SEMIANNUAL REVIEW AND Royce Value Trust REPORT TO STOCKHOLDERS Royce Micro-Cap Trust 2006 Royce Focus Trust www.roycefunds.com

A FEW WORDS ON CLOSED-END FUNDS

Royce & Associates, LLC manages three closed-end funds: Royce Value Trust, the first small-cap value closed-end fund offering; Royce Micro-Cap Trust, the only micro-cap closed-end fund; and Royce Focus Trust, a closed-end fund that invests in a limited number of primarily small-cap companies.

A closed-end fund is an investment company whose shares are listed on a stock exchange or are traded in the over-the-counter market. Like all investment companies, including open-end mutual funds, the assets of a closed-end fund are professionally managed in accordance with the investment objectives and policies approved by the fund Board of Directors. A closed-end fund raises cash for investment by issuing a fixed number of shares through initial and other public offerings that may include periodic rights offerings. Proceeds from the offerings are invested in an actively managed portfolio of securities. Investors wanting to buy or sell shares of a publicly traded closed-end fund after the offerings must do so on a stock exchange or the Nasdaq market, as with any publicly traded stock. This is in contrast to open-end mutual funds, in which the fund sells and redeems its shares on a continuous basis.

A CLOSED-END FUND OFFERS SEVERAL DISTINCT ADVANTAGES NOT AVAILABLE FROM AN OPEN-END FUND STRUCTURE

Since a closed-end fund does not issue redeemable securities or offer its securities on a continuous basis, it does not need to liquidate securities or hold uninvested assets to meet investor demands for cash redemptions, as an open-end fund must.

In a closed-end fund, not having to meet investor redemption requests or invest at inopportune times is ideal for value managers who attempt to buy stocks when prices are depressed and sell securities when prices are high.

A closed-end fund may invest more freely in less liquid portfolio securities because it is not subject to potential stockholder redemption demands. This is particularly beneficial for Royce-managed closed-end funds, which invest in small- and micro-cap securities.

The fixed capital structure allows permanent leverage to be employed as a means to enhance capital appreciation potential.

☐Unlike Royce☐s open-end funds, our closed-end funds are able to distribute capital gains on a quarterly basis. Each of the Funds has adopted a quarterly distribution policy for its common stock.

We believe that the closed-end fund structure is very suitable for the long-term investor who understands the benefits of a stable pool of capital.

WHY DIVIDEND REINVESTMENT IS IMPORTANT

A very important component of an investor stotal return comes from the reinvestment of distributions. By reinvesting distributions, our investors can maintain an undiluted investment in a Fund. To get a fair idea of the impact of reinvested distributions, please see the charts on pages 13, 15 and 17. For additional information on the Funds Distribution Reinvestment and Cash Purchase Options and the benefits for stockholders, please see page 19 or visit our website at www.roycefunds.com.

Semiannual Report to Stockholders	<u>11</u>

For more than 30 years, we have used a value approach to invest in smaller-cap securities. We focus primarily on the quality of a company[]s balance sheet, its ability to generate free cash flow and other measures of profitability or sound financial condition. At times, we may also look at other factors, such as a company[]s unrecognized asset values, its future growth prospects or its turnaround potential following an earnings disappointment or other business difficulties. We then use these factors to assess the company[]s current worth, basing the assessment on either what we believe a knowledgeable buyer might pay to acquire the entire company, or what we think the value of the company should be in the stock market.

PERFORMANCE TABLE

Charles M. Royce, President

When we discuss specific security

selection criteria for many of The

Royce Funds, four qualities are

commonly listed: a strong balance

sheet, a history of earnings, high

internal rates of return and the

ability to generate free cash flow.

Each is a critical part of

determining both a company∏s

current quality and the likelihood

that it will be able to maintain

that quality in the future. They

are also in many ways interrelated.

For example, previously we

discussed the importance of a low-

debt, asset-rich balance sheet in

helping to maintain or

IMPORTANT PERFORMANCE AND RISK INFORMATION

All performance information in this Review and Report reflects past performance, is presented on a total return basis and reflects the reinvestment of distributions. Past performance is no guarantee of future results. Performance information does not reflect the deduction of taxes that a stockholder would pay on distributions or on the sale of Fund shares. Investment return and principal value of an investment will fluctuate, so that shares may be worth more or less than their original cost when sold. Current performance may be higher or lower than performance quoted. Current month-end performance may be obtained at www.roycefunds.com. The Royce Funds invest primarily in securities of small-cap and/or micro-cap companies, which may involve considerably more risk than investments in securities of larger-cap companies.

^{**} Date Royce & Associates, LLC assumed investment management responsibility for the Fund.

fuel

earnings, especially when a business

is experiencing earnings trouble.

Similarly, a company∏s ability to

generate free cash flow is often

linked to its ability to sustain

positive earnings and to generate

high internal rates of return. We

think that it∏s a positive sign

2 | THIS PAGE IS NOT PART OF THE 2006 SEMIANNUAL REPORT TO STOCKHOLDERS The thoughts expressed in this Review and Report to Stockholders concerning recent market movements and future prospects for small company stocks are solely the opinion of Royce at June 30, 2006, and, of course, historical market trends are not necessarily indicative of future market movements. Statements regarding the future prospects for particular securities held in the Funds portfolios and Royce sinvestment intentions with respect to those securities reflect Royce sopinions as of June 30, 2006 and are subject to change at any time without notice. There can be no assurance that securities mentioned in this Review and Report to Stockholders will be included in any Royce-managed portfolio in the future.

LETTER TO OUR STOCKHOLDERS

Value In Vogue?

After three full decades managing small-cap value portfolios, we thought that we had seen all of the various movements, fads and trends that periodically capture the imaginations (to say nothing of the wallets) of investors. It was always easy for us to be amused at such things. Being value investors, with that term inherent sense of caution and conservatism, we have always measured a comfortable distance between the work that we do and anything that smacks of trends in equity investing. With its emphasis on attributes such as patience and diligence, with its demands of long hours of detailed research, value seems by nature not simply unfashionable, but nearly impervious to the short-term mindsets that typically dominate the stock market equivalent of the runways of Paris, Milan and Manhattan. Even earlier in the current decade, when value, especially small-cap value, began scoring high returns and glowing press, it did not appear to capture the investment zeitgeist in quite the same way that large-cap or Technology investments had during the \[\] 90s. This was more than all right with us. After all, we\[\] re not exactly high-fashion material (there\[\] s a reason we always look better in cartoon form), and we did not think that our approach was, either.

Yet here we are just past the halfway mark of 2006, and in our view small-cap value investing is nearing the end of its stint as domestic investment shottest approach. How did our style become so stylish? Its success over the last several years occurred during a period in which few alternatives in the domestic equity universe could compete with its strong results. As measured by the Russell 2000, small-cap bested large-cap (as measured by the S&P 500) for the one-, three-, five-, 10- and 15-year periods ended 6/30/06. In turn, the Russell 2000 Value index outperformed the Russell 2000 for each of these periods as well as the 20- and

The market still awaits Next Year s Model, but small-cap value s unexpected turn on the runway should hardly result in obsolescence.

THIS PAGE IS NOT PART OF THE 2006 SEMIANNUAL REPORT TO STOCKHOLDERS | 3

when earnings and cash flows

are closely aligned.

Cash flow is usually defined as the

amount of net cash that a company

brings in that may be used for

various company purposes, such as

to build assets or pay dividends.

(Cash flow can also be negative, in

which case there are no funds with

which to further capitalize business

activities or make payouts to

shareholders.) For most businesses,

cash flow comes from three

activities operations, investment

and financing.

Our preference in most cases is for a

company that generates the bulk of

its net cash flow from

LETTER TO OUR STOCKHOLDERS

25-year periods ended 6/30/06. These terrific results led to the plainly dressed small-cap value approach attracting speculative dollars from short-term investors, money hungry for the Next Big Thing that probably originated from those whose only experience with smaller stocks would most likely have come on the growth side. It was not long ago that this activity would have been difficult, if not impossible, without considered investments in specific small-cap stocks or astute choices in small-cap value mutual funds. However, with the advent of investment vehicles such as ETFs (Exchange Traded Funds), moving quickly in and out of virtually any equity style index has become more convenient for investors of all tastes, temperaments and time frames.

What becomes of investment approaches when they are no longer considered the most fashionable? We suspect that styles such as ours will manage just fine beyond the glare of the hot lights just as they did before they became trendy. Although the last few years have been wonderful, the rally has been top-heavy with an extended run for energy stocks (that may not be over) and shorter, less stellar bursts in other areas. This leaves ample room for potential growth in those places that have enjoyed only intermittent success or have been mostly left out. The market still awaits Next Year s Model, but small-cap value s unexpected turn on the runway should hardly result in obsolescence.

Is Large the New Small?

Our track record for large-scale stock market prognostication is checkered at best we like to joke that we ve called 10 of the last three corrections. Still, the case for emerging large-cap leadership remains compelling to us, even as it s also important to re-assert our view that any leadership phase in the coming months is likely to be short-lived, whether for large-caps, as measured by the S&P 500,

operations,

from the day-to-day activities of its

business. Cash flow from operations

is also significant because it may

likely affect the other two activities.

Although they are similar

in that they help us to understand

a company∏s profitability, cash flow

differs from earnings (the profits a

company makes) because it

also takes into account certain non-

cash accounting items, most

importantly depreciation.

Continued on Page 6...

4 | THIS PAGE IS NOT PART OF THE 2006 SEMIANNUAL REPORT TO STOCKHOLDERS or small-caps, as measured by the Russell 2000. The 10-year period ended 12/31/05 offered an almost eerily symmetrical split between long-term periods first of large-cap, then of small-cap dominance. We do not expect anything resembling the previous 10 years in terms of the time span of asset-class leadership or the breadth in performance spreads. We continue to believe that the stock market will be characterized by frequent leadership rotation and low returns.

