Invesco Ltd.

Notes to the Condensed Consolidated Financial Statements

1. ACCOUNTING POLICIES

Corporate Information

Invesco Ltd. (Parent) and all of its consolidated entities (collectively, the company or Invesco) provide retail, institutional and high-net-worth clients with an array of global investment management capabilities. The company's sole business is investment management.

Basis of Accounting and Consolidation

The accompanying Condensed Consolidated Balance Sheets, Statements of Income, Statements of Cash Flows, and Statement of Changes in Equity (together, the Condensed Consolidated Financial Statements) have not been audited and should be read in conjunction with the audited consolidated financial statements and notes thereto included in the company's Annual Report on Form 10-K for the year ended December 31, 2009. In the opinion of management, the Condensed Consolidated Financial Statements reflect all adjustments, consisting of normal recurring accruals, which are necessary for the fair presentation of the financial condition and results of operations for the interim periods presented. All significant intercompany transactions, balances, revenues and expenses are eliminated upon consolidation.

The Condensed Consolidated Financial Statements have been prepared in accordance with U.S. GAAP and consolidate the financial statements of the Parent, all of its controlled subsidiaries, any variable interest entities (VIEs) required to be consolidated, and any non-VIE general partnership investments where the company is deemed to have control. Control is deemed to be present when the Parent holds a majority voting interest or otherwise has the power to govern the financial and operating policies of the subsidiary so as to obtain the benefits from its activities. The company provides investment management services to, and has transactions with, various private equity funds, real estate funds, fund-of-funds, collateralized loan obligations (CLOs), and other investment products sponsored by the company for the investment of client assets in the normal course of business. The company serves as the investment manager, making day-to-day investment decisions concerning the assets of these products. Certain of these entities are considered to be VIEs.

The company follows the provisions of Accounting Standards Codification (ASC) Topic 810, Consolidation, when accounting for VIEs, including Accounting Standards Update (ASU) No. 2010-10, Amendments for Certain Investment Funds (ASU 2010-10), detailed in Accounting Pronouncements Recently Adopted and Pending Accounting Pronouncements below. VIEs, or entities in which the risks and rewards of ownership are not directly linked to voting interests, for which the company is the primary beneficiary are consolidated. For all investment products with the exception of CLOs, if the company is deemed to have a variable interest in, and to have the majority of rewards/risks of ownership associated with, these entities, then the company is deemed to be their primary beneficiary and is required to consolidate these entities. For CLOs, if the company is deemed to have the power to direct the activities of the CLO that most significantly impact the CLO's economic performance, and the obligation to absorb losses/right to receive benefits from the CLO that could potentially be significant to the CLO, then the company is deemed to be the CLO's primary beneficiary and is required to consolidate the CLO. Investment products that are consolidated are referred to as consolidated investment products in the accompanying Condensed Consolidated Financial Statements.

A significant portion of consolidated investment products are CLOs. CLOs are investment vehicles created for the sole purpose of issuing collateralized loan instruments that offer investors the opportunity for returns that vary with the risk level of their investment. The notes issued by the CLOs are backed by diversified collateral asset portfolios consisting primarily of loans or structured debt. For managing the collateral for the CLO entities, the company earns investment management fees, including in some cases subordinated management fees, as well as contingent incentive fees. The company has invested in certain of the entities, generally taking a portion of the unrated, junior subordinated position. The company's investments in CLOs are generally subordinated to other interests in the entities and entitles the company and other subordinated tranche investors to receive the residual cash flows, if any, from the entities. Investors in the CLOs have no recourse against the company for any losses sustained in the CLO structure.

Table of Contents

All of the investments held and notes issued by consolidated investment products are presented at fair value in the company's Condensed Consolidated Balance Sheet at June 30, 2010, and interest income and expense of consolidated CLOs is presented as other income/(expense) in the company's Condensed Consolidated Income Statement for the six months ended June 30, 2010. The surplus of consolidated CLO assets over consolidated CLO liabilities is reflected in the company's Condensed Consolidated Balance Sheet as retained earnings appropriated for investors in consolidated investment products. Current period gains/(losses) attributable to investors in consolidated CLOs are included in (gains)/losses attributable to noncontrolling interests in consolidated entities in the Condensed Consolidated Statement of Income and in the retained earnings appropriated for investors in consolidated investment products in the Condensed Consolidated Balance Sheet, as they are considered noncontrolling interests of the company. See Note 12, Consolidated Investment Products, for additional details.

The company also consolidates certain private equity funds that are structured as partnerships in which the company is the general partner receiving a management and/or performance fee. Private equity investments made by the underlying funds consist of direct investments in, or fund investments in other private equity funds that hold direct investments in, equity or debt securities in operating companies that are generally not initially publicly traded. Private equity funds are considered investment companies and are therefore accounted for under the Accounting Standards Codification (ASC) Topic 946, Financial Services—Investment Companies. The company has retained the specialized industry accounting principles of these investment products in its Condensed Consolidated Financial Statements. See Note 12, Consolidated Investment Products, for additional details.

Non-VIE general partnership investments are deemed to be controlled by the company and are consolidated under a voting interest entity (VOE) model, unless the limited partners have the substantive ability to remove the general partner without cause based upon a simple majority vote or can otherwise dissolve the partnership, or unless the limited partners have substantive participating rights over decision-making.

If the company determines that it does not control the private equity partnership funds in which it has invested, the equity method of accounting is used to account for the company's investment in these entities. The equity method of accounting is also used to account for investments in joint ventures and noncontrolled subsidiaries in which the company's ownership is between 20 and 50 percent. Equity investments are carried initially at cost (subsequently adjusted to recognize the company's share of the profit or loss of the investee after the date of acquisition) and are included in investments on the Condensed Consolidated Balance Sheets. The proportionate share of income or loss is included in equity in earnings of unconsolidated affiliates in the Condensed Consolidated Statements of Income. If the company determines that it does not control CLOs in which it has invested, the company accounts for its investments as available-for-sale investments.

The financial statements have been prepared primarily on the historical cost basis; however, certain items are presented using other bases such as fair value, where such treatment is required or voluntarily elected. The financial statements of subsidiaries, with the exception of consolidated investment products as discussed above, are prepared for the same reporting year as the Parent and use consistent accounting policies, which, where applicable, have been adjusted to U.S. GAAP from local generally accepted accounting principles or reporting regulations. The financial information of the consolidated CLOs is included in the company's consolidated financial statements on a one-month lag. Noncontrolling interests in consolidated entities and retained earnings appropriated for investors in consolidated investment products represent the interests in certain entities consolidated by the company either because the company has control over the entity or has determined that it is the primary beneficiary, but of which the company does not own all of the entity's equity.

In preparing the financial statements, management is required to make estimates and assumptions that affect reported revenues, expenses, assets, liabilities and disclosure of contingent liabilities. The primary estimates relate to investment valuation, goodwill impairment and taxes. Use of available information and application of judgment are inherent in the formation of estimates. Actual results in the future could differ from such estimates and the differences may be material to the financial statements.

Reclassifications

The presentation of certain prior period reported amounts has been reclassified to be consistent with the current presentation. Such reclassifications had no impact on net income or equity attributable to common shareholders.

Accounting Pronouncements Recently Adopted and Pending Accounting Pronouncements

In December 2007, the FASB issued Statement No. 141 (revised 2007), Business Combinations (FASB Statement No. 141(R)), and Statement No. 160, Noncontrolling Interests in Consolidated Financial Statements, an amendment of ARB No. 51 (FASB

Table of Contents

Statement No. 160). Under FASB Statement No. 141(R), which is now encompassed in ASC Topic 805, Business Combinations, the acquirer must recognize, with certain exceptions, 100% of the fair values of assets acquired, liabilities assumed, and noncontrolling interests in acquisitions of less than 100% controlling interest when the acquisition constitutes a change in control of the acquired entity. Additionally, when an acquirer obtains partial ownership in an acquiree, an acquirer recognizes and consolidates assets acquired, liabilities assumed and any noncontrolling interests at 100% of their fair values at that date regardless of the percentage ownership in the acquiree. As goodwill is calculated as a residual, all goodwill of the acquired business, not just the acquirer's share, is recognized under this full-goodwill approach. Contingent consideration obligations that are elements of consideration transferred are recognized as of the acquisition date as part of the fair value transferred in exchange for the acquired business. Acquisition-related costs incurred in connection with a business combination shall be expensed. FASB Statement No. 160, which is now encompassed in ASC Topic 810, Consolidation, establishes new accounting and reporting standards for noncontrolling interests (formerly known as minority interests) in a subsidiary and for the deconsolidation of a subsidiary. FASB Statement No. 141(R) and FASB Statement No. 160 became effective for the company on January 1, 2009. FASB Statement No. 141(R) was applied prospectively, while FASB Statement No. 160 required retroactive adoption of the presentation and disclosure requirements for existing noncontrolling interests but prospective adoption of all of its other requirements. The adoption of FASB Statement No. 141(R) amended the definition of a business, which led to a change in the company's basis, but not the company's conclusion, of determining that it has one reporting unit for goodwill impairment purposes. See Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, Critical Accounting Policies and Estimates Goodwill for additional information. The company completed the acquisition of Morgan Stanley's retail asset management business, including Van Kampen Investments (the acquired business or the acquisition) on June 1, 2010. See Note 4, Business Combination and Integration for additional details.

In February 2008, the FASB issued Staff Position No. FAS 157-2, Effective Date of FASB Statement No. 157 (FSP FAS 157-2). FSP FAS 157-2, which is now encompassed in ASC Topic 820, amended FASB Statement No. 157 to delay the effective date for nonfinancial assets and nonfinancial liabilities except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (that is, at least annually). For items within its scope, FSP FAS 157-2 delayed the effective date of FASB Statement No. 157 to January 1, 2009. As of January 1, 2008, Invesco applied the fair value measurement and disclosure provisions of FASB Statement No. 157 to its financial assets and financial liabilities that are recognized or disclosed at fair value in the financial statements. As of January 1, 2009, Invesco applied the fair value measurement and disclosure provisions of FASB Statement No. 157 to nonfinancial assets and nonfinancial liabilities that are recognized or disclosed at fair value in the financial statements on a non-recurring basis. Those items include: (1) nonfinancial assets and nonfinancial liabilities initially measured at fair value in a business combination or other new basis event, but not measured at fair value in subsequent periods; (2) nonfinancial long-lived assets measured at fair value for an impairment assessment under FASB Statement No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets; (now encompassed in ASC Topic 360, Property, Plant and Equipment); (3) nonfinancial liabilities for exit or disposal activities initially measured at fair value under FASB Statement No. 146, Accounting for Costs Associated with Exit or Disposal Activities; (now encompassed in ASC Topic 420, Exit or Disposal Cost Obligations) and (4) nonfinancial assets and nonfinancial liabilities measured at fair value in the second step of a goodwill impairment test. The adoption of FSP FAS 157-2 did not have a material impact on the company's financial statements.

In April 2008, the FASB issued Staff Position No. FAS 142-3, Determination of the Useful Life of Intangible Assets (FSP FAS 142-3). FSP FAS 142-3, which is now encompassed in ASC Topic 350, Intangibles Goodwill and Other (ASC Topic 350), amended the factors that should be considered in developing renewal or extension assumptions used to determine the useful life over which to amortize the cost of a recognized intangible asset under FASB Statement No. 142, Goodwill and Other Intangible Assets, also now encompassed in ASC Topic 350. FSP FAS 142-3 required an entity to consider its own assumptions about renewal or extension of the term of the arrangement, consistent with its expected use of the asset. FSP FAS 142-3 was intended to improve the consistency between the useful life of an intangible asset determined under FASB Statement No. 142 and the period of expected cash flows used to measure the fair value of the asset under FASB Statement No. 141(R) (now encompassed in ASC Topic 805)

and other U.S. GAAP. The guidance provided by FSP FAS 142-3 for determining the useful life of a recognized intangible asset was to be applied prospectively to intangible assets acquired after the effective date, which is January 1, 2009. FSP FAS 142-3 did not have a material impact on the company's financial statements.

During June 2008, the FASB issued Staff Position No. EITF 03-6-1, *Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities* (FSP EITF 03-6-1). FSP EITF 03-6-1, which is now encompassed in ASC Topic 260, *Earnings Per Share* (ASC Topic 260), addressed whether instruments granted in share-based payment transactions are participating securities prior to vesting and need to be included in the earnings allocation in computing earnings per share (EPS) under the two-class method described in FASB Statement No. 128,

Earnings Per Share, also now encompassed in ASC Topic 260. The guidance in the FSP EITF 03-6-1 provided that only those unvested share-based payment awards that contain nonforfeitable rights to

Table of Contents

dividends or dividend equivalents are participating securities that should be included in the calculation of basic EPS under the two-class method. The FASB concluded that the holder of a share-based award receives a noncontingent transfer of value each time the entity declares a dividend, and therefore the share-based award meets the definition of a participating security. FSP EITF 03-6-1 was effective for financial statements issued for fiscal years beginning after December 15, 2008, with all prior period EPS data being adjusted retrospectively. The adoption of FSP EITF 03-6-1 on January 1, 2009, required the company to include unvested restricted stock units (RSUs) that contain nonforfeitable dividend equivalents as outstanding common shares for purposes of calculating basic EPS. The adoption of FSP EITF 03-6-1 did not have a material impact on the company's calculation of diluted EPS for periods prior to January 1, 2009.

In December 2008, the FASB issued FASB Staff Position No. FAS 140-4 and FIN 46(R)-8, Disclosures about Transfers of Financial Assets and Interests in Variable Interest Entities (FSP FAS 140-4 and FIN 46(R)-8), which became effective for the company on March 31, 2009. FSP FAS 140-4 and FIN 46(R)-8, which is now encompassed in ASC Topic 860, Transfers and Servicing, required additional disclosures by public entities with a) continuing involvement in transfers of financial assets to a special purpose entity or b) a variable interest in a variable interest entity. The adoption of FSP FAS 140-4 and FIN 46(R)-8 did not have a material impact on the company's financial statements. See Note 12, Consolidated Investment Products, for additional disclosures.

In January 2009, the FASB issued Staff Position No. EITF 99-20-1, Amendments to the Impairment Guidance of EITF Issue No. 99-20 (FSP EITF 99-20-1), which became effective for the company on March 31, 2009. FSP EITF 99-20-1, which is now encompassed in ASC Topic 325, revised the impairment guidance provided by EITF 99-20 for beneficial interests to make it consistent with the requirements of FASB Statement No. 115 (now encompassed in ASC Topic 320) for determining whether an impairment of other debt and equity securities is other-than-temporary. FSP EITF 99-20-1 eliminated the requirement to rely exclusively on market participant assumptions about future cash flows and permitted the use of reasonable management judgment of the probability that the holder will be unable to collect all amounts due. Instead, FSP 99-20-1 required that an other-than-temporary impairment be recognized when it is probable that there has been an adverse change in the holder's estimated cash flows. FSP EITF 99-20-1 did not have a material impact on the company's financial statements.

On April 9, 2009, the FASB issued three Staff Positions (FSPs) intended to provide additional application guidance and enhance disclosures regarding fair value measurements and impairments of securities. FSP FAS 157-4,

Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions that Are Not Orderly (FSP FAS 157-4), now encompassed in ASC Topic 820, provided guidelines for making fair value measurements more consistent with the principles presented in FASB Statement No. 157. FSP FAS 107-1 and APB 28-1, Interim Disclosures about Fair Value of Financial Instruments (FSP FAS 107-1), now encompassed in ASC Topic 825, enhanced consistency in financial reporting by increasing the frequency of fair value disclosures. FSP FAS 115-2 and FAS 124-2, Recognition and Presentation of Other-Than-Temporary Impairments (FSP FAS 115-2), now encompassed in ASC Topic 320-10-65, provided additional guidance designed to create greater clarity and consistency in accounting for and presenting impairment losses on securities.

FSP FAS 157-4 addressed the measurement of fair value of financial assets when there is no active market or where the price inputs being used could be indicative of distressed sales. FSP FAS 157-4 reaffirmed the definition of fair value already reflected in FASB Statement No. 157, which is the price that would be paid to sell an asset in an orderly transaction (as opposed to a distressed or forced transaction) at the measurement date under current market conditions. FSP FAS 157-4 also reaffirmed the need to use judgment to ascertain if a formerly active market has become inactive and in determining fair values when markets have become inactive. FSP FAS 157-4 became effective for the company for the period ended June 30, 2009. The application of FSP FAS 157-4 did not have a material impact on the Consolidated Financial Statements. See Note 2, Fair Value of Assets and Liabilities, and Note 12, Consolidated Investment Products, for additional details.

FSP FAS 107-1 was issued to improve the fair value disclosures for any financial instruments that are not currently reflected on the balance sheets of companies at fair value. Prior to issuing FSP FAS 107-1, fair values of these assets and liabilities were only disclosed on an annual basis. FSP FAS 107-1 required these disclosures on a quarterly basis, providing qualitative and quantitative information about fair value estimates for all financial instruments not measured

on the balance sheet at fair value. FSP FAS 107-1 became effective for the company for the period ended June 30, 2009, which required the company to make annual disclosures in its interim financial statements, which are included in Note 2, Fair Value of Assets and Liabilities, Note 3, Investments, and Note 7, Debt.

FSP FAS 115-2 was intended to improve the consistency in the timing of impairment recognition and provide greater clarity to investors about the credit and noncredit components of impaired debt securities that are not expected to be sold. FSP FAS 115-2 required increased and more timely disclosures sought by investors regarding expected cash flows, credit losses, and an aging of

Table of Contents

securities with unrealized losses. The company adopted FSP FAS 115-2 on April 1, 2009. Upon adoption, the company recorded a cumulative effect adjustment of \$1.5 million to the April 1, 2009, opening balance of retained earnings with a corresponding adjustment to accumulated other comprehensive income.

In May 2009, the FASB issued Statement No. 165, *Subsequent Events* (FASB Statement No. 165). FASB Statement No. 165, which is now encompassed in ASC Topic 855, *Subsequent Events*, established general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. Specifically, FASB Statement No. 165 provided clarity around the period after the balance sheet date during which management of a reporting entity should evaluate events or transactions that may occur for potential recognition or disclosure in the financial statements, the circumstances under which an entity should recognize events or transactions occurring after the balance sheet date in its financial statements, and the disclosure that an entity should make about events or transactions that occurred after the balance sheet date. FASB Statement No. 165 was effective for interim and annual financial reporting periods ending after June 15, 2009, and was applied prospectively. On February 24, 2010, the FASB issued Accounting Standards Update 2010-09,

Amendments to Certain Recognition and Disclosure Requirements (ASU 2010-09). ASU 2010-09 amended the guidance on subsequent events to remove the requirement for Securities and Exchange Commission filers to disclose the date through which an entity has evaluated subsequent events.

In June 2009, the FASB issued Statement No. 166, *Accounting for Transfers of Financial Assets* an amendment of FASB Statement No. 140, (FASB Statement No. 166), which addresses the effects of eliminating the qualifying special-purpose entity concept from FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities* (FASB Statement No. 140), and will generally subject those entities to the consolidation guidance applied to other VIEs as provided by FASB Statement No. 167, *Amendments to FASB Interpretation No. 46(R)* (FASB Statement No. 167). FASB Statement No. 166 is now encompassed in ASC Topic 860. FASB Statement No. 167 is now encompassed in ASC Topic 810. Specifically, FASB Statement No. 166 introduces the concept of a participating interest, which will limit the circumstances where the transfer of a portion of a financial asset will qualify as a sale, assuming all other derecognition criteria are met, and clarifies and amends the derecognition criteria for determining whether a transfer qualifies for sale accounting. FASB Statement No. 166 will be applied prospectively to new transfers of financial assets occurring on or after January 1, 2010. The adoption of FASB Statement No. 166 did not have a material impact on the company's Consolidated Financial Statements.

In June 2009, the FASB issued Statement No. 167, which amends certain provisions of FIN 46(R). Specifically, FASB Statement No. 167 amends certain provisions for determining whether an entity is a VIE, it requires a qualitative rather than a quantitative analysis to determine whether the company is the primary beneficiary of a VIE, it amends FIN 46(R)'s consideration of related party relationships in the determination of the primary beneficiary of a VIE by providing an exception regarding de facto agency relationships in certain circumstances, it requires continuous assessments of whether the company is a VIE's primary beneficiary, and it requires enhanced disclosures about the company's involvement with VIEs, which are generally consistent with those disclosures required by FSP FAS 140-4 and FIN 46(R)-8 discussed above. In February 2010, the FASB issued ASU 2010-10, a deferral of the effective date of FASB Statement No. 167 for a reporting entity's interests in certain investment funds which have attributes of investment companies, for which the reporting entity does not have an obligation to fund losses, and which are not structured as securitization entities. In addition, the deferral applies to a reporting entity's interest in money market fund-type products. The company has determined that all of its managed funds with the exception of certain collateralized loan obligation products (CLOs) qualify for the deferral.

FASB Statement No. 167, which was effective January 1, 2010, had a significant impact on the presentation of the company's financial statements, as its provisions required the company to consolidate certain CLOs that were not previously consolidated. The cumulative effect adjustment upon adoption of FASB Statement No. 167 at January 1, 2010, resulted in an appropriation of retained earnings and a reclassification of other comprehensive income into retained earnings of \$274.3 million and \$5.2 million, respectively. The company's Consolidated Statement of Income for the six months ended June 30, 2010, reflect the elimination of \$17.6 million in management fees earned from these CLOs, and the addition of \$105.6 million in interest income, \$46.4 million in interest expense, and \$243.2 million in net other gains. The \$281.2 million net income impact during the six months ended June 30, 2010, of consolidation of

these CLOs is largely offset by gains/(losses) attributable to investors in noncontrolling interests of \$277.4 million. Prior to the adoption of FASB Statement No. 167, the company accounted for its investments in these CLOs as available-for-sale investments, with changes in the value of the company's interests being recorded through other comprehensive income. After the adoption of FASB Statement No. 167, the change in value of the company's investments in these CLOs is reflected in the company's net income. For the six months ended June 30, 2010, the net impact to the company of its investments in these CLOs was \$3.8 million. The Condensed Consolidated Balance Sheet at June 30, 2010, reflects the consolidation of \$6.5 billion in assets held and \$5.4 billion in debt issued by these CLOs, despite the fact that the assets cannot be used by the company, nor is the company obligated for the debt. Retained earnings appropriated for investors of consolidated investment products of \$719.5 million is presented as part of the

Table of Contents

company's total equity, reflecting the excess of the consolidated CLOs' assets over their liabilities, attributable to noncontrolling third-party investors in their consolidated CLOs at June 30, 2010. In addition, the company's Condensed Consolidated Cash Flow Statement for the six months ended June 30, 2010, reflects the cash flows of these CLOs. In accordance with the standard, prior periods have not been restated to reflect the consolidation of these CLOs.

Upon adoption of FASB Statement No. 167, the assets and liabilities of the consolidated CLOs were measured at fair value, as the determination of the carrying amounts was not practicable. The company has elected the fair value option under ASC Topic 825-10-25 to measure the assets and liabilities of all consolidated CLOs at fair value subsequent to the date of initial adoption of FASB Statement No. 167, as the company has determined that measurement of the notes issued by consolidated CLOs at fair value better correlates with the value of the assets held by consolidated CLOs, which are held to provide the cash flows for the note obligations. See Note 12, Consolidated Investment Products, for a consolidating balance sheet at June 30, 2010.

In July 2009, the FASB issued Statement No. 168, The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles – A Replacement of FASB Statement No. 162, (FASB Statement No. 168). FASB Statement No. 168 replaced the existing hierarchy of U.S. Generally Accepted Accounting Principles with the FASB ASC as the single source of authoritative U.S. accounting and reporting standards applicable for all nongovernmental entities, with the exception of guidance issued by the U.S. Securities and Exchange Commission and its staff. FASB Statement No. 168 is now encompassed in ASC Topic 105, Generally Accepted Accounting Principles, and was effective July 1, 2009. The company has replaced references to FASB accounting standards with ASC references, where applicable and relevant, in this Report.

In August 2009, the FASB issued Accounting Standards Update 2009-05, Fair Value Measurements and Disclosures (Topic 820) – Measuring Liabilities at Fair Value (ASU 2009-05). ASU 2009-05 amends Topic 820 by providing additional guidance (including illustrative examples) clarifying the measurement of liabilities at fair value. When a quoted price in an active market for the identical liability is not available, the amendments in ASU 2009-05 require that the fair value of a liability be measured using one or more of the listed valuation techniques that should maximize the use of relevant observable inputs and minimize the use of unobservable inputs. In addition, the amendments in ASU 2009-05 clarify that when estimating the fair value of a liability, an entity is not required to include a separate input or adjustment to the other inputs relating to the existence of a restriction that prevents the transfer of the liability. The amendments also clarify how the price of a traded debt security (i.e., an asset value) should be considered in estimating the fair value of the issuer's liability. The amendments in ASU 2009-05 became effective for the company on October 1, 2009. The company has made the required disclosures in Note 7, Debt.

In September 2009, the FASB issued Accounting Standards Update 2009-12, Investments in Certain Entities that Calculate Net Asset Value per Share (or Its Equivalent) (ASU 2009-12). ASU 2009-12 amends ASC Topic 820 to provide further guidance on how to measure the fair value of investments in alternative investments, such as hedge, private equity, real estate, venture capital, offshore and fund of funds. ASU 2009-12 permits, as a practical expedient, the measurement of fair value of an investment on the basis of the net asset value per share of the investment (or its equivalent) if the net asset value of the investment (or its equivalent) is calculated in a manner consistent with ASC Topic 946, Financial Services – Investment Companies, including measurement of all or substantially all of the funds' underlying investments at fair value in accordance with ASC Topic 820. ASU 2009-12 is effective for interim and annual periods ending after December 15, 2009. The adoption of ASU 2009-12 did not have a material impact on the Consolidated Financial Statements.

In January 2010, the FASB issued Accounting Standards Update 2010-06, Improving Disclosures about Fair Value Measurements (ASU 2010-06). ASU 2010-06 amends Topic 820 to require a number of additional disclosures regarding fair value measurements. Specifically, ASU 2010-06 requires entities to disclose: (1) the amount of significant transfers between Level 1 and Level 2 of the fair value hierarchy and the reasons for these transfers; (2) the reasons for any transfers in or out of Level 3; and (3) information in the reconciliation of recurring Level 3 measurements about purchases, sales, issuances and settlements on a gross basis. ASU 2010-06 also clarifies existing fair value disclosures about the appropriate level of disaggregation and about inputs and valuation techniques for both recurring and nonrecurring fair value measurements that fall in either Level 2 or Level 3. The new disclosures and

clarifications of existing disclosures are effective for interim and annual reporting periods beginning after December 15, 2009, except for the disclosures about purchases, sales, issuances, and settlements in the rollforward of activity in Level 3 fair value measurements, which are effective for fiscal years beginning after December 15, 2010, and for interim periods within those fiscal years. The company has made the required disclosures in Note 12, Consolidated Investment Products.

Table of Contents**2. FAIR VALUE OF ASSETS AND LIABILITIES**

The carrying value and fair value of financial instruments is presented in the below summary table. The fair value of financial instruments held by consolidated investment products is presented in Note 12, Consolidated Investment Products.

\$ in millions	Footnote Reference	June 30, 2010		December 31, 2009	
		Carrying Value	Fair Value	Carrying Value	Fair Value
Cash and cash equivalents		555.6	555.6	762.0	762.0
Available for sale investments	3	130.6	130.6	92.7	92.7
Assets held for policyholders		1,151.5	1,151.5	1,283.0	1,283.0
Trading investments	3	160.0	160.0	84.6	84.6
Support agreements	15	(2.5)	(2.5)	(2.5)	(2.5)
Policyholder payables		(1,151.5)	(1,151.5)	(1,283.0)	(1,283.0)
Financial instruments sold, not yet purchased		(0.2)	(0.2)		
Derivative liabilities		(0.2)	(0.2)		
Long-term debt	7	(1,395.7)	(1,428.3)	(745.7)	(765.5)

A three-level valuation hierarchy exists for disclosure of fair value measurements based upon the transparency of inputs to the valuation of an asset or liability as of the measurement date. The three levels are defined as follows:

Level 1 inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets.

Level 2 inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.

Level 3 inputs to the valuation methodology are unobservable and significant to the fair value measurement.

An asset or liability's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

There are three types of valuation approaches: a market approach, which uses observable prices and other relevant information that is generated by market transactions involving identical or comparable assets or liabilities; an income approach, which uses valuation techniques to convert future amounts to a single, discounted present value amount; and a cost approach, which is based on the amount that currently would be required to replace the service capacity of an asset.

The following is a description of the valuation methodologies used for assets and liabilities measured at fair value, as well as the general classification of such assets and liabilities pursuant to the valuation hierarchy.

Cash equivalents

Cash equivalents carried at fair value include cash investments in money market funds. Cash investments in money market funds are valued under the market approach through the use of quoted market prices in an active market, which is the net asset value of the underlying funds, and are classified within level 1 of the valuation hierarchy.

Available-for-sale investments

Available-for-sale investments include amounts seeded into affiliated investment products and investments in affiliated unconsolidated CLOs. Seed money is valued under the market approach through the use of quoted market prices available in an active market and is classified within level 1 of the valuation hierarchy. Seed money investments are investments held in Invesco managed funds with the purpose of providing capital to the funds during their development periods. These investments are recorded at fair value using quoted market prices in active markets; there is no modeling or additional information needed to arrive at the fair values of these investments. CLOs are valued using an income approach through the use of certain observable and unobservable inputs. Due to current liquidity

constraints within the market for CLO products that require the use of unobservable inputs, these investments are classified as level 3 within the valuation hierarchy.

Table of Contents

Assets held for policyholders

Assets held for policyholders represent investments held by one of the company's subsidiaries, which is an insurance entity that was established to facilitate retirement savings plans in the U.K. The assets held for policyholders are accounted for at fair value pursuant to ASC Topic 944, Financial Services – Insurance, and are comprised primarily of affiliated unitized funds. The assets are measured at fair value under the market approach based on the quoted prices of the underlying funds in an active market and are classified within level 1 of the valuation hierarchy. The policyholder liabilities are indexed to the value of the assets held for policyholders.

Trading investments

Trading investments include investments held to economically hedge against costs the company incurs in connection with certain deferred compensation plans in which the company participates, as well as trading and investing activities in equity and debt securities entered into in its capacity as sponsor of unit investment trusts (UITs).

