Summary of Investments in Securities by Industry

The following table represents the portfolio investments of the Fund by industry classifications as a percentage of total net assets at Sept. 30, 2009:

Industry	Percentage of net assets	Value
Real Estate Investment Trust (REITs)	84.6%	\$ 75,267,583
Real Estate Management & Development	13.5	11,970,360
Other(1)	18.7	16,671,071
Total		\$ 103,909,014

(1) Cash & Cash
Equivalents.

Notes to Portfolio of Investments

- (a) Securities are valued by using policies described in Note 2 to the financial statements in the most recent Semiannual Report dated June 30, 2009.
- (b) Non-income producing.
- (c) Foreign security values are stated in U.S. dollars.
- (d) At Sept. 30, 2009, security was partially or fully on loan.
- (e) Affiliated Money Market Fund The Fund may invest its daily cash balance in RiverSource Short-Term Cash Fund, a money market fund established for the exclusive use of the RiverSource funds and other institutional clients of RiverSource Investments. The rate shown is the seven-day current annualized yield at Sept. 30, 2009.

(f)

At Sept. 30, 2009, the cost of securities for federal income tax purposes was approximately \$106,509,000 and the approximate aggregate gross unrealized appreciation and depreciation based on that cost was:

Unrealized appreciation	\$ 6,319,000
Unrealized depreciation	(8,919,000)
Net unrealized depreciation	\$(2,600,000)

The industries identified above are based on the Global Industry Classification Standard (GICS), which was developed by and is the exclusive property of Morgan Stanley Capital International Inc. and Standard & Poor's, a division of The McGraw-Hill Companies, Inc.

Fair Value Measurements

Generally accepted accounting principles (GAAP) require disclosure regarding the inputs and valuation techniques used to measure fair value and any changes in valuation inputs or techniques. In addition, investments shall be disclosed by major category.

The Fund categorizes its fair value measurements according to a three-level hierarchy that maximizes the use of observable inputs and minimizes the use of unobservable inputs by prioritizing that the most observable input be used when available. Observable inputs are those that market participants would use in pricing an investment based on market data obtained from sources independent of the reporting entity. Unobservable inputs are those that reflect the Fund's assumptions about the information market participants would use in pricing an investment. An investment's level within the fair value hierarchy is based on the lowest level of any input that is deemed significant to the asset or liability's fair value measurement. The input levels are not necessarily an indication of the risk or liquidity associated with investments at that level. For example, certain U.S. government securities are generally high quality and liquid, however, they are reflected as Level 2 because the inputs used to determine fair value may not always be quoted prices in an active market.

Fair value inputs are summarized in the three broad levels listed below:

Level 1 Valuations based on quoted prices for investments in active markets that the Fund has the ability to access at the measurement date. Valuation adjustments are not applied to Level 1 investments.

Level 2 Valuations based on other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risks, etc.).

Level 3 Valuations based on significant unobservable inputs (including the Fund's own assumptions and judgment in determining the fair value of investments).

Inputs that are used in determining fair value of an investment may include price information, credit data, volatility statistics, and other factors. These inputs can be either observable or unobservable. The availability of observable inputs can vary between investments, and is affected by various factors such as the type of investment, and the volume

and level of activity for that investment or similar investments in the marketplace. The inputs will be considered by the Fund Administrator, along with any other relevant factors in the calculation of an investment's fair value. The Fund uses prices and inputs that are current as of the measurement date, which may include periods of market dislocations. During these periods, the availability of prices and inputs may be reduced for many investments. This condition could cause an investment to be reclassified between the various levels within the hierarchy.

Non-U.S. equity securities actively traded in foreign markets may be reflected in Level 2 despite the availability of closing prices, because the Fund evaluates and determines whether those closing prices reflect fair value at the close of the New York Stock Exchange (NYSE) or require adjustment, as described in Note 2 to the financial statements Valuation of securities in the most recent Semiannual Report dated June 30, 2009.

Investments falling into the Level 3 category are primarily supported by quoted prices from brokers and dealers participating in the market for those investments. However, these may be classified as Level 3 investments due to lack of market transparency and corroboration to support these quoted prices. Additionally, valuation models may be used as the pricing source for any remaining investments classified as Level 3. These models rely on one or more significant unobservable inputs and/or significant assumptions by the Fund Administrator. Inputs used in a valuation model may include, but are not limited to, financial statement analysis, discount rates and estimated cash flows, and comparable company data.

The following table is a summary of the inputs used to value the Fund's investments as of Sept. 30, 2009:

Description	Fair value at Sept. 30, 2009			Total
	Level 1 quoted prices in active markets for identical assets	Level 2 other significant observable inputs	Level 3 significant unobservable inputs	
Equity Securities				
Common Stocks				
Real Estate Management & Development	\$ 11,926,424	\$43,936	\$	\$ 11,970,360