After narrowly outperforming small-cap stocks in 2005, large-caps took their by-now-familiar position in the back seat to small-cap during the first half of 2006. The Russell 2000 was up 8.2% for the year-to-date period ended 6/30/06, versus a gain of 2.7% for the S&P 500 (and a loss of 1.5% for the still-struggling Nasdag Composite). Small-cap∏s advantage came primarily from its considerable outperformance in the bullish first quarter, when the Russell 2000 was up 13.9% versus a gain of 4.2% for the S&P 500. When stock prices began to correct in the second quarter, large-cap outperformed (-1.4% for the S&P 500 versus -5.0%

for the Russell 2000). The pattern of small-cap leading in brief up-market phases then ceding leadership to large-cap during equally brief downturns dates back to 2003.

The down-market resilience of large-cap stocks seems to us to be the central story of the recent decline. Our earlier contention, made in our 2005 Annual Review and Report, was that large-cap would lose less during declines, which has been the case so far in 2006. We also surmised that small-cap would have an edge in any subsequent rally, which held true in the first quarter. Yet we are no longer convinced that small-cap will lead in every subsequent bullish phase. An underreported element in the downturn was the tightening of liquidity on a worldwide level. The combination of better near-term down market results for large-cap stocks and the widespread liquidity crunch is likely to draw investors in the short run to cash, bonds and what they perceive to be stable, high-quality equities. In other words, the unfashionable nature of large-cap stocks may be exactly what helps to make them fashionable again.

Value Always in Style?

Of course, no style has been more fashionable in the current decade than small-cap value. However much we may think of our work as an all-weather strategy a fashion perennial more akin to a navy blazer or black cocktail dress than the latest creations adorning the windows of boutiques on Rodeo Drive there no denying the recent attraction of small-cap value for investors burdened with what we would describe as the investment equivalent of short attention spans. And its long run in the current decade has indeed been wildly impressive. The Russell 2000 Value index outpaced its small-cap growth counterpart, as measured by the Russell 2000 Growth index, for the one-, three-, five-, 10-, 15-, 20- and 25-year periods ended 6/30/06. One notable aspect of small-cap value sremarkable run in the current decade has been its absolute and relative strength during the most recent long-term

We do not expect anything resembling the previous 10 years in terms of the time span of asset-class leadership or the breadth in performance spreads. We continue to believe that the stock market will be characterized by frequent leadership rotation and low returns.

THIS PAGE IS NOT PART OF THE 2006 SEMIANNUAL REPORT TO STOCKHOLDERS | 5

A company∏s statement of cash

flows is crucial, because it

provides a record of how the firm

has handled cash inflows and

outflows over a given quarterly or

annual period.

It also helps to reconcile

information found on the balance

sheet (which shows a firm s assets

and liabilities) and the income

statement (which shows all revenue,

costs, expenses and earnings).

While the balance sheet can be

used to determine the increase or

decrease in assets and the

income statement shows the

profits that have made an impact

LETTER TO OUR STOCKHOLDERS

up-market period. From the small-cap market trough on 10/9/02 through 6/30/06, the Russell 2000 Value index gained 140.1% versus 123.1% for the Russell 2000 Growth index. Small-cap value srecent short-term returns were also strong. For the year-to-date period ended 6/30/06, the small-cap value index was up 10.4% versus 6.1% for the small-cap growth index. Although it trailed growth in the first quarter (+13.5% versus +14.4%), it moved ahead in the second, -2.7% versus -7.3%.

Investors can thus be forgiven if they re a little anxious about small-cap value∏s ongoing prospects. Our admittedly biased view is that small-cap value should be all right, even if its days of doing star turns on the most chic runways may be drawing to a close. Although returns for the approach seldom reached the same levels, its performance in the current decade is analogous to some degree to what large-cap stocks were during the mid-to-late ∏90s∏a fashionable area where people were putting money almost to the exclusion of the rest of the stock market. Now that the attention seems to be waning, we are finally beginning to see valuations come back to what we regard as more sensible levels throughout the small-cap world, although the number of bargains as of this writing is still not as plentiful as we would like.

Royce on the Runway

While the first six months of 2006 were terrific for the Russell 2000 (and the Russell 2000 Value index), results were slightly more mixed for our three closed-end offerings. All three Funds posted strong net asset

on that growth (or lack thereof),

the statement of cash flows gives

us an idea of how that growth

was financed. It tells the story of

where the money came from and

where it went.

This is especially relevant for

capital-intensive businesses such as

industrial companies that maintain

physical plants and own stores of

equipment that will eventually

need upgrading or replacing.

Continued on Page 8...

6 | THIS PAGE IS NOT PART OF THE 2006 SEMIANNUAL REPORT TO STOCKHOLDERS value (NAV) results on an absolute basis, but Royce Focus Trust narrowly trailed the Russell 2000 on that basis. However, this was only a small blemish, especially in the wider context of longer-term returns for periods ended 6/30/06. Over market cycle and other long-term time periods, each Fund posted impressive absolute and relative returns on both an NAV and market price basis. These are the time spans that matter most to us in evaluating performance.

Both in our portfolios and the small-cap world as a whole, energy stocks enjoyed a strong first half, as did many Industrial Products and Services companies. However, these were not the only three areas in which Fund performance was strong in the first half. Technology companies also made a sizeable positive contribution to performance. In fact, net

losses on a dollar basis were hard to find at the sector level, an impressive, albeit short-term, accomplishment during a volatile six months for equities.

From the Catwalk to the Coal Mine?

Some investors may be concerned that small-cap\(\pi\)s run has been of such long duration that the asset class is poised for a long period of desultory performance, with the recent downturn a harbinger of things to come. We respectfully disagree. The recent decline has been fairly benign as corrections go and hardly catastrophic for small-cap as a whole. In the coming months, we think that micro-cap stocks will be the area to watch most closely as a potential indicator of small-cap movement. They are generally more volatile to begin with, and having enjoyed strong performance over the last few years, they are especially vulnerable to nervous investors looking for safety. For the more fatalistic among us, they are the canary in the small-cap coal mine in that any major decline for our asset class would probably begin with them. However, we\regin more confident about the prospects for the entire small-cap area. We do not believe that the recent down-market period marks the beginning of a severe and/or long-term bear market for any asset class, including micro-caps. What we have been seeing lately seems to us less serious and more in line with what has happened historically following **successful, speculative periods.** The really interesting element in the downturn has been that several typically non-correlated asset categories∏small-cap stocks, natural resources stocks and commodities, real estate and emerging markets were coming off strong long-term performances and then began to correct at more or less the same time in the spring of this year. It\(\sigma\) been an odd confluence of declining performance that we believe has been making the downward move look more severe than it really is.

We define a correction as a decline of 15% or more from a previous small-cap peak. It remains too early to tell whether the current decline will reach this level (as of this writing it has not). However, like any previous decline, it has presented us with some discrete purchase opportunities, even as it has caused pain for investors. Although a market that steadily climbed year after year would make investors sleep more soundly, it is volatility that helps to create the pricing inefficiencies that attract value investors like ourselves. As any market sell-off worsens, quality companies are often lumped together with weaker ones, as short-term investors rush for the exits. This leaves many worthwhile companies trading for less than our estimate of their intrinsic value, piled among the rubble of companies walloped by the correction. The current decline has begun to create such situations, though not yet in large numbers. At least in the short run, further erosion in stock prices would not be the worst thing that could happen to small-cap stocks.

Although returns for the approach seldom reached the same stratospheric levels, small-caps performance in the current decade is analogous to some degree to what large-cap stocks were during the mid-to-late []90s[]a fashionable area where people were putting money almost to the exclusion of the rest of the stock market.

THIS PAGE IS NOT PART OF THE 2006 SEMIANNUAL REPORT TO STOCKHOLDERS | 7

Without positive cash flow, these

businesses are likely to have trouble

keeping up with more profitable,

cash-laden competitors. In such

businesses, we like to see cash

flows that are greater than earnings

because it means that the company[s

depreciation expenses are healthy.

In high-returning businesses, we

prefer that cash flows be reinvested

at high returns.

In all cases, regardless of the type

of business, we want to see cash

flows used intelligently. To our wav

of thinking, this means reinvesting

in the business or paying dividends

LETTER TO OUR STOCKHOLDERS

Five Years of Fashion

Most small-cap market cycles have been much shorter than the current cycle∏s nearly six-year time span, with the average length of the eight completed cycles in the history of the Russell 2000 being 3.3 years. The shortest was little more than one-and-a-quarter years (2/8/80-6/15/81), while the longest lasted approximately six-and-a-half years (10/9/89-5/22/96). If the current cycle were to end soon, it would be the second longest on record. This is one of the reasons why we evaluate Fund performance on an absolute basis over long-term periods, such as five years, in addition to full market cycles. Examining five-year periods is especially useful because they typically include all of or most of a full market cycle, sometimes two. In addition, examining rolling five-year results gives a better picture of long-term market trends, and can also provide insight into what we might expect as the market moves forward.

There have been 269 monthly trailing five-year return periods since the Russell 2000∏s inception on 12/31/78. From inception through 6/30/06, the index [s five-year return was less than zero in only 3% of these periods. The index provided positive single-digit returns more than 40% of the time and double-digit returns 56% of the time. Over the entire period, the average of all of the 269 five-year average annual total return periods was 11.6%. In the case of small-cap value, the results are even stronger. The Russell 2000 Value index did not

to shareholders. As with most

things, we think about the longterm

picture when it comes to cash

flow. We may be willing to buy a

firm in a negative cash flow

moment if we think the firm is

capable of righting itself. However,

cash flow problems should be

temporary as few factors signal

quality more definitively than

stable, growing cash flows.

8 | THIS PAGE IS NOT PART OF THE 2006 SEMIANNUAL REPORT TO STOCKHOLDERS have any negative five-year return periods since its inception and produced positive single-digit returns in 17% of the periods. In an impressive 83% of the periods, the value index produced double-digit five-year average annual total returns, averaging 14.5% for all of the 269 return periods. (Please see the following page for more details.)

