February 2006 Order Comments:

Order growth remained robust as favorable market dynamics and Emerson's leading market positions continued to drive growth. Unfavorable currency exchange rates reduced orders by approximately 2 percentage points.

Process Management orders strengthened again as the energy end markets continued to generate high levels of activity. This segment has experienced balanced growth across the valve, measurement, and systems businesses.

Orders for Industrial Automation were led by continued capital spending and industrial demand in North America. The growth for this segment was led by the power generating alternator and the mechanical power transmission businesses.

Edgar Filing: EMERSON ELECTRIC CO - Form 8-K

Network Power orders continued at high levels due to strong growth in the key computing and telecommunications end-markets. The growth continued to be driven by the power systems and the embedded power businesses.

Orders for Climate Technologies remained strong with growth in the residential air-conditioning business now driven by 13 SEER demand. The industry standard switched from 10 SEER to 13 SEER effective January 23, 2006.

Appliance and Tools had solid growth from the tools and storage business and modest declines at the motors and appliance components business.
