This report is deemed submitted and not filed pursuant to the rules and regulations of the Securities and Exchange Commission.

T-MOBILE USA REPORTS SECOND QUARTER 2009 RESULTS

\$1.6 billion Operating Income Before Depreciation and Amortization ("OIBDA") in the second quarter of 2009, up 16% from the first quarter of 2009 and up 1% from the second quarter of 2008

OIBDA Margin increased to 34% from 29% in first quarter of 2009 and 33% in the second quarter of 2008; focused efforts on reducing operating expenses helped improve margin

Contract customer churn of 2.2% in the second quarter, down from 2.3% in the first quarter of 2009, but up from 1.9% in the second quarter of 2008

Data ARPU growth accelerated to 15% year-on-year from 11% year-on-year in the first quarter of 2009 325,000 net new customers added in the second quarter of 2009, down from 415,000 in the first quarter of 2009 and 668,000 in the second quarter of 2008

Launched the T-Mobile® myTouchTM 3G, the highly anticipated second Android device Retail agreement announced with RadioShack to offer T-Mobile products in more than 4,000 stores

BELLEVUE, Wash., August 6, 2009 -- T-Mobile USA, Inc. (T-Mobile USA) today reported second quarter of 2009 results. In the second quarter of 2009, T-Mobile USA reported OIBDA of \$1.6 billion, up 16% compared to the first quarter of 2009 and up 1% from the second quarter of 2008, with an OIBDA margin of 34%. Additionally, T-Mobile USA reported contract churn of 2.2%, down from 2.3% in the first quarter of 2009, and 325,000 net new customers in the second quarter of 2009.

"In 2009, we're launching the best products and services we've ever brought to market," said Robert Dotson, President and CEO, T-Mobile USA. "In the quarter, we unveiled devices like our new T-Mobile myTouch 3G with Google. The myTouch will join other new T-Mobile 3G devices just in time for a powerful back-to-school offering available in even more locations with our newly announced RadioShack retail agreement. In the quarter, we also made steady progress in growing data revenues as more customers move to craved-for mobile internet and messaging services. And finally, in Q2 we also drove operational cost efficiencies that helped us deliver a much better margin for the quarter."

"We see opportunities for new growth given the anticipated growing demand for innovative mobile internet and data services in the U.S. market," said Rene Obermann, CEO of Deutsche Telekom. "In the area of cost control, I'm pleased with efforts by the U.S. team to drive a sequential increase in margin."

Customers

In the second quarter of 2009, T-Mobile USA added 325,000 net new customers, down from 415,000 in the first quarter of 2009 and 668,000 in the second quarter of 2008.

The number of net new customer additions decreased compared to the second quarter of 2008 primarily due to higher churn of contract customers, as explained below. Gross customer additions increased year-on-year, and continue to be driven by strong growth in lower ARPU products.

Contract customer net additions made up 17% of customer growth in the second quarter of 2009, compared to 39% in the first quarter of 2009 and 80% in the second quarter of 2008. The decrease in contract customer additions year-over-year is due to higher contract churn, including FlexPaysm. Additionally, gross contract customer additions were lower as lower gross customer additions of branded products were partially offset by strong machine-to-machine contract additions.

Prepaid net customer additions, including wholesale customers, were 268,000 in the second quarter of 2009, up from 255,000 in the first quarter of 2009 and up from 143,000 in the second quarter of 2008.

Contract customers comprised 81% of T-Mobile USA's total customer base at June 30, 2009. T-Mobile USA ended the second quarter of 2009 with 33.5 million customers, up from 33.2 million at the end of the first quarter of 2009.

Churn

Contract churn was 2.2% in the second quarter of 2009, down from 2.3% in the first quarter of 2009 and up from 1.9% in the second quarter of 2008.

Contract churn decreased in the second quarter of 2009 compared to the first quarter of 2009, due in part to customer loyalty initiatives.