The foregoing is in large part why we believe that small-caps continually offer the potential to produce above-average returns over long-term time horizons, and why we regard them as a necessary component in any asset allocation plan. Fashions come and go, but we believe that approaches such as ours, those that patiently strive to build wealth over the long haul, have what it takes to remain successful no matter what happens to be in (or out) of style elsewhere in the investment world.

Sincerely,

Charles M. Royce President W. Whitney George Vice President Jack E. Fockler, Jr. Vice President

July 31, 2006

The Russell 2000 Value index did not have any negative five-year return periods since its inception and produced positive single-digit returns in 17% of the periods. In an impressive 83% of the periods, the value index produced double-digit five-year average annual total returns, averaging 14.5% for all of the 269 return periods.

CALENDAR YEAR NAV TOTAL RETURNS

Year	RVT	Year	RVT
2005	8.4%	1996	15.5%
2004	21.4	1995	21.1
2003	40.8	1994	0.1
2002	-15.6	1993	17.3
2001	15.2	1992	19.3
2000	16.6	1991	38.4

The first-half results for Royce Value Trust∏s (RVT) diversified portfolio of small- and micro-cap stocks fully reflected the schizoid nature of the first six months of 2006. For the year-to-date period ended 6/30/06, the Fund was up 9.6% on a net asset value (NAV) basis and 0.7% on a market price basis versus an 8.2% return for the Russell 2000 and a 7.7% result for the S&P 600. On an NAV basis, RVT stayed ahead of both of its small-cap benchmarks, although its market price return trailed by a substantial margin. Much of the Fund\(\sigma\) s market price lag can be attributed to its relative lack of participation in the dynamic rally that characterized the first guarter, in which RVT∏s market price return was 6.1%. During the same period, the Russell 2000 was up 13.9% and the S&P 600 gained 12.8%, while RVT gained 14.0% on an NAV basis. When stock prices fell in the second quarter, RVT lost 3.9% on an NAV basis and 5.1% on a market price basis. The Russell 2000 declined 5.0% and the S&P 600 lost 4.6% in the second quarter.

The Fund solid first-half NAV return contributed to its strong absolute and relative results over market-cycle and other long-term periods. From the small-cap market peak on 3/9/00 through 6/30/06, RVT gained 112.3% versus 29.5% for the Russell 2000 and 77.8% for the S&P 600. During the more bullish phase from the small-cap market trough on 10/9/02 through 6/30/06, the Fund was up 141.8% compared to a gain of 131.8% for the Russell 2000 and 128.0% for the S&P 600. On an NAV basis, RVT also held a performance advantage over each of its benchmarks for the one-, three-, five-, 10-, 15-year and since inception (11/26/86) periods ended 6/30/06. The Fund outperformed the Russell 2000 on a market price basis for each of these periods except the one year interval and bested the S&P 600 for all but the one-and three-year periods. RVT\(\begin{aligned} \text{s average annual NAV total return since} \end{aligned}\) inception was 12.9%.

Each of the Fund\(\partial\) sequity sectors posted positive net gains during the first half. On a dollar basis, the leading sectors were Industrial Products, Industrial Services and Natural Resources. Within Industrial Products, more than 40% of the sector∏s dollar-based gains came from holdings in the machinery industry, including the portfolio∏s top gainer∏and top-ten position∏Lincoln Electric Holdings, a security that we have owned in RVT\(\sigma\) s portfolio since 1998. What has attracted us over the years to this welding and cutting products maker were its strong balance sheet, history of positive earnings and ability to generate positive cash flow from operating activities. Its cyclical industrial business was one that attracted quality-seeking value investors like ourselves. We were pleasantly surprised by its impressive first half, as the worldwide demand for its products continued to grow at a torrid pace. The firm announced record revenues in February for both the fiscal year and fourth quarter ended 12/31/05. Record revenues were also reported in April for the fiscal first

ROYCE MICRO-CAP TRUST

AVERAGE ANNUAL NAV TOTAL RETURNS Through 6/30/06

Second Quarter 2006*

-3.16%

During the first half of 2006, the diversified portfolio of Royce Micro-Cap Trust (RMT) posted solid results on both an absolute and relative basis. For the year-to-date period ended 6/30/06, RMT gained 11.6% on a net asset value (NAV) basis and 4.5% on a market price basis versus a return of 8.2% for the Russell 2000, the Fund[s small-cap **benchmark.** In the bullish opening quarter, RMT\(\sigma\) s portfolio fully participated in the dynamic up market with a gain of 15.2% versus the Russell 2000∏s return of 13.9%, while on a market price basis the Fund lagged, gaining 7.0%. Even better news was the Fund\\\ stronger relative down-market showing in the second quarter, a more bearish time span that saw stock prices fall. From April through the end of June, RMT was down 3.2% on an NAV basis and 2.3% on a market price basis, both results ahead of the Russell 2000∏s 5.0% decline. For the even shorter-term downturn from the most recent small-cap market high on 5/5/06 through 6/30/06, the Fund was down 6.1% on an NAV basis and 5.4% on a market price basis, both results again better then the small-cap index□s return of -7.1%. Although short-term performance periods are typically not of great interest or concern, we were pleased with RMT[s near-term down market results considering the volatility and vulnerability of the micro-cap asset class.

We were also pleased with the Fund \[\]s NAV full market cycle and other long-term results on both an absolute and relative basis. These are the periods that we believe matter most in any evaluation of the portfolio \[\]s merits. From the small-cap market peak on 3/9/00 through 6/30/06, RMT gained 125.2% on an NAV basis (+174.3% on a market price basis) versus 29.5% for the Russell 2000. Arguably even more impressive was the Fund \[\]s gain during the more bullish phase that ran from the small-cap market trough on 10/9/02 through 6/30/06, a period in which RMT was up 160.7% on an NAV basis (+191.5% on a market price basis) compared to the Russell 2000 \[\]s gain of 131.8%. The Fund also outperformed its benchmark for the one-, three-, five, 10-year and since inception (12/14/93) periods on both an NAV and market price basis. RMT \[\]s average annual NAV total return since inception was 14.4%.

All but one of the Fund[s equity sectors posted net gains during the first half, and losses at the individual company level were relatively small. Multi-business holding company BB Holdings spun off a subsidiary that trades in the U.S., but the prospect of its own domestic de-listing sent investors fleeing; its stock continues to trade overseas. Small pharmaceuticals companies have endured tough times recently, even conservatively capitalized businesses such as Momenta Pharmaceuticals. The firm experienced net losses as it waited for new drugs to be approved, which led many investors to go cold turkey on its stock. After selling some shares in March, we repurchased the stock in April. At the end of June, we held a position in American Bank Note Holographics, a firm that produces holograms for currency, credit card identification and

ROYCE FOCUS TRUST

AVERAGE ANNUAL NAV TOTAL RETURNS Through 6/30/06 Second Quarter 2006* Jan - June 2006* 8.11 One-Year 30.73

We were pleased with the first-half results for Royce Focus Trust (FUND) on an absolute basis, even if the Fund\[\] s net asset value (NAV) returns came up short by a hair\[\] s breadth on a relative basis. For the year-to-date period ended 6/30/06, FUND gained 8.1% on an NAV basis and 10.6% on a market price basis versus a return of 8.2% for its small-cap benchmark, the Russell 2000. In hindsight, the Fund\[\] s NAV results in the year\[\] s first six months went as we would expect\[\] a solid up-market turn and better relative down-market performance. During the bullish first quarter, the Fund was up 13.6% on an NAV basis and 18.4% on a market price basis, compared to a 13.9% gain for the Russell 2000. The second quarter saw stock prices decline, and the Fund lost 4.8% on an NAV basis (-6.5% on a market price basis), while the Russell 2000 declined 5.0%.

These historically characteristic performances helped FUND to post strong absolute and superior relative results over market-cycle and other long-term performance periods. From the most recent small-cap market peak on 3/9/00 through 6/30/06, the Fund gained 179.3% on an NAV basis (+233.4% on a market price basis) versus 29.5% for the Russell 2000. In the mostly up-market phase from the small-cap market trough on 10/9/02 through 6/30/06, FUND[s NAV return was 193.6% (+210.9% on a market price basis) versus a gain of 131.8% for its small-cap benchmark. On both an NAV and market price basis, FUND outperformed the Russell 2000 for the one-, three-, five-year and since inception of Royce[s management (11/1/96) periods ended 6/30/06. The Fund[s average annual NAV total return since inception was 14.3%.

Each of the Fund sectors posted net gains during the first half, led on a dollar basis by its three largest, Industrial Products, Natural Resources and Technology. Net losses at the individual company level were relatively minor, however disappointing. Orchid Cellmark has a dominant position in DNA testing, a promising niche business that we liked a great deal. However, it struggled with losses and meeting new regulations and the resulting accounting difficulties left us uncertain about the firm sfuture prospects. Multi-business holding company BB Holdings spun off a subsidiary that trades in the U.S., but the prospect of its own domestic de-listing sent investors fleeing; its stock continues to trade overseas.

Within Industrial Products, several holdings posted impressive net gains. We have owned shares of welding and cutting products maker Lincoln Electric Holdings since shortly after we assumed management of FUND[]s portfolio, drawn to its strong business, low-debt balance sheet, history of earnings and steady dividend. The firm[]s business has recently undergone explosive growth, reporting record sales for the fiscal year and fiscal fourth quarter of 2005, as well as the first fiscal quarter of 2006. It was a top-ten holding at the

^{*} Beginning with the 1997 (RVT), 2002 (RMT) and 2004 (FUND) distributions, the purchase price of distributions is a weighted average of the distribution reinvestment prices for the year.

18 | 2006 SEMIANNUAL REPORT TO STOCKHOLDERS

^{**} Other than for initial purchase and June 30, 2006, values are stated as of December 31 of the year indicated, after reinvestment of distributions.

DISTRIBUTION REINVESTMENT AND CASH PURCHASE OPTIONS

Why should I reinvest my distributions?

By reinvesting distributions, a stockholder can maintain an undiluted investment in the Fund. The regular reinvestment of distributions has a significant impact on stockholder returns. In contrast, the stockholder who takes distributions in cash is penalized when shares are issued below net asset value to other stockholders.

