CHAIRMAN'S STATEMENT

Dear shareholders,

In a flash moment, we find ourselves stepping into the second half of 2010.

During the first half of 2010, the global economy was still faced with uncertainties as the financial crisis has not entirely waned. However, benefiting greatly from the strong production growth and the higher international oil price, the Company achieved a record performance.

During the period, the oil spill in the Gulf of Mexico has raised a major concern for us. We believe such incident is not just a challenge for a single company to confront with, but is an issue that cannot be avoided by the entire industry. The incident has made us to reassess the high risk characteristics of the offshore oil industry. Reflecting on the incident, we have once again placed a higher degree of recognition on safety culture, environmental protection, and social responsibility. Although striving for better development and higher shareholder value is the basic duty of the Company, CNOOC Limited has been committed to, while making reasonable profits, fulfilling its social responsibilities, especially in safety and environmental protection.

It is encouraging that the Company has again improved performance during the first half of 2010 while maintaining an outstanding record in health, safety and environment (HSE).

STEADY BUSINESS GROWTH

Early this year, we set a rather ambitious production target. Moving steadily towards this target, we have achieved remarkable results for the first half of the year.

During the period, the Company's business progressed smoothly. Net oil and gas production reached 149.0 million BOE, representing an increase of 40.8% over the same period last year among which, crude oil accounted for 120.3 million barrels while natural gas accounted for 166.7 billion cubic feet. The Company's average realized oil price was US\$76.59 per barrel, a significant increase of 55.2% over the same period last year.

Benefiting from the strong growth of oil and gas production and rising realized prices, the Company's net profit for the first half of the year amounted to RMB25.99 billion, representing an increase of 109.6% over the same period last year. Earnings per share were RMB0.58. In view of the Company's sound financial position, the Board of Directors has declared an interim dividend of HK\$0.21 per share.

In addition, we have successfully completed several significant acquisitions. Through our 50% interest holdings in Bridas Corporation, we have established a solid platform for business development in South America. Through the technical service contract for Missan oil field in Iraq, we have entered this resource rich area along with super-majors. Increasing our share of ownership in the Panyu 4-2/5-1 oil field has added the Company's low risk assets in the core operation area.

HSE always serves as fundamental to our operations. After the oil spill in the Gulf of Mexico, the Company immediately implemented numerous measures including performing a full-scale risk evaluation and safety inspection on our operations, perfecting the procedure and process of drilling and well completion, and pushing to build more oil spill response bases in offshore China.

SOLID FOUNDATION FOR GROWTH

While we are pleased with our results for the first half of the year, we well noted the concerns that have recently been expressed by some of our shareholders: can CNOOC Limited maintain a high growth rate of 6% -10% CAGR over the next five years following so many years of rapid growth?

As a matter of fact, all the production guidance given to the market in these years has a solid material foundation. Our confidence comes from the thorough understanding of the existing resource base as well as the close assessment of the resource potential. Our production growth in the future is expected to come from three major areas.

First of all, our core area-continental shelf offshore China. With decades of operation, we have gained an in-depth understanding on the geological structure and resource distribution of the continental shelf offshore China, which puts us in an unrivalled position in this area. In the first half of 2010, we have achieved breakthrough in a number of new areas, including the significant discovery of Penglai 9-1 and several mid-sized discoveries including Kenli 6-4, Enping 24-2 and Liuhua 16-2.

Secondly, deepwater South China Sea. With an extensive acreage, South China Sea presents ample opportunities. In the first half of 2010, our partner made another new discovery of Liuhua 29-1 and successfully appraised the Liuhua 34-2 structure in deepwater South China Sea. This area is expected to become another major development area of the Company in the medium and long term.

Thirdly, overseas assets. In the first half of 2010, production of the Nigeria Akpo oil field ramped up steadily as anticipated. With the future development of OML130 Phase II Egina field, the production contribution from overseas assets is expected to rise steadily.