Investments related to deferred compensation plans

Investments related to deferred compensation plans are primarily invested in affiliated funds that are held to economically hedge current and non-current deferred compensation liabilities. Investments related to deferred compensation plans are valued under the market approach through the use of quoted prices in an active market and are classified within level 1 of the valuation hierarchy.

UIT-related equity and debt securities

At June 30, 2010, UIT-related equity and debt securities consisted of investments in corporate stock, UITs, U.S. state and political subdivisions. Each is discussed more fully below.

Corporate stock

The company temporarily holds investments in corporate stock for purposes of creating a UIT. Corporate stocks are valued under the market approach through use of quoted prices on an exchange. To the extent these securities are actively traded, valuation adjustments are not applied and they are categorized in Level 1 of the fair value hierarchy; otherwise, they are categorized in Level 2.

UITs

The company may hold units of its sponsored UITs at period-end for sale in the primary market or secondary market. Equity UITs are valued under the market approach through use of quoted prices on an exchange. Fixed income UITs are valued using recently executed transactions, market price quotations (where observable), bond spreads, or credit default swap spreads. The spread data used is for the same maturity as the underlying bond. If the spread data does not reference the issuer, then data that references a comparable issuer is used. When observable price quotations are not available, fair value is determined based on cash flow models with yield curves, bond or single name credit default spreads, and recovery rates based on collateral value as key inputs. Depending on the nature of the inputs, these investments are categorized as Level 1, 2, or 3.

U.S. state and political subdivision securities

U.S. state and political subdivision (collectively "municipals") securities are valued using recently executed transactions, market price quotations (where observable), bond spreads, or credit default swap spreads. The spread data used is for the same maturity as the underlying bond. If the spread data does not reference the issuer, then data that references a comparable issuer is used. When observable price quotations are not available, fair value is determined based on cash flow models with yield curves, bond or single name credit default spreads, and recovery rates based on collateral value as key inputs. Depending on the nature of the inputs, these investments are categorized as Level 1, 2, or 3.

UIT-related derivative contracts and hedging strategies

The company uses U.S. Treasury futures, which are types of derivative financial instruments, to economically hedge fixed income UIT inventory and securities in order to mitigate market risk. Open futures contracts are marked to market daily through earnings, which is recorded in the company's consolidated statement of income in other revenue, along with the mark-to-market on the underlying trading securities held. Fair values of derivative contracts in an asset position are included in other assets in the company's consolidated statement of position. Fair values of derivative contracts in a liability position are included in other liabilities in the company's consolidated statement of position. These derivative contracts are valued under the market approach through use of quoted prices in an active

market and are classified within Level 1 of the valuation hierarchy. Additionally, to economically hedge the market risk associated with equity UITs temporarily held as trading investments, the company will hold short corporate equity or ETF positions. These transactions are recorded as financial instruments sold, not yet purchased, and are valued in the same manner as corporate stock.

Table of Contents

The following table presents, for each of the hierarchy levels described above, the carrying value of the company's assets and liabilities, including major security type for equity and debt securities, which are measured at fair value on the face of the statement of financial position as of June 30, 2010.

	As of June 30, 2010			
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
\$ in millions	Fair Value Measurements			
Current assets:				
Cash equivalents:

Table of Contents

The following table presents, for each of the hierarchy levels described above, the carrying value of the company's assets that are measured at fair value as of December 31, 2009:

	As of December 31, 2009			
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
\$ in millions	Fair Value Measurements			
Current assets:				
Cash equivalents:				
Money market funds	498.6	498.6		
Investments:*				
Available-for-sale:				
Seed money	74.8	74.8		
Trading investments:				
Investments related to deferred compensation plans	84.6	84.6		
Assets held for policyholders	1,283.0	1,283.0		
Total current assets	1,941.0	1,941.0		
Non-current assets:				
Investments available-for-sale:				
CLOs	17.9			17.9
Total assets at fair value	1,958.9	1,941.0		17.9

* Current foreign time deposits of \$22.5 million and other current investments of \$0.5 million are excluded from this table. Other non-current equity method and other investments of \$134.7 million and \$4.8 million, respectively, are also excluded

from this table.

These

investments are
not measured at
fair value, in
accordance with
applicable
accounting
standards.

The following table shows a reconciliation of the beginning and ending fair value measurements for level 3 assets during the three and six month periods ending June 30, 2010, which are comprised solely of CLOs, and are valued using significant unobservable inputs:

	Three months Ended June 30, 2010	Six months Ended June 30, 2010
\$ in millions		
Beginning balance	0.4	17.9
Adoption of FASB Statement No. 167*		(17.4)
Beginning balance, as adjusted	0.4	0.5
Net unrealized gains and losses included in accumulated other comprehensive income/(loss)**	0.2	0.1
Purchases and issuances		
Other-than-temporary impairment included in other gains and losses, net		
Return of capital		
Ending balance	0.6	0.6

* The company adopted FASB Statement No. 167, now encompassed in ASC Topic 810, Consolidation, on January 1, 2010, resulting in the consolidation of CLOs for which the company has an underlying investment of \$21.8 million at June 30, 2010 (before consolidation). The adjustment

of \$17.4 million
in the table
above reflects
the elimination
of the company's
equity interest
upon adoption.
In accordance
with the
standard, prior
periods have not
been restated to
reflect the
consolidation of
these CLOs.

** Of these net
unrealized gains
and losses
included in
accumulated
other
comprehensive
income/(loss),
\$0.2 million for
the three months
ended June 30,
2010 and
\$0.1 million for
the six months
ended June 30,
2010 are
attributed to the
change in
unrealized gains
and losses
related to assets
still held at
June 30, 2010.

Table of Contents

The following table shows a reconciliation of the beginning and ending fair value measurements for level 3 assets during the three and six month periods ending June 30, 2009, which were comprised solely of CLOs (prior to the adoption of FASB Statement No. 167), and were valued using significant unobservable inputs:

	Three months Ended June 30, 2009	Six months Ended June 30, 2009
\$ in millions		
Beginning balance	13.5	17.5
Net unrealized gains and losses included in accumulated other comprehensive income/(loss)*	0.8	0.9
Purchases and issuances		
Other-than-temporary impairment included in other gains and losses, net	(0.8)	(4.4)
Return of capital	(0.1)	(0.6)
Ending balance	13.4	13.4

* Of these net unrealized gains and losses included in accumulated other comprehensive income/(loss), \$0.8 million for the three months ended June 30, 2009, and \$0.9 million for the six months ended June 30, 2009, are attributed to the change in unrealized gains and losses related to assets still held at June 30, 2009.

3. INVESTMENTS

The disclosures below include details of the company's investments. Investments held by consolidated investment products are detailed in Note 12, Consolidated Investment Products.

Current Investments

	As of
June 30,	December 31,

\$ in millions	2010	2009
Available-for-sale investments:		
Seed money	130.0	74.8
Trading investments:		
Investments related to deferred compensation plans	143.3	84.6
UIT-related equity and debt securities	16.7	
Foreign time deposits	23.5	22.5
Other	0.5	0.5
 Total current investments	 314.0	 182.4

Non-current Investments

\$ in millions	June 30, 2010	As of December 31, 2009
Available-for-sale investments:		
CLOs	0.6	17.9
Equity method investments	142.6	134.7
Other	4.5	4.8
 Total non-current investments	 147.7	 157.4

The portion of trading gains and losses for the six months ended June 30, 2010, that relates to trading securities still held at June 30, 2010, was \$6.6 million net loss.

Table of Contents

Realized gains and losses recognized in the income statement during the year from investments classified as available-for-sale are as follows:

	For the Three months Ended June 30, 2010			For the Six months Ended June 30, 2010		
	Proceeds from Sales	Gross Realized Gains	Gross Realized Losses	Proceeds from Sales	Gross Realized Gains	Gross Realized Losses
\$ in millions						
Current available-for-sale investments	3.7	0.3		10.6	0.7	(0.5)
Non-current available-for-sale investments	0.4			0.6		

Upon the sale of available-for-sale securities, net realized gains of \$0.3 million and \$0.2 million were transferred from accumulated other comprehensive income into the Condensed Consolidated Statements of Income during three and the six months ended June 30, 2010, respectively. The specific identification method is used to determine the realized gain or loss on securities sold or otherwise disposed.

Gross unrealized holding gains and losses recognized in other accumulated comprehensive income from available-for-sale investments are presented in the table below:

	June 30, 2010				December 31, 2009			
	Cost	Gross Unrealized Holding Gains	Gross Unrealized Holding Losses	Fair Value	Cost	Gross Unrealized Holding Gains	Gross Unrealized Holding Losses	Fair Value
\$ in millions								
Current:								
Seed money	129.4	5.1	(4.5)	130.0	74.7	5.9	(5.8)	74.8
Current available-for-sale investments	129.4	5.1	(4.5)	130.0	74.7	5.9	(5.8)	74.8
Non-current:								
CLOs*	0.3	0.3		0.6	12.6	5.3		17.9
Non-current available-for-sale investments:	0.3	0.3		0.6	12.6	5.3		17.9
	129.7	5.4	(4.5)	130.6	87.3	11.2	(5.8)	92.7

* The company adopted FASB Statement No. 167, now encompassed in ASC Topic 810, Consolidation, on January 1, 2010, resulting in the consolidation of CLOs for which the company has an

underlying investment of \$21.8 million at June 30, 2010 (before consolidation). In accordance with the standard, prior periods have not been restated to reflect the consolidation of these CLOs.

Available-for-sale debt securities as of June 30, 2010, by maturity, are set out below:

\$ in millions	Available-for-Sale (Fair Value)
Less than one year	
One to five years	
Five to ten years	0.6
Greater than ten years	
Total available-for-sale	0.6

The following table provides the breakdown of available-for-sale investments with unrealized losses at June 30, 2010:

	Less Than 12 Months Gross Unrealized		12 Months or Greater Gross Unrealized		Total Gross Unrealized	
\$ in millions	Fair Value	Losses	Fair Value	Losses	Fair Value	Losses
Seed money (124 funds)	62.1	(4.0)	7.1	(0.5)	69.2	(4.5)

Table of Contents

The following table provides the breakdown of available-for-sale investments with unrealized losses at December 31, 2009:

	Less Than 12 Months		12 Months or Greater		Total	
	Gross		Gross		Gross	
	Unrealized		Unrealized		Unrealized	
\$ in millions	Fair Value	Losses	Fair Value	Losses	Fair Value	Losses
Seed money (44 funds)	5.7	(0.3)	25.1	(5.5)	30.8	(5.8)

The company has reviewed investment securities for other-than-temporary impairment in accordance with its accounting policy and has recognized other-than-temporary impairment charges of \$4.0 million and \$6.1 million on seed money investments during the three and six months ended June 30, 2010, respectively, as discussed in Note 2, Fair Value of Assets and Liabilities.

The gross unrealized losses of seed money investments at June 30, 2010, were primarily caused by declines in the market value of the underlying securities in the seeded funds and foreign exchange movements. After conducting a review of the financial condition and near-term prospects of the underlying securities in the seeded funds as well as the severity and duration of the impairment, the company does not consider any material portion of its gross unrealized losses on these securities to be other-than-temporarily impaired. The securities are expected to recover their value over time and the company has the intent and ability to hold the securities until this recovery occurs.

As discussed in Note 1, Accounting Policies, the company adopted FSP FAS 115-2, now encompassed in ASC Topic 320, on April 1, 2009. Upon adoption, the company recorded a cumulative effect adjustment of \$1.5 million to the April 1, 2009, opening balance of retained earnings with a corresponding adjustment to accumulated other comprehensive income, representing the non-credit component of previously-recognized other-than-temporary impairment (OTTI). During the six months ended June 30, 2010, there were no charges to other comprehensive income from other-than-temporary impairment related to non-credit related factors. A rollforward of the cumulative credit-related other-than-temporary impairment charges recognized in earnings for which some portion of the impairment was recorded in other comprehensive income is as follows:

In millions	Three months ended June 30, 2010	Six months ended June 30, 2010
Beginning balance	0.8	18.8
Adoption of FASB Statement No. 167*		(18.0)
Beginning balance, as adjusted	0.8	0.8
Additional credit losses recognized during the period related to securities for which:		
No OTTI has been previously recognized		
OTTI has been previously recognized		
Ending balance	0.8	0.8

* The company adopted FASB Statement No. 167, now encompassed in ASC Topic 810,

Consolidation,
on January 1,
2010, resulting

4. BUSINESS COMBINATION AND INTEGRATION

On June 1, 2010, Invesco acquired from Morgan Stanley its retail asset management business, including Van Kampen Investments (the acquired business or the acquisition), in exchange for an aggregate of 30.9 million shares of common stock and participating preferred stock on an as converted basis and \$770.0 million in cash.

The acquired business brings in assets under management across the equity, fixed income and alternative asset classes (including mutual funds, variable insurance funds, separate accounts and unit investment trusts).

Each participating preferred shares issued to Morgan Stanley is convertible into 1,000 common shares upon transfer by Morgan Stanley to an unrelated third party. The 30.9 million shares issued to Morgan Stanley include 11.7 million common shares and 19.2 million participating preferred shares as converted to common shares.

Table of Contents

The transaction was accounted for under the acquisition method of accounting. Accordingly, the purchase price was allocated to the assets acquired and liabilities assumed based upon their estimated fair values at the date of the transaction. Substantially all of the \$362.7 million excess of the purchase price over the fair value of assets acquired and liabilities and non-controlling interests assumed was recorded as nondeductible goodwill. The goodwill balance resulted primarily from an opening balance sheet net deferred tax liability of \$307.8 million which reflects a carryover tax basis in certain assets that were acquired.

The following table summarizes the initial estimate of amounts of identified assets acquired and liabilities assumed at the acquisition date, as well as the consideration transferred to acquire Morgan Stanley's retail asset management business, including Van Kampen Investments.

\$ in millions	Fair Value Estimate
ASSETS	
Cash and cash equivalents	57.8
Cash of consolidated investment products	4.4
Investments	71.4
Investments of consolidated investment products	762.3
Receivables	81.1
Receivables of consolidated investment products	11.6
Property and equipment	3.2
Institutional relationships intangible	18.0
Sub-Advised relationships intangible	54.0
Fund management contracts intangible	1,047.0
Distribution relationships intangible	40.0
Distribution agreements intangible	17.0
Trademarks / Trade Names intangible	13.0
Goodwill	362.7
Other assets	18.8
Total assets	2,562.3
LIABILITIES AND APPROPRIATED EQUITY	
Accruals and accounts payables	(135.6)
Other current liabilities of consolidated investment products	(16.3)
Deferred taxation, net	(307.8)
Long-term debt of consolidated investment products	(630.2)
Retained earnings appropriated for investors of consolidated investment products	(130.7)
Total liabilities and appropriated equity	(1,220.6)
Total identifiable net assets	1,341.7
Summary of consideration:	
Cash paid	770.0
Payable to seller	2.5
Capital stock at fair value	569.2
Total cash and stock consideration	1,341.7

The 30.9 million aggregate common shares and participating preferred shares as converted to common shares issued to Morgan Stanley had a total fair value of \$567.8 million based on the company's opening market price of \$18.38 per share on June 1, 2010, the acquisition date. The vested portion of replacement employee share based awards had a fair value of \$1.4 million.

Operating revenues and net income of the acquired business from June 1 through June 30, 2010, were approximately \$67.0 million and \$11.2 million, respectively, which represents the incremental impact of the acquired business and does not represent the stand-alone results of the acquired business. Immediately following the acquisition date, the company commenced the integration of the acquired business with its pre-existing operations. The integration of the acquired business is largely complete as of the date of this Report; as such, the company does not expect to be able to disclose the amount of operating revenues and earnings generated by the acquired business for periods subsequent to June 30, 2010. The following unaudited proforma summary presents consolidated information of the Company as if the business combination had occurred on January 1, 2009, the earliest period presented herein. Transaction and integration expenses have been removed from the proforma information as they are deemed to be costs directly

Table of Contents

attributable to the acquired business. These pro forma results are not indicative of the actual results of operations that would have been achieved nor are they indicative of future results of operations.

	For the three months ended June 30,	
\$ in millions	2010	2009
Operating Revenues	925.2	796.2
Net income	124.7	76.8

	For the six months ended June 30,	
\$ in millions	2010	2009
Operating Revenues	1,823.8	1,453.6
Net income	254.6	97.6

During the three and six months ended June 30, 2010, the company incurred \$79.3 million, and \$96.5 million, respectively, of transaction and integration costs (\$64.5 million and \$79.8 million net of taxation, respectively). Transaction and integration costs include acquisition-related charges incurred during the period to effect a business combination, including legal, regulatory, advisory, valuation, and other professional or consulting fees, general and administrative costs, including travel costs related to the transaction and the costs of temporary staff involved in executing the transaction, and post-closing costs of integrating the acquired business into the company's existing operations including incremental costs associated with achieving synergy savings. The following table presents acquisition-related and integration-related charges incurred during the period.

\$ in millions	For the three months ended June 30, 2010	For the six months ended June 30, 2010
Acquisition-related charges	4.4	5.4
Integration-related charges	74.9	91.1
Total transaction and integration charges ⁽¹⁾	79.3	96.5

(1) The company incurred \$4.3 million of acquisition-related costs and \$6.5 million of integration-related costs during 2009, which is not reflected in this table.

Integration charges include costs associated with activities that do not represent ongoing costs of the fully integrated combined organization, such as severance and employee-related charges, costs associated with proxy solicitation to fund shareholders and other integration-related charges. The company expects to incur an additional \$13.4 million of severance and employee-related charges and \$54.3 million of additional integration-related charges during 2010 and 2011.

5. INTANGIBLE ASSETS

The following table presents the major classes of the company's finite-lived intangible assets at June 30, 2010, and December 31, 2009:

	Weighted Average			
	Amortization	Gross	Accumulated	Net
\$ in millions	Period (years)	Book	Amortization	Book
June 30, 2010		Value		Value
Management contracts	8.7	174.5	(81.4)	93.1
Customer relationships	12.0	40.0	(0.3)	39.7
Distribution agreements	4.0	17.0	(0.4)	16.6
Trademarks / Trade Names	2.0	13.0	(0.5)	12.5
Other	5.0	3.1	(2.5)	0.6
Total	8.6	247.6	(85.1)	162.5
 December 31, 2009				
Management contracts	9.3	103.4	(75.8)	27.6
Other	5.0	2.8	(1.9)	0.9
Total	9.0	106.2	(77.7)	28.5

Table of Contents

Where evidence exists that the underlying management contracts are renewed annually at little or no cost to the company, the management contract intangible asset is assigned an indefinite life. The acquisition of Morgan Stanley's retail asset management business, including Van Kampen Investments, added \$1,047.0 million of indefinite-lived intangible assets to the company's Condensed Consolidated Balance Sheet at June 1, 2010, as discussed in Note 4,

Business Combination and Integration, above. Indefinite-lived intangible assets, which total \$1,160.3 million at June 30, 2010 (December 31, 2009: \$110.6 million) primarily relate to fund management contracts acquired during the June 1, 2010 acquisition.

Amortization expense was \$5.2 million and \$8.3 million, respectively, during the three and six months ended June 30, 2010 (three and six months ended June 30, 2009: \$3.1 million and \$6.3 million, respectively) and is included within General and Administrative expenses in the Condensed Consolidated Statements of Income. Estimated amortization expense for each of the five succeeding fiscal years based upon the company's intangible assets at June 30, 2010, is as follows:

Years Ended June 30,
\$ in millions

2011	33.7
2012	27.7
2013	20.6
2014	18.5
2015	12.4

6. GOODWILL

The table below details changes in the goodwill balance:

\$ in millions	Gross Book Value	Accumulated Impairment	Net Book Value
January 1, 2009	5,983.4	(16.6)	5,966.8
Business combinations	34.2		34.2
Foreign exchange	466.6		466.6
December 31, 2009	6,484.2	(16.6)	6,467.6
January 1, 2010	6,484.2	(16.6)	6,467.6
Business combinations	388.5		388.5
Foreign exchange	(167.2)		(167.2)
June 30, 2010	6,705.5	(16.6)	6,688.9

The acquisition of Morgan Stanley's retail asset management business, including Van Kampen Investments, added \$362.7 million of goodwill to the company's Condensed Consolidated Balance Sheet at June 1, 2010, as discussed in Note 4, Business Combination and Integration, above. The April 3, 2010, earn-out calculation related to the 2006 acquisition of W.L. Ross & Co. resulted in an addition to goodwill and a non-interest bearing note payable to the sellers of \$25.8 million, payable at the next measurement date, October 3, 2010 (2009 earn-out goodwill addition: \$34.2 million). See Note 15, Commitments and Contingencies, for additional information.

Table of Contents**7. DEBT**

The disclosures below include details of the company's debt. Debt of consolidated investment products is detailed in Note 12, Consolidated Investment Products.

\$ in millions	June 30, 2010		December 31, 2009	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Unsecured Senior Notes*:				
5.625% due April 17, 2012	215.1	226.7	215.1	227.0
5.375% due February 27, 2013	333.5	351.3	333.5	343.4
5.375% due December 15, 2014	197.1	200.3	197.1	195.1
Floating rate credit facility terminated May 24, 2010				
Floating rate credit facility expiring May 23, 2013	650.0	650.0		
Total debt	1,395.7	1,428.3	745.7	765.5
Less: current maturities of total debt				
Long-term debt	1,395.7	1,428.3	745.7	765.5

* The company's Senior Note indentures contain certain restrictions on mergers or consolidations. Beyond these items, there are no other restrictive covenants in the indentures.

The fair market value of the company's total debt was determined by market quotes provided by Bloomberg. In the absence of an active market, the company relies upon the average price quoted by brokers for determining the fair market value of the debt. The level of trading, both in number of trades and amount of Notes traded, has increased to a level that the company believes market quotes to be a reasonable representation of the current fair market value of the Notes.

Analysis of Borrowings by Maturity:

\$ in millions	June 30, 2010
2011	
2012	215.1
2013	983.5
2014	197.1
Thereafter	
Total debt	1,395.7

On May 24, 2010, the company terminated its existing \$500.0 million credit facility and entered into a new \$1,250.0 million credit facility. Amounts borrowed under the credit facility are repayable at maturity on May 23, 2013,

At June 30, 2010, the outstanding balance on the credit facility was \$600.0 million and the weighted average interest rate on the credit facility was 1.73%. Borrowings under the credit facility will bear interest at (i) LIBOR for specified interest periods or (ii) a floating base rate (based upon the highest of (a) the Bank of America prime rate, (b) the Federal Funds rate plus 0.50% and (c) LIBOR for an interest period of one month plus 1.00%), plus, in either case, an applicable margin determined with reference to the company's credit ratings and specified credit default spreads. Based on credit ratings as of June 30, 2010, of the company and such credit default spreads, the applicable margin for LIBOR-based loans was 1.075% and for base rate loans was 0.075%. In addition, the company is required to pay the lenders a facility fee on the aggregate commitments of the lenders (whether or not used) at a rate per annum which is based on the company's credit ratings. Based on credit ratings as of June 30, 2010, the annual facility fee was equal to 0.30%.

The credit agreement governing the credit facility contains customary restrictive covenants on the company and its subsidiaries. Restrictive covenants in the credit agreement include, but are not limited to: prohibitions on creating, incurring or assuming any liens; entering into certain restrictive merger arrangements; selling, leasing, transferring or otherwise disposing of assets; making a material change in the nature of the business; making material amendments to organic documents; making a significant accounting policy change in certain situations; entering into transactions with affiliates; incurring certain indebtedness through the non-guarantor subsidiaries. Many of these restrictions are subject to certain minimum thresholds and exceptions. Financial covenants under the credit agreement include: (i) the quarterly maintenance of a debt/EBITDA ratio, as defined in the credit agreement, of not greater than 3.25:1.00 through December 31, 2011, and not greater than 3.00:1.00 thereafter, (ii) a coverage ratio (EBITDA, as defined in the

Table of Contents

credit agreement/interest payable for the four consecutive fiscal quarters ended before the date of determination) of not less than 4.00:1.00.

The credit agreement governing the credit facility also contains customary provisions regarding events of default which could result in an acceleration or increase in amounts due, including (subject to certain materiality thresholds and grace periods) payment default, failure to comply with covenants, material inaccuracy of representation or warranty, bankruptcy or insolvency proceedings, change of control, certain judgments, ERISA matters, cross-default to other debt agreements, governmental action prohibiting or restricting the company or its subsidiaries in a manner that has a material adverse effect and failure of certain guaranty obligations.

The lenders (and their respective affiliates) may have provided, and may in the future provide, investment banking, cash management, underwriting, lending, commercial banking, leasing, foreign exchange, trust or other advisory services to the company and its subsidiaries and affiliates. These parties may have received, and may in the future receive, customary compensation for these services.

8. SHARE CAPITAL

Movements in the number of common shares and common share equivalents issued are represented in the table below:

In millions	Six months Ended June 30, 2010	Six months Ended June 30, 2009
Common shares issued beginning balance	459.5	426.6
Issue of new shares	11.7	32.9
Common shares issued ending balance	471.2	459.5
Less: Treasury shares for which dividend and voting rights do not apply	(22.3)	(32.7)
Common shares outstanding	448.9	426.8
Participating preferred shares, on an as converted basis	19.2	
Common shares and common share equivalents outstanding	468.1	426.8

Total treasury shares at June 30, 2010, were 35.3 million (June 30, 2009: 45.7 million), including 13.0 million unvested restricted stock awards (June 30, 2009: 13.0 million) for which dividend and voting rights apply.

Separately, an aggregate of 1.4 million shares were withheld on vesting events during the six months ended June 30, 2010, to meet employees' withholding tax obligations (six months ended June 30, 2009: 1.1 million shares). The value of these shares withheld was \$34.0 million (six months ended June 30, 2009: \$12.3 million). Approximately \$1.4 billion remained authorized under the company's share repurchase plan at June 30, 2010.

On June 1, 2010, Invesco acquired Morgan Stanley's retail asset management business, including Van Kampen Investments. In connection with this transaction, Invesco issued to Morgan Stanley 19,212 shares of Series A convertible participating preferred stock (participating preferred shares). Each participating preferred share is convertible into 1,000 common shares upon transfer of the shares by Morgan Stanley to an unrelated third party. Each participating preferred share participates in dividends on a basis equal to common shares. The participating preferred shares are non-voting except as otherwise provided by applicable law and benefit from a liquidation preference of \$0.01 per share.

9. OTHER COMPREHENSIVE INCOME

The components of accumulated other comprehensive income, which includes our proportionate share of equity method investees' accumulated other comprehensive income, were as follows:

June 30,	December 31,
-----------------	---------------------

\$ in millions	2010	2009
Net unrealized gains/(losses) on available-for-sale investments	6.2	5.4
Tax on unrealized losses/(gains) on available-for-sale investments	(1.4)	(1.6)
Cumulative foreign currency translation adjustments	255.9	442.0
Tax on cumulative foreign currency translation adjustments	2.0	2.0
Employee benefit plan liability adjustments	(67.5)	(74.5)
Tax on employee benefit plan liability adjustments	18.4	20.3

10. TAXATION

At June 30, 2010, the total amount of gross unrecognized tax benefits was \$38.6 million as compared to the December 31, 2009, total amount of \$39.0 million.

The company and its subsidiaries file annual income tax returns in the United States (U.S.) federal jurisdiction, various U.S. state and local jurisdictions, and in numerous foreign jurisdictions. A number of years may elapse before an uncertain tax position, for which the company has unrecognized tax benefits, is finally resolved. To the extent that the company has favorable tax settlements, or determines that accrued amounts are no longer needed due to a lapse in

the applicable statute of limitations or other reasons, such liabilities, as well as the related interest and penalty, would be reversed as a reduction of income tax expense (net of federal tax effects, if applicable) in the period such determination is made.

11. EARNINGS PER SHARE

Basic earnings per share is calculated by dividing net income attributable to common shareholders by the weighted average number of shares outstanding during the periods, excluding treasury shares. Diluted earnings per share is computed using the treasury stock method, which requires computing share equivalents and dividing net income attributable to common shareholders by the total weighted average number of shares and share equivalents outstanding during the periods.

On June 1, 2010, Invesco acquired Morgan Stanley's retail asset management business, including Van Kampen Investments. In connection with this transaction, Invesco issued to Morgan Stanley 19,212 participating preferred shares. Each participating preferred share is convertible into 1,000 common shares upon transfer of the shares by Morgan Stanley to an unrelated third party. Each participating preferred share participates in dividends on a basis equal to common shares. Due to the similarities in terms between the company's participating preferred shares and common shares, and the fact that the number of participating preferred shares outstanding and the dividends payable on participating preferred shares would not change the amount of basic or diluted EPS, the company considers the participating preferred shares to be common share equivalents. As such, the company has included the outstanding participating preferred shares, as converted to common shares, in the calculation of average basic and diluted shares outstanding for the three and six months ended June 30, 2010.

Table of Contents

The calculation of earnings per share is as follows:

	Net Income Attributable to	Weighted Average Number of	Per Share
	Common	Shares	Amount
In millions, except per share data	Shareholders		
For the three months ended June 30, 2010			
Basic earnings per share	\$ 40.8	455.0	\$ 0.09
Dilutive effect of share-based awards		2.8	
Diluted earnings per share	\$ 40.8	457.8	\$ 0.09
For the three months ended June 30, 2009			
Basic earnings per share	\$ 75.7	410.6	\$ 0.18
Dilutive effect of share-based awards		6.2	
Diluted earnings per share	\$ 75.7	416.8	\$ 0.18
	Net Income Attributable to	Weighted Average Number of	Per Share
	Common	Shares	Amount
In millions, except per share data	Shareholders		
For the six months ended June 30, 2010			
Basic earnings per share	\$ 135.8	447.0	\$ 0.30
Dilutive effect of share-based awards		3.1	
Diluted earnings per share	\$ 135.8	450.1	\$ 0.30
For the six months ended June 30, 2009			
Basic earnings per share	\$ 106.4	401.3	\$ 0.26
Dilutive effect of share-based awards		6.2	
Diluted earnings per share	\$ 106.4	407.5	\$ 0.26

See Note 13, Share-based Compensation, for a summary of share awards outstanding under the company's share-based payment programs. These programs could result in the issuance of common shares that would affect the measurement of basic and diluted earnings per share.