Blended churn, including both contract and prepaid customers, was 3.1% in the second quarter of 2009, in line with the first quarter of 2009 and up from 2.7% in the second quarter of 2008.

Blended churn compared to the second quarter of 2008 continues to be impacted by competitive intensity in both the contract and prepaid customer segments.

OIBDA and Net Income

T-Mobile USA reported OIBDA of \$1.60 billion in the second quarter of 2009, up from \$1.38 billion in the first quarter of 2009 and \$1.58 billion in the second quarter of 2008.

The sequential increase in OIBDA was primarily due to lower operating expenses. The implementation of cost saving initiatives combined with lower commission costs and handset subsidies contributed to the decrease.

OIBDA margin (as defined in Note 6 to the Selected Data, below) was 34% in the second quarter of 2009, up from 29% in the first quarter of 2009 and 33% in the second quarter of 2008.

Net income for the second quarter of 2009 was \$425 million, up from \$322 million in the first quarter of 2009, but down from \$452 million in the second quarter of 2008.

Revenue

Service revenues (as defined in Note 1 to the Selected Data, below) were \$4.77 billion in the second quarter of 2009, in line with the first quarter of 2009, but down from \$4.85 billion in the second quarter of 2008.

Sequentially, service revenues were stable, as lower voice revenues were offset by data revenue growth.

The decrease in service revenues in the second quarter of 2009 compared to the second quarter of 2008 was primarily due to lower revenues from contract customers resulting from a higher proportion of lower ARPU customers combined with reduced customer spending.

Total revenues, including service, equipment, and other revenues were \$5.34 billion in the second quarter of 2009, down from \$5.40 billion in the first quarter of 2009 and \$5.47 billion in the second quarter of 2008.

The decrease in total revenues year-over-year was primarily due to the decrease in service revenues as discussed above. Sequentially, the decrease was driven by lower equipment sales.

ARPU

Blended Average Revenue Per User ("ARPU" as defined in Note 1 to the Selected Data, below) was \$48 in the second quarter of 2009, in line with the first quarter of 2009 but down from \$52 in the second quarter of 2008.

Contract ARPU was \$52 in the second quarter of 2009, in line with the first quarter of 2009, but down from \$55 in the second quarter of 2008.

Contract ARPU year-over-year decreased due to a higher proportion of lower ARPU customers in the customer base, the loss of some higher-value customers due to competitive intensity and lower variable revenues, including roaming.

Prepaid ARPU was \$21 in the second quarter of 2009, in line with first quarter of 2009 but down from \$23 in the second quarter of 2008.

The decrease in prepaid ARPU is due in part to an increase in the proportion of lower ARPU customers, such as wholesale customers.

Data services revenue (as defined in Notes 1 and 8 to the Selected Data, below) was \$990 million in the second quarter of 2009, representing 20.8% of blended ARPU, or \$9.90 per customer, up from 19.6% of blended ARPU, or \$9.40 per customer in the first quarter of 2009, and 16.6% of blended ARPU, or \$8.60 per customer in the second quarter of 2008. Data services revenue increased 6% compared to the first quarter of 2009 and 23% year-over-year.

2.1 million 3G-capable converged devices (such as the T-Mobile G1TM, the 3G-enabled Sidekick LX, and the Samsung Behold and Memoir) were on the T-Mobile USA network at the end of the second quarter of 2009, an increase of almost 40% from the first quarter of 2009.

The increase of 3G-capable converged devices and the continued build out of the 3G network has resulted in increased adoption of 3G data plans, driving data ARPU growth.

The total number of messages carried on the T-Mobile USA network increased to 74 billion in the second quarter of 2009, compared to 66 billion in first quarter of 2009 and 41 billion in the second quarter of 2008. Messaging revenue continues to be a significant component of data ARPU.

CPGA and CCPU

The average cost of acquiring a customer, Cost Per Gross Add ("CPGA" as defined in Note 4 to the Selected Data, below) was \$270 in the second quarter of 2009, down from \$300 in the first quarter of 2009 and \$320 in the second quarter of 2008.