How does the reinvestment of distributions from the Royce closed-end funds work?

The Funds automatically issue shares in payment of distributions unless you indicate otherwise. The shares are generally issued at the lower of the market price or net asset value on the valuation date.

How does this apply to registered stockholders?

If your shares are registered directly with a Fund, your distributions are automatically reinvested unless you have otherwise instructed the Funds transfer agent, Computershare, in writing. A registered stockholder also has the option to receive the distribution in the form of a stock certificate or in cash if Computershare is properly notified.

What if my shares are held by a brokerage firm or a bank?

If your shares are held by a brokerage firm, bank, or other intermediary as the stockholder of record, you should contact your brokerage firm or bank to be certain that it is automatically reinvesting distributions on your behalf. If they are unable to reinvest distributions on your behalf, you should have your shares registered in your name in order to participate.

What other features are available for registered stockholders?

The Distribution Reinvestment and Cash Purchase Plans also allow registered stockholders to make optional cash purchases of shares of a Fund□s common stock directly through Computershare on a monthly basis, and to deposit certificates representing your Fund shares with Computershare for safekeeping. The Funds□ investment adviser is absorbing all commissions on optional cash purchases under the Plans through December 31, 2006.

How do the Plans work for registered stockholders?

Computershare maintains the accounts for registered stockholders in the Plans and sends written confirmation of all transactions in the account. Shares in the account of each participant will be held by Computershare in non-certificated form in the name of the participant, and each participant will be able to vote those shares at a stockholder meeting or by proxy. A participant may also send other stock certificates held by them to Computershare to be held in non-certificated form. There is no service fee charged to participants for reinvesting distributions. If a participant elects to sell shares from a Plan account, Computershare will deduct a \$2.50 fee plus brokerage commissions from the sale transaction. If a nominee is the registered owner of your shares, the nominee will maintain the accounts on your behalf.

How can I get more information on the Plans?

You can call an Investor Services Representative at (800) 221-4268 or you can request a copy of the Plan for your Fund from Computershare. All correspondence (including notifications) should be directed to: [Name of Fund] Distribution Reinvestment and Cash Purchase Plan, c/o Computershare, PO Box 43010, Providence, RI 02940-3010, telephone (800) 426-5523.

- ^a Non-income producing.
- b At June 30, 2006, the Fund owned 5% or more of the Company so outstanding voting securities thereby making the Company an Affiliated Company as that term is defined in the Investment Company Act of 1940.
- ^c A portion of these securities were on loan at June 30, 2006.
- d A security for which market quotations are no longer readily available represents 0.2% of net assets. This security has been valued at its fair value under procedures established by the Fund so Board of Directors.
- ^e Includes securities first acquired in 2006 and less than 1% of net assets applicable to Common Stockholders.
- □ New additions in 2006.

INCOME TAX INFORMATION: The cost of total investments for Federal income tax purposes was \$1,062,163,481. At June 30, 2006, net unrealized appreciation for all securities was \$395,133,172, consisting of aggregate gross unrealized appreciation of \$436,662,692 and aggregate gross unrealized depreciation of \$41,529,520. The primary differences in book and tax basis cost is the timing of the recognition of losses on securities sold.

- (a) The Market Value Total Return is calculated assuming a purchase of Common Stock on the opening of the first business day and a sale on the closing of the last business day of each period reported. Dividends and distributions, if any, are assumed for the purposes of this calculation to be reinvested at prices obtained under the Fund
 ☐s Distribution Reinvestment and Cash Purchase Plan. Net Asset Value Total Return is calculated on the same basis, except that the Fund
 ☐s net asset value is used on the purchase and sale dates instead of market value.
- (b) Expense ratios based on total average net assets including liquidation value of Preferred Stock were 1.09%, 1.22%, 1.21%, 1.19%, 1.38% and 1.30% for the periods ended June 30, 2006 and December 31, 2005, 2004, 2003, 2002 and 2001, respectively.
- (c) Expense ratios based on average net assets applicable to Common Stockholders before waiver of fees by the investment adviser would have been 1.62%, 1.82% and 1.65% for the periods ended December 31, 2003, 2002 and 2001, respectively.
- (d) The management fee is calculated based on average net assets over a rolling 60-month basis, while the above ratios of Management fee expenses are based on average net assets applicable to Common Stockholders over an annualized six-month basis.
- (e) The average of month-end market values during the period that the Preferred Stock was outstanding.

 * To be allocated to net investment income and capital gains at year end.
- ** Annualized.
- *** Not annualized.

30 | 2006 SEMIANNUAL REPORT TO STOCKHOLDERS

THE ACCOMPANYING NOTES ARE AN INTEGRAL PART OF THESE FINANCIAL STATEMENTS.

Notes to Financial Statements (Unaudited)

Summary of Significant Accounting Policies:

Royce Value Trust, Inc. ([the Fund]) was incorporated under the laws of the State of Maryland on July 1, 1986 as a diversified closed-end investment company. The Fund commenced operations on November 26, 1986.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

Valuation of Investments:

Securities are valued as of the close of trading on the New York Stock Exchange (generally 4:00 p.m. Eastern time) on the valuation date. Securities that trade on an exchange or Nasdaq, and securities traded on Nasdaq\[\]s Electronic Bulletin Board, are valued at their last reported sales price or Nasdag official closing price taken from the primary market in which each security trades or, if no sale is reported for such day, at their bid price. Other over-the-counter securities for which market quotations are readily available are valued at their bid price. Securities for which market quotations are not readily available are valued at their fair value under procedures established by the Fund\s Board of Directors. Bonds and other fixed income securities may be valued by reference to other securities with comparable ratings, interest rates and maturities, using established independent pricing services. Investments in money market funds are valued at net asset value per share.

Investment Transactions and Related Investment Income:

Investment transactions are accounted for on the trade date. Dividend income is recorded on the ex-dividend date and any non-cash dividend income is recorded at the fair market value of the securities received. Interest income is recorded on an accrual basis. Realized gains and losses from investment transactions are determined on the basis of identified cost for book and tax purposes.

Taxes:

As a qualified regulated investment company under Subchapter M of the Internal Revenue Code, the Fund is not subject to income taxes to the extent that it distributes substantially all of its taxable income for its fiscal year. The Schedule of Investments includes information regarding income taxes under the caption \(\pi\) Income Tax Information\(\pi\).

Distributions:

The Fund currently has a policy of paying quarterly distributions on the Fund∏s Common Stock. Distributions are currently being made at the annual rate of 9% of the rolling average of the prior four calendar quarter-end NAVs of the Fund□s Common Stock, with the fourth quarter distribution being the greater of 2.25% of the rolling average or the distribution required by IRS regulations. Distributions to Preferred Stockholders are accrued daily and paid quarterly. The Fund is required to allocate long-term capital gain distributions and other types of income proportionately to distributions made to holders of shares of Common Stock and Preferred Stock. To the extent that distributions are not paid from long-term capital gains, net investment income or net short-term capital gains, they will represent a return of capital. Distributions are determined in accordance with income tax regulations that may differ from accounting principles generally accepted in the United States of America. Permanent book and tax basis differences relating to stockholder distributions will result in reclassifications within the capital accounts. Undistributed net investment income may include temporary book and tax basis differences, which will reverse in a subsequent period. Any taxable income or gain remaining undistributed at fiscal year end is distributed in the following year.

Repurchase Agreements:

The Fund may enter into repurchase agreements with institutions that the Fund investment adviser has determined are creditworthy. The Fund restricts repurchase agreements to maturities of no more than seven days. Securities pledged as collateral for repurchase agreements, which are held until maturity of the repurchase agreements, are marked-to-market daily and maintained at a value at least equal to the principal amount of the repurchase agreement (including accrued interest). Repurchase agreements could involve certain risks in the event of default or insolvency of the

Expenses:

The Fund incurs direct and indirect expenses. Expenses directly attributable to the Fund are charged to the Fund soperations, while expenses applicable to more than one of the Royce Funds are allocated in an equitable manner. Allocated personnel and occupancy costs related to The Royce Funds are included in administrative and office facilities expenses. The Fund has adopted a deferred fee agreement that allows the Fund Directors to defer the receipt of all or a portion of Directors Fees otherwise payable. The deferred fees are invested in certain Royce Funds until distributed in accordance with the agreement.

Compensating Balance Credits:

The Fund has an arrangement with its custodian bank, whereby a portion of the custodian s fee is paid indirectly by credits earned on the Fund s cash on deposit with the bank. This deposit arrangement is an alternative to purchasing overnight investments.

counter-party, including possible delays or restrictions upon the ability of the Fund to dispose of the underlying securities.

Securities Lending:

The Fund loans securities to qualified institutional investors for the purpose of realizing additional income. Collateral on all securities loaned for the Fund is accepted in cash and cash equivalents and invested temporarily by the custodian. The collateral is equal to at least 100% of the current market value of the loaned securities. The market value of the loaned securities is determined at the close of business of the Fund and any additional required collateral is delivered to the Fund on the next business day.

Notes to Financial Statements (Unaudited) (continued)

Capital Stock:

The Fund issued 1,209,849 and 2,294,908 shares of Common Stock as reinvestment of distributions by Common Stockholders for the six months ended June 30, 2006 and the year ended December 31, 2005, respectively.

At June 30, 2006, 8,800,000 shares of 5.90% Cumulative Preferred Stock were outstanding. Commencing October 9, 2008 and thereafter, the Fund, at its option, may redeem the Cumulative Preferred Stock, in whole or in part, at the redemption price. The Cumulative Preferred Stock is classified outside of permanent equity (net assets applicable to Common Stockholders) in the accompanying financial statements in accordance with Emerging Issues Task Force (EITF) Topic D-98, Classification and Measurement of Redeemable Securities, that requires preferred securities that are redeemable for cash or other assets to be classified outside of permanent equity to the extent that the redemption is at a fixed or determinable price and at the option of the holder or upon the occurrence of an event that is not solely within the control of the issuer.

