDA) approval for Orkambi, the first treatment approved for homozygous F508del patients, which targets approximately 35% to 40% of CF patients. We believe that Orkambi may well be a significant driver for Vertex Pharmaceuticals' revenues, earnings and share price in the coming years.

We established a Fund position in HanesBrands on a pullback in its share price during the semi-annual period. HanesBrands is a leading manufacturer and marketer of basic apparel. HanesBrands owns a collection of well-known brands that include Hanes, Champion, Bali and Maidenform.

We sold the Fund's position in Las Vegas Sands, a global company with a leading position in integrated resort development and operation. As gaming revenues in Las Vegas Sand's important region of Macau remained under pressure, we felt such a headwind would continue to impact earnings results and its share price going forward.

We exited the Fund's position in cable and satellite company Time Warner Cable after Charter Communications made an offer to acquire the company. This was after Comcast dropped its acquisition bid.

Were there any notable changes in the equity portion of the Fund's weightings during the six-month period?

During the semi-annual period, we decreased weightings relative to the S&P 500® Index in the financials, industrials and utilities sectors, and we increased relative positions in the consumer discretionary, health care and information technology sectors.

How was the equity portion of the Fund positioned relative to its benchmark index at the end of June 2015?

As of June 30, 2015, the Fund was overweighted relative to the S&P 500® Index in the consumer discretionary, health care and information technology sectors. The Fund was underweighted relative to the S&P 500® Index in the financials, energy, consumer staples and utilities sectors and was rather neutrally weighted to the S&P 500® Index in the industrials, materials and telecommunication services sectors on the same date.

What was the duration strategy of the fixed income portion of the Fund?

Duration positioning in the fixed income portion of the Fund had a positive effect on its performance relative to the Barclays Index during the reporting period. We kept the Fund's duration short that of the Barclays Index by approximately 1/3 year, which helped, as rates generally rose. Duration is a measure of the Fund's sensitivity to changes in interest rates.

Which fixed income market segments most significantly affected Fund performance?

The fixed income portion of the Fund's position in and issue selection among corporate bonds, both investment grade and high yield, was the strongest positive contributor to its relative performance. Investors were attracted to their relatively higher yields in a time of still relatively low rates. The biggest detractors from the fixed income portion of the Fund's results were U.S. Treasuries. While an underweighting at the long-term end of the U.S. Treasury yield curve, where rates rose most steeply, added to performance, an underweighting in intermediate-term U.S. Treasuries materially detracted, as this segment of the yield curve ended the semi-annual period with lower rates.

Were there any notable changes in the fixed income portion of the Fund's weightings during the six-month period?

During the semi-annual period, we reduced the fixed income portion of the Fund's allocation to long-term U.S. Treasury securities in anticipation of a rising rate environment. We also reduced exposure to short-term U.S. Treasury securities, reallocating those proceeds into asset-backed securities. We increased the fixed income portion of the Fund's position in high yield corporate bonds in anticipation of a strengthening global economy. These shifts in sector weightings were implemented without notable effect on duration but enabled the fixed income portion of the Fund to gain incremental income.

How was the fixed income portion of the Fund positioned relative to its benchmark index at the end of June 2015?

At the end of June 2015, the fixed income portion of the Fund remained overweight relative to the Barclays Index in spread, or non-U.S. Treasury, sectors. The fixed income portion of the Fund was overweight the investment grade corporate bond sector and maintained exposure to the high yield corporate bond sector. The fixed income portion of

the Fund was also overweight the securitized sector overall, specifically asset-backed securities and commercial mortgage-backed securities, but had an underweight to mortgage-backed securities. The fixed income portion of the Fund remained underweight relative to the Barclays Index in U.S. Treasuries given our focus on enhancing investment income.

TABLE OF CONTENTS

How did the Fund's overall asset allocation shift from beginning to end of the semi-annual period?

At the end of December 2014, the Fund had a weighting of 73.4% in stocks, 0.5% in bonds convertible into common stocks, 20.8% in fixed income securities and 5.3% in cash equivalents. Some changes during the first half of 2015 were based on active management decisions. For example, we sought to take advantage of pullback opportunities during this volatile period in the equity market to reduce the Fund's cash balance and use the monies to increase the Fund's overall exposure to equities. We also eliminated the Fund's minimal exposure to convertible bonds, as we found what we considered to be better capital appreciation and income opportunities in shares of common stocks. Other changes were due to appreciation of equities. At June 30, 2015, the Fund had a weighting of 78.1% in stocks, 0% in bonds convertible into common stocks, 21.3% in fixed income securities and 0.6% in cash equivalents.

How did the Fund use derivatives and similar instruments during the reporting period?

The Fund did not use derivatives during the reporting period.

What is your tactical view and strategy for the months ahead?

With short-term interest rates and inflation still low and with the Federal Reserve (the Fed) endorsing a conservative path of interest rate increases, we believe there are many stocks that offer attractive dividend income and capital appreciation potential. Thus, we intend to continue to seek to build a diversified equity portfolio of high quality companies with good balance sheets and cash flow generation, led by vetted management teams. We also intend to continue to monitor closely the pace of economic growth, the job market and the inflation rate, as these factors, along with potential changes to the Fed's stance on the economy and its timeline for raising interest rates, are likely to impact the Fund's equity holdings. In the fixed income portion of the Fund, we intend to position for a gradual rise in rates. This includes an overweight to spread sectors, as U.S. Treasuries tend to underperform in a rising rate environment. We also intend to maintain a modest presence in high yield corporate bonds given our expectations for a strengthening U.S. economy. Based on our view of return potential across asset classes, we remained comfortable at the end of the semi-annual period with the Fund's overweighted allocation to equities and underweighted allocation to fixed income. As always, our goal is to preserve capital in the near term while generating solid total return (i.e., income plus capital appreciation) over the long term and across economic cycles.

TABLE OF CONTENTS

VALUE LINE LARGER COMPANIES FOCUSED FUND, INC.

INVESTMENT OBJECTIVE AND STRATEGY (condensed)

The Fund's sole investment objective is to realize capital growth.

To achieve the Fund's investment objective EULAV Asset Management (the "Adviser") invests substantially all of the Fund's assets in common stock. Under normal circumstances, the Adviser expects that the Fund's portfolio will generally consist of positions in 30 to 50 companies. While the Fund is actively managed by the Adviser, the Adviser relies primarily on the rankings of companies by the Value Line Timeliness™ Ranking System (the "Ranking System") in selecting securities for purchase or sale. The Fund's investments usually, as measured by the number and total value of purchases, are selected from common stocks of larger companies by capitalization that are ranked 1, 2, or 3 by the Ranking System. The Adviser will determine the percentage of the Fund's assets invested in each stock based on the stock's relative attractiveness.

Manager Discussion of Fund Performance

Effective April 1, 2015, Value Line Larger Companies Fund, Inc. was renamed Value Line Larger Companies Focused Fund. Below, Value Line Larger Companies Focused Fund, Inc. portfolio manager Cynthia Starke discusses the Fund's performance and positioning for the six months ended June 30, 2015.

How did the Fund perform during the semi-annual period?