Options to purchase 9.2 million shares at a weighted average exercise price of 2,053 pence were outstanding for the six months ended June 30, 2010 (six months ended June 30, 2009: 13.2 million share options at a weighted average exercise price of 1,845 pence), but were not included in the computation of diluted earnings per share because the

option's exercise price was greater than the average market price of the shares and therefore their inclusion would have been anti-dilutive.

There were no contingently issuable shares excluded from the diluted earnings per share computation for the six months ended June 30, 2010 (six months ended June 30, 2009: 1.6 million contingently issuable shares), because the necessary performance conditions for the shares to be issuable had not yet been satisfied at the end of the respective period. There were no contingently issuable shares that were excluded from the computation of diluted earnings per share during the six months ended June 30, 2010 and 2009, due to their inclusion being anti-dilutive.

12. CONSOLIDATED INVESTMENT PRODUCTS

The company provides investment management services to, and has transactions with, various private equity funds, real estate funds, fund-of-funds, CLOs and other investment entities sponsored by the company for the investment of client assets in the normal course of business. The company serves as the investment manager, making day-to-day investment decisions concerning the assets of the products and generally has a small investment in certain of these products to demonstrate "skin in the game" to other potential unaffiliated investors in these products. Certain of these investments are considered to be variable interest entities (VIEs). If the company is the primary beneficiary of the VIEs, then the investment products are consolidated into the company's financial statements. Other partnership entities are consolidated under a voting interest entity (VOE) model where the company is the general partner and is presumed to have control, in the absence of simple majority kick-out rights to remove the general partner, simple majority liquidation rights to dissolve the partnership, or any substantive participating rights of the other limited partners.

Table of Contents

The company's risk with respect to each investment is limited to its equity ownership and any uncollected management fees. Therefore, the gains or losses of consolidated investment products have not had a significant impact on the company's results of operations, liquidity or capital resources. The company has no right to the benefits from, nor does it bear the risks associated with, these investments, beyond the company's minimal direct investments in, and management fees generated from, the investment products. If the company were to liquidate, these investments would not be available to the general creditors of the company, and as a result, the company does not consider investments held by consolidated investment products to be company assets.

CLOs

For CLO entities, as discussed in Note 1, Accounting Policies, and Note 2, Fair Value of Assets and Liabilities, the company generally invests in a portion of the unrated, junior subordinated positions. The company's investments in CLOs are generally subordinated to other interests in the entities and entitle the company and other subordinated tranche investors to receive the residual cash flows, if any, from the entities. The company's underlying investments in the CLOs of \$22.4 million (before consolidation) at June 30, 2010 (December 31, 2009: \$17.9 million) represent its maximum risk of loss.

Prior to the adoption of FASB Statement No. 167, now encompassed in ASC Topic 810, Consolidation (discussed in Note 1, Accounting Policies), the company's ownership interests, which were classified as available-for-sale investments on the company's Consolidated Balance Sheets, combined with its other interests (management and incentive fees), were quantitatively assessed to determine if the company is the primary beneficiary of these entities. The company determined, for periods prior to the adoption of FASB Statement No. 167, that it did not absorb the majority of the expected gains or losses from the CLOs and therefore was not their primary beneficiary.

Effective January 1, 2010, upon the adoption of FASB Statement No. 167, the company determined that it was the primary beneficiary of certain CLOs, as it has the power to direct the activities of the CLOs that most significantly impact the CLOs' economic performance, and the obligation to absorb losses/right to receive benefits from the CLOs that could potentially be significant to the CLOs. The primary beneficiary assessment includes an analysis of the rights of the company in its capacity as investment manager. In certain CLOs, the company's role as investment manager provides that the company contractually has the power, as defined in FASB Statement No. 167, to direct the activities of the CLOs that most significantly impact the CLOs' economic performance, such as managing the collateral portfolio and its credit risk. In other CLOs, the company determined that it does not have this power in its role as investment manager due to certain restrictions that limit its ability to manage the collateral portfolio and its credit risk. Additionally, the primary beneficiary assessment includes an analysis of the company's rights to receive benefits and obligation to absorb losses associated with its first loss position and management/incentive fees. As part of this analysis, the company uses a quantitative model to corroborate its qualitative assessments. The quantitative model includes an analysis of the expected performance of the CLOs and a comparison of the company's absorption of this performance relative to the other investors in the CLOs. The company has determined that it could receive significant benefits and/or absorb significant losses from certain CLOs in which it holds a first loss position and has the right to significant fees. It was determined that the company's benefits and losses from certain other CLOs could not be significant, particularly in situations where the company does not hold a first loss position and where the fee interests are based upon a fixed percentage of collateral asset value.

The company generally invests in only a portion of the unrated, junior subordinated positions. This subordinated interest can take the form of (1) subordinated notes, (2) income notes or (3) preference/preferred shares. The company has determined that, although the junior tranches have certain characteristics of equity, they should be accounted for and disclosed as debt on the company's Condensed Consolidated Balance Sheet, as the subordinated and income notes have a stated maturity indicating a date for which they are mandatorily redeemable. The preference shares are also classified as debt, as redemption is required only upon liquidation or termination of the CLO and not of the company.

The collateral assets of the CLOs are held solely to satisfy the obligations of the CLOs. The company has no right to the benefits from, nor does it bear the risks associated with, the collateral assets held by the CLOs, beyond the company's minimal direct investments in, and management fees generated from, the CLOs. If the company were to liquidate, the collateral assets would not be available to the general creditors of the company. Additionally, the investors in the CLOs have no recourse to the general credit of the company for the notes issued by the CLOs.

Private equity, real estate and fund-of-funds (partnerships)

For investment products that are structured as partnerships and are determined to be VIEs, including private equity funds, real estate funds and fund-of-funds products, the company evaluates the structure of the partnership to determine if it is the primary beneficiary of the investment product. This evaluation includes assessing the rights of the limited partners to transfer their economic interests in the investment product. If the limited partners lack objective rights to transfer their economic interests, they are considered

Table of Contents

to be de facto agents of the company, resulting in the company determining that it is the primary beneficiary of the investment product. The company generally takes less than a 1% investment in these entities as the general partner. Interests in unconsolidated private equity funds, real estate funds and fund-of-funds products are classified as equity method investments in the company's Consolidated Balance Sheets.

On July 8, 2009, the U.S. Treasury announced the launch of the Public-Private Investment Program (PPIP), which was designed to support market functioning and facilitate price discovery in the asset-based securities markets, to allow banks and other financial institutions to re-deploy capital, and to extend new credit to households and businesses. Under this program, the U.S. Treasury will invest up to \$30.0 billion of equity and debt into funds established with private sector investment managers and private investors for the purpose of purchasing legacy securities. The U.S. Treasury has partnered with eight investment management firms, including Invesco, in the PPIP. The company determined that certain feeder funds within the Invesco-sponsored PPIP partnership structure are VIEs; however, the company is not their primary beneficiary, as it does not absorb the majority of the expected gains or losses from these funds. Additionally, the company does not have any capital invested or committed into these funds. Other funds within the PPIP structure are VOEs; however, the company as general partner is not deemed to control these entities due to the presence of substantive kick-out or liquidation rights.

Other investment products

As discussed in Note 15, Commitments and Contingencies, the company has entered into contingent support agreements for two of its investment trusts to enable them to sustain a stable pricing structure, creating variable interests in these VIEs. The company earns management fees from the trusts and has a small investment in one of these trusts. The company was not deemed to be the primary beneficiary of these trusts after considering any explicit and implicit variable interests in relation to the total expected gains and losses of the trusts. The maximum committed amount under the support agreements, which represents the company's maximum risk of loss, is equivalent to the amount of support that the trusts required as of June 30, 2010, to maintain the net asset value of the trusts at \$1.00 per share. The recorded fair value of the guarantees related to these agreements at June 30, 2010, was estimated to be \$2.5 million (December 31, 2009: \$2.5 million), which was recorded as a guarantee obligation in other current liabilities in the Consolidated Balance Sheet. The fair value of these agreements is lower than the maximum support amount reflecting management's estimation that the likelihood of funding under the support agreement is low, as significant investor redemptions out of the trusts before the scheduled maturity of the underlying securities or significant credit default issues of the securities held within the trusts' portfolios would be required to trigger funding by the company.

In June 2009, the company invested in the initial public offering of Invesco Mortgage Capital Inc. (NYSE: IVR), a real estate investment trust which is managed by the company. The company purchased 75,000 common shares of IVR at \$20.00 per share and 1,425,000 limited partner units at \$20.00 per unit through private placements for a total of \$30.0 million. The company determined that IVR is a VIE and that its investment represents a variable interest. The company's ownership interests, which are classified as equity method investments on the company's Consolidated Balance Sheets, combined with its other interests (management fees), were quantitatively assessed to determine if the company is the primary beneficiary of IVR. The company determined that it did not absorb the majority of the expected gains or losses from IVR and therefore is not its primary beneficiary.

At June 30, 2010, the company's maximum risk of loss in significant VIEs in which the company is not the primary beneficiary is presented in the table below.

			Company's Maximum
\$ in millions	Footnote Reference	Carrying Value	Risk of Loss
CLO investments	2	0.6	0.6
Partnership and trust investments		17.0	17.0
Investments in Invesco Mortgage Capital Inc.		31.3	31.3
Support agreements*	12	(2.5)	36.0

Total	84.9
-------	------

* As of June 30, 2010, the committed support under these agreements was \$36.0 million with an internal approval mechanism to increase the maximum possible support to \$66.0 million at the option of the company.

FASB Statement No. 167, which was effective January 1, 2010, had a significant impact on the presentation of the company's financial statements, as its provisions required the company to consolidate certain CLOs that were not previously consolidated. The cumulative effect adjustment upon adoption of FASB Statement No. 167 at January 1, 2010, resulted in an appropriation of retained earnings and a reclassification of other comprehensive income into retained earnings of \$274.3 million and \$5.2 million, respectively.

Table of Contents

The company's Consolidated Statement of Income for the six months ended June 30, 2010, reflect the elimination of \$17.6 million in management fees earned from these CLOs, and the addition of \$105.6 million in interest income, \$46.4 million in interest expense, and \$243.2 million in net other gains. The \$281.2 million net income impact during the six months ended June 30, 2010, of consolidation of these CLOs is largely offset by gains/(losses) attributable to investors in noncontrolling interests of \$277.4 million. Prior to the adoption of FASB Statement No. 167, the company accounted for its investments in these CLOs as available-for-sale investments, with changes in the value of the company's interests being recorded through other comprehensive income. After the adoption of FASB Statement No. 167, the change in value of the company's investments in these CLOs is reflected in the company's net income. For the six months ended June 30, 2010, the net impact to the company of its investments in these CLOs was \$3.8 million. The Condensed Consolidated Balance Sheet at June 30, 2010, reflects the consolidation of \$6.5 billion in assets held and \$5.4 billion in debt issued by these CLOs, despite the fact that the assets cannot be used by the company, nor is the company obligated for the debt. Retained earnings appropriated for investors of consolidated investment products of \$719.5 million is presented as part of the company's total equity, reflecting the excess of the consolidated CLOs assets over their liabilities, attributable to noncontrolling third-party investors in their consolidated CLOs at June 30, 2010. In accordance with the standard, prior periods have not been restated to reflect the consolidation of these CLOs. During the six months ended June 30, 2010, entities with the following balance sheets were consolidated:

Balance Sheet

\$ in millions	VIEs consolidated
During the six months ended June 30, 2010*	
Current assets	254.6
Non-current assets	6,188.1
Total assets	6,442.7
Current liabilities	154.2
Non-current liabilities	5,883.4
Total liabilities	6,037.6
Total equity	405.1
Total liabilities and equity	6,442.7

* The amounts consolidated in this table reflect the initial consolidation of CLOs at the adoption of FASB Statement No. 167 on January 1, 2010 as well as the initial

consolidation of
certain CLOs
acquired in the
June 1, 2010,
acquisition.

During the six months ended June 30, 2009, the company deconsolidated \$53.3 million of investments held by consolidated investment products and related noncontrolling interests in consolidated entities as a result of determining that the company is no longer the primary beneficiary. The amounts deconsolidated from the Condensed Consolidated Balance Sheet are illustrated in the table below. There was no net impact to the Condensed Consolidated Statement of Income for the six months ended June 30, 2009, from the deconsolidation of these investment products.

Balance Sheet

* The company adopted FASB Statement No. 167 on January 1, 2010, resulting in the consolidation of certain CLOs. In accordance with the standard, prior periods have not been restated to reflect the consolidation of these CLOs. Prior to January 1, 2010, the company was not deemed to be the primary beneficiary of these CLOs.

Fair value of consolidated CLOs

The collateral assets held by consolidated CLOs are primarily invested in senior secured bank loans, bonds, and equity securities. Bank loan investments, which comprise the majority of consolidated CLO portfolio collateral, are senior secured corporate loans from a variety of industries, including but not limited to the aerospace and defense, broadcasting, technology, utilities, household products, healthcare, oil and gas, and finance industries. Bank loan investments mature at various dates between 2010 and 2018, pay interest at Libor or Euribor plus a spread of between 0.25% and 11%, and typically range in credit rating categories from BBB down to unrated. At June 30, 2010, the unpaid principal balance exceeded the fair value of the senior secured bank loans and bonds by approximately

\$345 million. Less than 3% of the collateral assets are in default as of June 30, 2010. CLO investments are valued based on price quotations provided by an independent third-party pricing source. For bank loan investments, in the event that the third-party pricing source is unable to price an investment, other relevant factors, data and information are considered, including: i) information relating to the market for the investment, including price quotations for and trading in the investment and interest in similar investments and the market environment and investor attitudes towards the investment and interests in similar investments; ii) the characteristics of and fundamental analytical data relating to the investment, including, for senior secured corporate loans, the cost, size, current interest rate, period until next interest rate reset, maturity and base lending rate, the terms and conditions of the senior secured corporate loan and any related agreements, and the position of the senior secured corporate loan in the borrower's debt structure; iii) the nature, adequacy and value of the senior secured corporate loan's collateral, including the CLO's rights, remedies and interests with respect to the collateral; iv) for senior secured corporate loans, the creditworthiness of the borrower, based on an evaluation of its financial condition, financial statements and information about the business, cash flows, capital structure and future prospects; v) the reputation and financial condition of the agent and any intermediate participants in the senior secured corporate loan; and vi) general economic and market conditions affecting the fair value of the senior secured corporate loan.

In a typical CLO structure, notes are issued in tranches and are categorized into varying degrees of subordination. Each tranche has a different level of credit protection or risk exposure than another. There is generally a senior (A) class of securities and one or more junior subordinated (B, C, etc.) classes that function as protective layers for the A class. The senior classes have first claim on the cash that the CLO receives, and the more junior classes receive repayment only after the more senior classes have repaid. Because of the cascading effect between classes, this arrangement is often referred to as a cash flow waterfall. In the event that the underlying collateral asset pool becomes insufficient to make payments on the notes, the loss is absorbed first by the subordinated tranches, and the upper-level tranches remain unaffected until the losses exceed the entire amount of the subordinated tranches. The senior securities are typically AAA-rated, signifying a lower risk, while the lower-credit quality subordinated classes receive a lower credit rating, signifying a higher risk. The most junior class (often called the equity class) is the most exposed to payment risk. In some cases the equity class receives no coupon (either fixed or floating), but only the residual cash flow (if any) after all the other classes have been paid.

Notes issued by consolidated CLOs mature at various dates between 2014 and 2024 and have a weighted average maturity of 10.1 years. The notes are issued in various tranches with different risk profiles. The interest rates are generally variable rates based on Libor or Euribor plus a pre-defined spread, which varies from 0.21% for the more senior tranches to 7.50% for the more subordinated tranches. At June 30, 2010, the outstanding balance on the notes issued by consolidated CLOs exceeds their fair value by approximately \$1.4 billion. The investors in this debt are not affiliated with the company and have no recourse to the general credit of the company for this debt. Notes issued by CLOs are recorded at fair value using an income approach, driven by cash flows expected to be received from the portfolio collateral assets. Fair value is determined using current information, notably market yields and

Table of Contents

projected cash flows of collateral assets based on forecasted default and recovery rates that a market participant would use in determining the current fair value of the notes, taking into account the overall credit quality of the issuers and the company's past experience in managing similar securities. Market yields, default rates and recovery rates used in the company's estimate of fair value vary based on the nature of the investments in the underlying collateral pools. In periods of rising market yields, default rates and lower debt recovery rates, the fair value, and therefore the carrying value, of the notes may be adversely affected. The current liquidity constraints within the market for CLO products require the use of certain unobservable inputs for CLO valuation. Once the undiscounted cash flows of the collateral assets have been determined, the company applies appropriate discount rates that a market participant would use, to determine the discounted cash flow valuation of the notes.

The significant inputs for the valuation model of the notes issued by consolidated CLOs include a cumulative average default rate of 4.6%, an average long-term recovery rate of 72.8%, and an average reinvestment rate of Libor plus 445 basis points. The discount rate applied to the undiscounted cash flows of the collateral assets was derived by utilizing the applicable forward rate curves and appropriate spreads.

Fair value of consolidated private equity funds

Consolidated private equity funds are generally structured as partnerships. Generally, the investment strategy of underlying holdings in these partnerships is to seek capital appreciation through direct investments in public or private companies with compelling business models or ideas or through investments in partnership investments that also invest in similar private or public companies. Various strategies may be used. Companies targeted could be distressed organizations, targets of leveraged buyouts or fledgling companies in need of venture capital. Investees of these consolidated investment products may not redeem their investment until the partnership liquidates. Generally, the partnerships have a life that range from seven to twelve years unless dissolved earlier. The general partner may extend the partnership term up to a specified period of time as stated in the Partnership Agreement. Some partnerships allow the limited partners to cause an earlier termination upon the occurrence of certain events as specified in the Partnership Agreement.

For private equity partnerships, fair value is determined by reviewing each investment for the sale of additional securities of an issuer to sophisticated investors or for investee financial conditions and fundamentals. Publicly traded portfolio investments are carried at market value as determined by their most recent quoted sale, or if there is no recent sale, at their most recent bid price. For these investments held by consolidated investment products, level 1 classification indicates that fair values have been determined using unadjusted quoted prices in active markets for identical assets that the partnership has the ability to access. Level 2 classification may indicate that fair values have been determined using quoted prices in active markets but give effect to certain lock-up restrictions surrounding the holding period of the underlying investments.

The fair value of level 3 investments held by consolidated investment products are derived from inputs that are unobservable and which reflect the limited partnerships' own determinations about the assumptions that market participants would use in pricing the investments, including assumptions about risk. These inputs are developed based on the partnership's own data, which is adjusted if information indicates that market participants would use different assumptions. The partnerships which invest directly into private equity portfolio companies (direct private equity funds) take into account various market conditions, subsequent rounds of financing, liquidity, financial condition, purchase multiples paid in other comparable third-party transactions, the price of securities of other companies comparable to the portfolio company, and operating results and other financial data of the portfolio company, as applicable.

The partnerships which invest into other private equity funds (funds of funds) take into account information received from those underlying funds, including their reported net asset values and evidence as to their fair value approach, including consistency of their fair value application. These investments do not trade in active markets and represent illiquid long-term investments that generally require future capital commitments. While the partnerships reported share of the underlying net asset values of the underlying funds is usually the most significant input in arriving at fair value and is generally representative of fair value, other information may also be used to value such investments at a premium or discount to the net asset values as reported by the funds, including allocations of priority returns within the funds as well as any specific conditions and events affecting the funds.

Unforeseen events might occur that would subsequently change the fair values of these investments, but such changes would be inconsequential to the company due to its minimal investments in these products (and the large offsetting noncontrolling interests resulting from their consolidation). Any gains or losses resulting from valuation changes in these investments are substantially offset by resulting changes in gains and losses attributable to noncontrolling interests in consolidated entities and therefore do not have a material effect on the financial condition, operating results (including earnings per share), liquidity or capital resources of the company's common shareholders.

Table of Contents**13. SHARE-BASED COMPENSATION**

The company issues equity-settled share-based awards to certain employees, which are measured at fair value at the date of grant, in accordance with ASC Topic 718, Compensation—Stock Compensation. The fair value determined at the grant date is expensed, based on the company's estimate of shares that will eventually vest, on a straight-line or accelerated basis over the vesting period. The initial forfeiture rate applied to most grants is 5% per year, based upon the company's historical experience with respect to employee turnover. Fair value for share awards representing equity interests identical to those associated with shares traded in the open market is determined using the market price at the grant date. Fair value is measured by use of the Black Scholes valuation model for certain share awards that do not include dividend rights, and fair value was measured by use of a stochastic model (a lattice-based model) for share option awards.

The company recognized total expenses of \$55.5 million in the six months ended June 30, 2010 (June 30, 2009: \$43.9 million) related to equity-settled share-based payment transactions. The total income tax benefit recognized in the Consolidated Statements of Income for share-based compensation arrangements was \$21.6 million for the six months ended June 30, 2010 (June 30, 2009: \$15.2 million).

Cash received from the exercise of share options granted under share-based compensation arrangements was \$6.2 million in the six months ended June 30, 2010 (June 30, 2009: \$9.6 million). The total tax benefit realized from share based payment awards was \$44.8 million in the six months ended June 30, 2010 (June 30, 2009: \$31.6 million).

Share Awards

Share awards are broadly classified into two categories: time-vested and performance-vested share awards. Share awards are measured at fair value at the date of grant and are expensed, based on the company's estimate of shares that will eventually vest, on a straight-line or accelerated basis over the vesting period.

Time-vested awards vest ratably over or cliff-vest at the end of a period of continued employee service. Performance-vested awards cliff-vest at the end of or vest ratably over a defined vesting period of continued employee service upon the company's attainment of certain performance criteria, generally the attainment of cumulative earnings per share growth targets at the end of the vesting period reflecting a compound annual growth rate of between 10.0% and 15.0% per annum during a three-year period. Time-vested and performance-vested share awards are granted in the form of restricted share awards (RSAs) or restricted share units (RSUs). Dividends accrue directly to the employee holder of RSAs, and cash payments in lieu of dividends are made to employee holders of certain RSUs. There is therefore no discount to the fair value of these share awards at their grant date. Movements on share awards priced in Pounds Sterling prior to the company's primary share listing moving to the New York Stock Exchange from the London Stock Exchange, which occurred on December 4, 2007, in connection with the redomicile of the company from the U.K. to Bermuda, are detailed below:

	Six months ended June 30, 2010			Six months ended June 30, 2009		
	Time-Vested	Performance-Vested	Weighted Average Grant Date Fair Value (£ Sterling)	Time-Vested	Performance-Vested	Weighted Average Grant Date Fair Value (£ Sterling)
Millions of shares, except fair values						
Unvested at the beginning of period	5.4	2.0	11.24	10.2	6.0	9.62
Forfeited during the period		(1.4)	12.02	(0.2)	(0.1)	8.77
Modification of share-based payment awards*					(1.4)	9.37
Vested and distributed during the period	(1.1)	(0.5)	8.93	(1.5)	(2.2)	8.32
Unvested at the end of the period	4.3	0.1	11.86	8.5	2.3	10.14

* During the six months ended June 30, 2009, the company modified the terms of 1.4 million equity-settled share-based payment awards such that the awards are now deferred cash awards. As a result of this modification, \$13.0 million was reclassified out of additional paid in capital and into other current and non-current liabilities on the Condensed Consolidated Balance Sheet during the period. There was no impact to the Condensed Consolidated Statement of Income or earnings per share as a result of this modification.

Table of Contents

Subsequent to the company's primary share listing moving to the New York Stock Exchange, shares are now priced in U.S. dollars. Movements on share awards priced in U.S. dollars are detailed below:

	Six months ended June 30, 2010		Six months ended June 30, 2009	
	Time- Vested	Weighted Average Grant Date Fair Value (\$)	Time- Vested	Weighted Average Grant Date Fair Value (\$)
Millions of shares, except fair values				
Unvested at the beginning of period	11.6	15.24	3.5	26.67
Granted during the period	9.9	19.19	8.9	11.47
Forfeited during the period	(0.1)	21.55		16.41
Vested and distributed during the period	(2.8)	14.48	(0.6)	26.58
Unvested at the end of the period	18.6	17.42	11.8	15.27

Share awards outstanding at June 30, 2010, had a weighted average remaining contractual life of 1.93 years.

Share Options

The company has not granted share option awards since 2005. All share options awards, therefore, were granted prior to the December 4, 2007, redomicile from the United Kingdom to Bermuda and relisting from the London Stock Exchange (where the predecessor company's ordinary shares traded in Pounds Sterling) to the New York Stock Exchange (where the company's common shares now trade in U.S. Dollars). The company maintains its two historical share option plans which have outstanding share options: The 2000 Share Option Plan and the No. 3 Executive Share Option Scheme. All remaining outstanding share option awards were fully vested and were expensed by the company over the applicable vesting periods (the latest of which ended prior to December 31, 2008). At the time of their grants, the exercise prices of the share options were denominated in the company's trading currency, which was Pounds Sterling. The company did not change the accounting for share options at the redomicile/relisting date, because the share options were not modified at that date. The exercise price remains in Pounds Sterling and was not changed to U.S. Dollars. Therefore, upon exercise of the share options, the Pounds Sterling exercise price will be converted into U.S. Dollars using the spot foreign exchange rate in effect on the exercise date.

The share option plans provided for a grant price equal to the quoted market price of the company's shares on the date of grant. If the options remain unexercised after a period of 10 years from the date of grant, the options expire. Furthermore, options are forfeited if the employee leaves the company before the options vest. The options outstanding at June 30, 2010, had a range of exercise prices from 50 pence to 3,360 pence, and a weighted average remaining contractual life of 2.26 years (for options exercisable at June 30, 2010, the weighted average remaining contractual life is 2.26 years). The total intrinsic value of options exercised during the six months ended June 30, 2010 and 2009, was \$4.5 million and \$2.7 million, respectively. At June 30, 2010, the aggregate intrinsic value of options outstanding and options exercisable was \$33.5 million and \$33.5 million, respectively. The market price of the company's common stock at June 30, 2010, was \$16.83.

Changes in outstanding share option awards are as follows:

	Six months ended June 30, 2010		Six months ended June 30, 2009	
	Options (millions of shares)	Weighted Average Exercise Price (£ Sterling)	Options (millions of shares)	Weighted Average Exercise Price (£ Sterling)

Edgar Filing: Invesco Ltd. - Form 10-Q

Outstanding at the beginning of the period	16.4	14.99	23.1	14.06
Forfeited during the period	(0.3)	19.34	(0.7)	18.05
Exercised during the period	(0.8)	6.09	(0.6)	7.94
Outstanding at the end of the period	15.3	15.39	21.8	14.08
Exercisable at the end of the period	15.3	15.39	21.6	14.24

Table of Contents**14. RETIREMENT BENEFIT PLANS****Defined Contribution Plans**

The company operates defined contribution retirement benefit plans for all qualifying employees. The assets of the plans are held separately from those of the company in funds under the control of trustees. When employees leave the plans prior to vesting fully in the contributions, the contributions payable by the company are reduced by the amount of forfeited contributions.

The total amounts charged to the Condensed Consolidated Statements of Income for the six months ended June 30, 2010 and 2009, of \$23.3 million and \$22.0 million, respectively, represent contributions paid or payable to these plans by the company at rates specified in the rules of the plans. As of June 30, 2010, accrued contributions of \$9.0 million (December 31, 2009: \$17.1 million) for the current year will be paid to the plans when due.

Defined Benefit Plans

The company maintains legacy defined benefit pension plans for qualifying employees of its subsidiaries in the U.K., Ireland, Germany, Taiwan and the U.S. All defined benefit plans are closed to new participants, and the U.S. plan benefits have been frozen. The company also maintains a postretirement medical plan in the U.S., which was closed to new participants in 2005. In 2006, the plan was amended to eliminate benefits for all participants who will not meet retirement eligibility by 2008. The assets of all defined benefit schemes are held in separate trustee-administered funds. Under the plans, the employees are generally entitled to retirement benefits based on final salary at retirement.

The components of net periodic benefit cost in respect of these defined benefit plans are as follows:

\$ in millions	Three months Ended June 30,				Six months Ended June 30,			
	Retirement Plans		Medical Plan		Retirement Plans		Medical Plan	
	2010	2009	2010	2009	2010	2009	2010	2009
Service cost	1.0	3.4		0.1	2.0	6.7	0.1	0.2
Interest cost	3.9	4.9	0.6	0.7	7.8	9.8	1.3	1.3
Expected return on plan assets	(3.5)	(5.2)	(0.1)	(0.1)	(6.9)	(10.5)	(0.2)	(0.2)
Amortization of prior service cost			(0.5)	(0.5)			(1.0)	(1.0)
Amortization of net actuarial (loss)/gain	0.6	0.2	0.9	1.0	1.3	0.5	1.8	2.1
Net periodic benefit cost	2.0	3.3	0.9	1.2	4.2	6.5	2.0	2.4

The estimated amounts of contributions expected to be paid to the plans during 2010 is \$7.9 million for retirement plans, with no expected contribution to the medical plan.

The Patient Protection and Affordable Care Act that was signed into law in the U.S. on March 23, 2010, and its related modifications as part of the Health Care and Education Reconciliation Act of 2010 did not have a material impact on the company's financial statements during the six months ended June 30, 2010. The company is evaluating whether these new laws may require any longer-term changes in our benefit plans.

15. COMMITMENTS AND CONTINGENCIES

Commitments and contingencies may arise in the ordinary course of business.

The company has transactions with various private equity, real estate and other investment entities sponsored by the company for the investment of client assets in the normal course of business. Many of the company's investment products are structured as limited partnerships. The company's investment may take the form of the general partner or a limited partner, and the entities are structured such that each partner makes capital commitments that are to be drawn down over the life of the partnership as investment opportunities are identified. At June 30, 2010, the company's undrawn capital commitments were \$85.5 million (December 31, 2009: \$77.6 million).