Apart from the above, the future merger and acquisition opportunities will also be an important driving force for the Company's medium and long term growth. As you know, the market has paid great attention to the Company's merger and acquisition activities overseas. In fact, such activities have been progressing smoothly all along. In the first half of 2010, we successfully entered into South America and the Middle East. Guided by the Company's growth strategy, every single merger and acquisition activity is targeting at striking a balance between the resources, risk and return, and ultimately achieving our goal of adding value to our shareholders.

We have built a solid foundation for growth in the future. Relying on a rich resource base, we strongly believe that CNOOC Limited will achieve a steady development and a prosperous future.

STRICT COST CONTROL

In the past few years, the rising oil price has caused the oil field service and raw materials costs to constantly increase and made the cost escalation a common issue in the oil industry.

The management of the Company clearly recognizes this issue. Over the years, we have been trying to achieve a balance between reserve and production growth and cost control, aiming at maximizing shareholder value. Our goal is to take the

benefit of the high oil prices by increasing our reserves and production while preventing rapid cost increases and creating shareholder value at the same time.

In the first half of the year, we have undertaken a number of cost control measures and achieved significant outcomes. These measures cover the following three areas:

Firstly, overall planning and managing of the oil and gas fields. Through a streamlining of our management system, we maintained a high production efficiency rate for the oil and gas fields. Taking advantage of the location concentration of the Company's oil and gas fields in offshore China, we arrange exploration, development and production operation resources in a reasonable way, fully utilizing time windows to increase efficiency and lower costs.

Secondly, promoting the regional development of oil and gas fields group instead of single oil and gas field. We consider the group of oil and gas fields in a region as a whole when designing the development plan, and share common facilities as much as possible to reduce costs.

Thirdly, promoting energy conservation and emission reduction to save costs within the Company. With recycling of flaring natural gas and saving of self-use oil and gas, we saved costs and contributed to environmental protection.

These measures have produced a favorable result. In the first half of 2010, the Company's operating cost was US\$6.8 per barrel, down 15.3% compared to that of the year of 2009.

Even though we have led the industry in terms of profitability in recent years, our cost is undoubtedly under upward pressure. We also noticed that the upward trend of the industry cost remains unchanged. With those oil and gas fields developed under the high oil prices environment coming on stream, cost control has become more challenging.

In the future, we will continue to implement the Company's low cost strategy, improve management, promote cost saving, maintain our competitive advantage, and maximize returns for the shareholders.

OUTLOOK OF THE SECOND HALF OF THE YEAR

In the second half of the year, we will focus on the following areas:

1. Continue to strengthen the inspection of operational facilities and management systems in order to ensure health, safety and environmental protection;
2. Step up the efforts of new areas and frontiers exploration and strengthen the Company's long-term reserve base;
3. Focus on the commencement of production of new projects and implementation of production enhancement measures such as infill drilling, and ensure the smooth completion of our annual production target;
4. Strengthen cost control and maintain our low cost advantage.

CNOOC Limited has beautifully completed its goals for the first half of 2010 and has embarked on our new journey for our "next decade of growth". I look forward to the continuous support of our shareholders as in the past decade. Please join hands with CNOOC Limited in the coming years and grow together.

2. BASIS OF PREPARATION AND ACCOUNTING POLICIES

Basis of preparation

The interim condensed consolidated financial statements for the six months ended 30 June 2010 have been prepared in accordance with International Accounting Standards 34 (“IAS 34”) and Hong Kong Accounting Standards 34 (“HKAS 34”) Interim Financial Reporting.

The interim condensed consolidated financial statements do not include all the information and disclosures required in the annual financial statements, and should be read in conjunction with the Group’s annual financial statements as at 31 December 2009.