The Fund generated a total return of 5.97% during the six months ended June 30, 2015. This compares to the 1.23% return of the Fund's benchmark, the S&P 500® Index, during the same semi-annual period.

What key factors were responsible for the Fund's performance during the six-month reporting period?

The Fund outperformed the S&P 500® Index during the six-month reporting period, attributable primarily to effective stock selection. The Fund's focus on large-cap growth stocks particularly helped, as growth stocks outperformed value stocks during the reporting period. Also, while sector allocation as a whole had a rather neutral impact, an emphasis on faster growing sectors of the market, such as health care and consumer discretionary, boosted relative results.

Which equity market sectors most significantly affected Fund performance?

Effective stock selection in the health care, consumer staples and energy sectors contributed most positively to the Fund's performance. Having an overweighted allocation to health care, which was the strongest performing sector in the S&P 500® Index during the semi-annual period, and an underweighted allocation to energy, which was the second weakest sector in the S&P 500® Index during the semi-annual period, also helped.

Partially offsetting these positive contributors was stock selection in the industrials, materials and consumer discretionary sectors, which detracted.

What were some of the Fund's best-performing individual stocks?

The individual stocks that contributed most to the Fund's relative results were specialty coffee retailer Starbucks, clinical-stage biopharmaceutical company Pharmacyclics and interactive entertainment software developer Activision Blizzard. Shares of Starbucks and Activision Blizzard each rose on better than expected earnings results. We modestly trimmed the Fund's position in each on strength. The Fund's holding in Pharmacyclics was a short-lived one, but a well-timed one. After we initiated a position in the Fund in January 2015, its shares rose sharply upon receiving a buyout offer from AbbVie in March 2015, valuing the company at \$21 billion. We subsequently sold the Fund's position in Pharmacyclics, taking profits.

Which stocks detracted significantly from the Fund's performance during the semi-annual period?

During the semi-annual period, the stocks that detracted most from the Fund's performance were Michael Kors Holdings, Micron Technology and Delta Air Lines. Michael Kors Holdings, which is a global luxury lifestyle brand operating in retail, wholesale and licensing, saw its shares decline during the semi-annual period on lower than expected U.S. same-store sales. We added to the Fund's position in Michael Kors Holdings, as we felt that, despite the disappointment, its shares were undervalued given the company's growth prospects. Shares of semiconductor device manufacturer Micron Technology declined on disappointing results, and we opted to add to the Fund's position on its share price weakness based on our view of the company's prospects ahead. Airline stocks broadly underperformed during the semi-annual period on worries about higher levels of competition in the U.S. market — despite the tailwind of lower fuel costs. Delta Air Lines was no exception. We added to the Fund's position in Delta Air Lines during the semi-annual period given our view that such worries would be temporary.

How did the Fund use derivatives and similar instruments during the reporting period?
The Fund did not use derivatives during the reporting period.

27

TABLE OF CONTENTS

VALUE LINE LARGER COMPANIES FOCUSED FUND, INC.

(continued)

Did the Fund make any significant purchases or sales during the semi-annual period?

During the semi-annual period, we initiated a Fund position in investment services firm Charles Schwab. We believe that Charles Schwab is well positioned to grow its earnings in the coming years and stands to benefit from higher interest rates. We established a Fund position in Netflix on a pullback in its share price and before it reported its first calendar quarter earnings in April 2015. Netflix is the world's leading Internet television network, with more than 42 million subscribers in the U.S. and approximately 23 million subscribers internationally. We believe Netflix has a virtually open-ended opportunity to target television subscribers from around the globe.

We sold the Fund's position in oil and gas exploration and production company EOG Resources, as we were concerned about the impact of lower oil prices on its current and future earnings. We eliminated the Fund's positions in two health care companies — Pharmacyclics, mentioned earlier, and Salix Pharmaceuticals, after each of these companies received a buyout offer during the semi-annual period. Pharmacyclics agreed to be acquired by AbbVie, and Salix Pharmaceuticals agreed to be acquired by Valeant Pharmaceuticals.

Were there any notable changes in the Fund's weightings during the six-month period?

During the six-month period ended June 30, 2015, we increased the Fund's weightings relative to the S&P 500® Index in the consumer discretionary and financials sectors and decreased the Fund's relative weightings in the energy and information technology sectors.

How was the Fund positioned relative to its benchmark index at the end of June 2015?

As of June 30, 2015, the Fund was overweighted relative to the S&P 500® Index in the consumer discretionary, health care and information technology sectors. The Fund was underweighted relative to the S&P 500® Index in the financials, energy, industrials, consumer staples and materials sectors on the same date. The Fund had no exposure to the utilities and telecommunication services sectors at the end of June 2015.

What is your tactical view and strategy for the months ahead?

On a macro level, the U.S. economy appears to be improving overall, and we saw this at the end of the semi-annual period in important data points ranging from a strengthening labor market, with unemployment down to 5.3%, to consumer spending in May 2015 increasing .9%, a six-year high.

That said, as we look toward the second half of 2015, regardless of economic or market conditions, we intend to continue to look for and to emphasize leading larger-capitalization growth stocks that generally are ranked in the higher categories of 1, 2 or 3 in the Value Line Timeliness™ Ranking System. As of June 30, 2015, a majority of the Fund's assets were in stocks that met these criteria. We intend to seek investments in a diversified but focused portfolio of high quality companies that we believe are well positioned to grow sales and earnings over the next few years, regardless of the pace of economic growth or the interest rate environment. As always, our goal is to generate solid returns through capital growth across market cycles.

TABLE OF CONTENTS

Notes to Financial Statements (unaudited)

1. Significant Accounting Policies

Value Line Premier Growth Fund, Inc., Value Line Mid Cap Focused Fund, Inc., Value Line Income and Growth Fund, Inc., and Value Line Larger Companies Focused Fund, Inc. (individually a “Fund” and collectively, the “Funds”) are each registered under the Investment Company Act of 1940, as amended, as diversified, open-end management investment companies. The primary investment objective of the Value Line Premier Growth Fund, Inc. and Value Line Mid Cap Focused Fund, Inc. is long-term growth of capital. The primary investment objective of the Value Line Income and Growth Fund, Inc. is income, as high and dependable as is consistent with reasonable risk and capital growth to increase total return. The sole investment objective of the Value Line Larger Companies Focused Fund, Inc. is to realize capital growth. The Value Line Funds (the “Value Line Funds”) is a family of 12 mutual funds that includes a wide range of solutions designed to meet virtually any investment goal and consists of a variety of equity, fixed income, and hybrid funds.

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results may differ from those estimates. The following is a summary of significant accounting policies consistently followed by the Funds in the preparation of their financial statements.

(A) Security Valuation: Securities listed on a securities exchange are valued at the closing sales prices on the date as of which the net asset value (“NAV”) is being determined. Securities traded on the National Association of Securities Dealers Automated Quotations (“NASDAQ”) Stock Market are valued at the NASDAQ Official Closing Price. In the absence of closing sales prices for such securities and for securities traded in the over-the-counter market, the security is valued at the midpoint between the latest available and representative asked and bid prices. Short-term instruments with maturities of 60 days or less at the date of purchase are valued at amortized cost, which approximates fair value. Short-term instruments with maturities greater than 60 days at the date of purchase are valued at the midpoint between the latest available and representative asked and bid prices, and commencing 60 days prior to maturity such securities are valued at amortized cost.