CPGA decreased in the second quarter of 2009 compared to the first quarter of 2009. This was primarily related to lower customer acquisition expenses, including commissions.

The average cash cost of serving customers, Cash Cost Per User ("CCPU" as defined in Note 3 to the Selected Data, below), was \$23 per customer per month in the second quarter of 2009, down from \$25 in the first quarter of 2009 and second quarter of 2008.

The sequential decrease in CCPU is partly due to the successful implementation of cost saving initiatives and lower retention costs, including a lower subsidy loss per handset.

Year-over-year both CPGA and CCPU have decreased due to a change in the mix in customer additions and the customer base towards lower ARPU products which incur lower acquisition and servicing costs.

Capital Expenditures

Cash capital expenditures (as defined in Note 7 to the Selected Data, below) were \$1.08 billion in the second quarter of 2009, compared to \$1.13 billion in the first quarter of 2009 and \$1.06 billion in the second quarter of 2008.

T-Mobile USA's continued focus on network quality and coverage as well as the national roll-out of the UMTS/HSDPA (3G) network resulted in consistent capital expenditures year-on-year and sequentially.

T-Mobile USA continues to invest in the 3G network which now covers 176 cities and reaches 121 million people, and is expected to continue to grow throughout the year.

Stick Together Highlights

On June 22, 2009, T-Mobile USA announced the availability of the T-Mobile myTouch 3G, the next highly anticipated Android device. T-Mobile myTouch 3G boasts a sleek look and contoured feel, plus an array of new features that builds on the popular T-Mobile G1. A touch-screen display with virtual keyboard is built into a slim, smooth and lightweight design.

Other new products launched include the 3G webConnect USB Laptop Stick, 3G-enabled Sidekick LXTM, T-Mobile® Dash 3GTM, HTC Touch Pro2TM, and the BlackBerry Curve 8520.

On July 23, 2009, T-Mobile USA announced a retail agreement with RadioShack to offer T-Mobile products and services in more than 4,000 stores. The relationship expands RadioShack's wireless offerings and for T-Mobile USA, the agreement nearly doubles the number of national retail partner stores offering its products and services nationwide, making RadioShack T-Mobile USA's largest national retail partner.

T-Mobile USA is the U.S. wireless operation of Deutsche Telekom AG (NYSE: DT). In order to provide comparability with the results of other US wireless carriers, all financial amounts are in US dollars and are based on accounting principles generally accepted in the United States ("GAAP"). T-Mobile USA results are included in the consolidated results of Deutsche Telekom, but differ from the information contained herein as Deutsche Telekom reports financial results in Euros and in accordance with International Financial Reporting Standards (IFRS).

This press release includes non-GAAP financial measures. The non-GAAP financial measures should be considered in addition to, but not as a substitute for, the information provided in accordance with GAAP. Reconciliations from the non-GAAP financial measures to the most directly comparable GAAP financial measures are provided below following Selected Data and the financial statements.

Since all companies do not calculate these figures in the same manner, the information contained in this press release may not be comparable to similarly titled measures reported by other companies.

¹ Average Revenue Per User ("ARPU") represents the average monthly service revenue we earn from our customers. ARPU is calculated by dividing service revenues for the specified period by the average customers

during the period, and further dividing by the number of months in the period. We believe ARPU provides management with useful information to evaluate the revenues generated from our customer base.

Service revenues include contract, prepaid, and roaming and other service revenues, and do not include equipment sales and other revenues. Data services revenues (including messaging and non-messaging revenue) is a component of service revenues. Within the consolidated financial statements below, other revenues include co-location rental income and, through 2008, wholesale revenues from the usage of our network in California, Nevada, and New York by AT&T customers, among other items, and are therefore not included in ARPU.