The volatility and valuation dislocations that occurred from 2007 to the date of this Report in certain sectors of the fixed income market have generated pricing issues in many areas of the market. As a result of these valuation dislocations, during the fourth quarter of 2007, Invesco elected to enter into contingent support agreements for two of its investment trusts to enable them to sustain a stable pricing structure. These two trusts are unregistered trusts that invest in fixed income securities and are available only to limited types

Table of Contents

of sophisticated investors. In June 2010, the agreements were amended to extend the term through December 31, 2010. As of June 30, 2010, the total committed support under these agreements was \$36.0 million with an internal approval mechanism to increase the maximum possible support to \$66.0 million at the option of the company. The recorded fair value of the guarantees related to these agreements at June 30, 2010, was estimated to be \$2.5 million (December 31, 2009: \$2.5 million), which was recorded in other current liabilities on the Condensed Consolidated Balance Sheet. No payments have been made under either agreement nor has Invesco realized any losses from the support agreements through the date of this Report. These trusts were not consolidated because the company was not deemed to be the primary beneficiary.

A subsidiary of the company has received assessments from the Canada Revenue Agency (CRA) for goods and services tax (GST) related to various taxation periods from April 1999 to December 2006 in the amount of \$20.9 million related to GST on sales charges collected from investors upon the redemption of certain mutual funds. The company has objected to the assessments and sought remedial action in the Ontario Superior Court of Justice. In November 2009, the company was successful in such remedial action and, as a result, anticipates successfully contesting the assessments. As a result of such actions, the CRA is currently considering its next steps and has not responded to the company in this regard. Management believes that the CRA's claims are unfounded and that this assessment is unlikely to stand, and accordingly no provision has been recorded in the Consolidated Financial Statements.

Acquisition Contingencies

Contingent consideration related to acquisitions includes the following:

Earn-outs relating to the Invesco PowerShares acquisition. A contingent payment of up to \$500.0 million could be due in October 2011, five years after the date of acquisition, based on compound annual growth in management fees (as defined and adjusted pursuant to the acquisition agreement) from an assumed base of \$17.5 million at closing. The Year 5 management fees will be reduced by \$50.0 million, for purposes of the calculation, since the second contingent payment was earned. For a compound annual growth rate (CAGR) in Year 5 below 15%, no additional payment will be made. For a CAGR in Year 5 between 15% and 75%, \$5.0 million for each CAGR point above 15%, for a maximum payment of \$300.0 million for a 75% CAGR. For a CAGR in Year 5 between 75% and 100%, \$300.0 million, plus an additional \$8.0 million for each CAGR point above 75%, for a maximum total payment of \$500.0 million for a 100% CAGR.

Earn-outs relating to the WL Ross acquisition. Contingent payments of up to \$55.0 million are due each year for the five years following the October 2006 date of acquisition based on the size and number of future fund launches in which W.L. Ross & Co. is integrally involved. The maximum remaining contingent payments of \$110.0 million would require annual fund launches to total \$4.0 billion. The April 3, 2010, earn-out calculation resulted in an addition to goodwill and a non-interest bearing note payable to the sellers of \$25.8 million, payable at the next measurement date, October 3, 2010.

Legal Contingencies

Following the industry-wide regulatory investigations in 2003 and 2004, multiple lawsuits based on market timing allegations were filed against various parties affiliated with Invesco. These lawsuits were consolidated in the United States District Court for the District of Maryland, together with market timing lawsuits brought against affiliates of other mutual fund companies, and on September 29, 2004, three amended complaints were filed against company-affiliated parties: (1) a putative shareholder class action complaint brought on behalf of shareholders of AIM funds formerly advised by Invesco Funds Group, Inc.; (2) a derivative complaint purportedly brought on behalf of certain AIM funds and the shareholders of such funds; and (3) an ERISA complaint purportedly brought on behalf of participants in the company's 401(k) plan. The company and plaintiffs have reached settlements in principle of these lawsuits. The proposed settlements, which are subject to court approval, call for a payment by the company of \$9.8 million, recorded in general and administrative expenses in the Consolidated Statement of Income in 2007, in exchange for dismissal with prejudice of all pending claims. In addition, under the terms of the proposed settlements, the company may incur certain costs in connection with providing notice of the proposed settlements to affected shareholders. Based on information currently available, it is not believed that any such incremental notice costs will

have any material effect on the consolidated financial position or results of operations of the company.

The asset management industry also is subject to extensive levels of ongoing regulatory oversight and examination. In the United States and other jurisdictions in which the company operates, governmental authorities regularly make inquiries, hold investigations and administer market conduct examinations with respect to compliance with applicable laws and regulations. Additional lawsuits or regulatory enforcement actions arising out of these inquiries may in the future be filed against the company and related entities and individuals in the U.S. and other jurisdictions in which the company and its affiliates operate. Any material loss of investor and/or

Table of Contents

client confidence as a result of such inquiries and/or litigation could result in a significant decline in assets under management, which would have an adverse effect on the company's future financial results and its ability to grow its business.

In the normal course of its business, the company is subject to various litigation matters. Although there can be no assurances, at this time management believes, based on information currently available to it, that it is not probable that the ultimate outcome of any of these actions will have a material adverse effect on the consolidated financial condition or results of operations of the company.

16. GUARANTOR CONDENSED CONSOLIDATING FINANCIAL STATEMENTS

Prior to the December 4, 2007, redomicile of the company from the United Kingdom to Bermuda and the relisting of the company from the London Stock Exchange to the New York Stock Exchange, INVESCO PLC (now known as Invesco Holding Company Limited), the Issuer, issued 4.5% \$300.0 million senior notes due 2009, 5.625% \$300.0 million senior notes due 2012, 5.375% \$350.0 million senior notes due 2013 and 5.375% \$200.0 million senior notes due 2014. These senior notes, are fully and unconditionally guaranteed as to payment of principal, interest and any other amounts due thereon by Invesco Ltd. (the Parent), together with the following wholly owned subsidiaries: Invesco Aim Management Group, Inc., Invesco Aim Advisers, Inc., Invesco North American Holdings, Inc., and Invesco Institutional (N.A.), Inc. (the Guarantors). On June 9, 2009, IVZ, Inc. also became a guarantor of the senior notes. On December 31, 2009, Invesco Aim Advisers, Inc. merged with Invesco Institutional (N.A.), Inc., which was renamed Invesco Advisors, Inc. The company's remaining consolidated subsidiaries do not guarantee this debt. The guarantees of each of the Guarantors are joint and several. Presented below are Condensed Consolidating Balance Sheets as of June 30, 2010, and December 31, 2009, Condensed Consolidating Statements of Income for the three and six months ended June 30, 2010 and 2009, and Condensed Consolidating Statements of Cash Flows for the six months ended June 30, 2010 and 2009.

Table of Contents**17. SUBSEQUENT EVENTS**

On July 27, 2010, the company declared a second quarter 2010 dividend of 11 cents per share, payable on September 9, 2010, to common and participating preferred shareholders of record at the close of business on August 23, 2010.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**Forward-Looking Statements**

The following Management's Discussion and Analysis of Financial Condition and Results of Operations should be read in conjunction with the Condensed Consolidated Financial Statements and related Notes thereto, which appear elsewhere in this Report. Except for the historical financial information, this Report may include statements that constitute forward-looking statements under the United States securities laws. Forward-looking statements include information concerning possible or assumed future results of our operations, expenses, earnings, liquidity, cash flows and capital expenditures, industry or market conditions, assets under management, acquisition activities and the effect of completed acquisitions, debt levels and our ability to obtain additional financing or make payments on our debt, regulatory developments, demand for and pricing of our products and other aspects of our business or general economic conditions. In addition, when used in this Report, the documents incorporated by reference herein or such other documents or statements, words such as believes, expects, anticipates, intends, plans, estimates, projects, forecasts, and future or conditional verbs such as will, may, could, should, and would, and any other statement necessarily depends on future events, are intended to identify forward-looking statements.

Forward-looking statements are not guarantees of performance. They involve risks, uncertainties and assumptions. Although we make such statements based on assumptions that we believe to be reasonable, there can be no assurance that actual results will not differ materially from our expectations. We caution investors not to rely unduly on any forward-looking statements and urge you to carefully consider the risks described in our most recent Form 10-K and subsequent Forms 10-Q, filed with the Securities and Exchange Commission.

References

In this Report, unless otherwise specified, the terms we, our, us, company, Invesco, and Invesco Ltd. refer to Invesco Ltd., a company incorporated in Bermuda, and its subsidiaries.

Executive Overview

The following executive overview summarizes the significant trends affecting our results of operations and financial condition for the periods presented. This overview and the remainder of this management's discussion and analysis supplements, and should be read in conjunction with, the Condensed Consolidated Financial Statements of Invesco Ltd. and its subsidiaries and the notes thereto contained elsewhere in this Report.

Invesco is a leading independent global investment manager with offices in 22 countries. As of June 30, 2010, we managed \$557.7 billion in assets for retail, institutional and high-net-worth investors around the world. By delivering the combined power of our distinctive worldwide investment management capabilities, Invesco provides a comprehensive array of enduring solutions for our clients. We have a significant presence in the institutional and retail segments of the investment management industry in North America, UK, Europe and Asia-Pacific, with clients in more than 150 countries.

Risk aversion came to the fore during the second quarter as doubts about the sovereign debt of Greece, Spain, Portugal, Ireland, and Italy unnerved investors. Global equity markets experienced significant declines as investors sought the safe haven of U.S. Treasury securities. The declines in the second quarter erased previous market gains achieved in the first quarter. The table below summarizes the second quarter and first half returns of several major market indices for 2010 and 2009:

Index	Three months ended June 30,		Six months ended June 30,	
	2010	2009	2010	2009
S&P 500	(11.9%)	15.2%	(8.5%)	3.2%
FTSE 100	(13.4%)	8.2%	(8.9%)	(3.3%)
Nikkei 225	(15.4%)	22.8%	(11.0%)	12.4%

MSCI Emerging Market Index	(9.1%)	33.6%	(7.2%)	34.6%
	44			

Table of Contents

Investor concerns about European sovereign debt and the sustainability of the economic recovery pressured global equity markets during the second quarter of 2010. The S&P 500 index posted its worst quarterly performance since the final three months of 2008 when the global financial crisis was in full swing declining over 11%. Steep declines were felt in most global markets with the FTSE 100 down just over 13% and the Nikkei 225 index down over 15%.

The strong returns in the corporate credit markets during the first quarter also ended with the increase in sovereign debt worries in Europe. As borrowing costs in Greece and other European nations soared, corporations found it more difficult to borrow as well. Corporate bond yields rose relative to U.S. Treasuries and new debt issuance ground to a halt as investors pulled money out of riskier credits and purchased the safer U.S. Treasury bonds. As a result of the flight to safety, U.S. Treasury bond prices jumped and yields, which move in the opposite direction of price, fell. U.S. Treasury securities returned 4.7% during the second quarter.

A significant portion of our business and assets under management (AUM) is based outside of the U.S. The strengthening or weakening of the U.S. dollar against other currencies, primarily the Pound Sterling and the Canadian dollar, will impact our reported revenues and expenses from period to period. Additionally, our revenues are directly influenced by the level and composition of our AUM. Therefore, movements in global capital market levels, net new business inflows (or outflows) and changes in the mix of investment products between asset classes and geographies may materially affect our revenues from period to period. The returns from most global capital markets decreased in the three and six months ended June 30, 2010, which resulted in market depreciation in our AUM of \$24.2 billion and \$14.5 billion during the respective period; additionally the change in foreign exchange rates reduced AUM by \$3.4 billion and \$7.9 billion during the respective period. AUM at June 30, 2010, were \$557.7 billion.

Summary operating information is presented in the table below:

	Three months ended June 30,		Six months ended June 30,	
U.S. GAAP Financial Measures Summary	2010	2009	2010	2009

Average assets under management (in billions)	\$480.5	\$401.5	\$ 465.0	\$377.9

(1) Net revenues are operating revenues less third-party distribution, service and advisory expenses, plus our proportional share of the net revenues of our joint venture

investments, plus
management fees
earned from, less
other revenue
recorded by,
consolidated
investment
products. See
Schedule of
Non-GAAP
Information for the
reconciliation of
operating revenues
to net revenues.

- (2) Adjusted operating margin is adjusted operating income divided by net revenues. Adjusted operating income includes operating income plus our proportional share of the operating income of our joint venture investments, transaction and integration charges, amortization of acquisition-related prepaid compensation and other intangibles, and the operating income impact of the consolidation of investment products. See Schedule of Non-GAAP Information for the reconciliation of operating income to adjusted operating income.

- (3) Adjusted net income is net

income attributable to common shareholders adjusted to add back transaction and integration charges, amortization of acquisition-related prepaid compensation and other intangibles, and the tax cash flow benefits resulting from tax amortization of goodwill and indefinite-lived intangible assets. Adjusted net income excludes the net income of consolidated investment products, and the net income impact of deferred compensation plans. By calculation, adjusted EPS is adjusted net income divided by the weighted average number of shares outstanding (for diluted EPS). See Schedule of Non-GAAP Information for the reconciliation of net income to adjusted net income.

Table of Contents

On June 1, 2010, the company completed the acquisition of Morgan Stanley's retail asset management business, including Van Kampen Investments (the acquired business or the acquisition), in exchange for a combination of \$770.0 million in cash paid and 30.9 million common shares and common share equivalents. The acquisition of Morgan Stanley's retail asset management business, including Van Kampen Investments, added assets under management across equity, fixed income and alternatives (including mutual funds, variable insurance funds, separate accounts and unit investment trusts). More specifically, this combination will:

Expand the depth and breadth of the company's investment strategies, enabling the company to offer an even more comprehensive range of investment capabilities and vehicles to its clients around the world;

Enhance the company's ability to serve U.S. clients by positioning Invesco among the leading U.S. asset managers by assets under management (AUM), diversity of investment teams and client profile;

Deepen Invesco's relationships with clients and strengthen its overall distribution capabilities; and

Further strengthen its position in the Japanese investment management market.

Current estimates indicate that the transaction will yield total adjusted earnings accretion in the first year after the close of the transaction of between 22 and 24 cents per share.

Table of Contents**Investment Capabilities Performance Overview**

Invesco's first strategic priority is to achieve strong investment performance over the long-term for our clients. Performance in our equities capabilities, as measured by the percentage of AUM ahead of benchmark and ahead of peer median, has generally been strong with some pockets of outstanding performance and some areas where we have been challenged. Within our equity asset class, U.S. Value, Continental European, and Global ex-U.S. and Emerging Markets have generally had strong relative performance versus competitors and versus benchmark over three- and five-year periods. Near term investment performance in our Canadian equities has seen a strong turnaround as 68% of assets are ahead of peers and benchmark. On a one-year basis, U.K. equity performance has lagged against both competitors and benchmarks; however long-term performance remains strong with over 91% of assets ahead of peers and benchmarks on a 3- and 5- year basis. Within our fixed income asset class, the global fixed income products have had at least 80% of AUM ahead of benchmark and peers over one-, three-, and five-year periods. Our money market capability had at least 93% of AUM ahead of peers on a one-, three-, and five-year basis.

Note: AUM measured in the one-, three-, and five-year peer group rankings represents 60%, 60%, and 58% of total Invesco AUM, respectively, and AUM measured versus benchmark on a one-, three-,

and five-year basis represents 72%, 71%, and 65% of total Invesco AUM, respectively, as of 6/30/10. Peer group rankings are sourced from a widely-used third party ranking agency in each fund's market (Lipper, Morningstar, Russell, Mercer, eVestment Alliance, SITCA) and asset-weighted in USD. Rankings are as of prior quarter-end for most institutional products and prior month-end for Australian retail funds due to their late release by third parties. Rankings for the most representative fund in each GIPS composite are applied to all products within each GIPS composite. Excludes Invesco PowerShares, W.L. Ross & Co., Invesco Private Capital, non-discretionary direct real estate products and CLOs. Certain funds and products were excluded from the

analysis because of limited benchmark or peer group data. Had these been available, results may have been different. These results are preliminary and subject to revision. Performance assumes the reinvestment of dividends. Past performance is not indicative of future results and may not reflect an investor's experience.

Table of Contents**Results of Operations for the three months ended June 30, 2010, Compared with the three months ended June 30, 2009****Assets Under Management**

The company's rolling presentation of AUM from period to period illustrates long-term inflows and outflows separately from the net flows into institutional money market funds. Long-term inflows and the underlying reasons for the movements in this line item include investments from new clients, existing clients adding new accounts/funds or contributions/subscriptions into existing accounts/funds, and new funding commitments into private equity funds. We present net flows into institutional money market funds separately, because shareholders of those funds typically utilize them as short-term funding vehicles, and because their flows are particularly sensitive to short-term interest rate movements. Long-term outflows and the underlying reasons for the movements in this line item include redemptions resulting from closed client accounts/funds, partial redemptions in continuing client accounts/funds, and reductions in funding commitments into private equity funds.

There are numerous drivers of AUM inflows and outflows, from individual investor decisions to change their investment preferences to fiduciaries making broad asset allocation decisions on behalf of advised clients to reallocate investments within portfolios. We are not a party to these asset allocation decisions, as the company does not generally have access to the underlying investor's decision-making process, including their risk appetite or short-term cash needs. Therefore, the company is not in a position to provide meaningful information regarding the drivers of inflows and outflows.

To align our external reporting of AUM with how Invesco is portrayed in the industry and to reflect more fully the company's revenue drivers, in the three months ended June 30, 2010, the company changed its definition of AUM to include assets with which the company is also associated: the PowerShares QQQ fund, DB PowerShares ETFs, and other passive assets. These products previously were not included in the company's reported AUM, because the company does not receive investment management fees from these assets. These assets are marketed as Invesco products, and to include them as part of our AUM more accurately reflects the full size and capabilities of Invesco. Additionally, the company may receive meaningful performance, service, distribution, or transaction revenues from these assets. The inclusion of these assets as AUM changed the following data points from those previously disclosed:

	Previously Disclosed	Post- Reporting Alignment
\$ in billions		
Ending AUM:		
January 1, 2009	357.2	377.1
March 31, 2009	348.2	369.0
June 30, 2009	388.7	414.4
December 31, 2009	423.1	459.5
March 31, 2010	419.6	457.7
Average AUM:		
Three months ended June 30, 2009	376.5	401.5
Six months ended June 30, 2009	365.4	377.9

Three months ended June 30, 2009	66.2bps	62.0bps
Six months ended June 30, 2009	63.8bps	61.7bps

Additionally, as a result of the June 1, 2010, acquisition of Morgan Stanley's retail asset management business, including Van Kampen Investments (the acquired business or the acquisition), the company now manages unit investment trust (UIT) products,

Table of Contents

which are now categorized in this passive asset group, and for which we earn revenues related to transactional sales charges from the sale of these products and trading income arising from securities temporarily held to form new UIT products.

AUM at June 30, 2010, were \$557.7 billion (March 31, 2010: \$457.7 billion; June 30, 2009: \$414.4 billion). The June 1, 2010, acquisition added \$114.6 billion in AUM at that date. During the three months ended June 30, 2010, net inflows increased AUM by \$13.9 billion, while negative market movements decreased AUM by \$24.2 billion. We also experienced net outflows in institutional money market funds of \$0.9 billion, and decreases in AUM of \$3.4 billion due to changes in foreign exchange rates during the three months ended June 30, 2010. During the three months ended June 30, 2009, net inflows increased AUM by \$4.4 billion, and positive market movements increased AUM by \$28.2 billion. We also experienced net inflows in institutional money market funds of \$1.7 billion, and increases in AUM of \$11.1 billion due to changes in foreign exchange rates during the three months ended June 30, 2009. Average AUM during the three months ended June 30, 2010, were \$480.5 billion, compared to \$401.5 billion for the three months ended June 30, 2009.

Net flows increased AUM by \$13.9 billion during the three months ended June 30, 2010 (three months ended June 30, 2009: \$4.4 billion), and included net long-term inflows of ETF, UIT and passive AUM of \$14.7 billion and other net long-term outflows of \$0.8 billion. Net flows were driven by net inflows into our Institutional distribution channel of \$15.7 billion, which resulted primarily from a \$15.8 billion passive mandate in Japan, a post-close direct consequence of the newly acquired business. Our retail distribution channel experienced net outflows of \$2.4 billion during the three months ended June 30, 2010, primarily in the equity asset class, while our high net worth distribution channel experienced net inflows of \$0.6 billion.

Market gains and losses/reinvestment of AUM includes the net change in AUM resulting from changes in market values of the underlying investments from period to period and reinvestment of client dividends. Market declines led to a \$24.2 billion decrease in AUM during the three months ended June 30, 2010, compared to an increase of \$28.2 billion in the comparative 2009 period. Of the total decrease in AUM resulting from market declines during the three months ended June 30, 2010, \$21.1 billion of this decrease was due to the change in value of our equity asset class across all of our business components. Our alternatives and balanced asset classes were also negatively impacted by the change in market valuations during the period. During the three months ended June 30, 2010, our equity AUM decreased in line with equity markets globally from March 31, 2010. As discussed in the Executive Overview section of this Management's Discussion and Analysis, the S&P 500 and the FTSE 100 indices decreased 11.9% and 13.4%, respectively, during the three months ended June 30, 2010. The decline in equity valuations impacted our retail distribution channel the most significantly. In contrast, of the \$28.2 billion increase in AUM resulting from market increases during the three months ended June 30, 2009, \$21.0 billion of this increase was due to the change in value of our equity asset class, in line with increases in the S&P 500 and the FTSE 100 indices of 15.2% and 8.2%, respectively, during that period.

Foreign exchange rate movements in our AUM result from the effect of changes in foreign exchange rates from period to period as non-U.S.-Dollar denominated AUM is translated into U.S. Dollars, the reporting currency of the company. Foreign exchange rate movements led to a \$3.4 billion decrease in AUM during the three months ended June 30, 2010, compared to an \$11.1 billion increase in the comparative 2009 period. The impact of the change in foreign exchange rates in the three months ended June 30, 2010, was driven primarily by the marginal weakening of the Pounds Sterling relative to the U.S. Dollar, which was reflected in the translation of our Pounds Sterling-based AUM into U.S. Dollars, the marginal weakening of the Canadian Dollar relative to the U.S. Dollar, which was reflected in the translation of our Canadian Dollar-based AUM into U.S. Dollars, and to the marginal weakening of the Euro relative to the U.S. Dollar, which was reflected in the translation of our Euro-based AUM into U.S. Dollars. In contrast, the impact of the change in foreign exchange rates in the three months ended June 30, 2009, which led to an increase in AUM during that period of \$11.1 billion, was driven by more significant strengthening of the Pounds Sterling, Canadian Dollar, and Euro to the U.S. Dollar.

The table below illustrates the spot foreign exchange rates for translation into the U.S. Dollar, the reporting currency of the company, at June 30, 2010 and 2009, as compared with the rates that existed at March 31, 2010 and 2009:

Edgar Filing: Invesco Ltd. - Form 10-Q

	June 30, 2010	March 31, 2010	June 30, 2009	March 31, 2009
Pounds Sterling (\$ per £)	1.50	1.52	1.65	1.43
Canadian Dollar (CAD per \$)	1.06	1.02	1.16	1.26
Euro (\$ per Euro)	1.23	1.35	1.40	1.33
	49			

Table of Contents

Net revenue yield increased 2.2 basis points to 49.0 basis points in the three months ended June 30, 2010, from the three months ended June 30, 2009, level of 46.8 basis points, resulting from a 25.3% increase in net revenues and a 19.7% increase in average AUM from the three months ended June 30, 2009. The June 1, 2010, acquired business added \$114.6 billion in AUM at that date, with an expected effective fee rate of approximately 47 basis points. Market driven changes in our asset mix significantly impact our net revenue yield calculation. Our equity AUM generally earn a higher net revenue rate than money market AUM. At June 30, 2010, equity AUM were \$263.2 billion, representing 47% of our total AUM at that date; whereas at June 30, 2009, equity AUM were \$155.6 billion, representing 37.5% of our total AUM at that date.

Gross revenue yield on AUM increased 3.2 basis points to 66.0 basis points in the three months ended June 30, 2010, from the three months ended June 30, 2009, level of 62.8 basis points. Gross revenue yield, the most comparable U.S. GAAP-based measure to net revenue yield, is not considered by management to be a meaningful effective fee rate measure. The numerator of the gross revenue yield measure, operating revenues, excludes the management fees earned from consolidated investment products; however the denominator of the measure includes the AUM of these investment products. Therefore, the gross revenue yield measure is not considered representative of the company's true effective fee rate from AUM. The company evaluates net revenue yield instead. See Schedule of Non-GAAP Information for a reconciliation of operating revenues (gross revenues) to net revenues.

(1)

Gross revenue yield on AUM is equal to annualized total operating revenues divided by average AUM, excluding joint venture (JV) AUM. Our share of the average AUM in the second quarter for our JVs in China was \$3.5 billion (first quarter 2010: \$3.8 billion; second quarter 2009: \$3.6 billion). It is appropriate to exclude the average AUM of our JVs for purposes of computing gross revenue yield on AUM, because the revenues resulting from these AUM are not presented in our operating revenues. Under U.S. GAAP, our share of the pre-tax earnings of the JVs is recorded as equity in earnings of unconsolidated affiliates on our Condensed Consolidated Statements of Income.

- (2) Net revenue
yield on AUM
is equal to
annualized net
revenues
divided by
average AUM.

(1) Channel refers to the distribution channel from which the AUM originated. Institutional AUM originated from individual corporate clients, endowments, foundations, government authorities, universities, or charities. Retail AUM arose from client investments into funds available to the public with shares or units. Private Wealth Management AUM arose from high net worth client investments.

(2) The beginning balances were adjusted to reflect certain asset reclassifications, including the

previously
discussed AUM
reporting
alignment to
include ETF,
UIT and passive
AUM.

- (3) Asset classes are descriptive groupings of AUM by common type of underlying investments.
- (4) The alternatives asset class includes financial structures, absolute return, real estate, private equity, asset allocation, portable alpha and multiple asset strategies.
- (5) Ending Money Market AUM includes \$68.1 billion in institutional money market AUM and \$4.4 billion in retail money market AUM.
- (6) Client domicile disclosure groups AUM by the domicile of the underlying clients.

Table of Contents**Results of Operations***Adoption of FASB Statement No. 167*

The company provides investment management services to, and has transactions with, various private equity, real estate, fund-of-funds, collateralized loan obligation products (CLOs), and other investment entities sponsored by the company for the investment of client assets in the normal course of business. The company serves as the investment manager, making day-to-day investment decisions concerning the assets of the products. Certain of these entities are consolidated under variable interest or voting interest entity consolidation guidance. See Part I, Item 1, Financial Statements Note 12, Consolidated Investment Products, for additional details.

FASB Statement No. 167, which was effective January 1, 2010, had a significant impact on the presentation of the company's financial statements, as its provisions required the company to consolidate certain CLOs that were not previously consolidated. The cumulative effect adjustment upon adoption of FASB Statement No. 167 at January 1, 2010, resulted in an appropriation of retained earnings and a reclassification of other comprehensive income into retained earnings of \$274.3 million and \$5.2 million, respectively. The company's Consolidated Statement of Income for the three months ended June 30, 2010, reflects the elimination of \$8.9 million in management fees earned from these CLOs, and the addition of \$53.1 million in interest income, \$25.6 million in interest expense, and \$158.1 million in net other gains. The \$175.4 million net income impact during the three months ended June 30, 2010, of consolidation of these CLOs is largely offset by gains/(losses) attributable to investors in noncontrolling interests of \$173.0 million. Prior to the adoption of FASB Statement No. 167, the company accounted for its investments in these CLOs as available-for-sale investments, with changes in the value of the company's interests being recorded through other comprehensive income. After the adoption of FASB Statement No. 167, the change in value of the company's investments in these CLOs is reflected in the company's net income. For the three months ended June 30, 2010, the net impact to the company of its investments in these CLOs was \$2.4 million. The Condensed Consolidated Balance Sheet at June 30, 2010, reflects the consolidation of \$6.5 billion in assets held and \$5.4 billion in debt issued by these CLOs, despite the fact that the assets cannot be used by the company, nor is the company obligated for the debt. Retained earnings appropriated for investors of consolidated investment products of \$719.5 million is presented as part of the company's total equity, reflecting the excess of the consolidated CLOs' assets over their liabilities, attributable to noncontrolling third-party investors in their consolidated CLOs at June 30, 2010, and includes \$130.7 million related to consolidated CLOs acquired as part of the June 1, 2010, acquisition. In accordance with the standard, prior periods have not been restated to reflect the consolidation of these CLOs.

The majority of the company's consolidated investment products balances were CLO-related as of June 30, 2010. The collateral assets of the CLOs are held solely to satisfy the obligations of the CLOs. The company has no right to the benefits from, nor does it bear the risks associated with, the collateral assets held by the CLOs, beyond the company's minimal direct investments in, and management fees generated from, the CLOs. If the company were to liquidate, the collateral assets would not be available to the general creditors of the company, and as a result, the company does not consider them to be company assets. Additionally, the investors in the CLOs have no recourse to the general credit of the company for the notes issued by the CLOs. The company therefore does not consider this debt to be a company liability. The discussion that follows will separate consolidated investment product results of operations from the company's investment management operations through the use of non-GAAP financial measures. See the Schedule of Non-GAAP Information for additional details and reconciliations of the most directly comparable U.S. GAAP measures to the non-GAAP measures.

Table of Contents**Condensed Consolidating Statements of Income**

* The Before Consolidation column includes Invesco's equity interest in the investment products, accounted for as equity method and available-for-sale investments and does not include any other adjustments related to non-GAAP financial measure presentation.

** The company adopted FASB Statement No. 167 on January 1, 2010, resulting in the consolidation of certain CLOs. In accordance with the standard, prior periods have not been restated to reflect the consolidation of these CLOs. Prior to January 1, 2010, the company was not deemed to be the primary beneficiary of these CLOs.

Table of Contents*Operating Revenues and Net Revenues*

Operating revenues increased by \$161.9 million (25.9%) in the three months ended June 30, 2010, to \$787.0 million (June 30, 2009: \$625.1million). Net revenues increased by \$118.9 million (25.3%) in the three months ended June 30, 2010, to \$589.0 million (June 30, 2009: \$470.1 million). Net revenues are operating revenues less third-party distribution, service and advisory expenses, plus our proportional share of net revenues from joint venture arrangements, plus management fees earned from, less other revenue recorded by, consolidated investment products. See Schedule of Non-GAAP Information for additional important disclosures regarding the use of net revenues. A significant portion of our business and managed AUM are based outside of the U.S. The income statements of foreign currency subsidiaries are translated into U.S. dollars, the reporting currency of the company, using average foreign exchange rates. Over the three month period, the U.S. dollar strengthened against the Pound Sterling and Euro, but weakened against the Canadian dollar which impacted our reported revenues for the three months ended June 30, 2010, as compared to the three months ended June 30, 2009. The impact of foreign exchange rate movements resulted in a \$6.6 million offset to the increase in operating revenues during the three months ended June 30, 2010.