Investments in shares of open-end mutual funds, including money market funds, are valued at their daily NAV which is calculated as of the close of regular trading on the NYSE (usually 4:00 P.M. Eastern Standard Time) on each day on which the NYSE is open for business. NAV per share is determined by dividing the Fund’s total net assets by the Fund’s total number of shares outstanding at the time of calculation.

The Board of Directors (the “Board”) has determined that the value of bonds and other fixed income corporate securities be calculated on the valuation date by reference to valuations obtained from an independent pricing service that determines valuations for normal institutional-size trading units of debt securities, without exclusive reliance upon quoted prices. This service takes into account appropriate factors such as institutional-size trading in similar groups of securities, yield, quality, coupon rate, maturity, type of issue, trading characteristics and other market data in determining valuations. Bonds and fixed income securities are valued at the evaluated bid on the date as of which the NAV is being determined. Securities, other than bonds and other fixed income securities, not priced in this manner are valued at the midpoint between the latest available and representative asked and bid prices, or when stock valuations are used, at the latest quoted sale price as of the regular close of business of the New York Stock Exchange (“NYSE”) on the valuation date.

The Board has adopted procedures for valuing portfolio securities in circumstances where market quotes are not readily available, and has delegated the responsibility for applying the valuation methods to the Adviser. A valuation committee (the “Valuation Committee”) was established by the Board to oversee the implementation of the Funds’ valuation methods and to make fair value determinations on behalf of the Board, as instructed. The Adviser monitors the continued appropriateness of methods applied and determines if adjustments should be made in light of market changes, events affecting the issuer, or other factors. If the Adviser determines that a valuation method may no longer be appropriate, another valuation method may be selected, or the Valuation Committee will be convened to consider the matter and take any appropriate action in accordance with procedures set forth by the Board. The Board shall

review the appropriateness of the valuation methods and these methods may be amended or supplemented from time to time by the Valuation Committee. In addition, the Funds may use the fair value of a security when the closing market price on the primary exchange where the security is traded no longer reflects the value of a security due to factors affecting one or more relevant securities markets or the specific issuer.

TABLE OF CONTENTS

June 30, 2015

(B) Fair Value Measurements: The Funds follow fair valuation accounting standards (FASB ASC 820-10) which establishes a definition of fair value and set out a hierarchy for measuring fair value. These standards require additional disclosures about the various inputs and valuation techniques used to develop the measurements of fair value and a discussion of changes in valuation techniques and related inputs during the period. These inputs are summarized in the three broad levels listed below:

- Level 1 — Inputs that reflect unadjusted quoted prices in active markets for identical assets or liabilities that the Fund has the ability to access at the measurement date;
- Level 2 — Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly, including inputs in markets that are not considered to be active;
- Level 3 — Inputs that are unobservable.

Transfers between investment levels may occur as the markets fluctuate and/or the availability of data used in an investment's valuation changes. The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The Funds follow the updated provisions surrounding fair value measurements and disclosures on transfers in and out of all levels of the fair value hierarchy on a gross basis and the reasons for the transfers as well as to disclosures about the valuation techniques and inputs used to measure fair value for investments that fall in either Level 2 or Level 3 of the fair value hierarchy.

For the six months ended June 30, 2015, there were no transfers between Level 1, Level 2, and Level 3 assets for each fund.

The Funds' policy is to recognize transfers between levels at the beginning of the reporting period.

The amounts and reasons for all transfers in and out of each level within the three-tier hierarchy are disclosed when the Funds had an amount of total transfers during the reporting period that were meaningful in relation to their net assets as of the end of the reporting period (e.g. greater than 1%). An investment asset's or liability's level within the fair value hierarchy is based on the lowest level input, individually or in aggregate, that is significant to fair value measurement. The objective of fair value measurement remains the same even when there is a significant decrease in the volume and level of activity for an asset or liability and regardless of the valuation techniques used.

For the six months ended June 30, 2015, there were no Level 3 investments for each fund. The Schedule of Investments includes a breakdown of the Funds' investments by category.

(C) Repurchase Agreements: Each Fund may enter into repurchase agreements, under the terms of a Master Repurchase Agreement, with selected commercial banks and broker-dealers, under which the Funds acquire securities as collateral and agrees to resell the securities at an agreed upon time and at an agreed upon price. Each Fund, through the custodian or a sub-custodian, receives delivery of the underlying securities collateralizing repurchase agreements. The Funds' custodian takes possession of the underlying collateral securities, the value of which exceeds the principal amount of the repurchase transaction, including accrued interest. To the extent that any repurchase transaction exceeds one business day, it is the Funds' policy to mark-to-market the value of the underlying securities daily to ensure the adequacy of the collateral. In the event of default by either the seller or the Funds, the Master Repurchase Agreement may permit the non-defaulting party to net and close out all transactions. The Funds have the right to liquidate the collateral and apply the proceeds in satisfaction of the obligation. Under certain circumstances, in the event of default or bankruptcy by the other party to the agreement, realization and/or retention of the collateral or proceeds may be subject to legal proceedings. At period end, there were no open repurchase agreements for the Value Line Funds.

(D) Federal Income Taxes: It is the policy of each Fund to continue to qualify as a regulated investment company by complying with the provisions available to regulated investment companies, as defined in applicable sections of the

Internal Revenue Code, and to distribute all of their investment income and capital gains to their shareholders. Therefore, no provision for federal income tax is required.

TABLE OF CONTENTS

Notes to Financial Statements (unaudited) (continued)

As of June 30, 2015, and for all open tax years, management has analyzed the Funds' tax positions taken on federal and state income tax returns, and has concluded that no provision for federal or state income tax is required in the Funds' financial statements. The Funds' federal and state income tax returns for tax years for which the applicable statutes of limitations have not expired are subject to examination by the Internal Revenue Service and the state departments of revenue.

(E) Security Transactions and Distributions: Security transactions are accounted for on the date the securities are purchased or sold. Realized gains and losses on sales of securities are calculated for financial accounting and federal income tax purposes on the basis of first in first out convention ("FIFO"). Dividend income and distributions to shareholders are recorded on the ex-dividend date. Distributions are determined in accordance with income tax regulations, which may differ from generally accepted accounting principles. Interest income, adjusted for the amortization of discount and premium, is earned from settlement date and recognized on the accrual basis. Gains and losses realized on prepayments received on mortgage-related securities are recorded as interest income.