The Fund is required to meet certain asset coverage tests with respect to the Cumulative Preferred Stock as required by the 1940 Act. In addition, pursuant to the Rating Agency Guidelines established by Moody□s, the Fund is required to maintain a certain discounted asset coverage. If the Fund fails to meet these requirements and does not correct such failure, the Fund may be required to redeem, in part or in full, the Cumulative Preferred Stock at a redemption price of \$25.00 per share, plus an amount equal to the accumulated and unpaid dividends, whether or not declared on such shares, in order to meet these requirements. Additionally, failure to meet the foregoing asset to pay dividends to Common Stockholders and could lead to sales of portfolio securities at inopportune times. The Fund has met these requirements since issuing the Cumulative Preferred Stock.

Investment Advisory Agreement:

As compensation for its services under the Investment Advisory Agreement, Royce & Associates, LLC ([Royce]) receives a fee comprised of a Basic Fee ([Basic Fee]) and an adjustment to the Basic Fee basedPurchases and Sales of Investment Securities: on the investment performance of the Fund in relation to the investment record of the S&P SmallCap 600 Index (∏S&P 600∏).

Stock, for the rolling 60-month period ending with such month (the [performance period]). The Basic Fee for each month is increased or decreased at the rate of 1/12 of .05% for each percentage point that the investment performance of the Fund exceeds, or is exceeded by, the percentage change in the investment record of the S&P 600 for the performance period by more than two percentage points. The performance period for each such month is a rolling 60-month period ending with such month. The maximum increase or decrease in the Basic Fee for any month may not exceed 1/12 of .5%. Accordingly, for each month, the maximum monthly fee rate as adjusted for performance is 1/12 of 1.5% and is payable if the investment performance of the Fund exceeds the percentage change in the investment record of the S&P 600 by 12 or more percentage points for the performance period, and the minimum monthly fee rate as adjusted for performance is 1/12 of .5% and is payable if the percentage change in the investment record of the S&P 600 exceeds the investment performance of the Fund by 12 or more percentage points for the performance period.

Notwithstanding the foregoing, Royce is not entitled to receive any fee for any month when the investment performance of the Fund for the rolling 36-month period ending with such month is negative. In the event that the Fund[s investment performance for such a performance period is less than zero, Royce will not be required to refund to the Fund any fee earned in respect of any prior performance period.

Royce has voluntarily committed to waive the portion of its investment advisory fee attributable to an issue of the Fund \square s Preferred Stock for any month in which the of the Preferred Stock fails to exceed the applicable Preferred Stock\\ s dividend rate.

For the six rolling 60-month periods ending June 2006, the investment performance of the Fund exceeded the investment performance of the S&P 600 by 4% to 12%. Accordingly, the investment advisory fee consisted of a Basic Fee of \$4,977,939 and an upward adjustment of \$1,651,656 for performance of the Fund above that of the S&P 600. For the six months ended June 30, 2006, the Fund accrued and paid Royce advisory fees totaling \$6,629,595.

For the six months ended June 30, 2006, the cost of purchases and proceeds from sales of investment securities, other than short-term securities and

The Basic Fee is a monthly fee equal to 1/12 of 1% collateral received for securities loaned, amounted to (1% on an annualized basis) of the average of the \$91,002,143 and \$175,751,874, respectively. Fund[]s month-end net assets applicable to Common Stockholders, plus the liquidation value of Preferred

Transactions in Shares of Affiliated Companies:

An □Affiliated Company□, as defined in the Investment Company Act of 1940, is a company in which a Fund owns 5% or more of the company∏s outstanding voting securities. The Fund effected the following transactions in shares of such companies during the six months ended June 30, 2006:

Affiliated Company	Shares 12/31/05	Market Value 12/31/05	Cost of Purchases	Cost of Sales	Realized Gain (Loss)	Dividend Income	Shares 6/30/06	Market Value 6/30/06

- (a) The Market Value Total Return is calculated assuming a purchase of Common Stock on the opening of the first business day and a sale on the closing of the last business day of each period reported. Dividends and distributions, if any, are assumed for the purposes of this calculation to be reinvested at prices obtained under the Fund
 ☐s Distribution Reinvestment and Cash Purchase Plan. Net Asset Value Total Return is calculated on the same basis, except that the Fund
 ☐s net asset value is used on the purchase and sale dates instead of market value.
- (b) Expense ratios based on total average net assets including liquidation value of Preferred Stock were 1.41%, 1.35%, 1.32%, 1.49%, 1.62% and 1.46% for the periods ended June 30, 2006 and December 31, 2005, 2004, 2003, 2002 and 2001, respectively.
- (c) Expense ratios based on average net assets applicable to Common Stockholders before waiver of fees by the investment adviser would have been 1.92%, 2.04% and 1.81% for the periods ended December 31, 2003, 2002 and 2001, respectively.
- (d) The management fee is calculated based on average net assets over a rolling 36-month basis, while the above ratios of Management fee expenses are based on average net assets applicable to Common Stockholders over an annualized six-month basis.
- (e) The average of month-end market values during the period that the Preferred Stock was outstanding.
- * To be allocated to net investment income and capital gains at year end.
- ** Annualized.

Notes to Financial Statements (Unaudited)

Summary of Significant Accounting Policies:

Royce Micro-Cap Trust, Inc. ([the Fund]) was incorporated under the laws of the State of Maryland on September 9, 1993 as a diversified closed-end investment company. The Fund commenced operations on December 14, 1993.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

Valuation of Investments:

Securities are valued as of the close of trading on the New York Stock Exchange (generally 4:00 p.m. Eastern time) on the valuation date. Securities that trade on an exchange or Nasdaq, and securities traded on Nasdaq∏s Electronic Bulletin Board, are valued at their last reported sales price or Nasdag official closing price taken from the primary market in which each security trades or, if no sale is reported for such day, at their bid price. Other over-the-counter securities for which market quotations are readily available are valued at their bid price. Securities for which market quotations are not readily available are valued at their fair value under procedures established by the Fund∏s Board of Directors. Bonds and other fixed income securities may be valued by reference to other securities with comparable ratings, interest rates and maturities, using established independent pricing services. Investments in money market funds are valued at net asset value per share.

Investment Transactions and Related Investment Income:

Investment transactions are accounted for on the trade date. Dividend income is recorded on the ex-dividend date and any non-cash dividend income is recorded at the fair market value of the securities received. Interest income is recorded on an accrual basis. Realized gains and losses from investment transactions are determined on the basis of identified cost for book and tax purposes.

Taxes:

As a qualified regulated investment company under Subchapter M of the Internal Revenue Code, the Fund is not subject to income taxes to the extent that it distributes substantially all of its taxable income for its fiscal year. The Schedule of Investments includes information regarding income taxes under the caption []Income Tax Information[].

Distributions:

The Fund currently has a policy of paying quarterly distributions on the Fund\(\sigma \) Common Stock. Distributions are currently being made at the annual rate of 9% of the rolling average of the prior four calendar guarter-end NAVs of the Fund∏s Common Stock, with the fourth quarter distribution being the greater of 2.25% of the rolling average or the distribution required by IRS regulations. Distributions to Preferred Stockholders are accrued daily and paid quarterly. The Fund is required to allocate long-term capital gain distributions and other types of income proportionately to distributions made to holders of shares of Common Stock and Preferred Stock. To the extent that distributions are not paid from long-term capital gains, net investment income or net short-term capital gains, they will represent a return of capital. Distributions are determined in accordance with income tax regulations that may differ from accounting principles generally accepted in the United States of America. Permanent book and tax basis differences relating to stockholder distributions will result in reclassifications within the capital accounts. Undistributed net investment income may include temporary book and tax basis differences, which will reverse in a subsequent period. Any taxable income or gain remaining undistributed at fiscal year end is distributed in the following year.

Repurchase Agreements:

The Fund may enter into repurchase agreements with institutions that the Fund investment adviser has determined are creditworthy. The Fund restricts repurchase agreements to maturities of no more than seven days. Securities pledged as collateral for repurchase agreements, which are held until maturity of the repurchase agreements, are marked-to-market daily and maintained at a value at least equal to the principal amount of the repurchase agreement (including accrued interest). Repurchase agreements could involve certain risks in the event of default or insolvency of the

Expenses:

The Fund incurs direct and indirect expenses. Expenses directly attributable to the Fund are charged to the Fund soperations, while expenses applicable to more than one of the Royce Funds are allocated in an equitable manner. Allocated personnel and occupancy costs related to The Royce Funds are included in administrative and office facilities expenses. The Fund has adopted a deferred fee agreement that allows the Fund Directors to defer the receipt of all or a portion of Directors Fees otherwise payable. The deferred fees are invested in certain Royce Funds until distributed in accordance with the agreement.

Compensating Balance Credits:

The Fund has an arrangement with its custodian bank, whereby a portion of the custodian see is paid indirectly by credits earned on the Fund scash on deposit with the bank. This deposit arrangement is an alternative to purchasing overnight investments.

counter-party, including possible delays or restrictions upon the ability of the Fund to dispose of the underlying securities.

Securities Lending:

The Fund loans securities to qualified institutional investors for the purpose of realizing additional income. Collateral on all securities loaned for the Fund is accepted in cash and cash equivalents and invested temporarily by the custodian. The collateral is equal to at least 100% of the current market value of the loaned securities. The market value of the loaned securities is determined at the close of business of the Fund and any additional required collateral is delivered to the Fund on the next business day.

44 | 2006 SEMIANNUAL REPORT TO STOCKHOLDERS

Notes to Financial Statements (Unaudited) (continued)

Capital Stock:

The Fund issued 587,476 and 1,625,665 shares of Common Stock as reinvestment of distributions by Common Stockholders for the six months ended June 30, 2006 and the year ended December 31, 2005, respectively.