Additionally, our revenues are directly influenced by the level and composition of our AUM as more fully discussed below. Movements in global capital market levels, net new business inflows (or outflows) and changes in the mix of investment products between asset classes and geographies may materially affect our revenues from period to period.

The main categories of revenues, and the dollar and percentage change between the periods, were as follows:

\$ in millions	Three months ended June 30,		\$ Change	% Change
	2010	2009		
Investment management fees	627.9	501.6	126.3	25.2%
Service and distribution fees	139.4	100.4	39.0	38.8%
Performance fees	3.5	8.0	(4.5)	(56.3)%
Other	16.2	15.1	1.1	7.3%
Total operating revenues	787.0	625.1	161.9	25.9%
Third-party distribution, service and advisory expenses	(220.7)	(166.3)	(54.4)	32.7%
Proportional share of revenues, net of third-party distribution expenses, from joint venture investments	10.4	11.1	(0.7)	(6.3)%
Management fees earned from consolidated investment products	12.3	1.0	11.3	1,130.0%
Other revenues recorded by consolidated investment products		(0.8)	0.8	(100.0)%
Net revenues	589.0	470.1	118.9	25.3%

Table of Contents

The operating results for the three months ended June 30, 2010, include the operating results of the acquired business from the closing date of June 1, 2010. The following table provides an analysis of the estimated impact of the acquired business on the company's operating results for the three months ended June 30, 2010.

	Existing	Acquired Business	Transaction and	
\$ in millions	Invesco Business	from June 1, 2010*	Integration Expenses	Q2 2010 Combined
Operating revenues				
Investment management fees	591.6	36.3		627.9
Service and distribution fees	114.2	25.2		139.4
Performance fees	3.5			3.5
Other	10.7	5.5		16.2
Total operating revenues	720.0	67.0		787.0
Operating expenses				
Employee compensation	244.3	16.2		260.5
Third-party distribution, service and advisory	201.7	19.0		220.7
Marketing	29.3	5.9		35.2
Property, office and technology	52.8	3.0		55.8
General and administrative	59.8	4.3		64.1
Transaction and integration			79.3	79.3
Total operating expenses	587.9	48.4	79.3	715.6
Operating income	132.1	18.6	(79.3)	71.4

* The integration of the acquired business into the existing Invesco business is now largely complete and as a result management does not expect to be able to provide similarly segregated information for future periods.

Investment management fees

Investment management fees are derived from providing professional services to manage client accounts and include fees earned from retail mutual funds, unit trusts, investment companies with variable capital (ICVCs),

exchange-traded funds, investment trusts and institutional and private wealth management advisory contracts. Investment management fees for products offered in the retail distribution channel are generally calculated as a percentage of the daily average asset balances and therefore vary as the levels of AUM change resulting from inflows, outflows and market movements. Investment management fees for products offered in the institutional and private wealth management distribution channels are calculated in accordance with the underlying investment management contracts and also vary in relation to the level of client assets managed.

Investment management fees increased by \$126.3 million (25.2%) in the three months ended June 30, 2010, to \$627.9 million (June 30, 2009: \$501.6 million) due to the acquisition, increases in average AUM, primarily retail AUM and changes in the mix of AUM between asset classes, offset by the impact of foreign exchange rate movement. The June 1, 2010, acquisition contributed to an increase in investment management fees of \$36.3 million during the period. The June 1, 2010, acquired business added \$114.6 billion in AUM at that date, with an expected effective fee rate of approximately 47 basis points. Average AUM for the three months ended June 30, 2010, increased 19.7% to \$480.5 billion from \$401.5 billion for the three months ended June 30, 2009. Average long-term AUM, which generally earn higher fee rates than money market AUM, for the three months ended June 30, 2010, increased 33.0% to \$413.4 billion from \$310.9 billion for the three months ended June 30, 2009, while average institutional money market AUM decreased 25.9% to \$67.1 billion at June 30, 2010, from \$90.6 billion for the three months ended June 30, 2009. The increase in average AUM and average long-term AUM includes the impact of the June 1, 2010, acquired business. Our equity AUM generally earns a higher net revenue rate than money market AUM. At June 30, 2010, equity AUM were \$263.2 billion, representing 47% of our total AUM at that date; whereas at June 30, 2009, equity AUM were \$155.6 billion, representing 37.5% of our total AUM at that date. See the company's disclosures regarding the changes in AUM during the three months ended June 30, 2010, in the Assets Under Management section of the Results of Operations for the three months ended June 30, 2010, compared with the three months ended

Table of Contents

June 30, 2009, above for additional information regarding the movements in AUM. Foreign exchange rate movements led to a decrease in investment management fees of \$4.3 million during the three months ended June 30, 2010.

Additionally, the change in investment management fee revenues reflects the adoption of FASB Statement No. 167, now encompassed in ASC Topic 810, Consolidation, on January 1, 2010, which resulted in the consolidation of certain CLOs with total assets of \$6.5 billion at June 30, 2010. As part of the consolidation, management fees of earned from consolidated CLOs and other products of \$12.3 million were eliminated from the company's operating revenues for the three months ended June 30, 2010. In accordance with the standard, prior periods have not been restated to reflect the consolidation of these CLOs. The company uses a non-GAAP financial measure, net revenues, to add back these eliminated management fees as part of net revenues, as the company has earned them for providing investment management services to the consolidated CLOs. See Schedule of Non-GAAP Information for the reconciliation of operating revenues to net revenues.

Service and distribution fees

Service fees are generated through fees charged to cover several types of expenses, including fund accounting fees and other maintenance costs for mutual funds, unit trusts and ICVCs, and administrative fees earned from closed-ended funds. Service fees also include transfer agent fees, which are fees charged to cover the expense of processing client share purchases and redemptions, call center support and client reporting. U.S. distribution fees can include 12b-1 fees earned from certain mutual funds to cover allowable sales and marketing expenses for those funds and also include asset-based sales charges paid by certain mutual funds for a period of time after the sale of those funds. Distribution fees typically vary in relation to the amount of client assets managed. Generally, retail products offered outside of the U.S. do not generate a separate distribution fee, as the quoted management fee rate is inclusive of these services.

In the three months ended June 30, 2010, service and distribution fees increased by \$39.0 million (38.8%) to \$139.4 million (June 30, 2009: \$100.4 million) due to increases in average AUM during the period. Additionally, the June 1, 2010, acquisition contributed \$25.2 million of the increase in service and distribution fees during the three months ended June 30, 2010.

Performance fees

Performance fee revenues are generated on certain management contracts when performance hurdles are achieved. Such fee revenues are recorded in operating revenues as of the performance measurement date, when the contractual performance criteria have been met and when the outcome of the transaction can be measured reliably in accordance with Method 1 of ASC Topic 605-20-S99, Revenue Recognition Services SEC Materials. Cash receipt of earned performance fees occurs after the measurement date. The performance measurement date is defined in each contract in which incentive and performance fee revenue agreements are in effect, and therefore we have performance fee arrangements that include monthly, quarterly and annual measurement dates. Given the uniqueness of each transaction, performance fee contracts are evaluated on an individual basis to determine if revenues can and should be recognized. Performance fees are not recorded if there are any future performance contingencies. If performance arrangements require repayment of the performance fee for failure to perform during the contractual period, then performance fee revenues are recognized no earlier than the expiration date of these terms. Performance fees will fluctuate from period to period and may not correlate with general market changes, since most of the fees are driven by relative performance to the respective benchmark rather than by absolute performance. Additionally, of our \$557.7 billion in AUM at June 30, 2010, only approximately \$31.6 billion, or 5.7%, could potentially earn performance fees. Of the \$114.6 billion AUM acquired on June 1, 2010, through the acquisition, \$2.7 billion, or 2.4%, earn performance fees.

In the three months ended June 30, 2010, performance fees decreased by \$4.5 million (56.3%) to \$3.5 million (June 30, 2009: \$8.0 million). The performance fees generated in the three months ended June 30, 2010, arose primarily due to products managed in our real estate group.

Other revenues

Other revenues include fees derived primarily from transaction commissions earned upon the sale of new investments into certain of our funds and fees earned upon the completion of transactions in our direct real estate and private equity asset groups. Real estate transaction fees are derived from commissions earned through the buying and

selling of properties. Private equity transaction fees include commissions associated with the restructuring of, and fees from providing advice to, portfolio companies held by the funds. These transaction fees are recorded in our financial statements on the date when the transactions are legally closed.

Table of Contents

Following the June 1, 2010, acquisition, the company is the sponsor of unit investment trust products (UITs). In its capacity as sponsor of UITs, the company earns other revenues related to transactional sales charges resulting from the sale of UIT products and from the difference between the purchase or bid and offer price of securities temporarily held to form new UIT products. These revenues are recorded net of concessions to dealers who distribute UITs to investors.

In the three months ended June 30, 2010, other revenues increased by \$1.1 million (7.3%) to \$16.2 million (June 30, 2009: \$15.1 million). Other revenues included \$5.5 million in UIT revenues during the period, which were offset by a \$1.6 million decline in transaction commissions, and lower front-end fees earned in the U.K. of \$1.7 million.

Third-party distribution, service and advisory expenses

Third-party distribution, service and advisory expenses include periodic renewal commissions paid to brokers and independent financial advisors for their continuing oversight of their clients' assets, over the time they are invested, and are payments for the servicing of client accounts. Renewal commissions are calculated based upon a percentage of the AUM value. Third-party distribution expenses also include the amortization of upfront commissions paid to broker-dealers for sales of fund shares with a contingent deferred sales charge (a charge levied to the investor for client redemption of AUM within a certain contracted period of time). The distribution commissions are amortized over the redemption period. Also included in third-party distribution, service and advisory expenses are sub-transfer agency fees that are paid to third parties for processing client share purchases and redemptions, call center support and client reporting. Third-party distribution, service and advisory expenses may increase or decrease at a rate different from the rate of change in service and distribution fee revenues due to the inclusion of distribution, service and advisory expenses for the U.K. and Canada, where the related revenues are recorded as investment management fee revenues, as noted above.

Third-party distribution, service and advisory expenses increased by \$54.4 million (32.7%) in the three months ended June 30, 2010, to \$220.7 million (June 30, 2009: \$166.3 million), consistent with the increases in investment management and service and distribution fee revenues. The acquired business contributed \$19.0 million of the increase in third-party distribution, service and advisory expenses during the period.

Proportional share of revenues, net of third-party distribution expenses, from joint venture investments

Management believes that the addition of our proportional share of revenues, net of third-party distribution expenses, from joint venture arrangements should be added to operating revenues to arrive at net revenues, as it is important to evaluate the contribution to the business that our joint venture arrangements are making. See Schedule of Non-GAAP Information for additional disclosures regarding the use of net revenues. The company's most significant joint venture arrangement is our 49.0% investment in Invesco Great Wall Fund Management Company Limited (the Invesco Great Wall joint venture).

Our proportional share of revenues, net of third-party distribution expenses decreased by \$0.7 million (6.3%) to \$10.4 million in the three months ended June 30, 2010 (June 30, 2009: \$11.1 million), driven by decreases in average AUM during the period in the Invesco Great Wall joint venture. Our share of the Invesco Great Wall joint venture's average AUM in the three months ended June 30, 2010, was \$3.5 billion (June 30, 2009: \$3.6 billion).

Management fees earned from consolidated investment products

Management believes that the consolidation of investment products may impact a reader's analysis of our underlying results of operations and could result in investor confusion or the production of information about the company by analysts or external credit rating agencies that is not reflective of the underlying results of operations and financial condition of the company. Accordingly, management believes that it is appropriate to adjust operating revenues for the impact of consolidated investment products in calculating net revenues. As management and performance fees earned by Invesco from the consolidated products are eliminated upon consolidation of the investment products, management believes that it is appropriate to add these operating revenues back in the calculation of net revenues. See Schedule of Non-GAAP Information for additional disclosures regarding the use of net revenues.

Management fees earned from consolidated investment products increased by \$11.3 million (1,130.0%) to \$12.3 million in the three months ended June 30, 2010 (June 30, 2009: \$1.0 million). The increase reflects the adoption of FASB Statement No. 167, now encompassed in ASC Topic 810, Consolidation, on January 1, 2010,

which primarily resulted in the consolidation of certain CLOs with total assets of \$6.5 billion at June 30, 2010. As part of the CLO consolidation, management fees of \$17.6 million were eliminated from the company's operating revenues for the six months ended June 30, 2010. In accordance with the standard, prior periods have not been restated to reflect the consolidation of these CLOs.

Table of Contents***Operating revenues of consolidated investment products***

Operating revenues of consolidated investment products are included in U.S. GAAP operating revenues resulting from the consolidation of investment products into the company's results of operations. Management believes that this consolidation could impact a reader's analysis of our underlying results of operations. Therefore, management believes that it is appropriate to deduct operating revenues of consolidated investment products in calculating net revenues. See

Schedule of Non-GAAP Information for additional disclosures regarding the use of net revenues. The change in operating revenues of consolidated investment products is discussed above.

Operating Expenses

During the three months ended June 30, 2010, operating expenses increased by \$200.9 million (39.0%) to \$715.6 million (June 30, 2009: \$514.7 million). As discussed above, a significant portion of our business and managed AUM are based outside of the U.S. The income statements of foreign currency subsidiaries are translated into U.S. dollars, the reporting currency of the company, using average foreign exchange rates. Over the three months, the U.S. dollar strengthened against the Pound Sterling and Euro, and weakened against the Canadian Dollar, which impacted our reported expenses for the three months ended June 30, 2010, as compared to the three months ended June 30, 2009. The impact of foreign exchange rate movements resulted in a \$3.0 million decrease in operating expenses during the three months ended June 30, 2010.

The main categories of operating expenses, and the dollar and percentage changes between periods, are as follows:

\$ in millions	Three months ended June 30,			% Change
	2010	2009	\$ Change	
Employee compensation	260.5	229.0	31.5	13.8%
Third-party distribution, service and advisory	220.7	166.3	54.4	32.7%
Marketing	35.2	23.9	11.3	47.3%
Property, office and technology	55.8	48.6	7.2	14.8%
General and administrative	64.1	46.9	17.2	36.7%
Transaction and integration	79.3		79.3	N/A
Total operating expenses	715.6	514.7	200.9	39.0%

The table below sets forth these cost categories as a percentage of total operating expenses and operating revenues, which we believe provides useful information as to the relative significance of each type of expense:

Three months ended: \$ in millions	June 30, 2010	% of Total Operating Expenses	% of Operating Revenues	June 30, 2009	% of Total Operating Expenses	% of Operating Revenues
Employee compensation	260.5	36.4%	33.1%	229.0	44.5%	36.6%
Third-party distribution, service and advisory	220.7	30.8%	28.0%	166.3	32.3%	26.6%
Marketing	35.2	4.9%	4.5%	23.9	4.6%	3.8%
Property, office and technology	55.8	7.8%	7.1%	48.6	9.4%	7.8%
General and administrative	64.1	9.0%	8.1%	46.9	9.2%	7.5%
Transaction and integration	79.3	11.1%	10.1%		N/A	N/A
Total operating expenses	715.6	100.0%	90.9%	514.7	100.0%	82.3%

Employee Compensation

Employee compensation includes salary, cash bonuses and share-based payment plans designed to attract and retain the highest caliber employees. Employee staff benefits plan costs and payroll taxes are also included in employee compensation.

Employee compensation increased \$31.5 million (13.8%) to \$260.5 million in the three months ended June 30, 2010, (June 30, 2009: \$229.0 million), including an increase of approximately \$16.2 million related to the June 1, 2010, acquisition. Base salaries and variable compensation increased \$23.3 million during the three months ended June 30, 2010, from the three months ended June 30, 2009, due to incremental costs associated with the June 1, 2010, acquisition, the impact of annual merit increases, and the increase in variable compensation accruals to reflect the overall underlying core earnings growth of the company from the three months ended

Table of Contents

June 30, 2009. Also included in compensation expenses during the three months ended June 30, 2010, are share-based payment costs of \$29.4 million, compared to \$20.2 million during the three months ended June 30, 2009, an increase of \$9.5 million, also due to the incremental impact of the acquisition and to the additional amortization of share awards granted February 28, 2010, as part of the company's annual share award cycle. Slightly offsetting these increases in employee compensation during the three months ended June 30, 2010, is a decrease of \$1.3 million caused by foreign exchange rate movements from the three months ended June 30, 2009. Additionally, employee compensation costs for the three months ended June 30, 2010 and 2009, included \$5.0 million of prepaid compensation amortization expenses related to the 2006 acquisition of W.L. Ross & Co. This expense amortization will continue through 2010, and the acquisition-related asset will be fully amortized by the third quarter of 2011.

Headcount at June 30, 2010, was 5,421 (June 30, 2009: 5,084). The June 1, 2010, acquisition added 580 employees at that date.

Third-Party Distribution, Service and Advisory Expenses

Third-party distribution, service and advisory expenses are discussed above in the operating and net revenues section.

Marketing

Marketing expenses include marketing support payments, which are payments made to distributors of certain of our retail products over and above the 12b-1 distribution payments. These fees are contracted separately with each distributor. Marketing expenses also include the cost of direct advertising of our products through trade publications, television and other media, and public relations costs, such as the marketing of the company's products through conferences or other sponsorships, and the cost of marketing-related employee travel.

Marketing expenses increased by \$11.3 million (47.3%) in the three months ended June 30, 2010, to \$35.2 million (June 30, 2009: \$23.9 million) primarily due to a market-driven increase in marketing support payments of \$3.3 million as compared to the three months ended June 30, 2009. Additionally, travel and sales literature/research expenses increased \$1.2 million and \$1.6 million, respectively, during the three months ended June 30, 2010, from the three months ended June 30, 2009. The June 1, 2010, acquisition contributed \$5.9 million to the increase in marketing expenses.

Property, Office and Technology

Property, office and technology expenses include rent and utilities for our various leased facilities, depreciation of company-owned property and capitalized computer equipment costs, minor non-capitalized computer equipment and software purchases and related maintenance payments, and costs related to externally provided operations, technology, and other back office management services.

Property, office and technology expenses increased by \$7.2 million (14.8%) to \$55.8 million in the three months ended June 30, 2010 (June 30, 2009: \$48.6 million). The June 1, 2010, acquisition increased property, office and technology expenses by \$3.0 million. The remaining increase of \$4.2 million was the result of higher depreciation on purchased technology and increased outsourcing costs in the U.K. and Hyderabad.

General and Administrative

General and administrative expenses include professional services costs, such as information service subscriptions, consulting fees, professional insurance costs, audit, tax and legal fees, non-marketing related employee travel expenditures, recruitment and training costs, and the amortization of certain intangible assets.

General and administrative expenses increased by \$17.2 million (36.7%) to \$64.1 million in the three months ended June 30, 2010 (June 30, 2009: \$46.9 million). Included in general and administrative expenses for the three months ended June 30, 2010, is \$8.9 million (\$6.0 million net of tax and reducing diluted EPS by \$0.01 per share) representing fund reimbursement costs from the correction of historical foreign exchange allocations. Travel expenses increased \$3.1 million during the three months ended June 30, 2010, from the three months ended June 30, 2009, driven by higher levels of business activity. The June 1, 2010, acquisition contributed \$4.3 million to the increase in general and administrative expenses during the period.

Table of Contents

During the three months ended June 30, 2010, intangible amortization expense increased \$2.0 million resulting from additional amortization of the various finite-lived intangible assets that arose from the June 1, 2010, acquisition. Estimated amortization expense for all of the company's intangible assets, for each of the five succeeding years based upon the company's intangible assets at June 30, 2010, is included in Part I, Financial Information, Item 1. Financial Statements, Note 5, Intangible Assets.

Transaction and integration

Transaction and integration expenses include acquisition-related charges incurred during the period to effect a business combination, including legal, regulatory, advisory, valuation, and other professional or consulting fees, general and administrative costs, including travel costs related to the transaction and the costs of temporary staff involved in executing the transaction, and post-closing costs of integrating the acquired business into the company's existing operations including incremental costs associated with achieving synergy savings.

Transaction and integration charges were \$79.3 million in the three months ended June 30, 2010 (three months ended June 30, 2009: none) and relate to the acquired business. The acquisition was announced in October 2009 and closed on June 1, 2010. Transaction and integration expenses include \$18.5 million of employee compensation costs, including \$14.5 million of severance costs, \$6.1 million for the proxy solicitation of fund investors to approve a change in fund advisor, \$27.5 million for transition of the Van Kampen funds to Invesco's platform and governance structure, \$4.7 million related to office space including onerous lease charges associated with vacating office space in Houston as we consolidate operations, \$5.4 million of sales and marketing costs as we print re-branded fund prospectuses, \$12.8 million of professional services, principally legal, consultancy and insurance, and \$4.3 million in technology contractor and travel costs. As previously announced, these costs in aggregate are currently expected to be less than \$175 million and include \$10.8 million incurred in 2009 with the remainder being incurred in 2010 and 2011.

Operating Income, Adjusted Operating Income, Operating Margin and Adjusted Operating Margin

Operating income decreased by \$39.0 million (35.3%) to \$71.4 million in the three months ended June 30, 2010 (June 30, 2009: \$110.4 million), as the increase in operating expenses, primarily due to transaction and integration expenses, was greater than the increase in operating revenues during the period. As a result of the decline in operating income, operating margin (operating income divided by operating revenues) declined from 17.7% in the three months ended June 30, 2009, to 9.1% in the three months ended June 30, 2010. Adjusted operating income (operating income plus our proportional share of the operating income from joint venture arrangements, transaction and integration charges, amortization of acquisition-related prepaid compensation and other intangibles, and the operating income impact of the consolidation of investment products), however, increased by \$62.2 million (49.2%) to \$188.7 million in the three months ended June 30, 2010, from \$126.5 million in the three months ended June 30, 2009. Adjusted operating margin is equal to adjusted operating income divided by net revenues. Net revenues are equal to operating revenues less third-party distribution, service and advisory expenses, plus our proportional share of the net revenues from our joint venture arrangements, plus management fees earned from, less other revenue recorded by, consolidated investment products. Adjusted operating margin increased to 32.0% in the three months ended June 30, 2010, from 26.9% in the three months ended June 30, 2009. See Schedule of Non-GAAP Information for a reconciliation of operating revenues to net revenues, a reconciliation of operating income to adjusted operating income and additional important disclosures regarding net revenues, adjusted operating income and adjusted operating margin.

Other Income and Expenses

The main categories of other income and expenses, and the dollar and percentage changes between periods are as follows:

\$ in millions	Three months ended June 30,		\$ Change	% Change
	2010	2009		
Equity in earnings of unconsolidated affiliates	10.4	7.5	2.9	38.7%
Interest income	1.8	1.2	0.6	50.0%
	53.1		53.1	%

Interest income of consolidated investment products				
Gains/(losses) of consolidated investment products, net	187.2	(48.4)	235.6	N/A
Interest expense	(14.1)	(16.5)	2.4	(14.5)%
Interest expense of consolidated investment products	(25.6)		(25.6)	%
Other gains and losses, net	(9.3)	10.0	(19.3)	N/A
Total other income and expenses	203.5	(46.2)	249.7	N/A

Table of Contents***Equity in earnings of unconsolidated affiliates***

Equity in earnings of unconsolidated affiliates increased by \$2.9 million (38.7%) to \$10.4 million in the three months ended June 30, 2010 (June 30, 2009: \$7.5 million). Included in equity in earnings from affiliates is our share of the income from our joint ventures in China, which declined \$1.5 million to \$6.3 million in the three months ended June 30, 2010, from \$7.8 million earned during the three months ended June 30, 2009. This decline was offset by our share of the valuation changes in certain partnership investments that increased by \$4.7 million for these comparative periods. Declines in equity in earnings from our joint ventures are due to declines in average AUM in those entities during the period.

Interest income and interest expense

Interest income increased by \$0.6 million (50.0%) to \$1.8 million in the three months ended June 30, 2010 (June 30, 2009: \$1.2 million). Higher yields during the three months ended June 30, 2010, offset lower cash and cash equivalent balances, resulting in an increase in interest income. Interest expense decreased by \$2.4 million (14.5%) to \$14.1 million in the three months ended June 30, 2010 (June 30, 2009: \$16.5 million), resulting from a lower average debt balance during the three months ended June 30, 2010, versus the comparative period.

Interest income and interest expense of consolidated investment products

Interest income of consolidated investment products results from interest generated by the collateral assets held by consolidated CLOs, which is used to satisfy the interest expenses of the notes issued by the consolidated CLOs and other operating expense requirements, including the payment of the management and performance fees to the company as investment manager. See Part I, Item 1, Financial Statements Note 12, Consolidated Investment Products, for additional details.

In the three months ended June 30, 2010, interest income and interest expense of consolidated investment products were \$53.1 million and \$25.6 million, respectively. The balances reflect the adoption of FASB Statement No. 167, now encompassed in ASC Topic 810, Consolidation, on January 1, 2010, which resulted in the consolidation of certain CLOs with total assets of \$6.5 billion at June 30, 2010. In accordance with the standard, prior periods have not been restated to reflect the consolidation.

Gains and losses of consolidated investment products, net income impact of consolidated investment products, and noncontrolling interests in consolidated entities

Included in other income and expenses are gains and losses of consolidated investment products, net, which are driven by realized and unrealized gains and losses of underlying investments held by consolidated investment products. In the three months ended June 30, 2010, other gains and losses of consolidated investment products were a net gain of \$187.2 million, as compared to a net loss of \$48.4 million in the three months ended June 30, 2009. The increase primarily reflects the adoption of FASB Statement No. 167, now encompassed in ASC Topic 810,

Consolidation, on January 1, 2010, which resulted in the consolidation of certain CLOs with total assets of \$6.5 billion at June 30, 2010. Collateral assets and notes issued by consolidated CLOs are held at fair value, and the unrealized and realized gains and losses of the collateral assets and notes are reflected in this line item. In accordance with the standard, prior periods have not been restated to reflect the consolidation of these CLOs. As these gains and losses are largely attributable to non-affiliated third party investors in consolidated investment products, it is not practicable for the company to analyze the components of the net gains and losses.

As illustrated in the Condensed Consolidating Statements of Income for the three months ended June 30, 2010 and 2009, at the beginning of this Results of Operations section, the consolidation of investment products during the three months ended June 30, 2010, resulted in a net income impact of \$199.5 million before attribution to noncontrolling interests. Invesco invests in only a portion of these products, and as a result this net income is offset by noncontrolling interests of \$197.3 million, resulting in a net income impact to the company of \$2.2 million. Net losses of consolidated investment products for the three months ended June 30, 2009, were \$47.7 million, and were largely offset by noncontrolling interests of consolidated entities of \$47.5 million.

Non-controlling interests in consolidated entities represent the profit or loss amounts attributed to third party investors in consolidated investment products. The amounts recorded are determined by comparisons of the underlying investments held by the company to the total investment products net assets or beneficial interests. Movements in amounts attributable to non-controlling interests in consolidated entities on the company's Condensed Consolidated Statements of Income generally offset the gains and losses, interest income and interest expense of

consolidated investment products.

Table of Contents

Other gains and losses, net

Other gains and losses, net were a net loss of \$9.3 million in the three months ended June 30, 2010, as compared to a net gain of \$10.0 million in the three months ended June 30, 2009. Included in other gains and losses is a net loss of \$5.6 million as a result of the depreciation of assets held for our deferred compensation plans (2009: \$0.0 million net gain), and \$4.0 million of other-than-temporary impairment charges related to the company's seed money investments (2009: \$0.1 million). In the three months ended June 30, 2010, we incurred \$0.1 million in net foreign exchange losses (2009: \$7.2 million in net foreign exchange gains).

Income Tax Expense

Our subsidiaries operate in several taxing jurisdictions around the world, each with its own statutory income tax rate. As a result, our effective tax rate will vary from year to year depending on the mix of the profits and losses of our subsidiaries. The majority of our profits are earned in the U.S., Canada and the U.K. The current U.K. statutory tax rate is 28%, the Canadian statutory tax rate is 31% and the U.S. Federal statutory tax rate is 35%.

Our effective tax rate, excluding noncontrolling interests in consolidated entities, for the three months ended June 30, 2010, was 47.4%, up from 32.2% for the three months ended June 30, 2009. The effective tax rate for the three months ended June 30, 2010, included the impact of non-deductible transaction and integration costs related to the acquired business.

Table of Contents**Results of Operations for the Six months ended June 30, 2010, Compared with the Six months ended June 30, 2009****Assets Under Management**

AUM at June 30, 2010, were \$557.7 billion (March 31, 2010: \$457.7 billion; June 30, 2009: \$414.4 billion). The June 1, 2010, acquisition of Morgan Stanley's retail asset management business, including Van Kampen Investments (the acquired business or the acquisition), added \$114.6 billion in AUM at that date. During the six months ended June 30, 2010, net inflows increased AUM by \$17.5 billion, while negative market movements decreased AUM by \$14.5 billion. We also experienced net outflows in institutional money market funds of \$11.5 billion, and decreases in AUM of \$7.9 billion due to changes in foreign exchange rates during the six months ended June 30, 2010. During the six months ended June 30, 2009, net inflows increased AUM by \$6.1 billion, and positive market movements increased AUM by \$11.7 billion. We also experienced net inflows in institutional money market funds of \$10.3 billion, and increases in AUM of \$9.2 billion due to changes in foreign exchange rates during the six months ended June 30, 2009. Average AUM during the six months ended June 30, 2010, were \$465.0 billion, compared to \$377.9 billion for the six months ended June 30, 2009.

Net flows increased AUM by \$17.5 billion during the six months ended June 30, 2010 (six months ended June 30, 2009: \$6.1 billion), driven by net inflows into our Institutional distribution channel of \$18.3 billion, which resulted primarily from the \$15.8 billion passive mandate in Japan, a post-close direct consequence of the newly acquired business. Our retail distribution channel experienced net outflows of \$1.7 billion during the six months ended June 30, 2010, primarily in the alternatives asset class, while our high net worth distribution channel experienced net inflows of \$0.9 billion.

