**Cummins Announces Two-for-One Stock Split**

**--Action Reflects Confidence in Future Operating Results -**

Columbus, IN. -- The Cummins Board of Directors today declared a two-for-one split of Cummins Inc. (NYSE: CMI) stock, payable April 9 to shareholders of record as of March 26, 2007.

As a result of the stock split, each Cummins' shareholder will receive one additional share of stock for each share owned on the record date. Since there will be twice as many shares after the split, each share will be worth half of what it was worth immediately prior to the split, while the overall value of a stockholder's investment remains the same.

The total amount of cash dividend payments with respect to the shares will remain unchanged as a result of the split, but the dividend will be proportionately adjusted to half the pre-split amount on a per-share basis.

"Cummins is a stronger, more diversified and more global company than at any time in our history, and we have set the stage for a period of sustained growth," said Tim Solso, Cummins Chairman and CEO. "This action today reflects our confidence in the future operating results of the company, as well as our continued commitment to creating value for our shareholders. We are also reaffirming our annual EPS guidance of \$11 - \$11.50 a share announced on January 29.

"The Board of Directors also decided to split the common stock to bring the Company's share price back into a trading range comparable with its peers and to make Cummins stock more accessible to a broader range of investors," Solso added.

Cummins' average total return to shareholders for the last four years was approximately 46 percent a year - well above the performance of the S&P 500 and the Company's peer group average.

In 2006, the Company increased its quarterly dividend by 20 percent, and continued to repurchase its stock, with more than one million shares being repurchased.

## Edgar Filing: CUMMINS INC - Form 8-K

Cummins had approximately 52 million shares of common stock outstanding as of Feb. 4, 2007. Upon completion of the split, the Company will have approximately 104 million shares of common stock outstanding.

The Company also reiterated its positive outlook for 2007 - despite an expected drop in the North American Heavy-duty truck engine market of nearly 50 percent related to the 2007 EPA emissions changes.

"Cummins is well-positioned to grow profitably in other parts of the business, such as medium-duty truck and bus; high horsepower engine markets; its Distribution and Power Generation segments and emission critical subsystems in the Components segment. As a result, 2007 still should be among the strongest years in our history," Solso said.

### **About Cummins**

Cummins Inc., a global power leader, is a corporation of complementary business units that design, manufacture, distribute and service engines and related technologies, including fuel systems, controls, air handling, filtration, emission solutions and electrical power generation systems. Headquartered in Columbus, Indiana, (USA) Cummins serves customers in more than 160 countries through its network of 550 Company-owned and independent distributor facilities and more than 5,000 dealer locations. Cummins reported net income of \$715 million on sales of \$11.4 billion in 2006. Press releases can be found on the Web at [www.cummins.com](http://www.cummins.com).

Information provided in this release that is not purely historical are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, including statements regarding the company's expectations, hopes, beliefs and intentions on strategies regarding the future. It is important to note that the company's actual future results could differ materially from those projected in such forward-looking statements because of a number of factors, including, but not limited to, general economic, business and financing conditions, labor relations, governmental action, competitor pricing activity, expense volatility and other risks detailed from time to time in Cummins Securities and Exchange Commission filings.