Significant accounting policies

The accounting policies adopted in the preparation of the interim condensed consolidated financial statements are consistent with those followed in the preparation of the Group’s annual financial statements for the year ended 31 December 2009, except for the adoption of the following new Standards and Interpretations mandatory as of 1 January 2010:

IFRS 3/HKFRS 3 (Revised) – Business Combinations and IAS 27/HKAS 27 (Amended) – Consolidated and Separate Financial Statements

IFRS 3/HKFRS 3 (Revised) introduces significant changes in the accounting for business combinations occurring on or after 1 January 2010. Changes affect the valuation of non-controlling interests, the accounting for transaction costs, the initial recognition and subsequent measurement of a contingent consideration and business combinations achieved in stages. These changes impact the amount of goodwill recognised, the reported results in the period that an acquisition occurs and future reporting results.

IAS 27/HKAS 27 (Amended) requires that a change in the ownership interest of a subsidiary (without loss of control) is accounted for as a transaction with owners in their capacity as owners. Therefore, such transactions will no longer give rise to goodwill, nor will it give rise to a gain or loss.

The changes introduced by the above revised standards have been applied prospectively.

Improvements to IFRSs/HKFRSs

Apart from the above, the IASB/HKICPA has also issued improvements to IFRSs/HKFRSs which set out amendments to a number of IFRSs/HKFRSs primarily with a view to remove inconsistencies and clarify wording. The adoption of those amendments upon their effective dates did not have any impact on the accounting policies, interim financial position or performance of the Group. While the adoption of some of the amendments may result in changes in accounting policy and presentation of the interim condensed financial statements upon their effective dates in future, none of them are expected to have a material financial impact on the Group. Besides, the Group has also considered all other IFRICs/HKFRICs issued and they are unlikely to have any financial impact on the Group.

4. OIL AND GAS SALES AND MARKETING REVENUES

Oil and gas sales represent the invoiced value of sales of oil and gas attributable to the interests of the Group, net of royalties and the government share oil that is lifted and sold on behalf of the government. Revenue from the sales of oil and gas is recognised when the significant risks and rewards of ownership have been transferred, which is when title passes to the customer. Revenue from the production of oil and gas in which the Group has a joint interest with other producers is recognised based on the Group’s working interest and the terms of the relevant production sharing contracts. Differences between production sold and the Group’s share of production are not significant.

Marketing revenues principally represent the sales of oil and gas purchased from the foreign partners under the production sharing contracts and revenues from the trading of oil and gas through the Company’s subsidiaries. The cost of the oil and gas sold is included in “Crude oil and product purchases” in the interim condensed consolidated statement of comprehensive income.

Consequently, no provision has been made for any expenses which might arise as a result of the dispute.

22.

SEGMENT INFORMATION

The Group is organised on a worldwide basis into three major operating segments. The Group is involved in the upstream operating activities of the petroleum industry that comprise independent operations, operations under production sharing contracts and trading business. These segments are determined primarily because the Group's chief operating decision maker makes key operating decisions and assesses performance of the segments separately. The Group evaluates the performance of each segment based on profit or loss from operations before income tax.

The Group mainly engages in the exploration, development, production and sales of crude oil, natural gas and other petroleum products in offshore China. Any activities outside the PRC are mainly conducted in Indonesia, Australia, Nigeria, Argentina, Canada and Singapore.

The following table presents revenue, profit and assets information for the Group's operating segments.

REPORT ON REVIEW OF INTERIM FINANCIAL STATEMENTS

To the Shareholders of
CNOOC Limited
(Incorporated in the Hong Kong Special Administrative Region with limited liability)

INTRODUCTION

We have reviewed the interim condensed financial statements set out on pages 6 to 33 which comprise the condensed consolidated statement of financial position of CNOOC Limited (the “Company”) and its subsidiaries (collectively as the “Group”) as of 30 June 2010 and the related condensed consolidated statements of comprehensive income, changes in equity and cash flows for the six-month period then ended and explanatory notes. The Main Board Listing Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited require the preparation of a report on interim financial information to be in compliance with the relevant provisions thereof and International Accounting Standard 34 Interim Financial Reporting (“IAS 34”) issued by the International Accounting Standards Board or Hong Kong Accounting Standard 34 Interim Financial Reporting (“HKAS 34”) issued by the Hong Kong Institute of Certified Public Accountants.