Market declines led to a \$14.5 billion decrease in AUM during the six months ended June 30, 2010, compared to an increase of \$11.7 billion in the comparative 2009 period. Of the total decrease in AUM resulting from market declines during the six months ended June 30, 2010, \$14.8 billion of this decrease was due to the change in value of our equity asset class across all of our business components. During the six months ended June 30, 2010, our equity AUM decreased in line with the decreases in equity markets globally from June 1, 2010. As discussed in the

Executive Overview section of this Management's Discussion and Analysis, the S&P 500 and the FTSE 100 indices decreased 8.5% and 8.9%, respectively, during the six months ended June 30, 2010. The decline in equity valuations impacted our retail distribution channel the most significantly. Additionally, the decrease in equity valuations was \$14.8 billion across our AUM grouped by client domicile. In contrast, of the total increase in AUM resulting from market increases during the six months ended June 30, 2009, \$9.7 billion of this increase was due to the change in value of our equity asset class.

Foreign exchange rate movements led to a \$7.9 billion decrease in AUM during the six months ended June 30, 2010, compared to a \$9.2 billion increase in the comparative 2009 period. The impact of the change in foreign exchange rates in the six months ended June 30, 2010, was driven primarily by the marginal weakening of the Pounds Sterling relative to the U.S. Dollar, which was reflected in the translation of our Pounds Sterling-based AUM into U.S. Dollars, the marginal weakening of the Canadian Dollar relative to the U.S. Dollar, which was reflected in the translation of our Canadian Dollar-based AUM into U.S. Dollars, and the marginal weakening of the Euro relative to the U.S. Dollar, which was reflected in the translation of our Euro-based AUM into U.S. Dollars. In contrast, the impact of the change in foreign exchange rates in the six months ended June 30, 2009, which led to an increase in AUM during that period of \$9.2 billion, was driven by more significant strengthening of the Pounds Sterling, Canadian Dollar, and Euro to the U.S. Dollar.

The table below illustrates the spot foreign exchange rates for translation into the U.S. Dollar, the reporting currency of the company, at June 30, 2010 and 2009, as compared with the rates that existed at December 31, 2009 and 2008:

	June 30, 2010	December 31, 2009	June 30, 2009	December 31, 2008
Pounds Sterling (\$ per £)	1.50	1.61	1.65	1.45
Canadian Dollar (CAD per \$)	1.06	1.05	1.16	1.23

Euro (\$ per Euro)	1.23	1.43	1.40	1.39
--------------------	------	------	------	------

Net revenue yield increased 2.0 basis points to 48.7 basis points in the six months ended June 30, 2010, from the six months ended June 30, 2009, level of 46.7 basis points, resulting from a 4.5% increase in net revenues and a 23.0% increase in average AUM from the six months ended June 30, 2009. The June 1, 2010, acquired business added \$114.6 billion in AUM at that date, with an expected effective fee rate of approximately 47 basis points. Market driven changes in our asset mix significantly impact our net revenue yield calculation. Our equity AUM generally earns a higher net revenue rate than money market AUM. At June 30, 2010, equity AUM were

65

Table of Contents

\$263.2 billion, representing 47% of our total AUM at that date; whereas at June 30, 2009, equity AUM were \$155.6 billion, representing 37.5% of our total AUM at that date.

Gross revenue yield on AUM increased 2.6 basis points to 65.3 basis points in the six months ended June 30, 2010, from the six months ended June 30, 2009, level of 62.7 basis points. Gross revenue yield, the most comparable U.S. GAAP-based measure to net revenue yield, is not considered a meaningful effective fee rate measure. The numerator of the gross revenue yield measure, operating revenues, excludes the management fees earned from consolidated investment products; however the denominator of the measure includes the AUM of these investment products. Therefore, the gross revenue yield measure is not considered representative of the company's true effective fee rate from AUM. The company evaluates net revenue yield instead. See Schedule of Non-GAAP Information for a reconciliation of operating revenues (gross revenues) to net revenues.

Changes in AUM were as follows:

(1) Gross revenue
yield on AUM
is equal to
annualized total
operating
revenues
divided by

average AUM, excluding joint venture (JV) AUM. Our share of the average AUM in the six months ended June 30, 2010, for our JVs in China was \$3.6 billion (six months ended June 30, 2009 \$3.4 billion). It is appropriate to exclude the average AUM of our JVs for purposes of computing gross revenue yield on AUM, because the revenues resulting from these AUM are not presented in our operating revenues. Under U.S. GAAP, our share of the pre-tax earnings of the JVs is recorded as equity in earnings of unconsolidated affiliates on our Condensed Consolidated Statements of Income.

- (2) Net revenue yield on AUM is equal to annualized net revenues divided by average AUM. See Schedule of

Non-GAAP
Information for
a reconciliation
of operating
revenues to net
revenues.

(1) Channel refers to the distribution channel from which the AUM originated. Institutional AUM originated from individual corporate clients, endowments, foundations, government authorities, universities, or charities. Retail AUM arose from client investments into funds available to the public with shares or units. Private Wealth Management AUM arose from high net worth client investments.

(2) The beginning balances were adjusted to reflect certain asset reclassifications, including the

previously
discussed AUM
reporting
alignment to
include ETF,
UIT and passive
AUM.

- (3) Asset classes are descriptive groupings of AUM by common type of underlying investments.
- (4) The alternatives asset class includes financial structures, absolute return, real estate, private equity, asset allocation, portable alpha and multiple asset strategies.
- (5) Ending Money Market AUM includes \$68.1 billion in institutional money market AUM and \$4.4 billion in retail money market AUM.
- (6) Client domicile disclosure groups AUM by the domicile of the underlying clients.

Table of Contents**Results of Operations***Adoption of FASB Statement No. 167*

The company's Consolidated Statement of Income for the six months ended June 30, 2010, reflect the elimination of \$17.6 million in management fees earned from CLOs, and the addition of \$105.6 million in interest income, \$46.4 million in interest expense, and \$243.2 million in net other gains. The \$281.2 million net income impact during the six months ended June 30, 2010, of consolidation of these CLOs is largely offset by gains/(losses) attributable to investors in noncontrolling interests of \$277.4 million. Prior to the adoption of FASB Statement No. 167, the company accounted for its investments in these CLOs as available-for-sale investments, with changes in the value of the company's interests being recorded through other comprehensive income. After the adoption of FASB Statement No. 167, the change in value of the company's investments in these CLOs is reflected in the company's net income. For the six months ended June 30, 2010, the net impact to the company of its investments in these CLOs was \$3.8 million.

Table of Contents***Operating Revenues and Net Revenues***

Operating revenues increased by \$332.4 million (28.3%) in the six months ended June 30, 2010, to \$1,506.1 million (June 30, 2009: \$1,173.7 million). Net revenues increased by \$251.7 million (28.5%) in the six months ended June 30, 2010, to \$1,133.4 million (June 30, 2009: \$881.7 million). Net revenues are operating revenues less third-party distribution, service and advisory expenses, plus our proportional share of net revenues from joint venture arrangements, plus management fees earned from, less other revenue recorded by, consolidated investment products. See Schedule of Non-GAAP Information for additional important disclosures regarding the use of net revenues. A significant portion of our business and managed AUM are based outside of the U.S. The income statements of foreign currency subsidiaries are translated into U.S. dollars, the reporting currency of the company, using average foreign exchange rates. Over the six month period, the U.S. dollar weakened against the Pound Sterling and Canadian dollar, and strengthened against the Euro, which impacted our reported revenues for the six months ended June 30, 2010, as compared to the six months ended June 30, 2009. The impact of foreign exchange rate movements resulted in \$29.7 million (8.9%) of the increase in operating revenues during the six months ended June 30, 2010. Additionally, our revenues are directly influenced by the level and composition of our AUM as more fully discussed below. Movements in global capital market levels, net new business inflows (or outflows) and changes in the mix of investment products between asset classes and geographies may materially affect our revenues from period to period.

The main categories of revenues, and the dollar and percentage change between the periods, were as follows:

\$ in millions	Six months ended June 30,		\$ Change	% Change
	2010	2009		
Investment management fees	1,221.4	938.1	283.3	30.2%
Service and distribution fees	251.9	189.4	62.5	33.0%
Performance fees	4.9	18.9	(14.0)	(74.1)%
Other	27.9	27.3	0.6	2.2%
Total operating revenues	1,506.1	1,173.7	332.4	28.3%
Third-party distribution, service and advisory expenses	(416.3)	(314.5)	101.8	32.4%
Proportional share of revenues, net of third-party distribution expenses, from joint venture investments	20.9	20.7	0.2	1.0%
Management fees earned from consolidated investment products	22.9	4.0	18.9	472.5%
Other revenues recorded by consolidated investment products	(0.2)	(2.2)	(2.0)	(90.9)%
Net revenues	1,133.4	881.7	251.7	28.5%

Investment management fees

Investment management fees increased by \$283.3 million (30.2%) in the six months ended June 30, 2010, to \$1,221.4 million (June 30, 2009: \$938.1 million) due to the acquisition, increases in average AUM, changes in the mix of AUM between asset classes and foreign exchange rate movement. The June 1, 2010, acquisition contributed to an increase in investment management fees of \$36.3 million during the period. The June 1, 2010, acquired business added \$114.6 billion in AUM at that date, with an expected effective fee rate of approximately 47 basis points. Average AUM for the six months ended June 30, 2010, were \$465.0 billion (June 30, 2009: \$377.9 billion). Average long-term AUM, which generally earn higher fee rates than money market AUM, for the six months ended June 30, 2010, were \$393.5 billion (June 30, 2009: \$289.5 billion), while average institutional money market AUM decreased

19.1% to \$71.5 billion at June 30, 2010, from \$88.4 billion for the six months ended June 30, 2009. The increase in average AUM and average long-term AUM includes the impact of the June 1, 2010, acquired business. Our equity AUM generally earns a higher net revenue rate than money market AUM. At June 30, 2010, equity AUM were \$263.2 billion, representing 47% of our total AUM at that date; whereas at June 30, 2009, equity AUM were \$155.6 billion, representing 37.5% of our total AUM at that date. See the company's disclosures regarding the changes in AUM during the six months ended June 30, 2010, in the Assets Under Management section of the Results of Operations for the six months ended June 30, 2010, compared with the six months ended June 30, 2009, above for additional information regarding the movements in AUM. Foreign exchange rate movements led to an increase in investment management fees of \$27.1 million during the six months ended June 30, 2010.

Additionally, the change in investment management fee revenues is primarily due to the adoption of FASB Statement No. 167, now encompassed in ASC Topic 810, Consolidation, on January 1, 2010, which resulted in the consolidation of certain CLOs with total assets of \$6.5 billion at June 30, 2010. In accordance with the standard, prior periods have not been restated to reflect the consolidation of these CLOs. The company uses a non-GAAP financial measure, net revenues, to add back these eliminated management fees as part of net revenues, as the company has earned them for providing investment management services to

Table of Contents

consolidated investment products. See Schedule of Non-GAAP Information for the reconciliation of operating revenues to net revenues.

Service and distribution fees

In the six months ended June 30, 2010, service and distribution fees increased by \$62.5 million (33.0%) to \$251.9 million (June 30, 2009: \$189.4 million) due to increases in average AUM during the period. Additionally, the June 1, 2010, acquisition contributed \$25.2 million of the increase in service and distribution fees during the six months ended June 30, 2010.

Performance fees

In the six months ended June 30, 2010, performance fees decreased by \$14.0 million (74.1%) to \$4.9 million (June 30, 2009: \$18.9 million). The performance fees generated in the six months ended June 30, 2010, arose primarily due to products managed in the UK and in our real estate groups.

Other revenues

In the six months ended June 30, 2010, other revenues increased by \$0.6 million (2.2%) to \$27.9 million (June 30, 2009: \$27.3 million). Other revenues included \$5.5 million in UIT revenues during the period, which was offset primarily by lower front-end fees earned in the U.K. of \$3.1 million.

Third-party distribution, service and advisory expenses

Third-party distribution, service and advisory expenses increased by \$101.8 million (32.4%) in the six months ended June 30, 2010, to \$416.3 million (June 30, 2009: \$314.5 million), consistent with the increases in investment management and service and distribution fee revenues. The acquired business contributed \$19.0 million of the increase in third-party distribution, service and advisory expenses during the period.

Proportional share of revenues, net of third-party distribution expenses, from joint venture investments

Our proportional share of revenues, net of third-party distribution expenses increased by \$0.2 million (1.0%) to \$20.9 million in the six months ended June 30, 2010 (June 30, 2009: \$20.7 million), driven by increases in average AUM during the period in the Invesco Great Wall joint venture. Our share of the Invesco Great Wall joint venture's average AUM in the six months ended June 30, 2010, was \$3.6 billion (June 30, 2009: \$3.4 billion).

Management fees earned from consolidated investment products

Management fees earned from consolidated investment products increased by \$18.9 million (472.5%) to \$22.9 million in the six months ended June 30, 2010 (June 30, 2009: \$4.0 million). The increase is primarily due to the adoption of FASB Statement No. 167, now encompassed in ASC Topic 810, Consolidation, on January 1, 2010, which resulted in the consolidation of certain CLOs with total assets of \$6.5 billion at June 30, 2010. In accordance with the standard, prior periods have not been restated to reflect the consolidation of these CLOs.

Operating revenues of consolidated investment products

See Schedule of Non-GAAP Information for additional disclosures regarding the use of net revenues. The change in operating revenues of consolidated investment products is discussed above.

Operating Expenses

During the six months ended June 30, 2010, operating expenses increased by \$296.3 million (29.6%) to \$1,297.8 million (June 30, 2009: \$1,001.5 million). As discussed above, a significant portion of our business and managed AUM are based outside of the U.S. The income statements of foreign currency subsidiaries are translated into U.S. dollars, the reporting currency of the company, using average foreign exchange rates. Over the six months, the U.S. dollar weakened against the Pound Sterling and Canadian dollar, and strengthened against the Euro, which impacted our reported expenses for the six months ended June 30, 2010, as compared to the six months ended June 30, 2009. The impact of foreign exchange rate movements resulted in \$24.0 million (8.1%) of the increase in operating expenses during the six months ended June 30, 2010.

Table of Contents

The main categories of operating expenses, and the dollar and percentage changes between periods, are as follows:

\$ in millions	Six months ended June 30,			
	2010	2009	\$ Change	% Change
Employee compensation	498.1	464.8	33.3	7.2%
Third-party distribution, service and advisory	416.3	314.5	101.8	32.4%
Marketing	63.5	50.8	12.7	25.0%
Property, office and technology	109.3	94.5	14.8	15.7%
General and administrative	114.1	76.9	37.2	48.4%
Transaction and integration	96.5		96.5	%
Total operating expenses	1,297.8	1,001.5	296.3	29.6%

The table below sets forth these cost categories as a percentage of total operating expenses and operating revenues, which we believe provides useful information as to the relative significance of each type of expense:

Six months ended: \$ in millions	June 30, 2010	% of Total Operating Expenses	% of Operating Revenues	June 30, 2009	% of Total Operating Expenses	% of Operating Revenues
Employee compensation	498.1	38.4%	33.1%	464.8	46.4%	39.6%
Third-party distribution, service and advisory	416.3	32.1%	27.6%	314.5	31.4%	26.8%
Marketing	63.5	4.9%	4.2%	50.8	5.1%	4.3%
Property, office and technology	109.3	8.4%	7.3%	94.5	9.4%	8.1%
General and administrative	114.1	8.8%	7.6%	76.9	7.7%	6.6%
Transaction and integration	96.5	7.4%	6.4%		N/A	N/A
Total operating expenses	1,297.8	100.0%	86.2%	1,001.5	100.0%	85.3%

Employee Compensation

Employee compensation increased \$33.3 million (7.2%) to \$498.1 million in the six months ended June 30, 2010, (June 30, 2009: \$464.8 million), including an increase of approximately \$16.2 million related to the June 1, 2010, acquisition. Base salaries and variable compensation increased \$20.2 million during the six months ended June 30, 2010, from the six months ended June 30, 2009, due to incremental costs associated with the June 1, 2010, acquisition, the impact of annual merit increases, and the increase in variable compensation accruals to reflect the overall underlying core earnings growth of the company from the six months ended June 30, 2009. Severance costs decreased by \$12.5 million during the six months ended June 30, 2010, from the prior comparative period. Also included in compensation expenses during the six months ended June 30, 2010, are share-based payment costs of \$55.5 million, compared to \$43.9 million during the six months ended June 30, 2009, an increase of \$11.6 million, also due to the incremental impact of the acquisition and to the additional amortization of share awards granted February 28, 2010, as part of the company's annual share award cycle. Foreign exchange rate movement led to an increase in employee compensation expenses of \$8.5 million during the six months ended June 30, 2010, from the six months ended June 30, 2009. Additionally, employee compensation costs for the six months ended June 30, 2010 and 2009, included \$10.0 million of prepaid compensation amortization expenses related to the 2006 acquisition of W.L. Ross & Co. This expense amortization will continue through 2010, and the acquisition-related asset will be fully amortized by the third quarter of 2011.

Headcount at June 30, 2010, was 5,421 (June 30, 2009: 5,084). The June 1, 2010, acquisition added 580 employees at that date.

Third-Party Distribution, Service and Advisory Expenses

Third-party distribution, service and advisory expenses are discussed above in the operating and net revenues section.

Marketing

Marketing expenses increased by \$12.7 million (25.0%) in the six months ended June 30, 2010, to \$63.5 million (June 30, 2009: \$50.8 million) primarily due to a market-driven increase in marketing support payments of \$6.3 million as compared to the six months ended June 30, 2009. Additionally, travel and sales literature/research expenses increased \$1.7 million and \$0.9 million, respectively, during the six months ended June 30, 2010, from the six months ended June 30, 2009, offset by a decrease in advertising expenses of

Table of Contents

\$1.5 million during the six months ended June 30, 2010, from the six months ended June 30, 2009. The June 1, 2010, acquisition contributed \$5.9 million to the increase in marketing expenses.

Property, Office and Technology

Property, office and technology expenses increased by \$14.8 million (15.7%) to \$109.3 million in the six months ended June 30, 2010 (June 30, 2009: \$94.5 million). Rent expense increased \$1.9 million during the six months ended June 30, 2010, from the six months ended June 30, 2009. Technology expenses included increases of \$4.6 million and \$6.2 million for the six months ended June 30, 2010, from the six months ended June 30, 2009, due to higher depreciation on purchased technology assets and increased outsourced administration costs the U.K. and associated with the Hyderabad transition. Additionally, the June 1, 2010, acquisition contributed \$3.0 million to the increase in property, office and technology costs.

General and Administrative

General and administrative expenses increased by \$37.2 million (48.4%) to \$114.1 million in the six months ended June 30, 2010 (June 30, 2009: \$76.9 million). Included in general and administrative expenses for the six months ended June 30, 2010, is \$8.9 million (\$6.0 million net of tax and reducing diluted EPS by \$0.01 per share) representing fund reimbursement costs from the correction of historical foreign exchange allocations. Travel expenses increased \$5.5 million during the six months ended June 30, 2010, from the six months ended June 30, 2009, driven by higher levels of business activity. Information services expenses increased \$3.1 million during the six months ended June 30, 2010, from the six months ended June 30, 2009, due to increases in costs associated with certain quantitative securities analysis services. Additionally, irrecoverable tax expense increased \$2.7 million during the six months ended June 30, 2010, from the six months ended June 30, 2009, due in part to an increase in VAT tax rates from 15% to 17.5%. Foreign exchange rate movements led to an increase of \$2.0 million in general and administrative expenses during the six months ended June 30, 2010, from the six months ended June 30, 2009. The June 1, 2010, acquisition contributed \$4.3 million to the increase in general and administrative expenses during the period.

During the six months ended June 30, 2010, intangible amortization expense increased \$2.0 million resulting from additional amortization of the various finite-lived intangible assets that arose from the June 1, 2010, acquisition. Estimated amortization expense for all of the company's intangible assets, for each of the five succeeding years based upon the company's intangible assets at June 30, 2010, is included in Part I, Financial Information, Item 1. Financial Statements, Note 5, Intangible Assets.

General and administrative expenses in the six months ended June 30, 2009, included an insurance recovery of \$9.5 million related to legal costs associated with the market-timing regulatory settlement.

Transaction and integration

Transaction and integration charges were \$96.5 million in the six months ended June 30, 2010 (six months ended June 30, 2009: none) and relate to the acquired business. Transaction and integration expenses include \$19.2 million of employee compensation costs, including \$14.5 million of severance costs; \$16.3 million for the proxy solicitation of fund investors to approve a change in fund advisor, \$27.5 million for transition of the Van Kampen funds to Invesco's platform and governance structure, \$5.5 million related to office space including onerous lease charges associated with vacating office space in Houston as we consolidate operations, \$5.5 million of sales and marketing costs as we print re-branded fund prospectuses, \$17.4 million of professional services, principally legal, consultancy and insurance, and \$4.3 million in technology contractor and travel costs. As previously announced, these costs in aggregate are currently expected to be less than \$175 million and include \$10.8 million incurred in 2009 with the remainder being incurred in 2010 and 2011.

Operating Income, Adjusted Operating Income, Operating Margin and Adjusted Operating Margin

Operating income increased by \$36.1 million (21.0%) to \$208.3 million in the six months ended June 30, 2010 (June 30, 2009: \$172.2 million); however, operating margin (operating income divided by operating revenues) declined slightly to 13.8% in the six months ended June 30, 2010, from 14.7% in the six months ended June 30, 2009. The decline in operating margin resulted from a greater increase in operating expenses (29.6%) than in operating revenues (28.3%) during the period. The following measures have improved, however, during the six months ended June 30, 2010: adjusted operating income, and adjusted operating margin. Adjusted operating income (operating income plus our proportional share of the operating income from joint venture arrangements, transaction and

integration charges, amortization of acquisition-related prepaid compensation and other intangibles, and the operating income impact of the consolidation of investment products) increased by \$166.2 million (80.9%) to \$371.7 million in the six months ended

Table of Contents

June 30, 2010, from \$205.5 million in the six months ended June 30, 2009. Adjusted operating margin is equal to adjusted operating income divided by net revenues. Net revenues are equal to operating revenues less third-party distribution, service and advisory expenses, plus our proportional share of the net revenues from our joint venture arrangements, plus management fees earned from, less other revenue recorded by, consolidated investment products. Adjusted operating margin increased to 32.8% in the six months ended June 30, 2010, from 23.3% in the six months ended June 30, 2009. See Schedule of Non-GAAP Information for a reconciliation of operating revenues to net revenues, a reconciliation of operating income to adjusted operating income and additional important disclosures regarding net revenues, adjusted operating income and adjusted operating margin.

Other Income and Expenses

The main categories of other income and expenses, and the dollar and percentage changes between periods are as follows:

\$ in millions	Six months ended June 30,		\$ Change	% Change
	2010	2009		
Equity in earnings of unconsolidated affiliates	16.2	10.0	6.2	62.0%
Interest income	3.4	6.0	(2.6)	(43.3)%
Interest income of consolidated investment products	105.6		105.6	100.0%
Gains/(losses) of consolidated investment products, net	290.3	(134.9)	425.2	N/A
Interest expense	(26.5)	(32.4)	5.9	(18.2)%
Interest expense of consolidated investment products	(46.4)		(46.4)	100.0%
Other gains and losses, net	(11.4)	5.8	(17.2)	N/A
Total other income and expenses	331.2	(145.5)	476.7	N/A

Equity in earnings of unconsolidated affiliates

Equity in earnings of unconsolidated affiliates increased by \$6.2 million (62.0%) to \$16.2 million in the six months ended June 30, 2010 (June 30, 2009: \$10.0 million). Included in equity in earnings from affiliates is our share of the income from our joint ventures in China, which declined \$2.1 million to \$11.8 million in the six months ended June 30, 2010, from \$13.9 million earned during the six months ended June 30, 2009. This decline was offset by our share of the valuation changes in certain partnership investments that increased by \$8.7 million for these comparative periods.

Interest income and interest expense

Interest income decreased by \$2.6 million (43.3%) to \$3.4 million in the six months ended June 30, 2010 (June 30, 2009: \$6.0 million), as a result of lower yields and cash and cash equivalent balances during the period. The decrease in yields was consistent with market direction during the period. Interest expense decreased by \$5.9 million (18.2%) to \$26.5 million in the six months ended June 30, 2010 (June 30, 2009: \$32.4 million), resulting from a lower average debt balance during the six months ended June 30, 2010, versus the comparative period.

Interest income and interest expense of consolidated investment products

In the six months ended June 30, 2010, interest income and interest expense of consolidated investment products were \$105.6 million and \$46.4 million, respectively. The increases reflect the adoption of FASB Statement No. 167, now encompassed in ASC Topic 810, Consolidation, on January 1, 2010, which resulted in the consolidation of certain CLOs with total assets of \$6.5 billion at June 30, 2010. In accordance with the standard, prior periods have not been restated to reflect the consolidation.

Gains and losses of consolidated investment products, net income impact of consolidated investment products, and noncontrolling interests in consolidated entities

Included in other income and expenses are gains and losses of consolidated investment products, net, which are driven by realized and unrealized gains and losses of underlying investments held by consolidated investment products. In the six months ended June 30, 2010, other gains and losses of consolidated investment products were a net gain of \$290.3 million, as compared to a net loss of \$134.9 million in the six months ended June 30, 2009. The increase primarily reflects the adoption of FASB Statement No. 167, now encompassed in ASC Topic 810,

Consolidation, on January 1, 2010, which resulted in the consolidation of certain CLOs with total assets of \$6.5 billion at June 30, 2010. Collateral assets and notes issued by consolidated CLOs are held at fair value, and the

Table of Contents

unrealized and realized gains and losses of the collateral assets and notes are reflected in this line item. In accordance with the standard, prior periods have not been restated to reflect the consolidation of these CLOs.

As illustrated in the Condensed Consolidating Statements of Income for the six months ended June 30, 2010 and 2009, at the beginning of this Results of Operations section, the consolidation of investment products during the six months ended June 30, 2010, resulted in a net income impact of \$320.5 million before attribution to noncontrolling interests. Invesco invests in a portion of these products, and as a result this net income is offset by noncontrolling interests of \$316.7 million, resulting in a net income impact to the company of \$3.8 million. Net losses of consolidated investment products for the six months ended June 30, 2009, were \$136.4 million, and were largely offset by noncontrolling interests of consolidated entities of \$136.3 million.

Other gains and losses, net

Other gains and losses, net were a net loss of \$11.4 million in the six months ended June 30, 2010, as compared to a net gain of \$5.8 million in the six months ended June 30, 2009. Included in other gains and losses is a net loss of \$3.4 million as a result of the depreciation of assets held for our deferred compensation plans (2009: \$0.0 million net gain). In the six months ended June 30, 2010, we incurred \$2.2 million in net foreign exchange losses (2009: \$7.9 million in net foreign exchange gains). Included in other losses are \$6.1 million of other-than-temporary impairment charges related to the company's seed money investments (2009: \$2.7 million).

Income Tax Expense

Our subsidiaries operate in several taxing jurisdictions around the world, each with its own statutory income tax rate. As a result, our effective tax rate will vary from year to year depending on the mix of the profits and losses of our subsidiaries. The majority of our profits are earned in the U.S., Canada and the U.K. The current U.K. statutory tax rate is 28%, the Canadian statutory tax rate is 31% and the U.S. Federal statutory tax rate is 35%.

Our effective tax rate, excluding noncontrolling interests in consolidated entities, for the six months ended June 30, 2010, was 39.0%, up from 34.6% for the six months ended June 30, 2009. The effective tax rate for the six months ended June 30, 2010, included the impact of non-deductible transaction and integration costs related to the acquired business.

Schedule of Non-GAAP Information

Beginning with the presentation of the company's results for the three months ended March 31, 2010, the company has expanded its use of non-GAAP measures to include reconciling items primarily relating to Financial Accounting Standards Board (FASB) Statement No. 167, Amendments to FASB Interpretation No. 46(R) (FASB Statement No. 167), now encompassed in the Accounting Standards Codification Topic 810 (discussed in Part I, Item I,

Financial Statements Note 1, Accounting Policies), and the acquisition of Morgan Stanley's retail asset management business, including Van Kampen Investments (the acquired business or the acquisition). We are presenting the following non-GAAP measures: net revenue (and by calculation, net revenue yield on AUM), adjusted operating income (and by calculation, adjusted operating margin), adjusted net income (and by calculation, adjusted earnings per share (EPS)). Prior to June 30, 2010, adjusted operating income, adjusted operating margin, adjusted net income, and adjusted earnings per share were described as adjusted cash operating income, adjusted cash operating margin, adjusted cash net income, and adjusted cash earnings per share, respectively. We believe these non-GAAP measures provide greater transparency into our business and allow more appropriate comparisons with industry peers. Management uses these performance measures to evaluate the business, and they are consistent with internal management reporting. Effective June 30, 2010, the company removed cash from the names of these measures to emphasize that these measures are performance measures and not liquidity measures.

The most directly comparable U.S. GAAP measures are operating revenues (and by calculation, gross revenue yield on AUM), operating income (and by calculation, operating margin), net income (and by calculation, diluted EPS). Each of these measures is discussed more fully below. Also beginning with the presentation of the company's results for the three months ended March 31, 2010, the net revenue measure has been redefined from that previously used to adjust for the impact of consolidating certain investment products. The presentation of net revenue in this Report for the three and six months ended June 30, 2009, has been restated to conform the calculation to the current period's methodology. These non-GAAP measures should not be considered as substitutes for any measures derived in accordance with U.S. GAAP and may not be comparable to other similarly titled measures of other companies.

Additional reconciling items may be added in the future to these non-GAAP measures if deemed appropriate.

76

Table of Contents

The following are reconciliations of operating revenues, operating income (and by calculation, operating margin), and net income (and by calculation, diluted EPS) on a U.S. GAAP basis to net revenues, adjusted operating income (and by calculation, adjusted operating margin), and adjusted net income (and by calculation, adjusted EPS):

\$ in millions	Three months ended June 30,		Six months ended June 30,	
	2010	2009	2010	2009
Operating revenues, U.S. GAAP basis	787.0	625.1	1,506.1	1,173.7

Adjusted EPS***	\$ 0.27	\$ 0.21	\$ 0.55	\$ 0.32

*

Operating margin is equal to operating income divided by operating revenues.