At June 30, 2006, 2,400,000 shares of 6.00% Cumulative Preferred Stock were outstanding. Commencing October 16, 2008 and thereafter, the Fund, at its option, may redeem the Cumulative Preferred Stock, in whole or in part, at the redemption price. The Cumulative Preferred Stock is classified outside of permanent equity (net assets applicable to Common Stockholders) in the accompanying financial statements in accordance with Emerging Issues Task Force (EITF) Topic D-98, Classification and Measurement of Redeemable Securities, that requires preferred securities that are redeemable for cash or other assets to be classified outside of permanent equity to the extent that the redemption is at a fixed or determinable price and at the option of the holder or upon the occurrence of an event that is not solely within the control of the issuer.

The Fund is required to meet certain asset coverage tests with respect to the Cumulative Preferred Stock as required by the 1940 Act. In addition, pursuant to the Rating Agency Guidelines established by Moody∏s, the Fund is required to maintain a certain discounted asset coverage. If the Fund fails to meet these requirements and does not correct such failure, the Fund may be required to redeem, in part or in full, the Cumulative Preferred Stock at a redemption price of \$25.00 per share, plus an amount equal to the accumulated and unpaid dividends, whether or not declared on such shares, in order to meet these requirements. Additionally, failure to meet the foregoing asset coverage requirements could restrict the Fund[s ability to pay dividends to Common Stockholders and could lead to sales of portfolio securities at inopportune times. The Fund has met these requirements since issuing the Cumulative Preferred Stock.

Investment Advisory Agreement:

As compensation for its services under the Investment Advisory Agreement, Royce & Associates, ([Basic Fee]) and an adjustment to the Basic Fee based \$2,442,929.

The Basic Fee is a monthly fee equal to 1/12 of 1% (1% on an annualized basis) of the average of the Fund s month-end net assets applicable to Common Stockholders, plus the liquidation value of Preferred Stock, for the rolling 36-month period ending with such month (the performance period). The Basic Fee for each month is increased or decreased at the rate of 1/12 of .05% for each percentage point that the investment performance of the Fund exceeds, or is exceeded by, the percentage change in the investment record of the Russell 2000 for the performance period by more than two percentage points. The performance period for each such month is a rolling 36-month period ending with such month. The maximum increase or decrease in the Basic Fee for any month may not exceed 1/12 of .5%. Accordingly, for each month, the maximum monthly fee rate as adjusted for performance is 1/12 of 1.5% and is payable if the investment performance of the Fund exceeds the percentage change in the investment record of the Russell 2000 by 12 or more percentage points for the performance period, and the minimum monthly fee rate as adjusted for performance is 1/12 of 5% and is payable if the percentage change in the investment record of the Russell 2000 exceeds the investment performance of the Fund by 12 or more percentage points for the performance period.

Royce has voluntarily committed to waive the portion of its investment advisory fee attributable to an issue of the Fund s Preferred Stock for any month in which the Fund s average annual NAV total return since issuance of the Preferred Stock fails to exceed the applicable Preferred Stock s dividend rate.

For the six rolling 36-month periods ending June 2006, the investment performance of the Fund exceeded the investment performance of the Russell 2000 by 18% to 29%. Accordingly, the investment advisory fee consisted of a Basic Fee of \$1,628,619 and an upward adjustment of \$814,310 for performance of the Fund above that of the Russell 2000. For the six months ended June 30, 2006, the LLC ([Royce]) receives a fee comprised of a Basic FeeFund accrued and paid Royce advisory fees totaling

on the investment performance of the Fund in relation
 Purchases and Sales of Investment Securities: to the investment record of the Russell 2000.

For the six months ended June 30, 2006, the cost of purchases and proceeds from sales of investment securities, other than short-term securities and collateral received for securities loaned, amounted to \$52,230,448 and \$77,416,882, respectively.

Transactions in Shares of Affiliated Companies:

An ∏Affiliated Company∏, as defined in the Investment Company Act of 1940, is a company in which a Fund owns 5% or more of the company soutstanding voting securities. The Fund effected the following transactions in shares of such companies during the six months ended June 30, 2006:

Affiliated	Shares	Market Value	Cost of	Cost of	Realized	Dividend	Shares	Market Value
Company	12/31/05	12/31/05 P	urchases	Sales	Gain (Loss)	Income	6/30/06	6/30/06

- (a) The Market Value Total Return is calculated assuming a purchase of Common Stock on the opening of the first business day and a sale on the closing of the last business day of each period reported. Dividends and distributions, if any, are assumed for the purposes of this calculation to be reinvested at prices obtained under the Fund
 ☐s Distribution Reinvestment and Cash Purchase Plan. Net Asset Value Total Return is calculated on the same basis, except that the Fund
 ☐s net asset value is used on the purchase and sale dates instead of market value.
- (b) Expense ratios based on total average net assets including liquidation value of Preferred Stock were 1.16%, 1.22%, 1.21%, 1.20%, 1.43% and 1.11% for the periods ended June 30, 2006 and December 31, 2005, 2004, 2003, 2002 and 2001, respectively.
- (c) Expense ratios based on average net assets applicable to Common Stockholders before waiver of fees by the investment adviser would have been 1.73%, 2.06% and 1.69% for the periods ended December 31, 2003, 2002 and 2001, respectively.
- (d) The average of month-end market values during the period that the Preferred Stock was outstanding.
- * To be allocated to net investment income and capital gains at year end.
- ** Annualized.
- *** Not annualized.

Notes to Financial Statements (Unaudited)

Summary of Significant Accounting Policies:

Royce Focus Trust, Inc. ([the Fund]) is a diversified closed-end investment company. The Fund commenced operations on March 2, 1988 and Royce & Associates, LLC ([Royce]) assumed investment management responsibility for the Fund on November 1, 1996.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

Valuation of Investments:

Securities are valued as of the close of trading on the New York Stock Exchange (generally 4:00 p.m. Eastern time) on the valuation date. Securities that trade on an exchange or Nasdaq, and securities traded on Nasdaq∏s Electronic Bulletin Board, are valued at their last reported sales price or Nasdag official closing price taken from the primary market in which each security trades or, if no sale is reported for such day, at their bid price. Other over-the-counter securities for which market quotations are readily available are valued at their bid price. Securities for which market quotations are not readily available are valued at their fair value under procedures established by the Fund∏s Board of Directors. Bonds and other fixed income securities may be valued by reference to other securities with comparable ratings, interest rates and maturities, using established independent pricing services. Investments in money market funds are valued at net asset value per share.

Investment Transactions and Related Investment Income:

Investment transactions are accounted for on the trade date. Dividend income is recorded on the ex-dividend date and any non-cash dividend income is recorded at the fair market value of the securities received. Interest income is recorded on an accrual basis. Realized gains and losses from investment transactions are determined on the basis of identified cost for book and tax purposes.

Taxes:

As a qualified regulated investment company under Subchapter M of the Internal Revenue Code, the Fund is not subject to income taxes to the extent that it distributes substantially all of its taxable income for its fiscal year. The Schedule of Investments includes information regarding income taxes under the caption \(\pi\)Income Tax Information\(\pi\).

Distributions:

The Fund currently has a policy of paying quarterly distributions on the Fund[s Common Stock. Distributions are currently being made at the annual rate of 5% of the rolling average of the prior four calendar quarter-end NAVs of the Fund∏s Common Stock, with the fourth quarter distribution being the greater of 1.25% of the rolling average or the distribution required by IRS regulations. Distributions to Preferred Stockholders are accrued daily and paid quarterly. The Fund is required to allocate long-term capital gain distributions and other types of income proportionately to distributions made to holders of shares of Common Stock and Preferred Stock. To the extent that distributions are not paid from long-term capital gains, net investment income or net short-term capital gains, they will represent a return of capital. Distributions are determined in accordance with income tax regulations that may differ from accounting principles generally accepted in the United States of America. Permanent book and tax basis differences relating to stockholder distributions will result in reclassifications within the capital accounts. Undistributed net investment income may include temporary book and tax basis differences, which will reverse in a subsequent period. Any taxable income or gain remaining undistributed at fiscal year end is distributed in the following year.

Repurchase Agreements:

The Fund may enter into repurchase agreements with institutions that the Fund sinvestment adviser has determined are creditworthy. The Fund restricts repurchase agreements to maturities of no more than seven days. Securities pledged as collateral for repurchase agreements, which are held until maturity of the repurchase agreements, are marked-to-market daily and maintained at a value at least equal to the principal amount of the repurchase agreement (including accrued interest). Repurchase agreements could involve certain risks in the event of default or

Expenses:

The Fund incurs direct and indirect expenses. Expenses directly attributable to the Fund are charged to the Fund operations, while expenses applicable to more than one of the Royce Funds are allocated in an equitable manner. Allocated personnel and occupancy costs related to The Royce Funds are included in administrative and office facilities expenses. The Fund has adopted a deferred fee agreement that allows the Fund Directors to defer the receipt of all or a portion of Directors Fees otherwise payable. The deferred fees are invested in certain Royce Funds until distributed in accordance with the agreement.

Compensating Balance Credits:

The Fund has an arrangement with its custodian bank, whereby a portion of the custodian see is paid indirectly by credits earned on the Fund cash on deposit with the bank. This deposit arrangement is an alternative to purchasing overnight investments.

52 | 2006 SEMIANNUAL REPORT TO STOCKHOLDERS

insolvency of the counter-party, including possible delays or restrictions upon the ability of the Fund to dispose of the underlying securities.

Securities Lending:

The Fund loans securities to qualified institutional investors for the purpose of realizing additional income. Collateral on all securities loaned for the Fund is accepted in cash and cash equivalents and invested temporarily by the custodian. The collateral is equal to at least 100% of the current market value of the loaned securities. The market value of the loaned securities is determined at the close of business of the Fund and any additional required collateral is delivered to the Fund on the next business day.

Notes to Financial Statements (Unaudited) (continued)

Capital Stock:

The Fund issued 254,747 and 1,191,399 shares of Common Stock as reinvestment of distributions by Common Stockholders for the six months ended June 30, 2006 and the year ended December 31, 2005, respectively.

On June 10, 2005, the Fund completed a rights offering of Common Stock to its stockholders at the rate of one common share for each 5 rights held by stockholders of record on May 6, 2005. The rights offering was fully subscribed, resulting in the issuance of 2,627,397 common shares at a price of \$8.34, and proceeds of \$21,912,491 to the Fund prior to the deduction of expenses of \$152,119. The net asset value per share of the Fund S Common Stock was reduced by approximately \$0.13 per share as a result of the issuance.