The dividends and distributions were as follows:

	Six Months Ended June 30, 2015 (unaudited)	Year Ended December 31, 2014
Value Line Premier Growth Fund, Inc.		
Dividends per share from net investment income	\$ 0.0000	\$ 0.0059
Distributions per share from net realized gains	\$ 0.0000	\$ 2.4421
Value Line Mid Cap Focused Fund, Inc.		
Dividends per share from net investment income	\$ 0.0000	\$ 0.0063
Value Line Income and Growth Fund, Inc.		
Dividends per share from net investment income	\$ 0.0368	\$ 0.1147
Distributions per share from net realized gains	\$ 0.0000	\$ 1.3457
Value Line Larger Companies Focused Fund, Inc.		
Dividends per share from net investment income	\$ 0.0000	\$ 1.0600
Distributions per share from net realized gains	\$ 0.0000	\$ 3.3972

Income dividends and capital gains distributions are automatically reinvested in additional shares of the Fund unless the shareholder has requested otherwise. Income earned by the Fund on weekends, holidays and other days on which the Fund is closed for business is declared as a dividend on the next day on which the Fund is open for business. The Value Line Income and Growth Fund, Inc. distributes all of its net investment income quarterly and the Value Line Premier Growth Fund, Inc., the Value Line Mid Cap Focused Fund, Inc., and the Value Line Larger Companies Focused Fund, Inc. distribute all of their net investment income annually. Net realized capital gains if any, are distributed to shareholders annually or more frequently if necessary to comply with the Internal Revenue Code.

(F) Foreign Currency Translation: The books and records of the Funds are maintained in U.S. dollars. Assets and liabilities which are denominated in foreign currencies are translated to U.S. dollars at the prevailing rates of exchange at the valuation date. The Funds do not isolate changes in the value of investments caused by foreign exchange rate differences from the changes due to other circumstances.

Income and expenses are translated to U.S. dollars based upon the rates of exchange on the respective dates of such transactions.

Net realized foreign exchange gains or losses arise from currency fluctuations realized between the trade and settlement dates on securities transactions, the differences between the U.S. dollar amounts of dividends, interest, and foreign withholding taxes recorded by the Funds, and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in the value of assets and liabilities, other

than investments, at the end of the fiscal period, resulting from changes in the exchange rates. The effect of the change in foreign exchange rates on the value of investments is included in realized gain/(loss) on investments and change in net unrealized appreciation/(depreciation) on investments.

40

TABLE OF CONTENTS

June 30, 2015

(G) Representations and Indemnifications: In the normal course of business, the Funds enter into contracts that contain a variety of representations and warranties which provide general indemnifications. The Funds' maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Funds that have not yet occurred. However, based on experience, management expects the risk of loss to be remote.

(H) Accounting for Real Estate Investment Trusts: The Funds own shares of Real Estate Investment Trusts ("REITs") which report information on the source of their distributions annually. Distributions received from REITs during the year which represent a return of capital are recorded as a reduction of cost and distributions which represent a capital gain dividend are recorded as a realized long-term capital gain on investments.

(I) Foreign Taxes: The Funds may be subject to foreign taxes on income, gains on investments, or currency repatriation, a portion of which may be recoverable. The Funds will accrue such taxes and recoveries as applicable, based upon its current interpretation of tax rules and regulations that exist in the markets in which it invests.

(J) Securities Lending: Under an agreement with State Street Bank & Trust ("State Street"), the Funds can lend their securities to brokers, dealers and other financial institutions approved by the Board. By lending their investment securities, the Funds attempt to increase their net investment income through receipt of interest on the loan. Any gain or loss in the market price of the securities loaned that might occur and any interest or dividends declared during the term of the loan would accrue to the account of the Funds. Risks of delay in recovery of the securities or even loss of rights in the collateral may occur should the borrower of the securities fail financially. Generally, in the event of a counter-party default, the Funds have the right to use the collateral to offset the losses incurred. The lending fees received and the Funds' portion of the interest income earned on the cash collateral are included in the Statements of Operations.

Upon entering into a securities lending transaction, the Funds receive cash or other securities as collateral in an amount equal to or exceeding 102% of the current market value of the loaned securities. Any cash received as collateral is invested by State Street Global Advisors, acting in its capacity as securities lending agent (the "Agent"), in the Value Line Funds collateral account, which is subsequently invested into joint repurchase agreements and/or State Street Navigator Securities Lending Prime Portfolio. When the Funds invest the cash collateral in the State Street Navigator Securities Lending Prime Portfolio, a portion of the dividends received on the collateral is rebated to the borrower of the securities and the remainder is split between the Agent and the Funds.

The Funds enter into joint repurchase agreements whereby their uninvested cash collateral from securities lending is deposited into a joint cash account with other funds managed by the Adviser and may be used to invest in one or more repurchase agreements. The value and face amount of the joint repurchase agreement are allocated to the funds based on their pro-rata interest in the repurchase agreement. A repurchase agreement is accounted for as a loan by the funds to the seller, collateralized by securities which are delivered to the Fund's custodian. The market value, including accrued interest, of the initial collateralization is required to be at least 102% of the dollar amount invested by the funds, with the value of the underlying securities marked-to-market daily to maintain coverage of at least 100%. Investments made with the cash collateral are disclosed on the Schedules of Investments.

As of June 30, 2015, the Value Line Funds were not invested in joint repurchase agreements.

As of June 30, 2015, the Funds loaned securities which were collateralized by cash which was reinvested into the State Street Navigator Securities Lending Prime Portfolio as disclosed on the Schedule of Investments. The value of the securities on loan and the value of the related collateral were as follows:

Fund	Value of Securities Loaned	Value of Collateral	Total Collateral (including Calculated Mark)*
Value Line Premier Growth Fund, Inc.	\$ 6,783,057	\$ 6,922,235	\$ 6,933,302
Value Line Mid Cap Focused Fund, Inc.	2,447,609	2,508,484	2,497,988
Value Line Income and Growth Fund, Inc.	13,666,624	13,893,850	13,977,508

Edgar Filing: Value Line Mid Cap Focused Fund, Inc. - Form N-CSRS

Value Line Larger Companies Focused Fund, Inc.	9,154,850	9,235,125	9,345,625
--	-----------	-----------	-----------

*

Balances represent the end of day mark-to-market of securities lending collateral that will be reflected by the Funds as of the next business day.

TABLE OF CONTENTS

Notes to Financial Statements (unaudited) (continued)

(K) Options: The Value Line Income and Growth Fund, Inc.'s investment strategy allows the use of options. The Fund utilizes options to hedge against changes in market conditions or to provide market exposure while trying to reduce transaction costs.

When the Fund writes a put or call option, an amount equal to the premiums received is included on the Statement of Assets and Liabilities as a liability. The amount of the liability is subsequently marked-to-market to reflect the current market value of the option. If an option expires on its stipulated expiration date or if the Fund enters into a closing purchase transaction, a gain or loss is realized. If a written call option on an individual security is exercised, a gain or loss is realized for the sale of the underlying security, and the proceeds from the sale are increased by the premium originally received. If a written put option on an individual security is exercised, the cost of the security acquired is decreased by the premium originally received. As a writer of an option, a Fund bears the market risk of an unfavorable change in the price of the individual security underlying the written option. Additionally, written call options may involve the risk of limited gains.

The Fund may also purchase put and call options. When a Fund purchases a put or call option, an amount equal to the premium paid is included on the Fund's Statement of Assets and Liabilities as an investment, and is subsequently marked-to-market to reflect the current market value of the option. If an option expires on the stipulated expiration date or if the Fund enters into a closing sale transaction, a gain or loss is realized. If the Fund exercises a call option on an individual security, the cost of the security acquired is increased by the premium paid for the call. If the Fund exercises a put option on an individual security, a gain or loss is realized from the sale of the underlying security, and the proceeds from such a sale are decreased by the premium originally paid. Written and purchased options are non-income producing securities.