- 2 A customer is defined as a SIM card with a unique mobile identity number which generates revenue. Contract customers and prepaid customers include FlexPay customers depending on the type of rate plan selected. FlexPay customers with a contract are included in contract customers, and FlexPay customers without a contract are included in prepaid customers. Wholesale customers are included in prepaid customers as they most closely align with this customer segment. Machine-to-machine customers have contracts and are therefore included in contract customers.
- 3 The average cash cost of serving customers, or Cash Cost Per User ("CCPU") is a non-GAAP financial measure and includes all network and general and administrative costs as well as the subsidy loss unrelated to customer acquisition. Subsidy loss unrelated to customer acquisition includes upgrade handset costs for existing customers offset by upgrade equipment revenues and other related direct costs. This measure is calculated as a per month average by dividing the total costs for the specified period by the average total customers during the period and further dividing by the number of months in the period. We believe that CCPU, which is a measure of the costs of serving a customer, provides relevant and useful information and is used by our management to evaluate the operating performance of our business.
- 4 Cost Per Gross Add ("CPGA") is a non-GAAP financial measure and is calculated by dividing the costs of acquiring a new customer, consisting of customer acquisition costs plus the subsidy loss related to customer acquisition for the specified period, by gross customers added during the period. Subsidy loss related to customer acquisition consists primarily of the excess of handset and accessory costs over related revenues incurred to acquire new customers. We believe that CPGA, which is a measure of the cost of acquiring a customer, provides relevant and useful information and is used by our management to evaluate the operating performance of our business.
- 5. Operating Income Before Interest, Depreciation and Amortization ("OIBDA") is a non-GAAP financial measure, which we define as operating income before depreciation and amortization. In a capital-intensive industry such as wireless telecommunications, we believe OIBDA, as well as the associated percentage margin calculation, to be meaningful measures of our operating performance. OIBDA should not be construed as an alternative to operating income or net income as determined in accordance with GAAP, as an alternative to cash flows from operating activities as determined in accordance with GAAP or as a measure of liquidity. We use OIBDA as an integral part of our planning and internal financial reporting processes, to evaluate the performance of our business by senior management and to compare our performance with that of many of our competitors. We believe that operating income is the financial measure calculated and presented in accordance with GAAP that is the most directly comparable to OIBDA. OIBDA is not adjusted for integration costs of SunCom.
- 6. OIBDA margin is a non-GAAP financial measure, which we define as OIBDA (as described in Note 5 above) divided by service revenues.
 - 7 Capital expenditures consist of amounts paid by T-Mobile USA for purchases of property and equipment.
- 8 Data ARPU is defined as total data revenues divided by average total customers during the period. Total data revenues include data revenues from contract customers, prepaid customers, Wi-Fi revenues and data roaming revenues. The relative fair value of data revenues from unlimited voice and data plans are included in total data

revenues.

Non-cash investing and financing activities with affiliates:

T-Mobile USA remitted \$400 million to affiliates in the first and second quarter of 2009 as a short term receivable. Of this amount, \$300 million of the cash outflow was used during the period as settlement of debt and \$100 million was received back within Q2 2009.

T-Mobile USA remitted \$1,120 million to affiliates in the first and second quarter of 2008 as a short term receivable; the cash outflow was later used during the second quarter of 2008 as settlement of debt in line with the related

repayment schedule.

About T-Mobile USA:

Based in Bellevue, Wash., T-Mobile USA, Inc. is the U.S. wireless operation of Deutsche Telekom AG (NYSE: DT). By the end of the second quarter of 2009, almost 150 million mobile customers were served by the mobile communication segments of the Deutsche Telekom group — 33.5 million by T-Mobile USA — all via a common technology platform based on GSM and UMTS, the world's most widely-used digital wireless standards. T-Mobile USA's innovative wireless products and services help empower people to connect to those who matter most. Multiple independent research studies continue to rank T-Mobile USA among the highest in numerous regions throughout the U.S. in wireless customer care and call quality. For more information, please visit http://www.T-Mobile.com. T-Mobile is a federally registered trademark of Deutsche Telekom AG.