At June 30, 2006, 1,000,000 shares of 6.00% Cumulative Preferred Stock were outstanding. Commencing October 17, 2008 and thereafter, the Fund, at its option, may redeem the Cumulative Preferred Stock, in whole or in part, at the redemption price. The Cumulative Preferred Stock is classified outside of permanent equity (net assets applicable to Common Stockholders) in the accompanying financial statements in accordance with Emerging Issues Task Force (EITF) Topic D-98, Classification and Measurement of Redeemable Securities, that requires preferred securities that are redeemable for cash or other assets to be classified outside of permanent equity to the extent that the redemption is at a fixed or determinable price and at the option of the holder or upon the occurrence of an event that is not solely within the control of the issuer.

The Fund is required to meet certain asset coverage tests with respect to the Cumulative Preferred Stock as required by the 1940 Act. In addition, pursuant to the Rating Agency Guidelines established by Moody□s, the Fund is required to maintain a certain discounted asset coverage. If the Fund fails to meet these requirements and does not

correct such failure, the Fund may be required to redeem, in part or in full, the Cumulative Preferred Stock at a redemption price of \$25.00 per share, plus an amount equal to the accumulated and unpaid dividends, whether or not declared on such shares, in order to meet these requirements. Additionally, failure to meet the foregoing asset coverage requirements could restrict the Fund\(\) sability to pay dividends to Common Stockholders and could lead to sales of portfolio securities at inopportune times. The Fund has met these requirements since issuing the Cumulative Preferred Stock

Investment Advisory Agreement:

The Investment Advisory Agreement between Royce and the Fund provides for fees to be paid at an annual rate of 1.0% of the Fund saverage daily net assets applicable to Common Stockholders plus the liquidation value of Preferred Stock. Royce has voluntarily committed to waive the portion of its investment advisory fee attributable to an issue of the Fund Preferred Stock for any month in which the Fund average annual NAV total return since issuance of the Preferred Stock fails to exceed the applicable Preferred Stock dividend rate. For the six months ended June 30, 2006, the Fund accrued and paid Royce advisory fees totaling \$892,864.

Purchases and Sales of Investment Securities:

For the six months ended June 30, 2006, the cost of purchases and proceeds from sales of investment securities, other than short-term securities and collateral received for securities loaned, amounted to \$25,496,847 and \$36,628,988, respectively.

BOARD APPROVAL OF INVESTMENT ADVISORY AGREEMENTS

At meetings held on June 7-8, 2006, each of the Funds respective Board of Directors, including all of the non-interested directors, approved the continuance of the Investment Advisory Agreements between Royce & Associates, LLC ($\sqcap R\&A \sqcap$) and each of Royce Value Trust, Royce Micro-Cap Trust and Royce Focus Trust (the $\sqcap Funds \sqcap$). In reaching these decisions, the Board reviewed the materials provided by R&A, which included, among other things, information prepared internally by R&A and independently by Morningstar Associates, LLC (☐Morningstar☐) containing detailed expense ratio and investment performance comparisons for each of the Funds with other funds in their ∏peer group∏, information regarding the past performance of Funds managed by R&A and a memorandum outlining the legal duties of the Board prepared by independent counsel to the non-interested directors. R&A also provided the directors with an analysis of its profitability with respect to providing investment advisory services to each of the Funds. In addition, the Board took into account information furnished throughout the year at regular Board meetings, including reports on investment performance, shareholder services, regulatory compliance, brokerage commissions and research, brokerage and execution products and services provided to the Funds. The Board also considered other matters it deemed important to the approval process such as brokerage commissions paid to R&A affiliates, and other direct and indirect benefits to R&A and its affiliates, from their relationship with the Funds. The directors also met throughout the year with investment advisory personnel from R&A. The Board, in its deliberations, recognized that, for many of the Funds shareholders, the decision to purchase Fund shares included a decision to select R&A as the investment adviser and that there was a strong association in the minds of Fund shareholders between R&A and each Fund. In considering factors relating to the approval of the continuance of the Investment Advisory Agreements, the non-interested directors received assistance and advice from, and met separately with, their independent counsel. While the Investment Advisory Agreements for the Funds were considered at the same Board meetings, the directors dealt with each agreement separately. Among other factors, the directors considered the following:

The nature, extent and quality of services provided by R&A: The directors considered the following factors to be of fundamental importance to their consideration of whether to approve the continuance of the Funds Investment Advisory Agreements: (i) R&A\sigma more than 30 years of small-cap value investing experience and track record; (ii) the history of long-tenured R&A portfolio managers managing the Funds; (iii) R&A∏s sole focus on mid-cap, small-cap and micro-cap value investing; (iv) the consistency of R&A\sqrt{s} approach to managing both the Funds and open-end mutual funds over more than 30 years; (v) the integrity and high ethical standards adhered to at R&A; (vi) R&A\(\sigma\) s specialized experience in the area of trading small- and micro-cap securities; (vii) R&A\(\sigma\) historical ability to attract and retain portfolio management talent and (viii) R&A s focus on shareholder interests as exemplified by its voluntary fee waiver policy on preferred stock assets in certain circumstances where the Fund[s total return performance from the issuance of the preferred does not exceed the coupon rate on the preferred, and expansive shareholder reporting and communications. The directors reviewed the services that R&A provides to the Funds, including, but not limited to, managing each Fund∫s investments in accordance with the stated policies of each Fund. The directors determined that the services to be provided to each Fund by R&A would be the same as those it previously provided to the Funds. They also took into consideration the histories, reputations and backgrounds of R&A\sigma portfolio managers for the Funds, finding that these would likely have an impact on the continued success of the Funds. Lastly, the directors noted R&A[s ability to attract quality and experienced personnel. The directors concluded that the services provided by R&A to each Fund compared favorably to services provided by R&A to other R&A client accounts, including other funds, in both nature and quality, and that the scope of services provided by R&A would continue to be suitable for each Fund.

Investment performance of the Funds and R&A: In light of R&A□s risk-averse approach to investing, the directors believe that risk-adjusted performance continues to be an appropriate measure of each Fund□s investment performance. One measure of risk-adjusted performance the directors have historically used in their review of the Funds□ performance is the Sharpe Ratio. The Sharpe Ratio is a risk-adjusted measure of performance developed by Nobel Laureate William Sharpe. It is calculated by dividing a fund□s annualized excess returns by its annualized standard deviation to determine reward per unit of risk. The higher the Sharpe Ratio, the better a fund□s historical risk-adjusted performance. The Board attaches primary importance to risk-adjusted performance over relatively long periods of time, typically three to five years. Using Morningstar data, Royce Value Trust□s Sharpe Ratio placed in the 2nd quartile for all funds within the small blend category assigned by Morningstar for the three- and five-year periods ended December 31, 2005. Similarly, Royce Micro-Cap Trust□s Sharpe Ratio placed it in the 2nd quartile among funds within the small blend category assigned by Morningstar for the three- and five-year periods. Finally, Royce Focus Trust□s Sharpe Ratio placed it in the top quartile among all funds within the small blend category assigned by Morningstar for the three- and five-year periods. The

directors noted that each of the Funds invest in small-cap and micro-cap issuers, and that each had 54 \mid 2006 SEMIANNUAL REPORT TO STOCKHOLDERS

BOARD APPROVAL OF INVESTMENT ADVISORY AGREEMENTS (CONTINUED)

outperformed the Russell 2000 Index over three- and five-year periods ended 12/31/05. Although the directors recognized that past performance is not necessarily an indicator of future results, they found that R&A had the necessary qualifications, experience and track record in managing small-cap and micro-cap securities to manage the Funds. The directors determined that R&A continued to be an appropriate investment adviser for the Funds and concluded that each Fund\[\]s performance supported the renewal of its Investment Advisory Agreement.

Cost of the services provided and profits realized by R&A from its relationship with each Fund: The directors considered the cost of the services provided by R&A and profits realized by R&A from its relationship with each Fund. As part of the analysis, the Board discussed with R&A its methodology in allocating its costs to each Fund and concluded that its allocations were reasonable. The directors concluded that R&A \square s profits were reasonable in relation to the nature and quality of services provided.

The extent to which economies of scale would be realized as the Funds grow and whether fee levels would reflect such economies of scale: The directors considered whether there have been economies of scale in respect of the management of the Funds, whether the Funds have appropriately benefited from any economies of scale and whether there is potential for realization of any further economies of scale. The directors noted the time and effort involved in managing portfolios of small- and micro-cap stocks and that they did not involve the same efficiencies as do portfolios of large cap stocks. The directors concluded that the current fee structure for each Fund was reasonable, and that no changes were currently necessary.

Comparison of services to be rendered and fees to be paid to those under other investment advisory contracts, such as contracts of the same and other investment advisers or other clients: The directors reviewed the investment advisory fee paid by each Fund and compared both the services to be rendered and the fees to be paid under the Investment Advisory Agreements to other contracts of R&A and to contracts of other investment advisers to registered investment companies investing in small- and micro-cap stocks, as provided by Morningstar. The directors noted that, in the case of Royce Value Trust, the 1.00% basic fee is subject to adjustment up or down (up to 50 bps in either direction) based on the Fund∏s performance versus the S&P 600 SmallCap Index over a rolling period of sixty months. The fee is charged on average net assets over that rolling period. As a result, in a rising market, the fee will be smaller than a fee calculated on the current year∏s average net assets, and vice versa. The directors determined that the performance adjustment feature continued to serve as an appropriate incentive to R&A to manage the Fund for the benefit of its long-term stockholders. The directors noted that R&A had also agreed to waive its management fee on Fund assets in an amount equal to the liquidation preference of the Fund[s outstanding preferred stock if the Fund[s total return from issuance of the preferred on such amount is less than the preferred or scoupon rate. The directors also noted that the fee arrangement, which also includes a provision for no fee in periods where the Fund performance is negative, requires R&A to measure the Fund∫s performance monthly against the S&P 600, an unmanaged index. Instead of receiving a set fee regardless of its performance, R&A is penalized for poor performance.