As of June 30, 2015, the Value Line Income and Growth Fund, Inc. had no open options contracts.

(L) Subsequent Events: Management has evaluated all subsequent transactions and events through the date on which these financial statements were issued and has determined that no additional items require adjustment to or disclosure in the financial statements.

2. Investment Risks

Securities issued by U.S. Government agencies or government-sponsored enterprises may not be guaranteed by the U.S. Treasury. The Government National Mortgage Association ("GNMA" or "Ginnie Mae"), a wholly-owned U.S. Government corporation, is authorized to guarantee, with the full faith and credit of the U.S. Government, the timely payment of principal and interest on securities issued by institutions approved by GNMA and backed by pools of mortgages insured by the Federal Housing Administration or guaranteed by the Department of Veterans Affairs. Government-related guarantors (i.e., not backed by the full faith and credit of the U.S. Government) include the Federal National Mortgage Association ("FNMA" or "Fannie Mae") and the Federal Home Loan Mortgage Corporation ("FHLMC" or "Freddie Mac"). Pass-through securities issued by FNMA are guaranteed as to timely payment of principal and interest by FNMA, but are not backed by the full faith and credit of the U.S. Government. FHLMC guarantees the timely payment of interest and ultimate collection of principal, but its participation certificates are not backed by the full faith and credit of the U.S. Government.

3. Purchases and Sales of Securities

Purchases and sales of securities, excluding short-term investments, were as follows:

Fund	Purchases of Investment Securities	Sales of Investment Securities	Purchases of U.S. Government Agency Obligations	Sales of U.S. Government Agency Obligations
Value Line Premier Growth Fund, Inc.	\$ 34,682,214	\$ 47,530,249	\$ 0	\$ 0
Value Line Mid Cap Focused Fund, Inc.	12,667,270	13,688,566	0	0
Value Line Income and Growth Fund, Inc.	73,123,883	41,308,578	6,116,084	2,911,756
	27,867,040	33,633,813	0	0

4. Income Taxes

At June 30, 2015, information on the tax components of capital is as follows:

Fund	Cost of investments for tax purposes	Gross tax unrealized appreciation	Gross tax unrealized depreciation	Net tax unrealized appreciation/ (depreciation) on investments
Value Line Premier Growth Fund, Inc.	\$ 191,754,323	\$ 181,933,402	\$ (909,272)	\$ 181,024,130
Value Line Mid Cap Focused Fund, Inc.	93,957,044	32,570,253	(373,174)	32,197,079
Value Line Income and Growth Fund, Inc.	350,555,977	60,763,463	(8,064,993)	52,698,470
Value Line Larger Companies Focused Fund, Inc.	187,412,665	59,984,033	(9,614,533)	50,369,500

5. Investment Advisory Fee, Service and Distribution Fees and Transactions With Affiliates

Advisory fees of \$1,392,366, \$429,778, \$1,275,372 and \$852,710 for the Value Line Premier Growth Fund, Inc., Value Line Mid Cap Focused Fund, Inc., Value Line Income and Growth Fund, Inc. and Value Line Larger Companies Focused Fund, Inc., respectively, were paid or payable to the Adviser for the six months ended June 30, 2015. For the Value Line Premier Growth Fund, Inc. and Value Line Larger Companies Focused Fund, Inc. advisory fees were computed at an annual rate of 0.75% of the daily net assets during the period. For Value Line Mid Cap Focused Fund, Inc. and Value Line Income and Growth Fund, Inc. advisory fees were computed at an annual rate of 0.70% of the first \$100 million of the Fund's average daily net assets plus 0.65% of the excess thereof. The Funds' advisory fees are paid monthly. The Adviser provides research, investment programs, and supervision of the investment portfolio and pays costs of administrative services, office space, equipment and compensation of administrative, bookkeeping, and clerical personnel necessary for managing the affairs of the Funds. The Adviser also provides persons, satisfactory to the Funds' Board, to act as officers and employees of the Funds and pays their salaries.

The Funds have a Service and Distribution Plan (the "Plan"), adopted pursuant to Rule 12b-1 under the Investment Company Act of 1940, which compensates EULAV Securities LLC (the "Distributor") for advertising, marketing and distributing the Funds' shares and for servicing the Funds' shareholders at an annual rate of 0.25% of the Funds' average daily net assets. For the six months ended June 30, 2015, fees amounting to \$464,122, \$155,763, \$480,991 and \$284,237 before fee waivers for the Value Line Premier Growth Fund, Inc., Value Line Mid Cap Focused Fund, Inc., Value Line Income and Growth Fund, Inc. and Value Line Larger Companies Focused Fund, Inc., respectively, were accrued under this Plan. Effective May 1, 2009, and voluntarily renewed annually through July 31, 2013, the Distributor contractually agreed to waive Value Line Mid Cap Growth Fund, Inc.'s 12b-1 fee by 0.25%; effective August 1, 2013, the Distributor discontinued to waive Value Line Mid Cap Growth Fund, Inc.'s 12b-1 fee. Effective March 1, 2009, and voluntarily renewed annually, the Distributor contractually agreed to reduce the fee for the Value Line Income and Growth Fund, Inc. by 0.05%; effective July 1, 2014, the Distributor discontinued to waive Value Line Income and Growth Fund, Inc.'s 12b-1 fee. Effective May 1, 2007, and voluntarily renewed annually through July 31, 2013, the Distributor contractually agreed to waive Value Line Larger Companies Focused Fund, Inc.'s 12b-1 fee by 0.25%; effective August 1, 2013 and voluntarily renewed annually, the Distributor contractually agreed to waive the Value Line Larger Companies Focused Fund, Inc.'s 12b-1 fee by 0.10%. The Value Line Larger Companies Focused Fund, Inc. fees waived amounted to \$113,695 for the six months ended June 30, 2015. The Distributor has no right to recoup previously waived amounts.

Effective July 5, 2012, the Value Line Premier Growth Fund, Inc., Value Line Mid Cap Focused Fund, Inc., Value Line Income and Growth Fund, Inc. and Value Line Larger Companies Focused Fund, Inc. have a Sub-Transfer Agent Plan (the "sub TA plan") which compensates financial intermediaries that provide sub-transfer agency and related services to investors that hold their Fund shares in omnibus accounts maintained by the financial intermediaries with

the Funds. The sub-transfer agency fee, which may be paid directly to the financial intermediary or indirectly via the Distributor, is equal to the lower of (i) the aggregate amount of additional transfer agency fees and expenses that the Funds would otherwise pay to the transfer agent if each subaccount in the omnibus account maintained by the financial intermediary with the Funds were a direct account with the Funds and (ii) the amount by which the fees charged by the financial intermediary for including the Funds on its platform

TABLE OF CONTENTS

Notes to Financial Statements (unaudited) (continued)

and providing shareholder, sub-transfer agency and related services exceed the amount paid under the Funds' Plan with respect to each Fund's assets attributable to shares held by the financial intermediary in the omnibus account. In addition, the amount of sub-transfer agency fees payable by the Fund's to all financial intermediaries in the aggregate is subject to a maximum cap of 0.05% of each Fund's average daily net assets. If the sub-transfer agency fee is paid to financial intermediaries indirectly via the Distributor, the Distributor does not retain any amount thereof and such fee otherwise reduces the amount that the Distributor is contractually obligated to pay to the financial intermediary. For the six months ended June 30, 2015, fees amounting to \$41,942, \$3,153, \$31,227 and \$5,531 for the Value Line Premier Growth Fund, Inc., Value Line Mid Cap Focused Fund, Inc., Value Line Income and Growth Fund, Inc. and Value Line Larger Companies Focused Fund, Inc., respectively, were paid under the sub TA plan.