** Adjusted operating margin is equal to net operating income divided by net revenues.

*** Adjusted EPS is equal to adjusted net income divided by the weighted average shares outstanding amount used in the calculation of diluted EPS.

(1) *Third-party distribution, service and advisory expenses*

Third-party distribution, service and advisory expenses include renewal commissions, management fee rebates and distribution costs (12b-1) paid to brokers and independent financial advisors. While the terms used for these types of expense vary by geography, they are all expense items that are closely linked to the value of AUM and the revenue earned by Invesco from AUM.

Renewal commissions are paid to independent financial advisors for as long as the clients' assets remain invested and are payments for the servicing of client accounts. These commissions, similar to our management fee revenues, are based upon a

Table of Contents

percentage of the AUM value and apply to much of our non-U.S. retail business. They can also take the form of management fee rebates, particularly outside of the U.S.

The revenues of our U.S. business include distribution fees earned from mutual funds, principally 12b-1 fees. Distribution costs are expenses paid to third-party brokers of our U.S. business. These include the amortization over the redemption period of upfront commissions paid to brokers for sales of fund shares with a contingent deferred sales charge (a charge levied on investors for redemptions within a certain contracted period of time). Both the revenues and the costs are dependent on the underlying AUM of the brokers' clients.

Also included in third-party distribution, service and advisory expenses are sub-transfer agency fees that are paid to third parties for processing client share purchases and redemptions, call center support and client reporting. These costs are reimbursed by the related funds.

Since the company has been deemed to be the principal in the third-party arrangements, the company must reflect these expenses gross of operating revenues under U.S. GAAP. Management believes that the deduction of third-party distribution, service and advisory expenses from operating revenues in the computation of net revenues (and by calculation, net revenue yield on AUM) and the related computation of adjusted operating income (and by calculation, adjusted operating margin), is useful information for investors and other users of the company's financial statements because such presentation appropriately reflects the nature of these expenses as revenue-sharing activities, as these costs are passed through to external parties who perform functions on behalf of the company's managed funds. Further, these expenses vary extensively by geography due to the differences in distribution channels. The net presentation assists in identifying the revenue contribution generated by the business, removing distortions caused by the differing distribution channel fees and allowing for a fair comparison with U.S. peer investment managers and within Invesco's own investment units. Additionally, management evaluates net revenue yield on AUM, which is equal to net revenues divided by average AUM during the reporting period. This financial measure is an indicator of the basis point net revenues we receive for each dollar of AUM we manage and is useful when evaluating the company's performance relative to industry competitors and within the company for capital allocation purposes.

(2) Proportional share of net revenues and operating income from joint venture investments

The company has two joint venture investments in China. The Invesco Great Wall joint venture was one of the largest Sino-foreign managers of equity products in China, with AUM of approximately \$6.2 billion as of June 30, 2010. The company has a 49.0% interest in Invesco Great Wall. The company also has a 50% joint venture with Huaneng Capital Services to assess private equity investment opportunities in power generation in China through Huaneng Invesco WLR Investment Consulting Company Ltd. Enhancing our operations in China is one effort that we believe could improve our competitive position over time. Accordingly, we believe that it is appropriate to evaluate the contribution of our joint venture investments to the operations of the business.

Management believes that the addition of our proportional share of revenues, net of distribution expenses, from joint venture investments in the computation of net revenues and the addition of our proportional share of operating income in the related computations of adjusted operating income and adjusted operating margin also provide useful information to investors and other users of the company's financial statements, as management considers it appropriate to evaluate the contribution of its joint ventures to the operations of the business. It is also consistent with the presentation of AUM and net flows (where our proportional share of the ending balances and related activity are reflected) and therefore provides a more meaningful calculation of net revenue yield on AUM.

(3) Consolidated investment products

In June 2009, the U.S. FASB issued Statement No. 167, which was effective January 1, 2010. It has had a significant impact on the presentation of the company's financial statements. The provisions of FASB Statement No. 167 required us to consolidate into our financial statements certain CLOs with approximately \$6.5 billion in assets and \$5.4 billion in debt at June 30, 2010. The company's Consolidated Statements of Income reflect the elimination of management and performance fees earned from these CLOs and other consolidated investment products of \$12.3 million and \$22.9 million during the three and six months ended June 30, 2010, respectively, and the addition of \$53.1 million and \$105.6 million in interest income, \$25.6 million and \$46.4 million in interest expense, and \$187.2 million and \$290.3 million in net other gains for the respective periods. The \$199.5 million and \$320.5 million net income impact during the three and six months ended June 30, 2010, respectively, of consolidation is largely offset by gains/(losses) attributable to noncontrolling interests of \$197.3 million and \$316.7 million, respectively. See Part I, Item I, Financial Statements Note 12, Consolidated Investment Products for a detailed analysis of the impact to the company's Condensed Consolidated Financial Statements from the consolidation of investment products.

Table of Contents

Management believes that the consolidation of investment products may impact a reader's analysis of our underlying results of operations and could result in investor confusion or the production of information about the company by analysts or external credit rating agencies that is not reflective of the underlying results of operations and financial condition of the company. Accordingly, management believes that it is appropriate to adjust operating revenues, operating income and operating margin for the impact of consolidated investment products in calculating the respective net revenues, adjusted operating income and adjusted operating margin. The reconciling items add back the management and performance fees earned by Invesco from the consolidated products and remove the revenues and expenses recorded by the consolidated products that have been included in the U.S. GAAP Condensed Consolidated Statements of Income.

(4) *Acquisition-related reconciling items*

Acquisition-related adjustments include transaction and integration expenses and intangible asset amortization related to acquired assets, amortization of prepaid compensation related to the 2006 acquisition of W.L. Ross & Co., and tax cash flow benefits resulting from tax amortization of goodwill and indefinite-lived intangible assets.

Transaction and integration charges were \$79.3 million and \$96.5 million for the three and six months ended June 30, 2010 (three and six months ended June 30, 2009: none), and relate to June 1, 2010, acquisition. Taxation on this amount, calculated at the applicable tax rate for the tax deductible portion of the charges, is \$14.8 million and \$16.7 million for the three and six months ended June 30, 2010 (three and six months ended June 30, 2009: none) giving a net adjustment of \$64.5 million and \$79.8 million for the three and six months ended June 30, 2010 (six months ended June 30, 2009: none). These aggregate costs are currently expected to be less than \$175 million, including those costs incurred in the second half of 2009 of \$10.8 million, and are expected to continue to be incurred during 2010-2011. These charges reflect the legal, regulatory, advisory, valuation and other professional or consulting fees, general and administrative costs, including travel costs related to the transaction and the costs of temporary staff involved in executing the transaction, and the post closing costs of integrating the acquired business into the company's existing operations including incremental costs associated with achieving synergy savings.

The acquisition will result in additional future amortization expenses of approximately \$23 million per year for the first 2 years following June 1, 2010, the expense then reduces in future years as the acquired finite-lived intangible assets become fully expensed. The U.S. GAAP to non-GAAP reconciling items also include acquisition-related amortization charges related to previous business combinations. These reconciling items are intangible amortization of \$5.2 million and \$8.3 million for the three and six months ended June 30, 2010, respectively (three and six months ended June 30, 2009: \$3.0 million and \$6.2 million, respectively), and the amortization of prepaid compensation of \$5.0 million and \$10.0 million for the three and six months ended June 30, 2010, respectively (three and six months ended June 30, 2009: \$5.0 million and \$10.0 million, respectively), related to the October 2006 acquisition of W.L. Ross & Co. Taxation of \$0.6 million and \$0.7 million for the three and six months ended June 30, 2010, respectively (three and six months ended June 30, 2009: \$0.1 million), is recorded on a portion of the intangible amortization expense that does not generate a cash tax benefit, giving a net adjustment of \$4.6 million and \$7.6 million for the three and six months ended June 30, 2010 (three and six months ended June 30, 2009: \$3.0 million and \$6.1 million, respectively). The W.L. Ross & Co. prepaid compensation expense will continue through 2010, and the acquisition-related asset will be fully amortized by the third quarter of 2011.

Management believes it is useful to investors and other users of our financial statements to adjust for the transaction and integration charges and the amortization expenses in arriving at adjusted operating income, adjusted operating margin and adjusted EPS, as this will aid comparability of our results period to period, and aid comparability with peer companies that may not have similar acquisition-related charges.

While finite-lived intangible assets are amortized under U.S. GAAP, there is no amortization charge on goodwill and indefinite-lived intangibles. In certain qualifying situations, these can be amortized for tax purposes, generally over a 15-year period, as is the case in the U.S. These cash flows represent tax benefits that are not included in the Condensed Consolidated Statements of Income absent an impairment charge or the disposal of the related business. We believe it is useful to include these tax cash flow benefits in arriving at the adjusted EPS measure. The company receives these cash flow benefits but does not anticipate a sale or impairment of these assets in the foreseeable future, and therefore the deferred tax liability recognized under U.S. GAAP is not expected to be used either through a credit in the Condensed Consolidated Statements of Income or through settlement of tax obligations. Adjustments for deferred income taxes on goodwill and indefinite-lived intangibles that are amortized for tax purposes were \$4.2 million and \$7.8 million for the three and six months ended June 30, 2010, respectively (three and six months ended June 30, 2009: \$3.6 million and \$7.2 million, respectively).

Table of Contents**(5) *Market movement on deferred compensation plan liabilities***

In 2009, Invesco introduced an incentive plan whereby certain of our investment team members can receive deferred cash compensation linked in value to the investment products being managed by the team. This is in lieu of share-based awards which were largely the only prior form of deferred compensation used by Invesco.

These new awards involve a return to the employee linked to the appreciation (depreciation) of specified investments, typically the funds managed by the employee. Invesco economically hedges the exposure to market movements by holding these investments on its balance sheet. U.S. GAAP requires the appreciation (depreciation) in the compensation liability to be expensed over the award vesting period in proportion to the vested amount of the award as part of compensation expense. The full value of the investment appreciation (depreciation) is immediately recorded below operating income in other gains and losses. This creates a timing difference between the recognition of the compensation expense and the investment gain or loss impacting net income attributable to common shareholders and diluted EPS which will reverse over the life of the award and net to zero at the end of the multi-year vesting period. During periods of high market volatility these timing differences impact compensation expense, operating income and operating margin that, over the life of the award, will ultimately be offset by gains and losses recorded below operating income on the Consolidated Statements of Income.

Since these plans are economically hedged, management believes it is useful to reflect the offset ultimately achieved from hedging the investment market exposure in the calculation of adjusted operating income (and by calculation, adjusted operating margin) and adjusted net income (and by calculation, adjusted EPS), to produce results that will be more comparable period to period. The related fund shares will have been purchased on or around the date of grant, eliminating any ultimate cash impact from market movements that occur over the vesting period. The non-GAAP measures therefore exclude the mismatch created by differing U.S. GAAP treatments of the market movement on the liability and the investments.

The market depreciation of the compensation liability was \$2.1 million and \$0.2 million for the three and six months ended June 30, 2010, respectively, with an investment loss of \$5.8 million and \$3.4 million for the three and six months ended June 30, 2010, respectively, on the assets held to economically hedge the compensation liability. This additional compensation expense and the investment loss are adjusted in arriving at the non-GAAP information and, net of applicable taxation of \$1.2 million and \$1.4 million for the three and six months ended June 30, 2010, respectively, result in a net income adjustment of \$2.5 million and \$2.2 million for the three and six months ended June 30, 2010, respectively. No adjustments are being made for the 2009 comparative non-GAAP measures presented above due to the relative insignificance of the amounts in that period.

(6) *Other reconciling items*

Included within general and administrative expenses is a charge of \$8.9 million (\$6.0 million net of tax and reducing diluted EPS by \$0.01 per share) for the three and six months ended June 30, 2010 (three and six months ended June 30, 2009: none), representing reimbursement costs from the correction of historical foreign exchange allocations in the fund accounting process that impacted the reporting of fund performance in certain funds. Management does not include these costs in internal reporting and these costs do not form part of the overall evaluation of the business. Management therefore believes that the exclusion of these costs, due to their unique character and magnitude, from total operating expenses provides useful information to investors, as this view is consistent with how management evaluates the performance of the business. Exclusion of these costs will aid in comparability of our results from period to period and the comparability of our results with those of peer investment managers.

Table of Contents**Balance Sheet Discussion**

Condensed Consolidating Balance Sheets are presented below and reflect the adoption of FASB Statement No. 167, now encompassed in ASC Topic 810, Consolidation, at January 1, 2010. The majority of the company's consolidated investment products were CLOs as of June 30, 2010. The collateral assets of the CLOs are held solely to satisfy the obligations of the CLOs. The company has no right to the benefits from, nor does it bear the risks associated with, the collateral assets held by the CLOs, beyond the company's minimal direct investments in, and management fees generated from, CLOs. If the company were to liquidate, the collateral assets would not be available to the general creditors of the company, and as a result, the company does not consider them to be company assets. Additionally, the investors in the CLOs have no recourse to the general credit of the company for the notes issued by the CLOs. The company therefore does not consider this debt to be a company liability.

* The Before Consolidation column includes Invesco's equity interest in the investment products, accounted for as equity method and available-for-sale investments and does not include any other adjustments related to non-GAAP financial measure presentation.

** The company adopted FASB Statement No. 167 on January 1, 2010, resulting in the consolidation of certain CLOs. In accordance with the standard, prior periods have not been restated to reflect the consolidation of these CLOs. Prior to January 1, 2010, the company was not deemed to be the primary beneficiary of these CLOs.

Table of Contents

The following table presents a comparative analysis of significant detailed balance sheet line items:

		December 31,		
\$ in millions	June 30, 2010	2009	\$ Change	% Change

Cash and Cash Equivalents

Cash and cash equivalents decreased by \$206.4 million from \$762.0 million at December 31, 2009, to \$555.6 million at June 30, 2010, as we utilized cash balances to pay annual bonus awards, to fund investment purchases, and to partly fund the acquisition. Of the \$712.2 million net cash paid to close the acquisition, \$650.0 million was borrowed from the credit facility while the balance was funded from existing cash balances.

Invesco has local capital requirements in several jurisdictions, as well as regional requirements for entities that are part of the European sub-group. These requirements mandate the retention of liquid resources in those jurisdictions, which we meet in part by holding cash and cash equivalents. This retained cash can be used for general business purposes in the European sub-group or in the countries where it is located. Due to the capital restrictions, the ability to transfer cash between certain jurisdictions may be limited. In addition, transfers of cash between international jurisdictions may have adverse tax consequences that may substantially limit such activity. At June 30, 2010, the European sub-group had cash and cash equivalent balances of \$318.3 million, much of which is used to satisfy these regulatory requirements. We are in compliance with all regulatory minimum net capital requirements.

In addition, the company is required to hold cash deposits with clearing organizations or to otherwise segregate cash to maintain compliance with federal and other regulations in connection with its unit investment trust broker dealer entity, which was acquired on June 1, 2010, as part of the acquired business. At June 30, 2010, these cash deposits totaled \$13.7 million.

Unsettled Fund Receivables

Unsettled fund receivables increased by \$302.1 million from \$383.1 million at December 31, 2009, to \$685.2 million at June 30, 2010, due to \$160.2 million of unsettled balances associated with the acquired UIT business as at June 30, 2010, together with higher transaction activity between funds and investors in late June 2010 when compared to late December 2009 in our U.K and offshore funds. Unsettled fund receivables are created by the normal settlement periods on transactions initiated by certain clients of our U.K. and offshore funds. The presentation of the receivable and substantially offsetting payable (\$643.6 million) at trade date with both the investor and the fund, for normal purchases and sales, reflects the legal relationship between the underlying investor and the company.

Investments (current and non-current)

As of June 30, 2010, we had \$461.7 million in investments, of which \$314.0 million were current investments and \$147.7 million were non-current investments. Included in current investments are \$130.0 million of seed money investments in affiliated funds used to seed funds as we launch new products, and \$143.3 million of investments related to assets held for deferred compensation plans, which are also held primarily in affiliated funds. Seed investments increased by \$55.2 million during the six months to June 30, 2010, primarily due to the \$53.9 million of seed investments acquired on June 1, 2010, with the acquired business. Investments held to hedge deferred compensation awards increased by \$58.7 million during the six month period as we purchased additional investments

Table of Contents

in affiliated funds to economically hedge new employee plan awards. Included in non-current investments are \$142.6 million in equity method investments in our Chinese joint ventures and in certain of the company's private equity, real estate and other investments.

Assets Held for Policyholders and Policyholder Payables

One of our subsidiaries, Invesco Perpetual Life Limited, is an insurance company that was established to facilitate retirement savings plans in the U.K. The entity holds assets that are managed for its clients on its balance sheet with an equal and offsetting liability. The increasing balance in these accounts from \$1,283.0 million at December 31, 2009, to \$1,151.5 million at June 30, 2010, was the result of foreign exchange movements, the increase in the market values of these assets, and net flows into the funds.

Investments of consolidated investment products

The company provides investment management services to, and has transactions with, various private equity funds, real estate funds, fund-of-funds, CLOs and other investment entities sponsored by the company for the investment of client assets in the normal course of business. The company serves as the investment manager, making day-to-day investment decisions concerning the assets of the products and may have a small investment in certain of these products to demonstrate skin in the game to other potential unaffiliated investors in these products. Certain of these investments are considered to be variable interest entities (VIEs). If the company is the primary beneficiary of the VIEs, then the investment products are consolidated into the company's financial statements. Other partnership entities are consolidated under a voting interest entity (VOE) model where the company is the general partner and is presumed to have control, in the absence of simple majority kick-out rights to remove the general partner, simple majority liquidation rights to dissolve the partnership, or any substantive participating rights of the other limited partners. See Part I, Item 1, Financial Statements Note 12, Consolidated Investment Products, for additional details.

Effective January 1, 2010, upon the adoption of FASB Statement No. 167, now encompassed in ASC Topic 810, the company determined that it was the primary beneficiary of certain CLO VIEs, as it has the power to direct the activities of the CLOs that most significantly impact the CLOs' economic performance, and the obligation to absorb losses/rights to receive benefits from the CLOs that could potentially be significant to the CLOs. Generally, private equity and fund of funds limited partnership entities where the general partner does not have substantive equity investment at risk and where the other limited partners do not have substantive (greater than 50%) rights to remove the general partner or to dissolve the limited partnership are also VIEs. The primary beneficiary of non-CLO investment products is the party to the VIE who absorbs a majority of the losses or absorbs the majority of the rewards generated by the VIE. Additionally, under the voting interest entity (VOE) consolidation model, the general partner in a partnership that is not a VIE consolidates the partnership because the general partner is deemed to control the partnership where the other limited partner do not have substantive kick-out, liquidation or participation rights. The company has no right to the benefits from, nor does it bear the risks associated with, investments held by consolidated investment products, beyond the company's minimal direct investments in, and management fees generated from, these products, which are eliminated upon consolidation. If the company were to liquidate, the assets held by consolidated investment products would not be available to the general creditors of the company. Investments of consolidated investment products include the investments of both consolidated VIEs and VOEs.

As of June 30, 2010, investments of consolidated investment products totaled \$6,788.5 million (December 31, 2009: \$685.0 million). These investments are offset primarily in long-term debt of consolidated investment products, noncontrolling interests in consolidated entities, and retained earnings appropriated for investors in consolidated investment products on the Condensed Consolidated Balance Sheets, as the company's equity investment in these structures is very small. The increase from December 31, 2009, primarily reflects adoption of FASB Statement No. 167 on January 1, 2010. In accordance with the standard, prior periods have not been restated. As a result of the June 1, 2010, acquisition, the company consolidated additional CLOs with investments of \$762.3 million at June 30, 2010.

Goodwill

Goodwill increased by \$221.3 million from \$6,467.6 million at December 31, 2009, to \$6,688.9 million at June 30, 2010, as we recorded \$362.7 million of goodwill associated with the acquired business, and \$25.8 million related to the earn-out on the 2006 acquisition of W.L. Ross & Co. The additions were offset by a reduction of \$167.2 million

due to the impact of foreign currency translation for certain subsidiaries whose functional currency differs from that of the parent.

Table of Contents***Long-term debt***

The non-current portion of our total long-term debt was \$1,395.7 million at June, 30, 2010 (December 31, 2009: \$745.7 million). On May 24, 2010, the company terminated its existing \$500.0 million credit facility and entered into a new \$1,250 million credit facility. At June 30, 2010, \$650.0 million was drawn on this credit facility and was used to fund part of the consideration for the acquired business, which closed on June 1, 2010. Amounts borrowed under the new credit facility are repayable at maturity on May 23, 2013.

Long-term debt of consolidated investment products

Long-term debt of consolidated investment products relates to notes issued by consolidated CLOs. Collateral assets of the CLOs, which are included in investments of consolidated investment products, are held solely to satisfy the obligations of the CLOs. The investors in the CLO debt tranches have no recourse to the general credit of the company for the notes issued by the CLOs.

Long-term debt of consolidated investment products was \$5,404.4 million at June 30, 2010, reflecting the adoption of FASB Statement No. 167, now encompassed in ASC Topic 810, Consolidation, on January 1, 2010. In accordance with the standard, prior periods have not been restated to reflect the consolidation. As a result of the June 1, 2010, acquisition, the company consolidated additional CLOs with notes issued of \$630.2 million at June 30, 2010.

Retained earnings appropriated for investors in consolidated investment products

The retained earnings appropriated for investors in consolidated investment products relates primarily to the difference in value between the collateral assets held (which are included in investments of consolidated investment products), and the debt issued, by consolidated CLOs. The collateral assets held, and notes issued, by consolidated CLOs are measured at fair value in the Condensed Consolidated Balance Sheet.

Retained earnings appropriated for investors in consolidated investment products was \$719.5 million at June 30, 2010, reflecting the adoption of FASB Statement No. 167, now encompassed in ASC Topic 810, Consolidation, on January 1, 2010, which resulted in the consolidation of certain CLOs with \$6.5 billion of assets held and \$5.4 billion in debt issued at June 30, 2010. In accordance with the standard, prior periods have not been restated to reflect the consolidation. As a result of the June 1, 2010, acquisition, the company consolidated additional CLOs with retained earnings appropriated for investors in consolidated investment products of \$130.7 million at June 30, 2010.

Equity attributable to noncontrolling interests in consolidated entities

Equity attributable to noncontrolling interests in consolidated entities increased by \$3.3 million from \$707.9 million at December 31, 2009, to \$711.2 million at June 30, 2010. Net gains attributable to noncontrolling interests in consolidated entities of \$39.5 million were offset by \$36.2 million of net changes in the partners' capital of these entities during the period.

The noncontrolling interests in consolidated entities are generally offset by the net assets of certain consolidated investment products, as the company's equity investment in the investment products is not significant.

Equity attributable to common shareholders

Equity attributable to common shareholders increased from \$6,912.9 million at December 31, 2009, to \$8,108.9 million at June 30, 2010, an increase of \$1,196.0 million. Increases to equity included \$566.9 million as a result of the business combination, net income attributable to common shareholders of \$135.8 million, share issuances upon employee option exercises of \$6.2 million, share based payment credit to capital of \$55.5 million, and retained earnings appropriated for investors in consolidated investment products of \$719.5 million arising from the adoption of FASB Statement No. 167, now encompassed in ASC Topic 810, Consolidation. The increases to equity were partially offset by \$93.7 million in dividend payments, \$149.0 million of changes in foreign currency rates, and \$34.0 million in shares acquired from staff to meet withholding tax obligations on share award vestings.

Liquidity and Capital Resources

The adoption of FASB Statement No. 167, now encompassed in ASC Topic 810, Consolidations, on January 1, 2010, which resulted in the consolidation of \$6.5 billion and \$5.4 billion of total assets and long-term debt of certain CLO products as of June 30,

Table of Contents

2010, respectively, did not impact the company's liquidity and capital resources. The collateral assets of the CLOs are held solely to satisfy the obligations of the CLOs. The company has no right to the benefits from, nor does it bear the risks associated with, the collateral assets held by the CLOs, beyond the company's minimal direct investments in, and management fees generated from, these products, which are eliminated upon consolidation. If the company were to liquidate, the collateral assets would not be available to the general creditors of the company, and as a result, the company does not consider them to be company assets. Additionally, the investors in the CLOs debt tranches have no recourse to the general credit of the company for the notes issued by the CLOs. The company therefore does not consider this debt to be an obligation of the company. See Part I, Item 1, Financial Statements Note 12, Consolidated Investment Products, for additional details.

The following summary of our recent capital transactions confirms our ability to access capital markets in a timely manner:

The May 26, 2009, issuance of 32.9 million common shares in a public offering that produced gross proceeds of \$460.5 million (\$441.8 million net of related expenses);

The June 9, 2009, replacement of our \$900.0 million credit facility, which was never fully utilized, with a \$500.0 million credit facility (with an option to increase it to \$750.0 million, subject to certain conditions), the amount of which was based upon our past and projected working capital needs;

The June 30, 2009, completion of a \$100.0 million tender offer to purchase publicly traded debt with a principal value of \$104.3 million;

The December 15, 2009, repayment of \$294.2 million 4.5% senior notes that matured on that date through the utilization of existing cash balances, having repurchased \$3.0 million of these notes earlier in the year;

The May 24, 2010, termination of the \$500.0 million credit facility and entrance into a new three-year \$1,250.0 million credit facility.

In addition, on July 28, 2010, S&P announced an upgrade of our credit rating from BBB+/Positive to A-/Stable.

We believe that our capital structure, together with available cash balances, cash flows generated from operations, existing capacity under our credit facility, proceeds from the public offering of our shares and further capital market activities, if necessary, should provide us with sufficient resources to meet present and future cash needs, including operating, debt and other obligations as they come due and anticipated future capital requirements. On June 1, 2010, we used a combination of existing cash balances and \$650.0 million credit facility borrowing to satisfy the \$770.0 million cash consideration related to acquisition. We issued 30.9 million shares of new equity, in the form of common and non-voting common equivalent preferred shares (with economic rights identical to common stock, other than no right to vote such shares) to Morgan Stanley, without holding restrictions, in conjunction with the close. The ultimate purchase price for the business was lower than the \$1.5 billion previously announced purchase price, due to depreciation of Invesco's common share price from the announcement date to the June 1, 2010, closing date. We believe that the cash flow generated from operations of the combined firm, the remaining \$600.0 million in credit facility capacity, and our ability to access the capital markets, will provide enough liquidity to meet future capital resource needs.

Our ability to access the capital markets in a timely manner depends on a number of factors including our credit rating, the condition of the global economy, investors' willingness to purchase our securities, interest rates, credit spreads and the valuation levels of equity markets. If we are unable to access capital markets in a timely manner, our business could be adversely impacted.

Certain of our subsidiaries are required to maintain minimum levels of capital. These and other similar provisions of applicable law may have the effect of limiting withdrawals of capital, repayment of intercompany loans and payment of dividends by such entities. After redomicile and after consultation with the U.K. FSA, it has been determined that, for the purposes of prudential supervision, Invesco Ltd. is not subject to regulatory consolidated capital requirements under current European Union (EU) Directives. A sub-group, however, including all of our

regulated EU subsidiaries, is subject to these consolidated capital requirements, and capital is maintained within this sub-group to satisfy these regulations. These requirements mandate the retention of liquid resources in those jurisdictions, which we meet in part by holding cash and cash equivalents. This retained cash can be used for general business purposes in the European sub-group or in the countries where it is located. Due to the capital restrictions, the ability to transfer cash between certain jurisdictions may be limited. In addition, transfers of cash between international jurisdictions may have adverse tax consequences that may substantially limit such activity. At June 30, 2010, the European sub-group had cash and cash equivalent balances of \$318.3 million, much of which is used to satisfy these regulatory requirements. We are in compliance with all regulatory minimum net capital requirements.

In addition, the company is required to hold cash deposits with clearing organizations or to otherwise segregate cash to maintain compliance with federal and other regulations in connection with its unit investment trust broker dealer entity, which was acquired on June 1, 2010, as part of the acquired business. At June 30, 2010, these cash deposits totaled \$13.7 million.

Table of Contents***Cash Flows***

The ability to consistently generate cash from operations in excess of capital expenditures and dividend payments is one of our company's fundamental financial strengths. Operations continue to be financed from current earnings and borrowings. Our principal uses of cash, other than for operating expenses, include dividend payments, capital expenditures, acquisitions, purchase of our shares in the open market and investments in certain new investment products.

Cash flows of consolidated investment products (discussed in Item 1, Financial Statements Note 12, Consolidated Investment Products) are reflected in Invesco's cash used in operating activities, provided by investing activities and provided by financing activities. Cash held by consolidated investment products is not available for general use by Invesco, nor is Invesco cash available for general use by its consolidated investment products.

Condensed Consolidating Statements of Cash Flows

\$ in millions	Before Consolidation	Consolidated Investment Products *	Eliminations	Total
For the six months ended June 30, 2010

*

The company adopted FASB Statement No. 167 on January 1, 2010, resulting in the consolidation of certain CLOs. In accordance with the standard, prior periods have not been restated to reflect the consolidation of these CLOs. Prior to January 1, 2010, the company was not deemed to be the primary beneficiary of these CLOs.

Cash and cash equivalents, end of period	817.7		817.7

Operating Activities

Operating cash flows are generated by the receipt of investment management and other fees generated from AUM, offset by operating expenses and changes in operating assets and liabilities. Although some receipts and payments are seasonal, particularly bonus payments, in general, after allowing for the change in cash held by consolidated investment products, our operating cash flows move in the same direction as our operating income.

During the six months ended June 30, 2010, cash used in operating activities increased \$60.6 million to \$63.4 million from \$2.8 million during the six months ended June 30, 2009. As shown on the table above, consolidated investment products accounted for the use of \$54.8 million of cash during the six months ended June 30, 2010 compared to a contribution of cash of \$20.7 million in the six months ended June 30, 2009. The sum of the operating, investing and financing cash flows of consolidated investment products offsets to a zero impact to the company's change in cash and cash equivalent balances from period to period. Excluding the impact of consolidated investment products, cash used in operations was \$8.6 million in the six months ended June 30, 2010 compared to \$23.5 million in the six months ended June 30, 2009.

The use of \$8.6 million of cash to fund operations during the six months ended June 30, 2010, included:

net purchases of trading investments of \$62.5 million, primarily to provide an economic hedge against staff deferred compensation plan awards, and

net cash generated from the other operating activities of \$53.9 million, representing net income as adjusted for non-cash items and the changes in operating assets and liabilities. This six month period included the use of \$227.7 million of cash to pay the annual staff bonuses, related payroll taxes, payroll taxes on then

annual share award vesting, and annual pension contributions, all of which result in increased operating cash utilization in the first half of the calendar year.