In the case of Royce Micro-Cap Trust, the directors noted that the Fund had a 1.00% basic fee subject to adjustment up or down (up to 50 bps in either direction) based on the Fund \square s performance versus the Russell 2000 Index over a rolling 36 month period. The fee is charged on average net assets over that rolling period. As a result, in a rising market, the fee will be smaller than a fee calculated on the current year average net assets, and vice versa. The directors determined that the performance adjustment feature continued to serve as an incentive to R&A to manage the Fund for the benefit of its long-term stockholders. The directors also noted R&A \square s voluntary waiver of its fee on the liquidation value of the outstanding preferred stock in circumstances where the Fund \square s total return performance from the issuance of the preferred is less than the coupon rate on the preferred for each month during the year.

Finally, in the case of Royce Focus Trust, the directors noted that if the Fund \square s expense ratio were based on total average net assets including net assets applicable to Preferred Stock, it would place in the 2nd quartile of its Morningstar peer group. The directors also noted that R&A had agreed to waive its management fee on the liquidation value of the outstanding preferred stock if the Fund \square s total return from the issuance of the preferred is less than its coupon rate.

The directors also considered fees charged by R&A to institutional and other clients and noted that the Funds[] advisory fees compared favorably to those other accounts.

After the non-interested directors deliberated in executive session, the entire Board, including all the non-interested directors, approved the renewal of the existing Investment Advisory Agreements, concluding that a contract renewal on the existing terms was in the best interest of the shareholders of each Fund and that each

investment advisory fee rate was reasonable in relation to the services provided.

NOTES TO PERFORMANCE AND OTHER IMPORTANT INFORMATION

The thoughts expressed in this *Review and Report* concerning recent market movements and future prospects for small company stocks are solely the opinion of Royce at June 30, 2006, and, of course, historical market trends are not necessarily indicative of future market movements. Statements regarding the future prospects for particular securities held in the Funds portfolios and Royce investment intentions with respect to those securities reflect Royce opinions as of June 30, 2006 and are subject to change at any time without notice. There can be no assurance that securities mentioned in this *Review and Report* will be included in any Royce-managed portfolio in the future. The Funds invest primarily in securities of mid-, small- and micro-cap companies, that may involve considerably more risk than investments of larger-cap companies. All publicly released material information is always disclosed by the Funds on the website at www.roycefunds.com.

Standard deviation is a statistical measure within which a fund \square s total returns have varied over time. The greater the standard deviation, the greater a fund \square s volatility.

The Russell 2000, Russell 2000 Value, Russell 2000 Growth, Nasdaq Composite, S&P 500 and S&P 600 are unmanaged indices of domestic common stocks. Returns for the market indices used in this *Review and Report* were based on information supplied to Royce by Frank Russell and Morningstar. Royce has not independently verified the above described information. The Royce Funds is a service mark of The Royce Funds.

Forward-Looking Statements

This material contains forward-looking statements within the meaning of the Securities Exchange Act of 1934,
amended (the [Exchange Act]), that involve risks and uncertainties, including, among others, statements as to:
the Funds□ future operating results
] the prospects of the Funds□ portfolio companies
] the impact of investments that the Funds have made or may make
] the dependence of the Funds[] future success on the general economy and its impact on the companies and
industries in which the Funds invest, and
the ability of the Funds□ portfolio companies to achieve their objectives.

This *Review and Report* uses words such as <code>[anticipates, [] [believes, [] [expects, [] [future, [] [intends, [] and sime expressions to identify forward-looking statements. Actual results may differ materially from those projected in the forward-looking statements for any reason.</code>

The Royce Funds have based the forward-looking statements included in this *Review and Report* on information available to us on the date of the report, and we assume no obligation to update any such forward-looking statements. Although The Royce Funds undertake no obligation to revise or update any forward-looking statements, whether as a result of new information, future events or otherwise, you are advised to consult any additional disclosures that we may make through future stockholder communications or reports.

Authorized Share Transactions

Royce Value Trust, Royce Micro-Cap Trust and Royce Focus Trust may each repurchase up to 300,000 shares of its respective common stock and up to 10% of the issued and outstanding shares of its respective preferred stock during the year ending December 31, 2006. Any such repurchases would take place at then prevailing prices in the open market or in other transactions. Common stock repurchases would be effected at a price per share that is less than the share \square s then current net asset value, and preferred stock repurchases would be effected at a price per share that is less than the share \square s liquidation value.

Royce Value Trust, Royce Micro-Cap Trust and Royce Focus Trust are also authorized to offer their common stockholders an opportunity to subscribe for additional shares of their common stock through rights offerings at a price per share that may be less than the share share strength the current net asset value. The timing and terms of any such offerings are within each Board siscretion.

Proxy Voting

A copy of the policies and procedures that The Royce Funds use to determine how to vote proxies relating to portfolio securities and information regarding how each of The Royce Funds voted proxies relating to portfolio securities during the most recent 12-month period ended June 30 is available, without charge, on the Royce Funds website at www.roycefunds.com, by calling 1-800-221-4268 (toll-free) and on the website of the Securities

as

and Exchange Commission ($\square SEC \square$), at www.sec.gov.

Form N-Q Filing

The Funds file their complete schedules of investments with the SEC for the first and third quarters of each fiscal year on Form N-Q. The Funds Forms N-Q are available on The Royce Funds website at www.roycefunds.com and on the SEC website at www.sec.gov. The Funds Forms N-Q may also be reviewed and copied at the SEC Public Reference Room in Washington, D.C. To find out more about this public service, call the SEC at 1-800-732-0330. The Funds complete schedules of investments are updated quarterly, and are available at www.roycefunds.com.

56 | 2006 SEMIANNUAL REPORT TO STOCKHOLDERS

POSTSCRIPT

Party People

For members of our investment staff, conversations at parties or other social gatherings usually follow a familiar pattern. Introductions are made, pleasantries are exchanged and soon the talk circles around to what people do for a living. When one of our staff says, [Investment management] or [Mutual funds,] the responses generally include inquiries about which firm we work for or what sort of investments we make.

Occasionally, when we mention that we manage money for The Royce Funds, people recognize the name some even know that we re a small-cap value shop or mention Chuck builduitous bow ties. Often, though, a few seconds of awkward silence ensues, followed by a quick nod and an attempt at reassurance, as if we decrestfallen that someone might not be familiar with one of the hundreds of mutual fund companies that exist today. To puncture the silence, they describe say something like, do have, Royce... yes, of course... no, I we heard of you, definitely... great company... really terrific... I think my niece owns one of your, uh, funds. At this, we usually smile politely, nod and reach for the shrimp.

More recently, however, we were taken aback at a question from a fellow guest who was familiar with the firm: []Why do you people have so many funds if all you do is small-cap value investing?[] To be honest, we seldom thought much about this, and at first we were a bit defensive. We wondered[]not aloud, fortunately[]if managers at Fidelity or Vanguard get these kinds of questions? Are fund managers whose firms offer multiple large-cap or fixed income portfolios ever buttonholed at parties and asked to justify the existence of half their product offerings? Didn[]t the person asking this question know that small-cap represents the largest domestic equity class in the U.S., with more than 8,000 publicly traded companies totaling more than \$2.7 trillion in total market capitalization?

But we stopped ourselves before slipping into a lecture on the wondrous variety of our chosen asset class. Taking a deep breath, we relaxed as soon as we realized that it wasn t facts such as those mentioned above that we were battling; it was the perception that if you do one thing well, there must be only one way to do it. The truth is a little more complicated, and more difficult to explain in the language of light chatter that animates a party.

We have always thought of small-cap value investing as an approach that encompasses a range of possible styles. Our opportunity to see this theory work in practice came in the late $\square 90s$. Whitney George began to manage portfolios on his own just before Buzz Zaino and Charlie Dreifus joined us early in 1998. Each of their approaches has important differences and similarities to the one Chuck Royce has been refining since 1972. The same holds true for the rest of the talented group of portfolio managers and analysts who work with us today. Each of them brings something unique to the portfolio process, while sharing our overall goal of finding high-quality, undervalued small companies.

Equally important is the enormous expansion in the number of small-cap companies available for potential investment over the last two decades. In 20 years, the number of companies has nearly doubled and the total market capitalization has increased by more than seven times: At the end of 1985, there were 4,781 companies with market caps less than \$500 million (the commonly accepted definition of small-cap at the time) representing \$348.7 billion in total market capitalization (Source: FactSet). We have introduced newer portfolios over the last 10 years in response to this extraordinary growth. The rapid expansion of small-cap has allowed us to bring out these new offerings.

Now maybe we can get back to cordial introductions, vacation talk and hors d□oeuvres.

THIS PAGE IS NOT PART OF THE 2006 REPORT TO STOCKHOLDERS

The RoyceFunds

Wealth Of Experience

With approximately \$25.1 billion in open- and closed-end fund assets under management, Royce & Associates is committed to the same small-company investing principles that have served us well for more than 30 years. Charles M. Royce, our Chief Investment Officer, enjoys one of the longest tenures of any active mutual fund manager. Royce sinvestment staff includes six other Portfolio Managers, as well as eight assistant portfolio managers and analysts, and six traders.

Multiple Funds, Common Focus

Our goal is to offer both individual and institutional investors the best available small-cap value portfolios. Unlike a lot of mutual fund groups with broad product offerings, we have chosen to concentrate on small-company value investing by providing investors with a range of funds that take full advantage of this large and diverse sector.

Consistent Discipline

Our approach emphasizes paying close attention to risk and maintaining the same discipline, regardless of market movements and trends. The price we pay for a security must be significantly below our appraisal of its current worth. This requires a thorough analysis of the financial and business dynamics of an enterprise, as though we were purchasing the entire company.

Co-Ownership Of Funds

It is important that our employees and shareholders share a common financial goal; our officers, employees and their families currently have approximately \$111 million invested in The Royce Funds.