Each Fund bears direct expenses incurred specifically on its behalf while common expenses of the Value Line Funds are allocated proportionately based upon each Fund's respective net assets. The Funds bear all other costs and expenses.

Certain officers and a trustee of the Adviser are also officers and a director of the Funds. At June 30, 2015, the officers and directors of the Value Line Premier Growth Fund, Inc., Value Line Mid Cap Focused Fund, Inc., Value Line Income and Growth Fund, Inc. and Value Line Larger Companies Focused Fund, Inc., as a group owned less than 1% of the outstanding shares of each Fund.

6. New Accounting Pronouncements

In June 2014, the Financial Accounting Standards Board issued Accounting Standards Update (ASU) No. 2014-11. Transfers and Servicing (Topic 860), Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures. The ASU changes the accounting for certain repurchase agreements and expands disclosure requirements related to repurchase agreements, securities lending, repurchase-to-maturity and similar transactions. The ASU is effective for interim and annual reporting periods beginning after December 15, 2014. Management has reviewed the requirements and believes the adoption of this ASU will not have a material impact on the financial statements.

In May 2015, the Financial Accounting Standards ("FASB") issued ASU 2015-07 entitled Fair Value Measurement (Topic 820) — Disclosures for Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent) which is intended to address the diversity in practice of how investments measured at the fair value with redemption dates in the future (including periodic redemption dates) are categorized within the fair value hierarchy. ASU 2015-07 is effective for interim and annual reporting periods in fiscal years that begin after December 15, 2015. At this time, management is evaluating the implications of ASU 2015-07 and its impact to financial statements.

TABLE OF CONTENTS

Fund Expenses (unaudited)

Example

As a shareholder of the Funds, you incur ongoing costs, including management fees, distribution and service (12b-1) fees, and other Fund expenses. This Example is intended to help you understand your ongoing costs (in dollars) of investing in each Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period (January 1, 2015 through June 30, 2015).

Actual Expenses

The first line of the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line for each Fund under the heading "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The second line of the table below provides information about hypothetical account values and hypothetical expenses based on the Funds' actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Funds' actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as sales charges (loads), redemption fees, or exchange fees. Therefore, the table is useful in comparing ongoing costs only and will not help you determine the relative total costs of owning different funds. In addition, if transactional costs were included, your costs would have been higher.

	Beginning account value 1/1/15	Ending account value 6/30/15	Expenses paid during the period 1/1/15 thru 6/30/15*
Actual			
Value Line Premier Growth Fund, Inc.	\$ 1,000.00	\$ 1,023.10	\$ 6.22
Value Line Mid Cap Focused Fund, Inc.	1,000.00	1,028.80	6.24
Value Line Income and Growth Fund, Inc.	1,000.00	1,011.30	5.64
Value Line Larger Companies Focused Fund, Inc.	1,000.00	1,059.70	5.72
Hypothetical (5% return before expenses)			
Value Line Premier Growth Fund, Inc.	1,000.00	1,018.65	6.21
Value Line Mid Cap Focused Fund, Inc.	1,000.00	1,018.65	6.21
Value Line Income and Growth Fund, Inc.	1,000.00	1,019.19	5.66
Value Line Larger Companies Focused Fund, Inc.	1,000.00	1,019.24	5.61

*

Expenses are equal to the Funds' annualized expense ratio of 1.24%, 1.24%, 1.13% and 1.12%, respectively, multiplied by the average account value over the period, multiplied by 181/365 to reflect the one-half year period. These expense ratios may differ from the expense ratios shown in the Financial Highlights.

TABLE OF CONTENTS

Semi-Annual Report

FACTORS CONSIDERED BY THE BOARD IN APPROVING CONTINUANCE OF THE INVESTMENT ADVISORY AGREEMENT FOR VALUE LINE PREMIER GROWTH FUND, INC., VALUE LINE MID CAP FOCUSED FUND, INC., VALUE LINE INCOME AND GROWTH FUND, INC., AND VALUE LINE LARGER COMPANIES FOCUSED FUND, INC.

The Investment Company Act of 1940 (the “1940 Act”) requires the Boards of Directors (the “Board”) of Value Line Mid Cap Focused Fund, Inc., Value Line Income and Growth Fund, Inc., Value Line Larger Companies Focused Fund, Inc., and Value Line Premier Growth Fund, Inc. (each, a “Fund” and collectively, the “Funds”), including a majority of each Board’s Directors who are not “interested persons,” as that term is defined in the 1940 Act (the “Independent Directors”), to annually consider the continuance of each Fund’s investment advisory agreement (each, an “Agreement”) with its investment adviser, EULAV Asset Management (the “Adviser”).

In considering whether the continuance of a Fund’s Agreement was in the best interests of such Fund and its shareholders, the Board requested, and the Adviser provided, such information as the Board deemed to be reasonably necessary to evaluate the terms of such Agreement. At meetings held throughout the year, including the meeting specifically focused upon the review of each Agreement, the Independent Directors met in executive sessions separately from the non-Independent Director of the Funds and any officers of the Adviser. In selecting the Adviser and approving the continuance of each Agreement, the Independent Directors relied upon the assistance of counsel to the Independent Directors.

Both in the meeting specifically focused upon the review of the Agreements and at other meetings, the Board, including the Independent Directors, received materials relating to the Adviser’s investment and management services under the Agreements. These materials included information for each Fund regarding: (i) the Fund’s investment performance, performance-related metrics and risk-related related metrics over various periods of time and comparisons thereof to similar information regarding the Fund’s benchmark index, the Fund’s category of comparable funds (the “Category”) (as objectively classified, selected and prepared by Morningstar, Inc., an independent evaluation service (“Morningstar”)), and the Fund’s more narrow peer group of comparable funds (the “Peer Group”) (again, as objectively classified, selected and prepared by Morningstar); (ii) the Fund’s investment process, portfolio holdings, investment restrictions, valuation procedures, and financial statements; (iii) purchases and redemptions of the Fund’s shares; (iv) the Adviser’s view of the general investment outlook in the markets in which the Fund invests; (v) arrangements with respect to the distribution of the Fund’s shares; (vi) the allocation and cost of the Fund’s brokerage (none of which was effected through any affiliate of the Adviser, including EULAV Securities LLC (the “Distributor”)); and (vii) the overall nature, quality and extent of services provided by the Adviser.