The use of \$23.5 million of cash to fund operations during the six months ended June 30, 2009, included: net purchases of trading investments of \$29.1 million principally for staff deferred compensation plan awards, and

Cash generated from the other operating activities of \$5.6 million, representing net income as adjusted for non-cash items and the changes in operating assets and liabilities. This six month period included the use of \$309.0 million of cash to pay the annual staff bonuses, related payroll taxes, payroll taxes on the annual share based awards vesting, and annual pension contributions, all of which result in increased cash utilization in the first half of the calendar year.

Table of Contents

After excluding the net purchase of trading investments, cash generated from other operating activities in the six months ended June 30, 2010 improved by \$48.3 million from \$5.6 million in the six months ended June 30, 2009 to \$53.9 million in the six months ended June 30, 2010. This reflects the increased net income as realized into cash together with the lower annual staff related operating cash outflows, as bonus and other staff compensation related payments in early 2010 were lower than in early 2009 principally due to reduced profitability in the respective years to which the bonuses related.

Investing Activities

Net cash used in investing activities totaled \$559.1 million for the six months ended June 30, 2010, (six months ended June 30, 2009: net cash used of \$2.1 million). As shown in the table above, consolidated investment products, including investment purchases, sales and returns of capital, contributed \$195.3 million (2009: \$1.0 million contributed). After allowing for these consolidated investment product cash flows, net cash used in investing activities was \$754.4 million (six months ended June 30, 2009: net cash used of \$3.1 million). The closing of the business acquisition on June 1, 2010, resulted in the payment of cash consideration of \$770.0 million while the acquired business had cash and cash equivalents on its balance sheet of \$57.8 million on that date, giving net cash outflow of \$712.2 million. There were no acquisition related payments in the six months ended June 30, 2009.

In addition, during the six months ended June 30, 2010, the company purchased available-for-sale investments and other investments of \$56.7 million (six months ended June 30, 2009: \$23.1 million) and capital expenditures of \$35.7 million (six months ended June 30, 2009: \$17.1 million). These cash outflows were partly offset from collected proceeds of \$50.2 million from sales of investments in the six months ended June 30, 2010 (six months ended June 30, 2009: \$36.8 million).

The increase in capital expenditure cash outflows in the six months ended June 30, 2010 when compared to the six months ended June 30, 2009 was related to technology and computer hardware needed for the acquired business. Our capital expenditures related principally in each year to technology initiatives, including new platforms from which we maintain our portfolio management systems and fund accounting systems, improvements in computer hardware and software desktop products for employees, new telecommunications products to enhance our internal information flow, and back-up disaster recovery systems. Also, in each year, a portion of these costs related to leasehold improvements made to the various buildings and workspaces used in our offices. These projects have been funded with proceeds from our operating cash flows. During the six months ended June 30, 2010 and 2009, our capital divestitures were not significant relative to our total fixed assets.

There were no payments made in the six months ended June 30, 2010, related to acquisition earn-out arrangements.

Financing Activities

Net cash provided by financing activities totaled \$434.3 million for the six months ended June 30, 2010, (six months ended June 30, 2009: \$224.2 million). As shown in the table above, the financing activities of the consolidated investment products used cash of \$140.5 million (six months ended June 30, 2009: \$21.7 million). Excluding the impact of consolidated investment products, financing activities provided cash of \$574.8 million in the six months ended June 30, 2010 (six months ended June 30, 2009: \$245.9 million).

To provide the cash funding needed to complete the business acquisition, in late May 2010, \$650.0 million was borrowed from the company's \$1,250.0 million credit facility fund. This balance remained outstanding at June 30, 2010.

Other financing cash flows during the six months ended June 30, 2010 included \$93.7 million of dividend payments for the dividends declared in January and April 2010 (six months ended June 30, 2009: dividends paid of \$80.2 million), cash inflows from the exercise of options of \$6.2 million (six months ended June 30, 2009: \$9.6 million), and excess tax benefits cash inflows from share-based compensation of \$12.3 million (six months ended June 30, 2009: none).

Net cash provided by financing activities for the six months ended June 30, 2009, also included equity issuance proceeds of \$441.8 million, payments to purchase outstanding debt of \$103.0 million resulting from a tender offer, repayments of our credit facility of \$12.0 million and a payment of \$10.3 million to purchase of the remaining 24.9% of Invesco Real Estate GmbH not already held by the company, the controlling interest having been acquired in December 2003.

Table of Contents***Dividends***

Invesco declares and pays dividends on a quarterly basis. On April 27, 2010, the company declared a first quarter 2010 cash dividend, which was paid on June 9, 2010, to shareholders of record as of May 24, 2010. On July 27, 2010, the company declared a second quarter 2010 cash dividend of 11 cents per share, which is payable on September 9, 2010, to common and preferred shareholders of record at the close of business on August 23, 2010.

Share Repurchase Plan

An aggregate of 1.4 million shares were withheld on vesting events during the six months ended June 30, 2010, to meet employees' withholding tax obligations (six months ended June 30, 2009: 1.1 million shares). The value of these shares withheld was \$34.0 million (six months ended June 30, 2009: \$12.3 million). At June 30, 2010, approximately \$1.4 billion remained authorized for repurchase under the company's share repurchase plan.

Debt

Our total indebtedness at June 30, 2010, was \$1,395.7 million (December 31, 2009 is \$745.7 million) and was comprised of the following:

\$ in millions	June 30, 2010	December 31, 2009
Unsecured Senior Notes:		
5.625% due April 17, 2012	215.1	215.1
5.375% due February 27, 2013	333.5	333.5
5.375% due December 15, 2014	197.1	197.1
Floating rate credit facility expiring May 23, 2013	650.0	
Total debt	1,395.7	745.7
Less: current maturities of total debt		
Long-term debt	1,395.7	745.7

For the six months ended June 30, 2010, the company's weighted average cost of debt was 4.87% (six months ended June 30, 2009: 5.06%).

Financial covenants under the credit facility include: (i) the quarterly maintenance of a debt/EBITDA ratio, as defined in the credit agreement, of not greater than 3.25:1.00 through December 31, 2011, and not greater than 3.00:1.00 thereafter, (ii) a coverage ratio (EBITDA, as defined in the credit agreement/interest payable for the four consecutive fiscal quarters ended before the date of determination) of not less than 4.00:1.00. As of June 30, 2010, we were in compliance with our debt covenants. At June 30, 2010, our leverage ratio was 1.60:1.00 (December 31, 2009: 1.11:1.00), and our interest coverage ratio was 13.03:1.00 (December 31, 2009: 11.01:1.00).

Table of Contents

The June 30, 2010, coverage ratio calculations are as follows:

\$ millions	Total	Q2 2010	Q1 2010	Q4 2009	Q3 2009
Net income attributable to common shareholders	351.9	40.8	95.0	110.9	105.2
Net income attributable to Consolidated Investment Products	(3.8)	(2.2)	(1.6)		
Tax expense	178.7	36.7	50.1	48.2	43.7
Amortization/depreciation	84.0	20.8	18.3	24.9	20.0
Interest expense	58.6	14.1	12.4	15.2	16.9
Share-based compensation expense	102.4	31.3	24.2	22.6	24.3
Unrealized gains and losses from investments, net*	8.2	7.7	1.6	0.3	(1.4)
Acquired business proforma EBITDA impact**	140.2	35.7	41.2	28.7	34.6
EBITDA***	920.2	184.9	241.2	250.8	243.3
Adjusted debt***	\$1,474.7				
Leverage ratio (Debt/EBITDA maximum 3.25:1.00)	1.60				
Interest coverage (EBITDA/Interest Expense minimum 4.00:1.00)	13.03				

* Adjustments for unrealized gains and losses from investments, as defined in our credit facility, include non-cash gains and losses on investments to the extent that they do not represent anticipated future cash receipts or expenditures.

** The credit facility agreement requires that the company shall

calculate
EBITDA on a
proforma basis
including the
impact of the
acquired
business as if the
acquisition had
occurred on the
first day of the
EBITDA period.

*** EBITDA and
Adjusted debt
are non-GAAP
financial
measures;
however
management
does not use
these measures
for anything
other than these
debt covenant
calculations. The
calculation of
EBTIDA above
(a reconciliation
from net income
attributable to
common
shareholders) is
defined by our
credit agreement,
and therefore net
income
attributable to
common
shareholders is
the most
appropriate
GAAP measure
from which to
reconcile to
EBITDA. The
calculation of
adjusted debt is
defined in our
credit facility
and equals total
long-term debt

of
\$1,395.7 million
plus
\$78.9 million in
letters of credit
and \$0.1 million
in capital leases.

Off Balance Sheet Commitments

The company has transactions with various private equity, real estate and other investment entities sponsored by the company for the investment of client assets in the normal course of business. Many of the company's investment products are structured as limited partnerships. The company's investment may take the form of the general partner or a limited partner, and the entities are structured such that each partner makes capital commitments that are to be drawn down over the life of the partnership as investment opportunities are identified. At June 30, 2010, the company's undrawn capital commitments were \$85.5 million (December 31, 2009: \$77.6 million).

The volatility and valuation dislocations that occurred from 2007 to the date of this Report in certain sectors of the fixed income market have generated pricing issues in many areas of the market. As a result of these valuation dislocations, during the fourth quarter of 2007, Invesco elected to enter into contingent support agreements for two of its investment trusts to enable them to sustain a stable pricing structure. These two trusts are unregistered trusts that invest in fixed income securities and are available only to limited types of sophisticated investors. In June 2010, the agreements were amended to extend the term through December 31, 2010. As of June 30, 2010, the total committed support under these agreements was \$36.0 million with an internal approval mechanism to increase the maximum possible support to \$66.0 million at the option of the company. The recorded fair value of the guarantees related to these agreements at June 30, 2010, was estimated to be \$2.5 million (December 31, 2009: \$2.5 million), which was recorded in other current liabilities on the Condensed Consolidated Balance Sheets. No payments have been made under either agreement nor has Invesco realized any losses from the support agreements through the date of this Report. These trusts were not consolidated because the company was not deemed to be the primary beneficiary. As of the date of this Report, the required support level under these agreements was less than \$15 million.

Table of Contents***Contractual Obligations***

We have future obligations under various contracts relating to debt and interest payments, financing and operating leases, long-term defined benefit pension and post-retirement medical plans, and acquisition contracts. During the six months ended June 30, 2010, significant changes to these obligations from those reported in our Annual Report on Form 10-K for the year ended December 31, 2009, include the termination of the floating rate credit agreement on May 24, 2010, and the entrance into a new \$1,250.0 million credit facility expiring May 23, 2013, discussed in Part I, Item 1, Financial Statements Note 7, Debt.

Critical Accounting Policies and Estimates

Our significant accounting policies are disclosed in our most recent Form 10-K for the year ended December 31, 2009. The accounting policies and estimates that we believe are the most critical to an understanding of our results of operations and financial condition are those that require complex management judgment regarding matters that are highly uncertain at the time policies were applied and estimates were made. Different estimates could have been used in the current period that would have had a material effect on these financial statements, and changes in these estimates are likely to occur from period-to-period in the future. Our accounting policies and estimates regarding investments and consolidated investment products are discussed below, as there have been changes to these policies after the adoption of FASB Statement No. 167, now encompassed in ASC Topic 810, Consolidation, on January 1, 2010.

Goodwill. Goodwill represents the excess of the cost of an acquired entity over the net of the amounts assigned to assets acquired and liabilities assumed and is recorded in the functional currency of the acquired entity. Goodwill is tested for impairment at the single reporting unit level on an annual basis, or more often if events or circumstances indicate that impairment may exist. If the carrying amount of the reporting unit exceeds its fair value (the first step of the goodwill impairment test), then the second step is performed to determine if goodwill is impaired and to measure the amount of the impairment loss, if any. The second step of the goodwill impairment test compares the implied fair value of goodwill with the carrying amount of goodwill. If the carrying amount of goodwill exceeds the implied fair value of goodwill, an impairment loss is recognized in an amount equal to that excess.

We have determined that we have one operating and reportable segment. The company evaluated the components of its business, which are business units one level below the operating segment level, and has determined that it has one reporting unit for purposes of goodwill impairment testing. The company's components include Invesco Worldwide Institutional, Invesco North American Retail, Invesco Perpetual, Invesco Continental Europe and Invesco Asia Pacific. The company's operating segment represents one reporting unit because all of the components are similar due to the common nature of products and services offered, type of clients, methods of distribution, manner in which each component is operated, extent to which they share assets and resources, and the extent to which they support and benefit from common product development efforts. Traditional profit and loss measures are not produced, and therefore not reviewed by component management, for any of the components. Furthermore, the financial information that is available by component is not sufficient for purposes of performing a discounted cash flow analysis at the component level in order to test goodwill for impairment at that level. As none of our components are reporting units, we have determined that our single operating segment, investment management, is also our single reporting unit.

The principal method of determining fair value of the reporting unit is an income approach where future cash flows are discounted to arrive at a single present value amount. The discount rate used is derived based on the time value of money and the risk profile of the stream of future cash flows. Recent results and projections based on expectation regarding revenues, expenses, capital expenditures and acquisition earn out payments produce a present value for the reporting unit. While the company believes all assumptions utilized in our assessment are reasonable and appropriate, changes in these estimates could produce different fair value amounts and therefore different goodwill impairment assessments. The most sensitive of these assumptions are the estimated cash flows and the use of a weighted average cost of capital as the discount rate to determine present value. The present value produced for the reporting unit is the fair value of the reporting unit. This amount is reconciled to the company's market capitalization to determine an implied control premium, which is compared to an analysis of historical control premiums experienced by peer companies over a long period of time to assess the reasonableness of the fair value of the reporting unit.

The company also utilizes a market approach to provide a secondary and corroborative fair value of the reporting unit by using comparable company and transaction multiples to estimate values for our single reporting unit. Discretion and judgment is required in determining whether the transaction data available represents information for companies of comparable nature, scope and size. The results of the secondary market approach to provide a fair value estimate are not combined or weighted with the results of the income approach described above but are used to provide an additional basis to determine the reasonableness of the income approach fair value estimate.

Table of Contents

The company cannot predict the occurrence of future events that might adversely affect the reported value of goodwill that totaled \$6,688.9 million and \$6,467.6 million at June 30, 2010, and December 31, 2009, respectively. Such events include, but are not limited to, strategic decisions made in response to economic and competitive conditions, the impact of the economic environment on the company's assets under management, or any other material negative change in assets under management and related management fees. The company's annual goodwill impairment review is performed as of October 1 of each year. As a result of that analysis, the company determined that no impairment existed at that date. Our goodwill impairment testing conducted during 2009 and 2008 indicated that the fair value of the reporting unit exceeded its carrying value, indicating that step two of the goodwill impairment test was not necessary.

Due to deteriorating market conditions, interim impairment tests were performed at October 31, 2008, and March 31, 2009, using the most recently available operating information. These interim tests also concluded that no impairment had occurred. Following the March 31, 2009, interim test, the general market conditions improved and the company did not identify the need for further interim tests during 2009 as no indicators of impairment existed. The March 31, 2009, interim impairment test adopted an income approach consistent with the annual 2008 impairment tests, but utilized the company's updated forecasts for changes in AUM due to market gains and long-term net flows and the corresponding changes in revenues and expenses. The primary assumption changes from the October 31, 2008, valuation test were increases in the anticipated rise in equity markets in the near-term and in net AUM sales. The increase in equity markets was based on an analysis of the Dow Jones Industrial Average for 10 recession events between 1945 and 2001. The October 31, 2008, valuation had assumed an equity market rise in-line with more normal non-recessionary experience. The higher AUM net sales reflects new flows into the equity markets as values stabilize and confidence returns, and also took into account the company's improved relative investment performance. A discount rate of 13.7% was used for the March 31, 2009, test, similar to the October 31, 2008, rate of 13.6% (October 1, 2008: 11.6%). The discount rates used are estimates of the weighted average cost of capital for the asset management sector reflecting the overall industry risks associated with future cash flows and have been calculated consistently across the various tests dates.

The October 1, 2009, annual goodwill impairment test was performed using a consistent methodology to that used for the March 31, 2009, interim impairment test, with the exception that adjustments were made to remove the near-term equity market rise assumption, since much of the market rebound had been experienced in the period between March 31, 2009, and October 1, 2009. A discount rate of 12.9% was used for the October 1, 2009, analysis. A 40% decline in the fair value of our reporting unit, or a 500 basis point increase in the discount rate assumption used during our October 1, 2009, goodwill impairment analysis, would have caused the carrying value of our reporting unit to be in excess of its fair value, which would require the second step to be performed. The second step could have resulted in an impairment loss for goodwill.

Intangible Assets. Management contract intangible assets identified on the acquisition of a business are capitalized separately from goodwill if the fair value can be measured reliably on initial recognition (transaction date) and, if they are finite-lived, are amortized and recorded as operating expenses on a straight-line basis over their useful lives, from two to 12 years, which reflects the pattern in which the economic benefits are realized. The company considers its own assumptions, which require management's judgment, about renewal or extension of the term of the arrangement, consistent with its expected use of the asset. A change in the useful life of an intangible asset could have a significant impact on the company's amortization expense. Where evidence exists that the underlying management contracts are renewed annually at little or no cost to the company, the management contract intangible asset is assigned an indefinite life and reviewed for impairment on an annual basis. The company reevaluates the useful life determination for intangible assets each reporting period to determine whether events and circumstances warrant a revision to the remaining useful life or an indication of impairment.

Definite-lived intangibles are reviewed for impairment whenever events or changes in circumstances indicate that their carrying amount may not be recoverable (i.e. carrying amount exceeds the sum of the fair value of the intangible). Intangible assets not subject to amortization are tested for impairment annually or more frequently if events or changes in circumstances indicate that the asset might be impaired. The impairment test consists of a comparison of the fair value of an intangible asset with its carrying amount. If the carrying amount of the intangible

asset exceeds its fair value, an impairment loss is recognized in an amount equal to that excess. Fair value is determined using an income approach where future cash flows are discounted to arrive at a single present value amount. The income approach includes inputs that require significant management judgment, including discount rates, revenue multiples and AUM growth rates. Changes in these estimates could produce different fair value amounts and therefore different impairment conclusions.

Table of Contents

Investments. Most of our investments are carried at fair value on our balance sheet with the periodic mark-to-market recorded either in accumulated other comprehensive income in the case of available-for-sale investments or directly to earnings in the case of trading assets. Fair value is generally determined by reference to an active trading market, using quoted close or bid prices as of each reporting period end. When a readily ascertainable market value does not exist for an investment the fair value is calculated based on the expected cash flows of its underlying net asset base, taking into account applicable discount rates and other factors. Since assumptions are made in determining the fair values of investments for which active markets do not exist, the actual value that may be realized upon the sale or other disposition of these investments could differ from the current carrying values. Fair value calculations are also required in association with our quarterly impairment testing of investments. The accuracy of our other-than-temporary impairment assessments is dependent upon the extent to which we are able to accurately determine fair values. Of our \$461.7 million total investments at June 30, 2010, those most susceptible to impairment include \$130.0 million seed money investments in our affiliated funds. Seed money investments are investments held in Invesco managed funds with the purpose of providing capital to the funds during their development periods. These investments are recorded at fair value using quoted market prices in active markets; there is no modeling or additional information needed to arrive at the fair values of these investments.

The value of investments may decline for various reasons. The market price may be affected by general market conditions which reflect prospects for the economy as a whole or by specific information pertaining to an industry or individual company. Such declines require further investigation by management, which considers all available evidence to evaluate the realizable value of the investment, including, but not limited to, the following factors:

- The probability that the company will be unable to collect all amounts due according to the contractual terms of a debt security not impaired at acquisition;

- The length of time and the extent to which the market value has been less than cost;

- The financial condition and near-term prospects of the issuer, including any specific events which may influence the operations of the issuer such as changes in technology that may impair the earnings potential of the investment or the discontinuance of a component of the business that may affect the future earnings potential;

- The intent and ability of the company to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in market value;

- The decline in the security's value due to an increase in market interest rates or a change in foreign exchange rates since acquisition;

- Determination that the security is not realizable; or

- An adverse change in estimated cash flows of a beneficial interest.

Our other-than-temporary impairment analysis of seed money holdings includes a review of the market returns required for each fund portfolio to enable us to recover our original investment. As part of the review, we analyze several scenarios to project the anticipated recovery period of our original investments based on one-, three-, and five-year historical index returns and historical trends in the equity markets. We also analyze the absolute amount of any loss to date, the trend of the losses, and percent declines in values of the seed money investments. Along with intent and ability to hold, all of these scenarios are considered as part of our other-than-temporary impairment analysis of seed money holdings.

Consolidated Investment Products. The primary beneficiary of VIEs consolidate the VIEs. A VIE is an entity that does not have sufficient equity to finance its operations without additional subordinated financial support, or an entity for which the risks and rewards of ownership are not directly linked to voting interests. The company provides investment management services to, and has transactions with, various private equity funds, real estate funds, fund-of-funds, CLOs, and other investment entities sponsored by the company for the investment of client assets in the normal course of business. The company serves as the investment manager, making day-to-day investment decisions concerning the assets of the products. Certain of these entities are considered to be VIEs.

For all investment funds with the exception of CLOs, if the company is deemed to have a variable interest in these entities, the company is deemed to be the fund's primary beneficiary if the company has the majority of rewards/risks of ownership. For CLOs, if the company is deemed to have a variable interest in these entities, the company is deemed to be the fund's primary beneficiary if it has the power to direct the activities of the CLO that most significantly impact

the CLO's economic performance, and the obligation to absorb losses/right to receive benefits from the CLO that could potentially be significant to the CLO.

Table of Contents

Assessing if an entity is a VIE or VOE involves judgment and analysis on a structure-by-structure basis. Factors included in this assessment include the legal organization of the entity, the company's contractual involvement with the entity and any related party or de facto agent implications of the company's involvement with the entity. Generally, limited partnership entities where the general partner does not have substantive equity investment at risk and where the other limited partners do not have substantive (greater than 50%) rights to remove the general partner or to dissolve the limited partnership are VIEs. Additionally, certain investment products are voting interest entities (VOEs) and are structured as limited partnerships of which the company is the general partner and is deemed to have control with the lack of substantive kick-out, liquidation or participation rights of the other limited partners. These investment products are also consolidated into the company's financial statements.

Determining if the company is the primary beneficiary of a VIE also requires significant judgment, as the calculation of expected losses and residual returns (for investment products other than CLOs) involves estimation and probability assumptions. For CLOs, there is judgment involved to assess if the company has the power to direct the activities that most significantly effect the CLOs economic results and to assess if the company's interests could be deemed significant. If current financial statements are not available for consolidated VIEs or VOEs, estimation of investment valuation is required, which includes assessing available quantitative and qualitative data. Significant changes in these estimates could impact the reported value of the investments held by consolidated investment products and the related offsetting equity attributable to noncontrolling interests in consolidated entities on the Condensed Consolidated Balance Sheets and the other gains and losses of consolidated investment products, net, and related offsetting gains and losses attributable to noncontrolling interests in consolidated entities, net, amounts on the Condensed Consolidated Statements of Income.

As of June 30, 2010, the company consolidated VIEs that held investments of \$6,171.9 million (December 31, 2009: \$67.9 million) and VOE partnership investments of \$616.5 million (December 31, 2009: \$617.1 million). As circumstances supporting estimates and factors change, the determination of VIE and primary beneficiary status may change, as could the determination of the necessity of consolidation of VOEs.

Recent Accounting Standards

See Part I, Item 1, Financial Statements Note 1, Accounting Policies Accounting Pronouncements Recently Adopted and Pending Accounting Pronouncements.

Item 3. *Quantitative and Qualitative Disclosures About Market Risk*

In the normal course of its business, the company is primarily exposed to market risk in the form of securities market risk, interest rate risk, and foreign exchange rate risk.

AUM Market Price Risk

The company's investment management revenues are comprised of fees based on a percentage of the value of AUM. Declines in equity or fixed income security market prices could cause revenues to decline because of lower investment management fees by:

Causing the value of AUM to decrease.

Causing the returns realized on AUM to decrease (impacting performance fees).

Causing clients to withdraw funds in favor of investments in markets that they perceive to offer greater opportunity and that the company does not serve.

Causing clients to rebalance assets away from investments that the company manages into investments that the company does not manage.

Causing clients to reallocate assets away from products that earn higher revenues into products that earn lower revenues.

Underperformance of client accounts relative to competing products could exacerbate these factors.

Table of Contents

Securities Market Risk

The company has investments in sponsored investment products that invest in a variety of asset classes. Investments are generally made to establish a track record or to hedge exposure to certain deferred compensation plans. The company's exposure to market risk arises from its investments. A 20% increase or decrease in the fair value of investments exposed to market risk is not material to the operating results of the company.

Interest Rate Risk

Interest rate risk relates to the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The company is exposed to interest rate risk primarily through its external debt and cash and cash equivalent investments. On June 30, 2010, the interest rates on 53.4% of the company's borrowings were fixed for an average period of 2.9 years. Borrowings under the credit facility, which represent 46.6% of the company's borrowings, have floating interest rates. A 1% change in the level of interest rates on current debt levels would change annualized interest expense by \$6.5 million but would not have a material impact on the ability of the company to continue to service its indebtedness.

Foreign Exchange Rate Risk

The company has transactional currency exposures that occur when any of the company's subsidiaries receives or pays cash in a currency different from its functional currency. Such exposure arises from sales or purchases by an operating unit in currencies other than the unit's functional currency. These exposures are not actively managed.

The company also has certain investments in foreign operations, whose net assets and results of operations are exposed to foreign currency translation risk when translated into U.S. dollars upon consolidation into Invesco Ltd. The company does not hedge these exposures.

The company is exposed to foreign exchange revaluation into the income statement on monetary assets and liabilities that are held by subsidiaries in different functional currencies than the subsidiaries' functional currencies. Net foreign exchange revaluation losses were \$3.9 million for the six months ended June 30, 2010, and \$6.9 million in gains in the comparable prior year period, and are included in general and administrative and other gains and losses, net on the Condensed Consolidated Statements of Income. We continue to monitor our exposure to foreign exchange revaluation.

Item 4. Controls and Procedures

Our management is responsible for establishing and maintaining disclosure controls and procedures that are designed to ensure that information the company is required to disclose in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure controls and procedures include controls and procedures designed to ensure that the company's management, including its principal executive and principal financial officers, as appropriate, to allow timely decisions regarding required disclosure.

We have evaluated, with the participation of our chief executive officer and chief financial officer, the effectiveness of our disclosure controls and procedures as of June 30, 2010. There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives. Based upon our evaluation, our chief executive officer and chief financial officer concluded that our disclosure controls and procedures were effective to provide reasonable assurance that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the applicable rules and forms, and that it is accumulated and communicated to our management, including our chief executive officer and chief financial officer, as appropriate to allow timely decisions regarding required disclosure.

We have evaluated any change in our internal control over financial reporting that occurred during the six months ended June 30, 2010, and have concluded that there was no change that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents**PART II. OTHER INFORMATION****Item 1. Legal Proceedings**

Following the industry-wide regulatory investigations in 2003 and 2004, multiple lawsuits based on market timing allegations were filed against various parties affiliated with Invesco. These lawsuits were consolidated in the United States District Court for the District of Maryland, together with market timing lawsuits brought against affiliates of other mutual fund companies, and on September 29, 2004, three amended complaints were filed against company-affiliated parties: (1) a putative shareholder class action complaint brought on behalf of shareholders of AIM funds formerly advised by Invesco Funds Group, Inc.; (2) a derivative complaint purportedly brought on behalf of certain AIM funds and the shareholders of such funds; and (3) an ERISA complaint purportedly brought on behalf of participants in the company's 401(k) plan. The company and plaintiffs have reached settlements in principle of these lawsuits. The proposed settlements, which are subject to court approval, call for a payment by the company of \$9.8 million, recorded in general and administrative expenses in the Consolidated Statement of Income in 2007, in exchange for dismissal with prejudice of all pending claims. In addition, under the terms of the proposed settlements, the company may incur certain costs in connection with providing notice of the proposed settlements to affected shareholders. Based on information currently available, it is not believed that any such incremental notice costs will have any material effect on the consolidated financial position or results of operations of the company.

The asset management industry also is subject to extensive levels of ongoing regulatory oversight and examination. In the United States and other jurisdictions in which the company operates, governmental authorities regularly make inquiries, hold investigations and administer market conduct examinations with respect to compliance with applicable laws and regulations. Additional lawsuits or regulatory enforcement actions arising out of these inquiries may in the future be filed against the company and related entities and individuals in the U.S. and other jurisdictions in which the company and its affiliates operate. Any material loss of investor and/or client confidence as a result of such inquiries and/or litigation could result in a significant decline in assets under management, which would have an adverse effect on the company's future financial results and its ability to grow its business.

In the normal course of its business, the company is subject to various litigation matters. Although there can be no assurances, at this time management believes, based on information currently available to it, that it is not probable that the ultimate outcome of any of these actions will have a material adverse effect on the consolidated financial condition or results of operations of the company.

Item 1A. Risk Factors

The company has had no significant changes in its risk factors from those previously disclosed in its Annual Report on Form 10-K for the year ended December 31, 2009.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**Repurchases of Equity Securities**

The following table sets forth information regarding purchases of our common shares by us and any affiliated purchases during the three months ended June 30, 2010:

Month	Total Number of Shares Purchased ⁽¹⁾	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs ⁽²⁾	Maximum Number at end of period (or Approximate Dollar Value) of Shares that May Yet Be Purchased
				Under the Plans or Programs ⁽²⁾

April 1-30, 2010	4,594	22.56	\$ 1,360,608,682
May 1-31, 2010	46,922	21.66	\$ 1,360,608,682
June 1-30, 2010	32,430	17.48	\$ 1,360,608,682
Total	83,946		

(1) An aggregate of 83,946 restricted share awards were surrendered to us by Invesco employees to satisfy tax withholding obligations or loan repayments in connection with the vesting of equity awards.

(2) On April 23, 2008, our board of directors authorized a share repurchase authorization of up to \$1.5 billion of our common shares with no stated expiration date.