The directors are responsible for the preparation and fair presentation of these interim condensed financial statements in accordance with IAS 34 and HKAS 34. Our responsibility is to express a conclusion on these interim condensed financial statements based on our review. Our report is made solely to you, as a body, in accordance with our agreed terms of engagement, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

SCOPE OF REVIEW

We conducted our review in accordance with Hong Kong Standard on Review Engagements 2410 Review of Interim Financial Information Performed by the Independent Auditor of the Entity issued by the Hong Kong Institute of Certified Public Accountants. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Hong Kong Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

CONCLUSION

Based on our review, nothing has come to our attention that causes us to believe that the interim condensed financial statements are not prepared, in all material respects, in accordance with IAS 34 and HKAS 34.

CODE ON CORPORATE GOVERNANCE PRACTICES

The Company has complied with the code provisions of the Code on Corporate Governance Practices (the "CG Code") as set out in Appendix 14 of Listing Rules throughout the six months ended 30 June 2010, except for the deviations from the code provisions ("Code Provision") A.2.1 and A.4.1 only. The following summarises the requirements under the relevant Code Provisions and the Company's reasons for such deviations.

Code Provision A.2.1

Under Code Provision A.2.1, the roles of the chairman and chief executive officer are required to be separated and not to be performed by the same individual.

Mr. Fu Chengyu (“Mr. Fu”) is the Chairman of the Board. In addition to the role of the Chairman, the role of Chief Executive Officer is also designated to Mr. Fu. This constitutes a deviation from Code Provision A.2.1. The reason for such deviation is set out below.

The Company is engaged in the oil and gas exploration and production business which is different from integrated oil companies engaging in both upstream and downstream operations. In light of this, the Board considers that the interests of the Company’s oil and gas exploration and production business is best served when strategic planning decisions are made and implemented by the same person. The Nomination Committee of the Company also agreed that it is in the best interests of the Company that the roles of the Chairman of the Board and Chief Executive Officer be performed by the same individual.

CODE ON CORPORATE GOVERNANCE PRACTICES (CONTINUED)

Code Provision A.4.1

Under Code Provision A.4.1, non-executive directors should be appointed for a specific term and be subject to re-election.

None of the existing Independent Non-executive Directors of the Company is appointed for a specific term. This constitutes a deviation from Code Provision A.4.1. However, all the Directors are subject to the retirement provisions under article 97 of the articles of association of the Company (“Article 97”). According to Article 97, one-third of the Directors for the time being must retire from the office by rotation at each annual general meeting. The Company has observed the need for good corporate governance practices. All the other incumbent Non-executive Directors and Independent Non-executive Directors of the Company, except Mr. Wang Tao who was elected as a new Independent Non-executive Director of the Company for the first time by the shareholders at the annual general meeting of the Company on 29 May 2008 and Mr. Li Fanrong who was appointed as a new Non-executive Director of the Company with effect from 24 May 2010, have retired from the office by rotation and have been re-elected in the past three years according to Article 97. Therefore, the Company considers that sufficient measures have been taken to ensure that the Company’s corporate governance practices are no less exacting than those in the CG Code.

STATEMENT OF SIGNIFICANT DIFFERENCES IN CORPORATE GOVERNANCE PRACTICES FOR PURPOSES OF SECTION 303A.11 OF THE NEW YORK STOCK EXCHANGE LISTED COMPANY MANUAL

The Company is incorporated under the laws of Hong Kong. The principal trading market for the ordinary shares of the Company is The Stock Exchange of Hong Kong Limited. However, many of the corporate governance rules in the NYSE Listed Company Manual (the "NYSE Standards") do not apply to the Company as a "foreign private issuer" and the Company is permitted to follow its home country corporate governance practices in lieu of most corporate governance standards contained in the NYSE Standards. Section 303A.11 of the NYSE Listed Company Manual requires NYSE-listed foreign private issuers to describe the significant differences between their corporate governance practices and the corporate governance standards applicable to U.S. companies listed on the NYSE.