As part of their review, the Board requested, and the Adviser provided, additional information in order to evaluate the quality of the Adviser’s services and the reasonableness of its fees under each Fund’s Agreement. In a separate executive session, the Independent Directors reviewed information for each Fund, which included data comparing: (i) advisory, administrative, distribution, custody, accounting, audit, legal, transfer agency, and other non-management expenses incurred by the Fund to those incurred by the Fund’s Peer Group and Category; (ii) the Fund’s expense ratio to those of its Peer Group and Category; and (iii) the Fund’s investment performance, performance-related metrics and risk-related related metrics over various time periods to similar information regarding the Fund’s benchmark index, Peer Group and Category.

In classifying a Fund within a Category, Morningstar considered the characteristics of the Fund’s actual portfolio holdings over various periods of time relative to the market and other factors that distinguish a particular investment strategy under Morningstar’s methodology with the objective to permit meaningful comparisons. Morningstar classified Value Line Mid Cap Focused Fund, Inc. and Value Line Premier Growth Fund, Inc. within its Mid-Cap Growth category, Value Line Larger Companies Focused Fund, Inc. within its Large Growth category and Value Line Income and Growth Fund, Inc. within its Moderate Allocation category.

In preparing a Peer Group for each Fund, Morningstar considered the Fund’s most recent portfolio holdings in light of the same factors used in classifying a Fund within a Category, as well as additional factors including similarity of expense structure (e.g., same share class characteristics) and net asset size. Generally, the final Peer Group consists of funds that range in net assets from twice-in-size to half-in-size of the Fund and includes roughly equal numbers of

funds that are smaller and larger than the Fund. Morningstar prepared the Peer Groups for Value Line Larger Companies Focused Fund, Inc. and Value Line Mid Cap Focused Fund, Inc. each consisting of 12 other retail, no-load funds with similar investment style, expense structure and asset size as each Fund, the Peer Group for the Value Line Premier Growth Fund, Inc. consisting of 14 other retail, no-load funds with similar investment style, expense structure and asset size as the Fund and the Peer Group for Value Line Income and Growth Fund, Inc. consisting of 14 other funds with similar investment style, expense structure and asset size as the Fund.

In their executive session, the Independent Directors also reviewed information regarding: (a) the financial results and condition of the Adviser and the Distributor and their profitability from the services that have been performed for each Fund and the Value Line family of funds; (b) the Adviser's investment management staffing and resources; (c) the ownership, control and day-to-day management of the Adviser; and (d) each Fund's potential for achieving economies of scale. In support of its review of the statistical information, the Board discussed with Morningstar the description of the methodology used by Morningstar to determine each Fund's Peer Group and Category and the results of the statistical information prepared by Morningstar.

The Board observed that there is a range of investment options available to shareholders of the Funds, including other mutual funds, and that each Fund's shareholders have chosen to invest in the Fund.

TABLE OF CONTENTS

The following summarizes matters considered by the Board in connection with its continuance of each of the Agreements. However, the Board did not identify any single factor as all-important or controlling, each Director may have weighed certain factors differently, and the summary does not detail all the matters that were considered.

Investment Performance. The Board reviewed each Fund's overall investment performance and compared it to its Peer Group, Category and benchmark index.

Value Line Larger Companies Focused Fund, Inc. The Board noted that the Fund outperformed the Peer Group and Category medians and the benchmark index for the one-year period ended March 31, 2015. The Board also noted that the Fund's performance for the three-year and five-year periods ended March 31, 2015 was above the performance of the Peer Group and Category medians but not the benchmark index. Lastly, the Board noted that the Fund's performance for the ten-year period ended March 31, 2015 was below the performance of the Peer Group and Category medians and the benchmark index.

Value Line Mid Cap Focused Fund, Inc. The Board noted that the Fund underperformed the Peer Group and Category medians and the benchmark index for the one-year and ten-year periods ended March 31, 2015. The Board also noted that the Fund's performance for the three-year period ended March 31, 2015 was above the performance of the Peer Group and Category medians but not the benchmark index, and that the Fund outperformed the Peer Group and Category medians and the benchmark index for the five-year period ended March 31, 2015. The Board considered that the Fund's performance in periods prior to March 2015 was achieved before the Fund's adoption on a non-fundamental policy of investing at least 80% of the Fund's total assets in common stocks and other equity securities of mid-sized companies under normal conditions.

Value Line Premier Growth Fund, Inc. The Board noted that the Fund underperformed the Peer Group and Category medians and the benchmark index for the one-year and three-year periods ended March 31, 2015, but outperformed the Peer Group and Category medians and the benchmark index for the five-year and ten-year periods ended March 31, 2015.

Value Line Income and Growth Fund, Inc. The Board noted that the Fund outperformed the Peer Group and Category medians and the benchmark index for the one-year, three-year and ten-year periods ended March 31, 2015. The Board also noted that the Fund's performance for the five-year period ended March 31, 2015 was above the performance of the Category median but not the Peer Group median and benchmark index.

The Adviser's Personnel and Methods. The Board reviewed the background of the portfolio managers responsible for the daily management of each Fund's portfolio, seeking to achieve the applicable Fund's investment objectives and adhering to such Fund's investment strategies. The Independent Directors also engaged in discussions with the Adviser's senior management responsible for the overall functioning of each Fund's investment operations. The Board viewed favorably: (i) the Adviser's use of analytic tools in support of the portfolio management, compliance and shareholder relation functions which the Adviser previously committed resources to acquire; (ii) the continuity of the Adviser's staff attributable in part to its actions taken to attract and retain personnel, including its ongoing improvements to employee benefit programs and previous increases in base compensation and merit-based compensation for certain staff members to be more industry competitive; and (iii) that the Adviser continues to receive the Value Line ranking systems without cost. The Board concluded that each Fund's management team and the Adviser's overall resources were adequate and that the Adviser had investment management capabilities and personnel essential to performing its duties under the Agreement.

Management Fee. The Board considered the Adviser's management fee rate under each Fund's Agreement relative to the management fee rate applicable to the funds in such Fund's Peer Group and Category before applicable fee waivers. The Board noted that the Adviser bears the cost of providing fund accounting services for the Fund as part of the management fee. The Board was informed that the management fee rates for funds in the Peer Group and Category most likely did not include the provision of fund accounting services and, if it did, the Fund's management fee rate would have compared more favorably. After a review of the information provided to the Board, the Board concluded that each Fund's management fee rate was satisfactory for the purpose of approving continuance of each Fund's Agreement.

Value Line Larger Companies Focused Fund, Inc. Before giving effect to fee waivers applicable to certain funds in the Peer Group and Category, the Board noted that, for the most recent fiscal year for which audited financial data is

available, the Fund's management fee rate was lower than that of the Peer Group median, but equal to that of the Category median.

Value Line Mid Cap Focused Fund, Inc. Before giving effect to fee waivers applicable to certain funds in the Peer Group and Category, the Board noted that, for the most recent fiscal year for which audited financial data is available, the Fund's management fee rate was less than that of the Peer Group and Category medians.

Value Line Premier Growth Fund, Inc. Before giving effect to fee waivers applicable to certain funds in the Peer Group and Category, the Board noted that, for the most recent fiscal year for which audited financial data is available, the Fund's management fee rate was less than that of the Peer Group and Category medians.

