**DATA I/O ANNOUNCES THIRD QUARTER PROFITS**

**Redmond, Wash., October 24, 2007** Data I/O Corporation (NASDAQ: DAIO), the leading provider of manual and automated device programming systems, today announced financial results for the third quarter of 2007.

Revenues for the third quarter of 2007 were \$7.3 million, an increase of 26% compared with \$5.8 million for the second quarter of 2007. New orders during the third quarter were \$8.3 million, up 33% from the \$6.2 million for the second quarter of 2007. The gross margin as a percentage of sales for the third quarter of 2007 was 62.0%, compared with 49.1% for the second quarter of 2007. The increase in gross margin percentage was primarily due to a favorable product mix; higher sales volume relative to fixed operating costs; sales channel mix being mostly direct; and savings from our restructuring actions, as well as favorable inventory material cost and labor and overhead variances.

In accordance with U.S. generally accepted accounting principles (GAAP), net income for the third quarter of 2007 was \$1.6 million, or \$0.18 per share, compared with a net income of \$47,000 or \$0.01 per share for the third quarter of 2006, and compared with a net loss of (\$1.1 million), or (\$0.13) per share, for the second quarter of 2007. Included in the results of each of these periods was \$0.01 per share related to the impact of expensing options.

We were pleased to report both the large orders to a new automotive customer announced earlier, as well as strong sales to wireless customers, said Fred Hume, president and CEO. The substantial increase reported in gross margin, which combined with savings resulting from our restructuring actions were the leverage for delivering outstanding profitability for the third quarter.