Value Line Income and Growth Fund, Inc. Before giving effect to fee waivers applicable to certain funds in the Peer Group and Category, the Board noted that, for the most recent fiscal year for which audited financial data is available, the Fund's management fee rate was slightly less than that of the Peer Group and Category medians.

TABLE OF CONTENTS

Semi-Annual Report (continued)

Expenses. The Board also considered each Fund's total expense ratio relative to its Peer Group and Category medians. After a review of the information provided to the Board, the Board concluded that each Fund's average expense ratio was satisfactory for the purpose of approving continuance of the Fund's Agreement.

Value Line Larger Companies Focused Fund, Inc. The Distributor and the Board agreed that the Distributor will extend the existing contractual waiver of the Fund's Rule 12b-1 fee for another one-year period ending June 30, 2016. This waiver effectively reduces the Fund's Rule 12b-1 fee rate from 0.25% to 0.10% of the Fund's average daily net assets. Such waiver cannot be changed during the contractual waiver period without the approval of the Board and the Distributor. The Board noted that, for the most recent fiscal year for which audited financial data is available, the Fund's expense ratio was less than that of the Peer Group and Category medians before and after giving effect to fee waivers applicable to the Fund and certain funds in the Peer Group and Category.

Value Line Mid Cap Focused Fund, Inc. The Board noted that, for the most recent fiscal year for which audited financial data is available, the Fund's expense ratio was higher than that of the Peer Group median after giving effect to fee waivers applicable to certain funds in the Peer Group, but the same as that of the Peer Group median before giving effect to such waivers. The Board also noted that during such period, the Fund's expense ratio was lower than that of the Category median before and after giving effect to fee waivers applicable to certain funds in the Category.

Value Line Premier Growth Fund, Inc. The Board noted that, for the most recent fiscal year for which audited financial data is available, the Fund's expense ratio was less than that of the Peer Group and Category medians before and after giving effect to fee waivers applicable to certain funds in the Peer Group and Category.

Value Line Income and Growth Fund, Inc. The Board noted that, for the most recent fiscal year for which audited financial data is available, the Fund's expense ratio was greater than that of the Peer Group median before and after giving effect to fee waivers applicable to the certain funds in the Peer Group. The Board also noted that during such period, the Fund's expense ratio was higher than that of the Category median after, and slightly lower than the Category median before, giving effect to fee waivers applicable to certain funds in the Category.

Nature, Extent and Quality of Services. The Board considered the nature, extent and quality of other services provided by the Adviser and the Distributor. At meetings held throughout the year, the Board reviewed the resources and effectiveness of the Adviser's overall compliance program, as well as the services provided by the Distributor. The Board reviewed the services provided by the Adviser and the Distributor in supervising each of the Fund's third-party service providers. The Board also reviewed the services of the Distributor in engaging financial intermediaries to provide sub-transfer agency and related services to shareholders who hold their shares of a Fund in omnibus accounts. The Board noted that the Distributor and the Adviser retained no portion of a Fund's sub-transfer agency fees as compensation for these services, but the Board considered that a Fund's payment of such fees to financial intermediaries might reduce amounts that the Distributor or the Adviser would otherwise pay out of their own resources to the financial intermediaries. Based on this review, the Board concluded that the nature, quality, cost, and extent of such other services provided by the Adviser and the Distributor were satisfactory, reliable and beneficial to each Fund's shareholders.

Profitability. The Board considered the level of profitability of the Adviser and the Distributor with respect to each Fund individually and in the aggregate for all the funds within the Value Line group of funds, including the impact of the restructuring of the Adviser and Distributor in 2010 and certain actions taken during prior years. These actions included the reduction (voluntary in some instances, contractual or permanent in other instances) of management and/or Rule 12b-1 fees for certain funds, the Adviser's termination of the use of soft dollar research, and the cessation of trading through the Distributor. The Board also considered the Adviser's continued attention to the rationalization and differentiation of funds within the Value Line group of funds to better identify opportunities for savings and efficiencies among the funds. The Board concluded that the profitability of the Adviser and the Distributor with respect to each Fund, including the financial results derived from each Fund's Agreement, was within a range the Board considered reasonable.

Other Benefits. The Board also considered the character and amount of other direct and incidental benefits received by the Adviser and the Distributor from their association with each Fund. The Board concluded that potential "fall-out" benefits that the Adviser and the Distributor may receive, such as greater name recognition, appear to be reasonable,

and may in some cases benefit the Funds.

Economies of Scale.

Value Line Larger Companies Focused Fund, Inc. The Board considered that, given both the current and anticipated size of the Fund, any perceived and potential economies of scale were not yet a significant consideration for the Fund and that the addition of breakpoints to the fee structure was not currently necessary.

Value Line Mid Cap Focused Fund, Inc. The Board noted the Agreement includes a breakpoint applicable to the Adviser's fee under which the Adviser is a paid 0.70% on the first \$100 million of the Fund's average daily net assets and 0.65% on any additional assets. The Board considered that, given the current and anticipated size of the Fund, any perceived and potential economies of scale were not yet a significant consideration for the Fund and that the addition of more breakpoints to the fee structure was not currently necessary.

TABLE OF CONTENTS

Value Line Premier Growth Fund, Inc. The Board considered that, given both the current and anticipated size of the Fund, any perceived and potential economies of scale were not yet a significant consideration for the Fund and that the addition of breakpoints to the fee structure was not currently necessary.

Value Line Income and Growth Fund, Inc. The Board noted the Agreement includes a breakpoint applicable to the Adviser's fee under which the Adviser is paid 0.70% on the first \$100 million of the Fund's average daily net assets and 0.65% on any additional assets. The Board considered that, given the current and anticipated size of the Fund, any perceived and potential economies of scale were not yet a significant consideration for the Fund and that the addition of more breakpoints to the fee structure was not currently necessary.

Fees and Services Provided for Other Comparable Funds/Accounts Managed by the Adviser. The Board was informed by the Adviser that the Adviser does not currently manage any non-mutual fund account that has similar objectives and policies as those of the Funds.

Conclusion. The Board examined the totality of the information it was provided at the meeting specifically addressing approval of each Fund's Agreement and at other meetings held during the past year and did not identify any single controlling factor. Based on its evaluation of all material factors deemed relevant and with the advice of independent counsel, the Board concluded that the rate at which each Fund pays a management fee to the Adviser under its Agreement does not constitute a fee that is so disproportionately large as to bear no reasonable relationship to the services rendered and that could not have been the product of arm's-length bargaining. Further, the Board concluded that each Fund's Agreement, and the management fee rate thereunder, is fair and reasonable and voted to continue each Agreement as in the best interest of that Fund and its shareholders.

TABLE OF CONTENTS

The Value Line Family of Funds

In 1950, Value Line started its first mutual fund. Since then, knowledgeable investors have been relying on the Value Line Funds to help them build their financial futures. Over the years, Value Line Funds has evolved into what we are today – a diversified family of no-load mutual funds with a wide range of investment objectives – ranging from small, mid and large capitalization equities to fixed income. We also provide strategies that effectively combine both equities and fixed income, diligently taking into account the potential risk and reward of each investment.
